FOIA Request: 18-11960-F

Daniel McGrath, Staff Attorney
Austin Evers, Executive Director
American Oversight
1030 15th Street NW, Suite B255
Washington, DC 20005
foia@americanoversight.org

Dear Mr. McGrath:

This is the Second Partial Initial Agency Decision (IAD) to your Freedom of Information Act (FOIA) request to the Office of the Secretary, U.S. Dept. of Veterans Affairs (OSVA) dated and received August 23, 2018, and assigned FOIA tracking number **18-11960-F**. You requested: All records reflecting communications (including emails, email attachments, text messages, messages on messaging platforms (such as Slack, GChat or Google Hangouts, Lync, Skype, or WhatsApp), telephone call logs, calendar invitations/entries, meeting notices, meeting agendas, informational material, talking points, any handwritten or electronic notes taken during any oral communications, summaries of any oral communications, or other materials) between any of the individuals listed

- Veterans Affairs Officials
 - Darin Selnick, Senior Advisor to the Secretary
 - Casin Spero, Special Advisor
 - Individuals within the Offices of the Secretary and Deputy Secretary: David Shulkin, Former Secretary, and anyone acting on his behalf
 - Vivieca Wright Simpson, Former Chief of Staff
 - Pete O'Rourke, Former Chief of Staff, Former Acting Secretary, and Senior Advisor to the Secretary; and anyone acting on his behalf
 - Robert Wilkie, Secretary, and anyone acting on his behalf
 - Jacquelyn Hayes-Byrd, Acting Chief of Staff and Deputy Chief of Staff
 - Thomas Bowman, Deputy Secretary, and anyone acting on his behalf
 - Any political appointee* in the immediate Office of the Secretary or Deputy Secretary during the applicable time period not previously listed above
- Outside Recipients
 - Dan Caldwell
 - Nathan Anderson
 - Shannon Hough
 - Pete Hegseth
 - Any email address ending in @cv4a.org or @cvafoundation.org
 - Isaac "Ike" Perlmutter
 - Bruce Moskowitz
 - Marc Sherman
- All email communications between any of the individuals listed in Column A and any external individuals or organizations (i.e., emails with addresses ending in com/.org/.net/.mil/.edu) that mention one or more of the following search terms in the subject line, body of the email, or attachment:
 - a. "Concerned Veterans"
 - b. "Concerned Vets"
 - c. CVA
 - d. CV4A

Please provide all responsive records from January 20, 2017, through the date of the search."

There is substantial overlap between this FOIA request and your prior FOIA request **18-07426-F**, as some redacted records released for your FOIA request **18-07426-F** are also responsive to FOIA request **18-11960-F**.

Reasonable Searches Dated September 6, 2018, September 18, 2018, October 12, 2018, October 16, 2018, October 18, 2018, and November 15, 2018

On September 6, 2018, the OSVA FOIA Officer requested that the VA IT office search through the email boxes of the below ten (10) custodians from January 20, 2017, to September 6, 2018:

- 1) Wilkie, Robert L., Jr., VA Secretary;
- 2) Shulkin, David, former VA Secretary;
- 3) O'Rourke, Peter M., former VA Acting Secretary;
- 4) Bowman, Thomas, former VA Deputy Secretary;
- 5) Hayes-Byrd, Jacquelyn, former VA Acting Chief of Staff;
- 6) Wright-Simpson, Vivieca, former VA Chief of Staff;
- 7) Selnick, Darin, former VA White House Senior Advisor;
- 8) Lukach, Michael, former VA White House Senior Advisor;
- 9) Leinenkugel, Jake, former VA White House Senior Advisor; and,
- 10) Spero, Casin D, former VA White House Liaison.

The VA IT office provided search results, with the OSVA FOIA Officer to conduct secondary searches.

On October 12, 2018, and October 16, 2018, the OSVA FOIA Officer searched through former VA Acting Secretary Peter O'Rourke's emails and calendars from May 4, 2018, to June 22, 2018. The OSVA FOIA office used the search terms Sherman, Perlmutter, Moskowitz, and @frenchangel59.com. These October 12, 2018, and October 16, 2018, searches yielded forty-four (44) pages, which OSVA released redacted as pages Bates-numbered 243-286 to you for FOIA request **18-07426-F**.

On September 18, 2018, and October 16, 2018, the OSVA FOIA Officer searched through former VA Acting Chief of Staff Jacquelyn Hayes-Byrd's emails and calendars from November 8, 2016, to June 22, 2018. OSVA used the search terms Sherman, Perlmutter, Moskowitz, and @frenchangel59.com. This search yielded two hundred fifty-five (255) pages, which OSVA released redacted as pages Bates-numbered 287-541 to you for FOIA request **18-07426-F**.

On October 18, 2018, the OSVA FOIA office searched through the email boxes and calendars, from January 20, 2017, to June 22, 2018, of: David Shulkin, Thomas Bowman, Vivieca Wright-Simpson, Darin Selnick, Michael Lukach, Jake Leinenkugel, and Casin Spero. The OSVA FOIA office used the search terms Sherman, Perlmutter, Moskowitz, @frenchangel59.com, and Kushner. This search yielded three hundred twenty-eight (328) pages, which OSVA released redacted as pages Bates-numbered 542-813 and 816-871 to you for FOIA request **18-07426-F**.

On November 15, 2018, the OSVA FOIA office searched through the email boxes and calendars from June 23, 2018, to September 6, 2018, of:

- 1) Wilkie, Robert L., Jr., VA Secretary;
- 2) O'Rourke, Peter M., former VA Acting Secretary;
- 3) Bowman, Thomas, former VA Deputy Secretary;
- 4) Hayes-Byrd, Jacquelyn, former VA Acting Chief of Staff;
- 5) Wright-Simpson, Vivieca, former VA Chief of Staff;
- 6) Selnick, Darin, former VA White House Senior Advisor;
- 7) Lukach, Michael, former VA White House Senior Advisor;

- 8) Leinenkugel, Jake, former VA White House Senior Advisor; and,
- 9) Spero, Casin D, former VA White House Liaison.

The November 15, 2018, search yielded two pages, which OSVA released redacted as pages Bates-numbered 814-815 for your FOIA request **18-07426-F**.

Partial Initial Agency Decision

Using the Clearwell e-discovery platform, the OSVA FOIA Officer used the key terms “Concerned Veterans of America,” “CVA,” and “cv4a.org” to search through former VA Secretary David Shulkin’s email boxes for responsive records. The OSVA FOIA Officer also used the same search key terms through the email boxes of the following custodians: Robert Wilkie, Peter O’Rourke, David Shulkin, Thomas Bowman, Jacquelyn Hayes-Byrd, Vivieca Wright-Simpson, Darin Selnick, Michael Lukach, Jake Leinenkugel, and Casin Spero.

This Clearwell search yielded approximately four hundred (400) documents totaling approximately five thousand (5,000) pages. OSVA now releases to you one hundred seventy-nine (179) documents totaling three thousand five hundred twenty-four (3,524) pages, Bates-numbered as 996-4547 (with 1508-1535 intentionally left blank). OSVA will release approximately one hundred twenty (120) redacted documents totaling approximately fourteen hundred (1,400) pages to you in the future. After reviewing the three thousand five hundred twenty-four (3,524) pages, OSVA redacts some information with FOIA Exemptions 4, 5, 6, 7(C).

5 U.S.C. § 552(b)(4) exempts from disclosure “trade secrets and commercial or financial information obtained from a person and privileged or confidential.” Redacted information includes voluntary proposal submission verbiage, technical processes, technical approaches, and partnership or subcontracting agreements. The release of this information would likely lead to substantial competitive harm in reverse-engineering of the vendors’ technical approaches, processes, partnership, subcontracting, and business and labor strategies. RMS Indus. v. DOD, No. C-92-1545, slip op. at 7 (N.D. Cal. Nov. 24, 1992) (protecting “descriptions of equipment and the names of contacts, customers, key employees, and subcontractors” because “bidders only submit such information if it will not be released to their competitors”); BDM Corp. v. SBA, 2 Gov’t Disclosure Serv. (P-H) ¶ 81,189, at 81,495 (D.D.C. Mar. 20, 1981) (protecting names of consultants and subcontractors, performance, cost, and equipment information).

5 U.S.C. § 552(b)(5) exempts from disclosure “inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency.” Exemption 5 permits an agency to withhold material reflecting the thoughts, opinions, and recommendations of federal officials and consultants reviewing an issue. Under the deliberative process privilege and FOIA Exemption 5, OSVA redacts internal government deliberations, thoughts, opinions, recommendations, and proposed solutions from federal employees and consultants reviewing VA programs in their professional capacities, as well as non-final or draft documents. The information contained in the responsive records is both predecisional and deliberative because it reflects preliminary opinions, proposed solutions, and recommendations, which do not reflect VA’s final decision. Exposure of premature discussions before a final decision is made could create undue public confusion. The release of the redacted information would negatively impact the ability of federal employees and consultants to openly and frankly consider issues amongst themselves when deliberating, discussing, reviewing, proposing changes to, and making recommendations on VA programs. The information reveals the thoughts, deliberations, and opinions that, if released, would have a chilling effect on the ability of federal officials and consultants to discuss, opine, recommend or be forthcoming about the agency’s issues which require full and frank assessment. Here, the

disclosure of the withheld information is likely to compromise the integrity of this deliberative or decision-making process. Moreover, the predecisional character of a document is not altered by the passage of time. Bruscino v. BOP, No. 94-1955, 1995 WL 444406 at *5 (D.D. C. May 15, 1995), aff'd in part, No. 95-5212, 1996 WL 393101 (D.C. Cir. June 24, 1996).

5 U.S.C. § 552(b)(5) exempts from disclosure “inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency.” Under the attorney-client and work product privileges, the VA redacts portions of records, emails, and communications between VA employees and attorneys analyzing and discussing legal issues for the VA and its employees. The release of this information would impede the ability of VA employees and attorneys to speak openly and frankly about legal issues concerning the VA or its employees. The release of this information would also compromise the legal positions of the VA and its employees.

5 U.S.C. § 552(b)(6) exempts from required disclosure “personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.” FOIA Exemption 6 permits VA to withhold a document or information within a document if disclosure of the information, either by itself or in conjunction with other information available to either the public or the FOIA requester, would result in an unwarranted invasion of an individual’s personal privacy without contributing significantly to the public’s understanding of the activities of the federal government. Specifically, the information being withheld, as indicated on the enclosed documents, under FOIA Exemption 6, consists of names, identities, email addresses, VA usernames, phone numbers, cellular numbers, and facsimile numbers of federal employees and private citizens; we however release the names and VA email addresses of VA Senior Executives. Federal civilian employees and private citizens retain a significant privacy interest under certain circumstances, such as in instances where the release of their information could represent a threat to their well-being, harassment, or their ability to function within their sphere of employment. The federal civilian employees and private citizens whose information is at issue have a substantial privacy interest in their personal information. In weighing the private versus the public interest, except names and VA email addresses of VA Senior Executives, we find that there is no public interest in knowing the names, identities, email addresses, VA usernames, phone numbers, cellular numbers, and facsimile numbers of federal civilian employees and private citizens. The coverage of FOIA Exemption 6 is absolute unless the FOIA requester can demonstrate a countervailing public interest in the requested information by demonstrating that the individual is in a position to provide the requested information to members of the general public and that the information requested contributes significantly to the public’s understanding of the activities of the Federal government. Additionally, the requester must demonstrate how the public’s need to understand the information significantly outweighs the privacy interest of the person to whom the information pertains. Upon consideration of the records, I have not been able to identify a countervailing public interest of sufficient magnitude to outweigh the privacy interest of the individuals whose names are redacted. The protected information has been redacted and (b)(6) inserted. Releasing even a single VA username reveals the pattern to ascertain VA usernames that VA employees use to log into VA Systems of Records; releasing VA usernames exposes the VA, its employees, and its contractors to potential hacking and information technology security liabilities and risks. “Withholding a telephone number or e-mail address, alone, is not sufficient to protect that [privacy] interest; alternate means of contacting and harassing these employees would be readily discoverable on the Internet if this court ordered their names disclosed.” Long v. Immigration & Customs Enf’t, 2017 U.S. Dist. LEXIS 160719 (D.C. Cir. 2017).

5 U.S.C. § 552(b)(7)(C) exempts from required disclosure information law enforcement information the disclosure of which "could reasonably be expected to constitute an unwarranted invasion of personal privacy." Redacted information includes names and email addresses of White House employees with security clearances, as well as Redacted information includes names, identities, email addresses, and VA usernames of VA law enforcement employees. The release of this information would risk impersonation of these White House employees with security clearances also working on national security and law enforcement matters, as well as jeopardizing their health and safety and those the White House employees are charged with protecting. The release of this information would risk impersonation of VA law enforcement personnel and jeopardize the health and safety of not only law enforcement personnel, but those persons the VA law enforcement personnel protect including the VA Secretary.

5 U.S.C. § 552(b)(7)(E) exempts from required disclosure information that "would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law." Redacted information includes VA usernames of VA law enforcement employees and shared VA email groups, for which VA law enforcement officials plan their law enforcement operations and protection of VA personnel. The release of this information would compromise the safety of VA law enforcement personnel and VA employees.

FOIA Mediation

As part of the 2007 FOIA amendments, the Office of Government Information Services (OGIS) was created to offer mediation services to resolve disputes between FOIA requesters and Federal agencies as a non-exclusive alternative to litigation. Using OGIS services does not affect your right to pursue litigation. Under the provisions of the FOIA Improvement Act of 2016, the following contact information is provided to assist FOIA requesters in resolving disputes:

VA Central Office FOIA Public Liaison:

Name: John Buck

Email Address: vacofoiaservice@va.gov

Office of Government Information Services (OGIS)

Email Address: ogis@nara.gov

Fax: 202-741-5769

Mailing address:

College Park, MD 20740-6001

FOIA Appeal

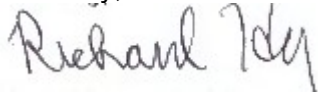

This concludes OSVA's partial IAD to request **18-11960-F**. Please be advised that should you desire to do so, you may appeal the determination made in this response to:

Office of General Counsel (024)
Department of Veterans Affairs
810 Vermont Avenue, NW
Washington, DC 20420

Mr. McGrath, Esq., & Mr. Evers
Page 6
November 30, 2018

If you should choose to file an appeal, please include a copy of this letter with your written appeal and clearly indicate the basis for your disagreement with the determination set forth in this response. Please be advised that in accordance with VA's implementing FOIA regulations at 38 C.F.R. § 1.559, your appeal must be postmarked no later than ninety (90) days of the date of this letter.

Sincerely,

A handwritten signature in dark ink, appearing to read "Richard Ha".

Richard Ha, JD, CIPP/G
OSVA FOIA Officer

Dan Caldwell, Director of Policy

VA

Darin Selnick

Brooks Tucker

John Ulliot

Jake Leinenkugel

(b) (6)

OBJECTIVE:

Meet CVA leadership and understand their priorities; Share your vision and priorities with CVA leadership; Discuss public components of Vets CARE Plan and related issues

BACKGROUND:

- CVA requested to meet with you. They've indicated that while they've seen you briefly at events, they haven't had the chance to sit down and talk to you. The two senior leaders would like to introduce themselves and tell you more about their organization and their priorities.
- They'd also like to discuss how they can work more closely with VA-- in particular the Vets CARE program and the pilots.
- The White House has included CVA in its meetings and they've become more supportive of VA. However, traditional VSO remain skeptical of the organization and don't consider them a VSO

BIOGRAPHY:

(next page)

Mark Lucas is the Executive Director of Concerned Veterans for America. Prior to this, Lucas was a Regional Director of Americans for Prosperity, where he had previously served as the Iowa State Director. Under his leadership, the Iowa chapter of AFP grew to be the highest-performing in the organization in only 2 years.

Mark was the youngest-ever elected City Councilman at the age of 19 in his hometown of Wilton, Iowa. Mid-way through his term he was appointed as the Mayor Pro Tem.

During the 2008 presidential primary, Mark was the State Director of the Americans for Fair Taxation. The National Review said the FairTax campaign was the biggest success story of the 2008 primary season.

Mark has served for over 13 years in the Iowa Army National Guard and is a graduate of the US Army Ranger School. He led an infantry rifle platoon along the Afghanistan-Pakistan border as a platoon leader. He was awarded the Combat Infantry Badge and Bronze Star Medal by distinguishing himself for meritorious service in combat.

He received his Business Management degree from the University of Iowa Tippie College of Business with a certificate in Entrepreneurial Management.

He recently moved to Washington DC with his (b) (6) (b) (6) and (b) (6) (b) (6).

CVA APPLAUDS SHULKIN'S VISION FOR VETERANS HEALTH CARE CHOICE

Arlington, VA – Today the Senate Veterans Affairs Committee (SVAC) held a **hearing** examining the Veterans Choice Program and the future of the Department of Veterans Affairs (VA) care in the community program. VA Secretary Shulkin testified, unveiling a new vision for expanding choice and community care programs, called the Vets Community Access Rewarding Experience (CARE) program, and announcing a new pilot choice program very similar to what CVA has proposed for years.

Concerned Veterans for America (CVA) supports expanding veterans' health choice beyond the current Choice Program. In the bipartisan *Fixing Veterans Health Care Task Force*, CVA proposes the creation of a government-chartered non-profit and veterans insurance program to oversee the distribution of health care benefits to veterans. In this new model, veterans would be fully empowered to decide where and when to seek care outside of the VA.

Concerned Veterans for America (CVA) Policy Director Dan Caldwell issued the following statement:

“We applaud Secretary Shulkin for proposing reforms that will expand choice and for being willing to test new ideas to deliver health care to our veterans. The current Choice Program was meant to be temporary, has been implemented poorly, and offers unacceptably limited health care options. When it doesn't make sense to use the VA for care, veterans should be able to go outside of it. We look forward to working with Secretary Shulkin, this administration, and members of Congress to develop legislation that will achieve a vision of true health care freedom for veterans.

“Unfortunately, some members of the Senate — in particular, Senator Patty Murray — are opposed to even trying new ideas to deliver health care to our veterans. It is disappointing that some in Congress just want to double down on the status quo at the VA.”

In April, the Senate passed and President Trump signed a reauthorization and extension of the **Veterans Choice Act**, which was passed originally in 2014 as a quick fix to the wait list scandal at the VA in Phoenix.

The Veterans Choice Program has been poorly implemented and has not offered the veterans who qualify for it the real choice that the creators of the program envisioned. The “40-mile, 30-day” rule means that, in theory, veterans can only seek care outside the VA if they can't be seen within a month of when they request an appointment or if they can't be seen within a 40-mile radius. Even then, many veterans are still forced to jump through many bureaucratic hoops to access the program.

President Trump and VA Secretary Shulkin have both repeatedly expressed the need to give veterans more choice over their health care. President Trump included choice as part of his 10-point plan to fix the VA while he was on the campaign trail last year.

###

CVA STATEMENT ON SOLUTION TO CHOICE PROGRAM

Arlington, VA — This week Department of Veterans Affairs (VA) Secretary Shulkin testified before the Senate that funding for the Veteran Choice Program will likely run out later this year, much sooner than originally expected.

When President Trump reauthorized the Choice Program earlier this year, there were changes made to the program – in particular, making the VA the primary payor for care – which may have led to significantly increased spending. In addition, the increased referrals to the program have been larger than anticipated.

Concerned Veterans for America (CVA) Policy Director Dan Caldwell issued the following statement:

“Elected officials should quickly pass legislation that will allow the VA to move existing funds to the Veteran Choice Program, which they are unable to do under current law. Congress authorized the VA to move funds out of the program in 2015 – a measure we opposed – and they should now allow the VA the same flexibility to move funds back into the program.

“Patching up this flawed program year after year is not a permanent solution to the health care issues facing veterans. A systemic overhaul of the VHA is needed to allow veterans to use their benefits whenever and wherever they want and to remove the VA as the middleman.”

The Choice Program, which was enacted under Veterans’ Access to Care through Choice, Accountability, and Transparency Act, was intended as a temporary solution to the wait list scandal of 2014. The Program was flawed — allowing veterans to only receive care at VA-approved facilities if they meet the “30-day, 40-mile” rule, for example — and has been implemented poorly.

For years, CVA has proposed the creation of a government-chartered non-profit to oversee the distribution of health care benefits at the Department of Veterans Affairs (VA). This entity would empower veterans to use these benefits at his or her own discretion – inside or outside of the VA.

DAN CALDWELL

Dan Caldwell was named the Executive Director for Concerned Veterans for America (CVA) in October 2017 and has worked for CVA since 2013.

In 2005, Dan enlisted in the United States Marine Corps as an infantryman. During Basic Training, Dan was selected for the Marine Corps' Presidential Support Program, in which he served as a member of the Marine Security Force at Marine Barracks Washington and the Presidential Retreat at Camp David. Upon completion of his tour at Camp David, Dan was assigned to 2nd Battalion, 1st Marines where he served as an infantry team leader, squad leader, and vehicle commander. Dan deployed to Iraq with 2nd Battalion, 1st Marines in support of Operation Iraqi Freedom and conducted operations in Al Anbar and Ninawa provinces.

Prior to joining CVA in 2013, Dan worked for Congressman David Schweikert (R-AZ) from 2011 to 2013. Dan originally was a constituent caseworker focused on resolving constituents' issues with the Department of Veterans Affairs and Department of Defense and eventually was promoted to Deputy Chief of Staff. Additionally, in 2012, Dan managed the successful re-election campaign of Congressman Schweikert in one of the most intense incumbent versus incumbent races of the 2012 election cycle. Dan also graduated cum laude in 2011 from Arizona State University with degrees in International Studies, Political Science, and Asian History.

Subject: Former Senate Majority Leader Dr. Frist

I had a long phone conversation with former Senate Majority Leader Dr. Bill Frist last week. Dr. Frist did part-time surgery for over 15 years at the VA Hospital in Nashville. He was also one of the co-chairs of the CVA Fixing Veterans Healthcare Taskforce.

As you know Dr. Frist is a board member for a lot of different types of Healthcare companies and wants to use his expertise and connections to help you and VA healthcare. Below is the follow up email he sent me (b) (5)

One example is Valor Healthcare. VALOR is (b) (5) with 33 CBOCs that see 110,000 veterans each year. As a contract provider (b) (5). I met with their (b) (5)

VA-18-0457-A-000008

(b) (5)

By the way, the OIG did two studies in 2010 and 2011 comparing VA staff CBOC vs. contract CBOC in terms of quality, OIG found (b) (5)

I think Dr. Frist as past Majority leader (b) (5).

(b) (5) is to set up a meeting with you, (b) (6) and myself, with Dr. Frist and (b) (6),
(b) (6) is an Army veteran (b) (6)
Dr. Frist (b) (5)

Let me know if you want to go forward with the meeting with Dr. Frist and I will set it up.

Thanks

Subject: issues discussed

Darin,

Great to catch up and excited about the opportunities to accelerate your and the Secretary's initiatives there.

1. Primary care and access. I have forwarded to you a memo on Valor and hopefully you can discuss (b) (5).
2. Palliative health care. (b) (5) nonhospice, community based palliative care company in the country and is (b) (5) and (b) (5). They are aware of a pilot that the VA has done which apparently was successful and (b) (5) (b) (6) with your smartest person to, again on the innovation and on the service front, (b) (5).
3. Infrastructure: I am on the board of AECOM, the largest design and architecture firm in the country, . The VA is a very important client of AECOM (b) (5) with the agency through several contracts and through the Army Corps of Engineers, which now oversees the major construction projects for the VA. AECOM completed the design for the VA hospital in Orlando and has delivered more than a dozen renovation projects over the last couple of years. (b) (5).
4. Partnerships. I would suggest in the health IT world and mobile technology and communication world, that the VA (b) (5) (b) (6) (b) (5).

Thanks for taking time to discuss these opportunities. And thanks for heling me navigate through the VA to serve our veterans (which I had the privilege of doing every week in the operating room for 15 years!

Darin,

Attached are documents OCLA collected or prepared in advance of the Friday meeting with Rep McMorris Rogers. We ask that you specifically look at the SecVA Briefing Memo as we would usually provide background and talking points.

We remain available to assist but wanted to give you enough time to review what has been prepared. The packet includes:

1. SECVA Briefing Memo
2. Rep. McMorris-Rodgers bio
3. Bill Summary and draft bill
4. Related articles/op-eds from members, VSO's and a former

Thank you, Ron

Ron Maurer, Ed.D.

Acting, Deputy Assistant Secretary

Department of Veterans Affairs' Office of Congressional and Legislative Affairs

Report: 'VA still manipulating wait times'

Concerned Veterans of America pushing for timely health care for veterans

By [Jodi Mohrmann](#) - Managing Editor of special projects

Posted: 6:23 PM, March 06, 2017

Updated: 6:23 PM, March 06, 2017

JACKSONVILLE, Fla. - [Concerned Veterans for America](#) is pointing to a new audit that it says proves VA employees are still manipulating patient wait times, and is pushing for new laws that would give veterans access to timely health care.

Last week, the Department of Veterans Affairs Office of Inspector General released its results of a [new audit](#) confirming widespread wait time inaccuracies at VA medical facilities in North Carolina and Virginia.

The OIG's audit found wait time numbers are "significantly higher" than the numbers reported in the Veterans Health Administration's scheduling system. CVA explains this happened because VA schedulers documented the scheduled appointment time as the "desired appointment time" instead of the "requested appointment time."

As a result, veterans who were eligible for the Choice Program and who could have sought care at a doctor of their choosing, were forced to wait for care at the VA.

Of 15,300 appointments audited, in which veterans should have been added to the Veterans Choice List, OIG estimates VA staff did not identify 90 percent of them to be added to the list.

"The VA has consistently failed at their number one priority: to provide veterans access to timely health care," said CVA Policy Director Dan Caldwell in a statement. "The fact that VA employees across the country are still engaging in inappropriate scheduling practices shows just how dysfunctional the department still is. Accountability and choice reforms at the VA are simply not an option anymore – they are an urgent necessity."

CVA says it is supporting two pieces of legislation to help give military veterans the timely health care they need and deserve.

First is the [Caring for Our Heroes in the 21st Century Act](#). This draft legislation, introduced by Rep. Cathy McMorris Rodgers (R-WA) last year, would empower veterans to seek care inside or outside the VA at their own discretion.

VA-18-0457-A-000019

The second piece of legislation CVA supports is the [2017 VA Accountability First Act](#). The Senate version was introduced last week by Sen. Marco Rubio (R-FL) and the House version was introduced by Rep. Phil Roe (R-TN.) If it passes, it would make it easier to terminate bad VA employees and help bring a new culture of accountability.

In the meantime, CVA is pushing Congress to re-authorize the current Choice Card program this August until more permanent reforms can take hold.

VA OIG's investigations into wait times follows the scandal of wait-time manipulation at the Phoenix VA Health Care System in 2014. After that, VA received numerous allegations from veterans, VA employees and members of Congress of the same thing happening at VA facilities nationwide.

CARING FOR OUR HEROES IN THE 21ST CENTURY ACT: THE REFORM VA NEEDS

By Shaun Rieley

06.08.16

Caring for Our Heroes in the 21st Century Act: The Reform VA Needs

Just over two years have passed since it was revealed that numerous veterans died waiting for care on secret VA hospital waiting lists that had been intentionally manipulated, resulting in the resignation of then-VA Secretary Eric Shinseki. In the wake of that scandal, Congress passed the [Veterans Access, Choice, and Accountability Act of 2014](#), which took steps toward providing veterans with access and choice that are the hallmarks of good health care, and toward improving accountability for VA employees.

These reforms were a step in the right direction, but in the years since they were enacted, implementation of the Choice Program has proven less than satisfactory, and it has become clear that the accountability measures have failed to hold accountable many problematic VA employees. This is because the reforms failed to address certain systemic and structural issues in VA that serve to perpetuate a toxic culture which results, all too often, in failure to take care of the veterans that it exists to serve.

In fact, the [independent assessment](#) of VA care, mandated by the Veterans Access, Choice, and Accountability Act, [found](#) that true reform would require “no less than a system-wide reworking.”

Congress will now have the opportunity to bring those changes. U.S. Rep. Cathy McMorris Rodgers (R-WA) has released a [discussion draft](#) of the *Caring for Our Heroes in the 21st Century Act*—legislation which would comprehensively overhaul the Veterans Health Administration.

Rep. McMorris Rodgers’ bill seeks to go to the root of the problems. It restructures VA, shifting the Veterans Health Administration (VHA) to governance by a board of directors, allowing it to be run like a high-performance health care organization, rather than as a government bureaucracy, improving both accountability and access, while allowing the system to right-size itself, which is projected to save money over the long term.

Furthermore, it allows veterans increased choice in both private health care and VA providers. Thus it allows veterans who are satisfied with their care at VA to remain in the system with no cost-sharing, and those who prefer to leverage the resources in their local community can do so, while receiving premium support to help cover costs.

Despite the often-repeated assertion that VA’s problems stem from a lack of money, the VA budget has [grown precipitously](#) over the past decade. Yet, VA’s problems continue. Clearly simply increasing VA’s budget has not appreciably improved outcomes.

VA-18-0457-A-000022

The plan is bold, and real reform is never easy—even when it is clearly needed. But to provide veterans with the best care possible—care that they have earned through their service and sacrifice—we will need to think beyond the tired talking points and failed status quo. Honoring veterans means asking the hard questions and doing the right thing, even when it is difficult.

THE CARING FOR OUR HEROES IN THE 21ST CENTURY ACT

What can be done to fix the VA?

Real reform for our nations veterans

Give Veterans The Care They Earned

GIVE VETERANS THE CARE THEY EARNED

The VA is failing to keep its promise to veterans across the country. And it's only going to get worse if we don't reform it now.

Fortunately, a real reform plan is under consideration in Congress. Congresswoman Cathy McMorris Rodgers (R-WA) introduced the Caring for Our Heroes in the 21st Century Act.

In order for veterans to get the quality, timely care they truly deserve, Congress must modernize the VA. This legislation is our best hope for giving vets the care they have earned.

Here's what you can do – sign your name to support the Caring for Our Veterans in the 21st Century Act, and tell Congress to give our heroes the health care choice they deserve.

Together, we can give vets and military families more choice, flexibility, and access to medical care.

House GOP conference chair: Wait time is up for VA fix

By Rep. Cathy McMorris Rodgers April 26, 2016

***The Outrage Machine* is regular opinion column by voices from the left and right on Washington.**

Imagine a veterans' hospital with no waiting list to see a doctor.

One where veterans can book their appointments online 24 hours a day, seven days a week.

Where the red carpet is rolled out for our heroes to receive world-class care for their world-class service the very next day — before it's too late.

And where the men and women who accepted the call of duty can choose to continue seeing the doctor they've seen their entire lives.

This is what a common sense, 21st century veterans' health care system should look like. After all, we're talking about the men and women who lay their lives on the line and sacrifice so that we may live free.

To think they could be trapped in a broken system simply because of their service, and not have the same access to quality services available to private citizens, is outrageous.

Unbelievably, as we approach two years since the scandal broke out at the VA with secret wait lists, patients dying waiting for appointments, and an overwhelming feeling of hopelessness, we're finding that our veterans still aren't even coming close to that vision for 21st century care.

In fact, according to recent reports, the situation is even worse.

An audit released last week by the Government Accountability Office (GAO) found that the VA still hasn't fixed the wait times that plagued the system two years ago; schedulers at half the reviewed centers had falsified wait times, and scheduling was done improperly a quarter of the time. An earlier report revealed that as of January, more than 30,000 veterans were waiting longer than one month for health care than they were the year before.

This doesn't mean a 21st century VA isn't possible, but it will require a comprehensive overhaul of the agency we know today, starting with the way health centers schedule appointments, and

continuing until the culture and focus of the agency's bureaucrats places veterans before themselves.

The VA is centered on the status quo and the problems at the agency are deeply rooted at every level of this obsolete government model built for the previous century. And it's failing our veterans.

For example, despite assertions from the agency that several dozen employees lost or would lose their jobs over the manipulated wait times, in reality, only a handful have been fired — not even enough to qualify as a slap on the wrist.

Veterans died while on VA waiting lists, and it is unconscionable that there has been little effort on the part of the agency to reform its own culture, rectify this situation, or hold those responsible accountable.

Delivering timely, quality care for these brave men and women has to be more than just lip service—it has to be a priority.

This means taking seriously the long wait times, insufficient care, and unresponsive management.

It is estimated that 18 percent of VA appointments are wasted due to last-minute cancellations and no-shows. In these instances, VA personnel failed to refill the cancelled appointments.

In June of last year, an internal audit found more than 120,000 veterans waited at least 90 days for appointments for medical care, or they didn't receive appointments at all.

These slots could be filled by the countless other veterans stuck on the wait-list using real-time updates available through existing technology.

The VA recently told Congress that it is putting on hold its overhaul of its scheduling system that was supposed to fix the problem, meaning the agency is still relying on archaic technology systems and phone calls to get the job done.

We can do better.

I believe we should open up the scheduling process to the same technologies being used in doctors' offices by private citizens across the country, which is why I've introduced legislation with Rep. Seth Moulton (D-Mass.) that incorporates self-scheduling so veterans can schedule and confirm medical appointments online and immediately.

But the scheduling system is not enough. Across the board, whether it's how appointments are scheduled, or the quality of health services provided, our veterans should have access to the same technology and services as private patients across the country.

If we don't clean house at the VA and overhaul its culture, we're just biding time until another — potentially worse— scandal surfaces.

Over the coming months, we will focus on legislation that demonstrates to the VA how innovative ideas already being used in the private sector can also work for them to cut back on red tape, stay within budget, and, most importantly, get our veterans the care they earned and need.

The time has run out for the VA to address its issues on its own.

If this administration cannot follow through on the fundamental duty and solemn obligation to serve our veterans with the VA as-is, then it's time to try something different.

No more waiting. No more sitting by the phone hoping that someone follows up.

Self-scheduling is only one example of the endless possibilities for a 21st century VA — one that treats our veterans with dignity and respect, and ensures our heroes' sacrifices don't continue after their tours end.

It just takes the imagination and willpower to make it happen.

A founder of the Congressional Military Family Caucus, Cathy McMorris Rodgers has represented Fairchild Air Force Base in Washington's 5th Congressional District since 2005. McMorris Rodgers is chair of the House Republican Conference.

MCMORRIS RODGERS RELEASES DRAFT VA REFORM LEGISLATION

Eastern Washington Congresswoman Cathy McMorris Rodgers (WA-05) today released a discussion draft of legislation, the *Caring for our Heroes in the 21st Century Act*, which would modernize the way veterans receive health care.

“Every day I hear from veterans in Eastern Washington who are struggling to work with the VA,” said McMorris Rodgers. “We have a profound obligation to honor the service of our veterans and ensure that our heroes’ sacrifices shouldn’t continue after their tours of duty end. With the never ending wait times and the VA Secretary doubling down on his comparison to Disney, the time has long passed for the VA to make the necessary changes to ensure that our veterans are treated effectively, seen efficiently, and cared for with respect. Veterans should be freed from a system that offers them little or no choice.

“With this draft legislation, my goal is for veterans to have the ability to choose what health care plan best fits their individual needs. This proposal should serve as the starting point for putting veterans in charge of their health care. I look forward to receiving feedback from veterans and the organizations that represent them, so we can ensure veterans receive the health care they deserve and have earned in a timely manner.”

Note: The *Caring for our Heroes in the 21st Act* is a draft document which serves as an opportunity to discuss ideas for introduction in the future. [Click here](#) to read the discussion draft, which has not yet been introduced in the U.S. House of Representatives.

[DISCUSSION DRAFT]114TH CONGRESS
2D SESSION**H. R.** _____

To amend title 38, United States Code, to establish the Veterans Accountable Care Organization and to provide veterans access to private health insurance plans, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

Mrs. MCMORRIS RODGERS introduced the following bill; which was referred to the Committee on _____

DRAFT

A BILL

To amend title 38, United States Code, to establish the Veterans Accountable Care Organization and to provide veterans access to private health insurance plans, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

4 (a) SHORT TITLE.—This Act may be cited as the
5 “Caring for our Heroes in the 21st Century Act”.

6 (b) TABLE OF CONTENTS.—The table of contents for
7 this Act is as follows:

Sec. 1. Short title; table of contents.

TITLE I—VETERANS ACCOUNTABLE CARE ORGANIZATION AND HEALTH INSURANCE SUPPORT

Sec. 101. Establishment of Veterans Accountable Care Organization.

Sec. 102. Establishment of Veterans Health Insurance Program.

Sec. 103. Designation of existing authorities for hospital care, medical services, and other health care.

Sec. 104. Health insurance support for new veterans and veterans electing health insurance support in lieu of eligibility for hospital care, medical services, and other health care under existing authorities.

Sec. 105. Coordination between VetsCare Choice program and eligibility to make contributions to health savings accounts.

Sec. 106. Publication of health care information.

TITLE II—REALIGNMENT OF MEDICAL CENTERS OF DEPARTMENT OF VETERANS AFFAIRS

Sec. 201. Realignment of medical centers.

Sec. 202. Congressional consideration of Commission report.

TITLE III—IMPLEMENTATION OF HEALTH CARE REFORMS

Sec. 301. VetsCare Advisory Commission.

TITLE IV—LONG-TERM CARE INSURANCE FOR VETERANS

Sec. 401. Veterans' eligibility for long-term care insurance.

TITLE I—VETERANS ACCOUNT- ABLE CARE ORGANIZATION AND HEALTH INSURANCE SUPPORT

SEC. 101. ESTABLISHMENT OF VETERANS ACCOUNTABLE CARE ORGANIZATION.

(a) ESTABLISHMENT.—

(1) IN GENERAL.—Chapter 3 of title 38, United States Code, is amended by adding at the end the following new section:

1 **“§ 323. Veterans Accountable Care Organization**

2 “(a) ESTABLISHMENT.—(1) There is established the
3 Veterans Accountable Care Organization (in this section
4 referred to as the ‘Corporation’).

5 “(2) The Corporation is a federally chartered cor-
6 poration.

7 “(3) The Corporation shall be incorporated and domi-
8 ciled in the District of Columbia, or another nearby State,
9 as determined by the board of directors of the Corpora-
10 tion.

11 “(4) The Corporation shall be a charitable and non-
12 profit corporation.

13 “(5) Except as otherwise provided, the Corporation
14 shall have perpetual existence.

15 “(b) PURPOSE.—The purpose of the Corporation is
16 to furnish high quality hospital care, medical services, and
17 other health care (excluding nursing home care and domi-
18 ciliary care) to individuals eligible for such care and serv-
19 ices under laws administered by the Secretary.

20 “(c) BOARD OF DIRECTORS.—(1) The powers of the
21 Corporation shall be vested in a Board of Directors that
22 governs the Corporation.

23 “(2) The Board of Directors shall be composed of the
24 following members:

25 “(A) The Secretary of Veterans Affairs.

1 “(A) Two members appointed by the Speaker of
2 the House of Representatives, at least one of whom
3 shall be a veteran.

4 “(B) Two members appointed by the Minority
5 Leader of the House of Representatives, at least one
6 of whom shall be a veteran.

7 “(C) Two members appointed by the Majority
8 Leader of the Senate, at least one of whom shall be
9 a veteran.

10 “(D) Two members appointed by the Minority
11 Leader of the Senate, at least one of whom shall be
12 a veteran.

13 “(E) Two members appointed by the President,
14 at least one of whom shall be veterans.

15 “(3) The President shall designate a member of the
16 Board of Directors to serve as Chairperson of the Board.
17 The Board shall select a Vice Chairperson from among
18 its members.

19 “(4)(A) A member of the Board of Directors shall
20 serve for a term of five years, except that the members
21 first appointed shall be appointed for staggered terms as
22 the President considers appropriate to ensure that the
23 terms of no more than three members expire in the same
24 year.

1 “(B) Any member appointed to fill a vacancy occur-
2 ring before the expiration of the term for which the mem-
3 ber’s predecessor was appointed shall be appointed only
4 for the remainder of that term. A member may serve after
5 the expiration of that member’s term until a successor has
6 taken office. A vacancy on the Board shall not affect its
7 powers, but shall be filled in the same manner in which
8 the original appointment was made.

9 “(C) The term of each member may be renewed for
10 an additional term, except that in no case shall any mem-
11 ber serve more than two consecutive terms exceeding ten
12 years.

13 “(D) During the absence or disability of the Sec-
14 retary of Veterans Affairs or in the event of a vacancy
15 in the office of Secretary, the Acting Secretary of Veterans
16 Affairs shall serve as the member of the Board of Direc-
17 tors specified in paragraph (2)(A).

18 “(d) DUTIES.—In carrying out subsection (b), the
19 Corporation shall—

20 “(1) transfer personnel and assets of the De-
21 partment of Veterans Affairs to the Corporation
22 pursuant to subsection (b) of section 101 of the Car-
23 ing for our Heroes in the 21st Century Act;

24 “(2) establish priorities, milestones, and
25 timelines, in consultation with the Secretary of Vet-

1 erans Affairs, for the termination of functions of the
2 Veterans Health Administration directly related to
3 the furnishing of hospital care, medical services, and
4 other health care (excluding nursing home care and
5 domiciliary care) pursuant to subsection (c) of such
6 section 101;

7 “(3) with respect to centers of excellence relat-
8 ing to service-connected injuries and other medical
9 issues—

10 “(A) continue to administer such centers
11 previously established by the Secretary; and

12 “(B) establish and administer additional
13 such centers as the Board of Directors deter-
14 mines appropriate.

15 “(4) in consultation with the Secretary, carry
16 out such other actions necessary to carry out this
17 section.

18 “(e) POWERS.—The Corporation shall—

19 “(1) appoint employees; and

20 “(2) adopt a Constitution and bylaws consistent
21 with the purpose set forth under subsection (b).

22 “(f) DUTY TO MAINTAIN CORPORATE AND TAX-EX-
23 EMPT STATUS.—(1) The Corporation shall maintain its
24 status as a corporation incorporated under the laws of the

1 District of Columbia or another nearby State, as deter-
2 mined by the Board of Directors.

3 “(2) The Corporation shall maintain its status as an
4 organization exempt from the Internal Revenue Code of
5 1986.

6 “(g) VETERANS ACCOUNTABLE CARE ORGANIZATION
7 FUND.—(1) There is in the Treasury a fund to be known
8 as the Veterans Accountable Care Organization Fund (in
9 this subsection referred to as the ‘Fund’).

10 “(2) Amounts recovered or collected under chapter 26
11 of this title shall be deposited in the Fund.

12 “(3) Amounts in the Fund shall be available, without
13 further appropriation and without fiscal year limitation,
14 to establish and administer centers of excellence described
15 in subsection (d)(3) and for health care or medical services
16 furnished to a veteran at a facility operated by the Cor-
17 poration.”.

18 (2) CLERICAL AMENDMENT.—The table of sec-
19 tions at the beginning of chapter 3 of such title is
20 amended by inserting after the item relating to sec-
21 tion 322 the following new item:

“323. Veterans Accountable Care Organization.”.

22 (b) TRANSFER OF PERSONNEL AND ASSETS.—

23 (1) TRANSFER.—All of the personnel, property,
24 records, and unexpended balances of appropriations,
25 allocations, and other funds employed, used, held,

VA-18-0457-A-000044

1 available, or to be made available in connection with
2 the direct furnishing of hospital care, medical serv-
3 ices, and other health care (excluding nursing home
4 care and domiciliary care) to individuals eligible for
5 such care and services under laws administered by
6 the Secretary of Veterans Affairs are transferred to
7 the Veterans Accountable Care Organization estab-
8 lished under section 323 of title 38, United States
9 Code, as added by subsection (a).

10 (2) REDUCTION IN FORCE.—The Secretary may
11 implement a reduction in force in carrying out para-
12 graph (1).

13 (c) TERMINATION OF FUNCTIONS.—

14 (1) IN GENERAL.—Except as provided by para-
15 graph (2), all of the functions of the Veterans
16 Health Administration directly relating to the fur-
17 nishing of hospital care, medical services, and other
18 health care (excluding nursing home care and domi-
19 ciliary care) to individuals eligible for such care and
20 services under laws administered by the Secretary
21 shall terminate one year after the date of the enact-
22 ment of this Act.

23 (2) EXTENSIONS.—The Secretary of Veterans
24 Affairs may make not more than two 90-day exten-
25 sions to the termination date specified in paragraph

1 (1) if the Secretary notifies Congress of such exten-
2 sions.

3 (3) CERTIFICATION OF TERMINATION DATE.—

4 The Secretary shall certify to Congress the date on
5 which paragraph (1) is carried out.

6 (d) RECOMMENDATIONS FOR STATUTORY AMEND-
7 MENTS.—Not later than 180 days after the date of the
8 enactment of this Act, the Secretary shall submit to Con-
9 gress a report that contains recommendations for tech-
10 nical and conforming amendments to Federal statutes to
11 carry out this Act.

12 **SEC. 102. ESTABLISHMENT OF VETERANS HEALTH INSUR-**
13 **ANCE PROGRAM.**

14 (a) ESTABLISHMENT.—Chapter 73 of title 38,
15 United States Code, is amended by adding at the end the
16 following new section:

17 **“§ 7309A. Veterans Health Insurance Program**

18 “(a) ESTABLISHMENT.—There is established in the
19 Veterans Health Administration the Veterans Health In-
20 surance Program (in this section referred to as the ‘Pro-
21 gram’).

22 “(b) DUTIES.—Under the Program, the Secretary
23 shall administer the provision of health insurance support
24 to veterans under chapter 26 of this title.”.

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of chapter 73 of such title is amended by inserting after the item relating to section 7309 the following new item:

“7309A. Veterans Health Insurance Program.”.

SEC. 103. DESIGNATION OF EXISTING AUTHORITIES FOR HOSPITAL CARE, MEDICAL SERVICES, AND OTHER HEALTH CARE.

(a) DESIGNATION.—Subchapter I of chapter 17 of title 38, United States Code, is amended by inserting after section 1701 the following new section:

“§ 1701A. VetsCare Federal program: designation of authorities for hospital care, medical services, and other health care as program

“(a) IN GENERAL.—Effective as of the date described in section 101(c)(3) of the Caring for our Heroes in the 21st Century Act, the authorities for the provision of hospital care, medical services, and other health care (other than nursing home care and domiciliary care) in subchapter II of this chapter and under any other law administered by the Secretary may be referred to as the ‘VetsCare Federal program’.

“(b) DESIGNATION OF RECIPIENTS.—Effective as of the date described in section 101(c)(3) of the Caring for our Heroes in the 21st Century Act, any eligible individual

VA-18-0457-A-000047

1 who receives hospital care, medical services, and other
2 health care (excluding nursing home care and domiciliary
3 care) in accordance with the authorities referred to in sub-
4 section (a) after such date may be referred to in the re-
5 ceipt of such care or services as participating in the
6 ‘VetsCare Federal program’.

7 “(c) SECONDARY PAYER.—

8 “(1) IN GENERAL.—Notwithstanding any other
9 provision of law, any health plan (including the
10 Medicare program under title XVIII of the Social
11 Security Act (42 U.S.C. 1395 et seq.) or a State
12 plan under title XIX of such Act (42 U.S.C. 1396
13 et seq.) and the TRICARE program under chapter
14 55 of title 10) under which an eligible individual is
15 covered shall be responsible for the payment of costs
16 for any health care received by an eligible individual
17 for a non-service connected disability up to the max-
18 imum amount allowable under such plan before the
19 VetsCare Federal program is responsible for any
20 such costs, if applicable.

21 “(2) NOTIFICATION.—The Secretary of Health
22 and Human Services, the Secretary of Defense, or
23 any other head of a relevant department or agency
24 of the Federal Government shall notify the Secretary
25 of Veterans Affairs of an eligible individual being

1 covered under a health plan described in paragraph
2 (1).

3 “(d) TREATMENT OF EMPLOYER SPONSORED
4 HEALTH PLANS.—

5 “(1) IN GENERAL.—The provisions of section
6 1862(b)(3)(C) of the Social Security Act (42 U.S.C.
7 1395y(b)(3)(C)) shall apply with respect to financial
8 or other incentives for an employee who is an eligible
9 individual not to enroll (or to terminate enrollment)
10 under a health plan that would (in the case of such
11 enrollment) be responsible under subsection (c) for
12 the payment of costs for hospital care, medical serv-
13 ices, or other health care received by the eligible in-
14 dividual for a non-service connected disability in the
15 same manner as such section 1862(b)(3)(C) applies
16 to financial or other incentives for an individual enti-
17 tled to benefits under title XVIII of the Social Secu-
18 rity Act (42 U.S.C. 1395 et seq.) not to enroll (or
19 to terminate enrollment) under a group health plan
20 or a large group health plan which would (in the
21 case of enrollment) be a primary plan (as defined in
22 section 1862(b)(2)(A) of such Act).

23 “(2) REGULATIONS.—The Secretary may by
24 regulation adopt such additional exceptions to the
25 prohibition described in paragraph (1) as the Sec-

1 retary considers appropriate and such paragraph
2 shall be implemented taking into account the adop-
3 tion of such exceptions.

4 “(3) AGREEMENTS.—The Veterans Accountable
5 Care Organization and the Secretary of Health and
6 Human Services may enter into agreements to carry
7 out this subsection. Any such agreement shall pro-
8 vide that any expenses incurred by the Secretary of
9 Health and Human Services pertaining to carrying
10 out this subsection shall be reimbursed by the Vet-
11 erans Accountable Care Organization.

12 “(4) GROUP HEALTH PLAN DEFINED.—In this
13 subsection, the term ‘group health plan’ means a
14 group health plan (as that term is defined in section
15 5000(b)(1) of the Internal Revenue Code of 1986
16 without regard to section 5000(d) of the Internal
17 Revenue Code of 1986).

18 “(e) ELIGIBLE INDIVIDUALS.—An individual is eligi-
19 ble to participate in the VetsCare Federal program if such
20 individual was enrolled in the system of annual patient
21 enrollment established and operated by the Secretary
22 under section 1705(a) of this title as of the date described
23 in section 101(c)(3) of the Caring for our Heroes in the
24 21st Century Act.”.

(b) CLERICAL AMENDMENT.—The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 1701 the following new item:

“1701A. VetsCare Federal program: designation of authorities for hospital care, medical services, and other health care as program.”.

SEC. 104. HEALTH INSURANCE SUPPORT FOR NEW VETERANS AND VETERANS ELECTING HEALTH INSURANCE SUPPORT IN LIEU OF ELIGIBILITY FOR HOSPITAL CARE, MEDICAL SERVICES, AND OTHER HEALTH CARE UNDER EXISTING AUTHORITIES.

(a) IN GENERAL.—Part II of title 38, United States Code, is amended by inserting after chapter 24 the following new chapter:

“CHAPTER 26—VETERANS INDEPENDENCE IN HEALTH CARE

“SUBCHAPTER I—VETERANS GENERALLY

- “2601. VetsCare Choice program: designation of recipients.
- “2602. Eligibility.
- “2603. Qualifying health insurance.
- “2604. Health insurance support.
- “2605. Treatment of other health plans.
- “2606. Receipt of health care through the Department.
- “2607. Pharmacy benefits.

“SUBCHAPTER II—MEDICARE-ELIGIBLE VETERANS

- “2611. VetsCare Senior program: designation of recipients.
- “2612. Medicare support.

1 **“Subchapter I—Veterans Generally**

2 **“§ 2601. VetsCare Choice program: designation of re-**
3 **ciipients**

4 “(a) IN GENERAL.—The authorities for the provision
5 of health insurance support under this subchapter may be
6 referred to as the ‘VetsCare Choice program’.

7 “(b) DESIGNATION OF RECIPIENTS.—Any veteran
8 who receives health insurance support under this sub-
9 chapter may be referred to in the receipt of support as
10 participating in the ‘VetsCare Choice program’.

11 “(c) RELATIONSHIP TO CARE BY VETERANS AC-
12 COUNTABLE CARE ORGANIZATION.—Health insurance
13 support under this subchapter is in addition to any health
14 care or medical services furnished to a veteran at a facility
15 operated by the Veterans Accountable Care Organization.

16 **“§ 2602. Eligibility**

17 “(a) IN GENERAL.—Except as provided in sub-
18 sections (c) and (d), the following veterans shall be pro-
19 vided health insurance support under this subchapter:

20 “(1) Veterans who first enroll in the system of
21 annual patient enrollment established and operated
22 by the Secretary under section 1705(a) of this title
23 on or after the date described in section 101(c)(3)
24 of the Caring for our Heroes in the 21st Century
25 Act.

1 “(2) Veterans enrolled in such system as of the
2 date described in section 101(c)(3) of the Caring for
3 our Heroes in the 21st Century Act who elect health
4 insurance support under this subchapter in lieu of
5 eligibility for hospital care, medical services, and
6 other health care (excluding nursing home care and
7 domiciliary care) under the VetsCare Federal pro-
8 gram under chapter 17 of this title or any other law
9 administered by the Secretary.

10 “(b) ENROLLMENT.—The Secretary shall admin-
11 ister—

12 “(1) an open enrollment period for the
13 VetsCare Choice program that corresponds to the
14 open enrollment period for the Federal Employees
15 Health Benefits program described in section
16 8905(g); and

17 “(2) special enrollment periods based on quali-
18 fying life events of veterans similar to such events
19 under the Federal Employees Health Benefits Pro-
20 gram, except that the change of priority group shall
21 also be treated as a qualifying life event.

22 “(c) EFFECT OF ELECTION.—While an election
23 under subsection (a)(2) of a veteran described in that sub-
24 section is in effect, the veteran is not eligible for hospital
25 care, medical services, and other health care (excluding

1 nursing home care and domiciliary care) under chapter 17
2 of this title or any other law administered by the Sec-
3 retary.

4 “(d) EXCEPTIONS.—The following veterans are not
5 eligible for health insurance support under this sub-
6 chapter:

7 “(1) Any veteran eligible for care under the
8 Medicare program under title XVIII of the Social
9 Security Act (42 U.S.C. 1395 et seq.).

10 “(2) Any veteran who—

11 “(A) first enrolls in the system of annual
12 patient enrollment established and operated by
13 the Secretary under section 1705(a) of this title
14 on or after the date described in section
15 101(c)(3) of the Caring for our Heroes in the
16 21st Century Act.; and

17 “(B) is in priority group 7 or priority
18 group 8.

19 “(e) COMMENCEMENT OF AVAILABILITY OF SUP-
20 PORT.—Health insurance support under this subchapter
21 shall commence being available as follows:

22 “(1) With respect to veterans in priority group
23 1, 2, or 3, on the first day of the first month that
24 begins on or after the date described in section

1 101(c)(3) of the Caring for our Heroes in the 21st
2 Century Act.

3 “(2) With respect to veterans in a priority
4 group other than 1, 2, or 3, on the first day of the
5 first month that begins on or after the date that is
6 180 days after the commencement date under para-
7 graph (1).

8 “(f) PRIORITY GROUP DEFINED.—In this section,
9 the term ‘priority group’ means the priority groups estab-
10 lished by the Secretary for purposes of the enrollment of
11 veterans in the patient enrollment system under section
12 1705(a) of this title.

13 **“§ 2603. Qualifying health insurance**

14 “Health insurance support may be provided under
15 this subchapter only for health plans that—

16 “(1) include the types of health care authorized
17 under section 1079 of title 10, United States Code;
18 and

19 “(2) provide such additional elements of cov-
20 erage as the Secretary shall prescribe for purposes
21 of this subchapter.

22 **“§ 2604. Health insurance support**

23 “(a) IN GENERAL.—The Secretary shall provide
24 health insurance support to veterans eligible for such sup-
25 port under this subchapter through premium support

1 under subsections (b) and (c), cost-sharing support under
2 subsection (d), and alternative support under subsection
3 (e) by paying or reimbursing such veterans for the costs
4 associated with such health insurance support. The Sec-
5 retary shall make such payments or reimbursements in a
6 manner similar to the manner in which the Centers for
7 Medicare & Medicaid Services make similar payments and
8 reimbursements.

9 “(b) PREMIUM SUPPORT GENERALLY.—The pre-
10 mium support provided by the Secretary under this sub-
11 section is as follows:

12 “(1) TIER 1.—To any veteran with a service-
13 connected disability rated as 100 percent disabling,
14 health insurance support sufficient to provide bene-
15 fits to the veteran under a health plan that are actu-
16 arially equivalent to 100 percent of the full actuarial
17 value of the benefits provided under the health plan.
18 A health plan under this paragraph may be referred
19 to as a ‘Tier 1 Plan’.

20 “(2) TIER 2.—To any veteran in priority group
21 1 not covered by paragraph (1) and any veteran in
22 priority group 2, health insurance support sufficient
23 to provide benefits to the veteran under a health
24 plan that are actuarially equivalent to 90 percent of
25 the full actuarial value of the benefits provided

1 under the health plan. A health plan under this
2 paragraph may be referred to as a ‘Tier 2 Plan’.

3 “(3) TIER 3.—To any veteran in priority group
4 3 or priority group 4, health insurance support suffi-
5 cient to provide benefits to the veteran under a
6 health plan that are actuarially equivalent to 80 per-
7 cent of the full actuarial value of the benefits pro-
8 vided under the health plan. A health plan under
9 this paragraph may be referred to as a ‘Tier 3
10 Plan’.

11 “(4) TIER 4.—To any veteran in priority group
12 5 or priority group 6, health insurance support suffi-
13 cient to provide benefits to the veteran under a
14 health plan that are actuarially equivalent to 70 per-
15 cent of the full actuarial value of the benefits pro-
16 vided under the health plan. A health plan under
17 this paragraph may be referred to as a ‘Tier 4
18 Plan’.

19 “(5) TIER 5.—To any veteran not in a priority
20 group covered by paragraphs (1) through (4) and
21 not ineligible for such support under section
22 2602(d)(2) of this title, health insurance support
23 sufficient to provide benefits to the veteran under a
24 health plan that are actuarially equivalent to 60 per-
25 cent of the full actuarial value of the benefits pro-

1 vided under the health plan. A health plan under
2 this paragraph may be referred to as a ‘Tier 5
3 Plan’.

4 “(c) ADDITIONAL PREMIUM SUPPORT BASED ON
5 NEED.—The premium support provided by the Secretary
6 under this subsection is as follows:

7 “(1) To any veteran with an annual gross
8 household income that is less than 133 percent of
9 the poverty line, health insurance support sufficient
10 to cover any costs of such monthly premium that are
11 more than 2 percent of the monthly gross household
12 income of the veteran.

13 “(2) To any veteran with an annual gross
14 household income that is between 133 percent and
15 150 percent of the poverty line, health insurance
16 support sufficient to cover any costs of such monthly
17 premium that are more than 3 percent of the
18 monthly gross household income of the veteran.

19 “(3) To any veteran with an annual gross
20 household income that is between 150 percent and
21 200 percent of the poverty line, health insurance
22 support sufficient to cover any costs of such monthly
23 premium that are more than 4 percent of the
24 monthly gross household income of the veteran.

1 “(4) To any veteran with an annual gross
2 household income that is between 200 percent and
3 250 percent of the poverty line, health insurance
4 support sufficient to cover any costs of such monthly
5 premium that are more than 6.3 percent of the
6 monthly gross household income of the veteran.

7 “(5) To any veteran with an annual gross
8 household income that is between 250 percent and
9 300 percent of the poverty line, health insurance
10 support sufficient to cover any costs of such monthly
11 premium that are more than 8.05 percent of the
12 monthly gross household income of the veteran.

13 “(6) To any veteran with an annual gross
14 household income that is between 300 percent and
15 400 percent of the poverty line, health insurance
16 support sufficient to cover any costs of such monthly
17 premium that are more than 9.5 percent of the
18 monthly gross household income of the veteran.

19 “(d) COST-SHARING SUPPORT.—The cost-sharing
20 support provided by the Secretary under this subsection
21 is as follows:

22 “(1) To any veteran with an annual gross
23 household income that is less than 150 percent of
24 the poverty line, health insurance support sufficient
25 to cover cost-sharing in order to ensure that the ef-

1 fective minimum actuarial value of the benefits pro-
2 vided under the health plan of the veteran is not less
3 than 94 percent.

4 “(2) To any veteran with an annual gross
5 household income that is between 150 percent and
6 200 percent of the poverty line, health insurance
7 support sufficient to cover cost-sharing in order to
8 ensure that the effective minimum actuarial value of
9 the benefits provided under the health plan of the
10 veteran is not less than 87 percent.

11 “(3) To any veteran with an annual gross
12 household income that is between 200 percent and
13 250 percent of the poverty line, health insurance
14 support sufficient to cover cost-sharing in order to
15 ensure that the effective minimum actuarial value of
16 the benefits provided under the health plan of the
17 veteran is not less than 73 percent.

18 “(e) ALTERNATIVE SUPPORT FOR VETERANS WITH
19 CERTAIN HEALTH INSURANCE.—

20 “(1) IN GENERAL.—Notwithstanding any other
21 provision of this section, upon the election of a vet-
22 eran eligible for health insurance support under this
23 subchapter who obtains a high deductible health
24 plan that includes a health savings account under
25 section 223 of the Internal Revenue Code of 1986,

1 the Secretary shall contribute an amount calculated
2 under paragraph (2) into such health savings ac-
3 count on behalf of the veteran.

4 “(2) AMOUNT CALCULATED.—The amount cal-
5 culated under this paragraph is an amount equal to
6 the difference between—

7 “(A) the amount of health insurance sup-
8 port the veteran would otherwise have received
9 under the subsection of this section applicable
10 to the veteran; and

11 “(B) the amount payable by the veteran in
12 connection with the high deductible health plan
13 described in paragraph (1).

14 “(f) DETERMINATIONS BASED ON COST OF
15 PLANS.—In making determinations under this section
16 with respect to the amount of health insurance support
17 to provide to a veteran, the Secretary shall make such de-
18 terminations based on the costs associated with the sec-
19 ond-least-costly health plan available to the veteran in the
20 area in which the veteran resides.

21 “(g) DEFINITIONS.—In this section:

22 “(1) The term ‘cost-sharing’, in connection with
23 the receipt of health care and treatment under a
24 health plan, means any copayments, deductibles, or
25 other charges imposed, collected, or otherwise re-

1 quired by a health insurance provider or health care
2 provider in connection with the receipt of health care
3 and treatment under such health plan.

4 “(2) The term ‘poverty line’ means the poverty
5 line (as defined in section 673(2) of the Community
6 Services Block Grant Act (42 U.S.C. 9902(2)) appli-
7 cable to a family of the size involved.

8 “(3) The term ‘high deductible health plan’ has
9 the meaning given that term in section 223(c)(2) of
10 the Internal Revenue Code of 1986.

11 “(4) The term ‘priority group’ means the pri-
12 ority groups established by the Secretary for pur-
13 poses of the enrollment of veterans in the patient en-
14 rollment system under section 1705(a) of this title.

15 **“§ 2605. Treatment of other health plans**

16 “(a) SECONDARY PAYER.—

17 “(1) IN GENERAL.—Notwithstanding any other
18 provision of law, any health plan (including a State
19 plan under title XIX of the Social Security Act (42
20 U.S.C. 1396 et seq.) and the TRICARE program
21 under chapter 55 of title 10) under which a veteran
22 is covered that is not a health plan for which health
23 insurance support is provided under this subchapter
24 shall be responsible for the payment of costs for any
25 health care received by an eligible individual for a

1 non-service connected disability up to the maximum
2 amount allowable under such plan before any health
3 plan for which health insurance support is provided
4 under this subchapter is responsible for any such
5 costs, if applicable.

6 “(2) NOTIFICATION.—The Secretary of Health
7 and Human Services, the Secretary of Defense, or
8 any other head of a relevant department or agency
9 of the Federal Government shall notify the Secretary
10 of Veterans Affairs of an eligible individual being
11 covered under a health plan described in paragraph

12 (1).

13 “(b) TREATMENT OF EMPLOYER SPONSORED
14 HEALTH PLANS.—

15 “(1) IN GENERAL.—The provisions of section
16 1862(b)(3)(C) of the Social Security Act (42 U.S.C.
17 1395y(b)(3)(C)) shall apply with respect to financial
18 or other incentives for an employee who is a veteran
19 not to enroll (or to terminate enrollment) under a
20 health plan that is not a health plan for which
21 health insurance support is provided under this sub-
22 chapter and that would (in the case of such enroll-
23 ment) be responsible under subsection (a) for the
24 payment of costs for health care received by the vet-
25 eran in the same manner as such section

1 1862(b)(3)(C) applies to financial or other incentives
2 for an individual entitled to benefits under title
3 XVIII of the Social Security Act (42 U.S.C. 1395 et
4 seq.) not to enroll (or to terminate enrollment)
5 under a group health plan or a large group health
6 plan which would (in the case of enrollment) be a
7 primary plan (as defined in section 1862(b)(2)(A) of
8 such Act).

9 “(2) REGULATIONS.—The Secretary may by
10 regulation adopt such additional exceptions to the
11 prohibition described in paragraph (1) as the Sec-
12 retary considers appropriate and such paragraph
13 shall be implemented taking into account the adop-
14 tion of such exceptions.

15 “(3) AGREEMENTS.—The Secretary of Veterans
16 Affairs and the Secretary of Health and Human
17 Services may enter into agreements to carry out this
18 subsection. Any such agreement shall provide that
19 any expenses incurred by the Secretary of Health
20 and Human Services pertaining to carrying out this
21 subsection shall be reimbursed by the Secretary of
22 Veterans Affairs.

23 “(4) GROUP HEALTH PLAN DEFINED.—In this
24 subsection, the term ‘group health plan’ means a
25 group health plan (as that term is defined in section

1 5000(b)(1) of the Internal Revenue Code of 1986
2 without regard to section 5000(d) of the Internal
3 Revenue Code of 1986).

4 **“§ 2606. Receipt of health care through the Depart-**
5 **ment**

6 “(a) CONTRACTS.—Any health insurance provider
7 that provides a health plan for which health insurance
8 support may be provided under this subchapter or sub-
9 chapter II may enter into a contract with the Veterans
10 Accountable Care Organization under which the medical
11 personnel and facilities of the Veterans Accountable Care
12 Organization may be treated as a designated provider for
13 purposes of such health plan.

14 “(b) COST OF CARE.—The cost, including any copay-
15 ments, of any health care or treatment provided to a vet-
16 eran by the Veterans Accountable Care Organization
17 under a contract under subsection (a) shall be determined
18 by the Veterans Accountable Care Organization.

19 “(c) MECHANISM.—The Board of Directors of the
20 Veterans Accountable Care Organization shall establish a
21 mechanism through which the Veterans Accountable Care
22 Organization enters into contracts with health insurance
23 providers under subsection (a).

1 **“§ 2607. Pharmacy benefits**

2 “A veteran who is enrolled in the VetsCare Choice
3 program or the VetsCare Senior program may fill pre-
4 scriptions at pharmacies of the Department.

5 “SUBCHAPTER II—MEDICARE-ELIGIBLE
6 VETERANS

7 **“§ 2611. VetsCare Senior program: designation of re-
8 cipients**

9 “(a) IN GENERAL.—The authorities for the provision
10 of health insurance support under this subchapter may be
11 referred to as the ‘VetsCare Senior program’.

12 “(b) DESIGNATION OF RECIPIENTS.—Any veteran
13 who receives health insurance support under this sub-
14 chapter may be referred to in the receipt of support as
15 participating in the ‘VetsCare Senior program’.

16 “(c) RELATIONSHIP TO CARE BY VETERANS AC-
17 COUNTABLE CARE ORGANIZATION.—Health insurance
18 support under this subchapter is in addition to any health
19 care or medical services furnished to a veteran at a facility
20 operated by the Veterans Accountable Care Organization.

21 **“§ 2612. Medicare support**

22 “(a) IN GENERAL.—The Secretary shall provide
23 health insurance support to each covered veteran equal to
24 the costs incurred by such veteran for Medicare premiums
25 and cost-sharing under parts A, B, C, and D of title XVIII
26 of the Social Security Act (42 U.S.C. 1395 et seq.) and

VA-18-0457-A-000066

1 for premiums and cost-sharing for medicare supplemental
2 policies under section 1882 of such Act (42 U.S.C.
3 1395ss).

4 “(b) RELATIONSHIP WITH VETSCARE FEDERAL.—
5 Notwithstanding any other provision of law, if a covered
6 veteran is enrolled in the VetsCare Federal program under
7 section 1701A of this title, the Medicare program under
8 title XVIII of the Social Security Act (42 U.S.C. 1395
9 et seq.) (or a medicare supplemental policy under section
10 1882 of such Act (42 U.S.C. 1395ss)) shall be responsible
11 for the payment of costs for any health care received by
12 an eligible individual for a non-service connected disability
13 up to the maximum amount allowable under such program
14 (or supplemental policy) for such health care before the
15 VetsCare Federal program is responsible for any such
16 costs, if applicable.

17 “(c) AVAILABILITY OF PAYMENT OR REIMBURSE-
18 MENT.—

19 “(1) COMMENCEMENT.—Health insurance sup-
20 port under this subchapter shall commence being
21 available as follows:

22 “(A) With respect to covered veterans in
23 priority group 1, 2, or 3, on the first day of the
24 first month that begins on or after the date de-

1 scribed in section 101(c)(3) of the Caring for
2 our Heroes in the 21st Century Act.

3 “(B) With respect to covered veterans in a
4 priority group other than 1, 2, or 3, on the first
5 day of the first month that begins on or after
6 the date that is 180 days after the commence-
7 ment date under paragraph (1).

8 “(2) EXCLUSION OF CERTAIN VETERANS.—A
9 covered veteran is not eligible for health insurance
10 support under this section if such veteran—

11 “(A) first enrolls in the system of annual
12 patient enrollment established and operated by
13 the Secretary under section 1705(a) of this title
14 on or after the date of the enactment of this
15 Act; and

16 “(B) is in priority group 7 or 8.

17 “(d) DEFINITIONS.—In this section:

18 “(1) The term ‘cost-sharing’, in connection with
19 the receipt of health care and treatment under the
20 Medicare program under title XVIII of the Social
21 Security Act (42 U.S.C. 1395 et seq.) or medicare
22 supplemental policies under section 1882 of such Act
23 (42 U.S.C. 1395ss), means any copayments,
24 deductibles, or other charges imposed, collected, or
25 otherwise required by a health insurance provider or

1 health care provider in connection with receipt of
 2 health care and treatment under such program or
 3 supplemental policies.

4 “(2) The term ‘covered veteran’ means a vet-
 5 eran receiving benefits under the Medicare program
 6 under title XVIII of the Social Security Act.

7 “(3) The term ‘priority group’ means the pri-
 8 ority groups established by the Secretary for pur-
 9 poses of the enrollment of veterans in the patient en-
 10 rollment system under section 1705(a) of this title.”.

11 (b) CLERICAL AMENDMENT.—The table of chapters
 12 at the beginning title 38, United States Code, is amended
 13 by inserting after the item relating to chapter 24 the fol-
 14 lowing new item:

“Chapter 26 .Veterans Independence in Health Care 2601”.

15 (c) CONFORMING AMENDMENTS.—

16 (1) MINIMUM ESSENTIAL COVERAGE.—Section
 17 5000A(f)(1)(A)(v) of the Internal Revenue Code of
 18 1986 is amended by striking “or 18” and inserting
 19 “, 18, or 26”.

20 (2) MEDICARE PART B.—

21 (A) NON-APPLICATION OF LATE ENROLL-
 22 MENT PENALTY.—Section 1839(b) of the Social
 23 Security Act (42 U.S.C. 1395r(b)) is amended,
 24 in the second sentence, by inserting “or months
 25 for which the individual can demonstrate that

VA-18-0457-A-000069

1 the individual was enrolled in the VetsCare Sen-
2 ior program under subchapter II of chapter 26
3 of title 38, United States Code” after “an indi-
4 vidual described in section 1837(k)(3)”.

5 (B) SPECIAL ENROLLMENT PERIOD.—Sec-
6 tion 1837 of the Social Security Act (42 U.S.C.
7 1395p) is amended by adding at the end the
8 following new subsection:

9 “(m)(1) In the case of any individual who is enrolled
10 in the VetsCare Senior program under subchapter II of
11 chapter 26 of title 38, United States Code at the time
12 the individual is entitled to part A under section 226 or
13 section 226A and who is eligible to enroll but who has
14 elected not to enroll (or to be deemed enrolled) during the
15 individual’s initial enrollment period, there shall be a spe-
16 cial enrollment period as specified by the Secretary.

17 “(2) In the case of an individual who enrolls during
18 the special enrollment period provided under paragraph
19 (1), the coverage period under this part shall begin on
20 such date specified by the Secretary.

21 “(3) An individual may only enroll during the special
22 enrollment period provided under paragraph (1) one time
23 during the individual’s lifetime.

24 “(4) The Secretary of Veterans Affairs shall collabo-
25 rate with the Secretary of Health and Human Services

1 and the Commissioner of Social Security to provide for
 2 the accurate identification of individuals described in para-
 3 graph (1). The Secretary of Veterans Affairs shall provide
 4 such individuals with notification with respect to this sub-
 5 section. The Secretary of Veterans Affairs shall collabo-
 6 rate with the Secretary of Health and Human Services
 7 and the Commissioner of Social Security to ensure appro-
 8 priate follow up pursuant to any notification provided
 9 under the preceding sentence.”.

10 **SEC. 105. COORDINATION BETWEEN VETSCARE CHOICE**

11 **PROGRAM AND ELIGIBILITY TO MAKE CON-**

12 **TRIBUTIONS TO HEALTH SAVINGS AC-**
 13 **COUNTS.**

14 (a) IN GENERAL.—Section 223(c)(1)(B) of the Inter-
 15 nal Revenue Code of 1986 is amended by striking “and”
 16 at the end of clause (ii), by striking the period at the end
 17 of clause (iii) and inserting “, and”, and by adding at the
 18 end the following new clause:

19 “(iv) coverage for health insurance
 20 support under the VetsCare Choice pro-
 21 gram under subchapter I of chapter 26 of
 22 title 38, United States Code.”.

23 (b) DENIAL OF DEDUCTION FOR AMOUNTS NOT IN-
 24 CLUDIBLE IN GROSS INCOME.—Subsection (b) of section

1 223 of the Internal Revenue Code of 1986 is amended by
2 adding at the end the following new paragraph:

3 “(9) AMOUNTS NOT INCLUDIBLE IN GROSS IN-
4 COME.—No amount paid to a health savings account
5 of an individual shall be taken into account under
6 subsection (a) if (without regard to this section)
7 such amount, when paid to or on behalf of such indi-
8 vidual, is excluded from gross income of the indi-
9 vidual or exempt from taxation under any provision
10 of Federal law.”.

11 (c) EFFECTIVE DATE.—The amendments made by
12 this section shall apply to amounts paid to a health sav-
13 ings account (as defined in section 223(d) of the Internal
14 Revenue Code of 1986) after the date of the enactment
15 of this Act.

16 **SEC. 106. PUBLICATION OF HEALTH CARE INFORMATION.**

17 (a) IN GENERAL.—The Secretary of Veterans Affairs
18 shall make available to the public on an ongoing basis in-
19 formation about the operations of the Veterans Health Ad-
20 ministration in a manner similar to publication of infor-
21 mation under the Medicare Accountable Care Organiza-
22 tion program to better monitor and support continuous
23 improvement in the Veterans Health Administration.

24 (b) ELEMENTS.—The information published under
25 subsection (a) shall include information about the oper-

1 ations of the Veterans Health Administration, including
2 metrics regarding quality, safety, patient experience, time-
3 liness, and cost-effectiveness.

4 **TITLE II—REALIGNMENT OF**
5 **MEDICAL CENTERS OF DE-**
6 **PARTMENT OF VETERANS AF-**
7 **FAIRS**

8 **SEC. 201. REALIGNMENT OF MEDICAL CENTERS.**

9 (a) REALIGNMENT.—

10 (1) IN GENERAL.—Except as provided in sub-
11 section (b), the Veterans Accountable Care Organi-
12 zation shall—

13 (A) close all medical centers recommended
14 for closure by the VetsCare Advisory Commis-
15 sion in each report submitted under section
16 301(b)(2); and

17 (B) realign all medical centers rec-
18 ommended for realignment by the Commission
19 in each such report.

20 (2) MAINTENANCE OF HEALTH CARE SERV-
21 ICES.—In carrying out paragraph (1), the Veterans
22 Accountable Care Organization shall ensure that the
23 availability of health care services for veterans in the
24 area in which a medical center is closed or realigned

1 under paragraph (1) is not decreased as a result of
2 such closure or realignment.

3 (b) CONGRESSIONAL DISAPPROVAL.—

4 (1) IN GENERAL.—The Veterans Accountable
5 Care Organization may not carry out any closure or
6 realignment recommended by the Commission in a
7 report submitted under section 301(b)(2) if a resolu-
8 tion of disapproval is enacted before the earlier of—

9 (A) the end of the 45-day period beginning
10 on the date on which the report is submitted;
11 or

12 (B) the adjournment of Congress sine die
13 for the session during which such report is sub-
14 mitted.

15 (2) CALCULATION OF DAYS.—For purposes of
16 paragraph (1) of this subsection and subsections (a)
17 and (c) of section 202, the days on which either
18 House of Congress is not in session because of an
19 adjournment of more than three days to a day cer-
20 tain shall be excluded in the computation of a pe-
21 riod.

22 (c) RESOLUTION OF DISAPPROVAL DEFINED.—In
23 this section, the term “resolution of disapproval” means
24 a resolution of disapproval under section 202.

1 **SEC. 202. CONGRESSIONAL CONSIDERATION OF COMMIS-**
2 **SION REPORT.**

3 (a) RESOLUTION OF DISAPPROVAL.—For purposes of
4 section 201 and this section, the term “resolution of dis-
5 approval” means only a joint resolution—

6 (1) that is introduced during the 10-day period
7 beginning on the date on which Congress receives
8 the report under section 301(b)(2);

9 (2) that does not have a preamble;

10 (3) the sole matter after the resolving clause of
11 which is as follows: “That Congress disapproves the
12 recommendations of the VetsCare Advisory Commis-
13 sion as submitted to Congress on _____”, with
14 the blank space being filled in with the date on
15 which the report was transmitted to Congress; and

16 (4) the title of which is as follows: “Joint reso-
17 lution disapproving the recommendations of the
18 VetsCare Advisory Commission.”.

19 (b) REFERRAL.—

20 (1) IN THE SENATE.—A resolution of dis-
21 approval introduced in the Senate shall be referred
22 to the Committee on Veterans’ Affairs of the Senate.

23 (2) IN THE HOUSE OF REPRESENTATIVES.—A
24 resolution of disapproval that is introduced in the
25 House of Representatives shall be referred to the

1 Committee on Veterans' Affairs of the House of
2 Representatives.

3 (c) DISCHARGE.—If the committee to which a resolu-
4 tion of disapproval is referred has not reported such reso-
5 lution (or an identical resolution) by the end of the 20-
6 day period beginning on the date on which the Congress
7 receives the report under section 301(b)(2), such com-
8 mittee shall be, at the end of such period, discharged from
9 further consideration of such resolution, and such resolu-
10 tion shall be placed on the appropriate calendar of the
11 House involved.

12 (d) CONSIDERATION.—

13 (1) MOTION TO PROCEED.—On or after the
14 third day after the date on which the committee to
15 which a resolution of disapproval is referred has re-
16 ported, or has been discharged (under subsection
17 (c)) from further consideration of, such a resolution,
18 it is in order (even though a previous motion to the
19 same effect has been disagreed to) for any Member
20 of the respective House to move to proceed to the
21 consideration of the resolution. A Member may make
22 such a motion only on the day after the calendar day
23 on which the Member announces to the House con-
24 cerned the Member's intention to make the motion,
25 except that, in the case of the House of Representa-

1 tives, the motion may be made without such prior
2 announcement if the motion is made by direction of
3 the committee to which the resolution was referred.
4 All points of order against the resolution of dis-
5 approval (and against consideration of the resolu-
6 tion) are waived. The motion is highly privileged in
7 the House of Representatives and is privileged in the
8 Senate and is not debatable. The motion is not sub-
9 ject to amendment, or to a motion to postpone, or
10 to a motion to proceed to the consideration of other
11 business. A motion to reconsider the vote by which
12 the motion is agreed to or disagreed to shall not be
13 in order. If a motion to proceed to the consideration
14 of the resolution of disapproval is agreed to, the re-
15 spective House shall immediately proceed to consid-
16 eration of the resolution of disapproval without in-
17 tervening motion, order, or other business, and the
18 resolution of disapproval shall remain the unfinished
19 business of the respective House until disposed of.

20 (2) FURTHER CONSIDERATION.—Debate on the
21 resolution of disapproval, and on all debatable mo-
22 tions and appeals in connection therewith, shall be
23 limited to not more than two hours, which shall be
24 divided equally between those favoring and those op-
25 posing the resolution of disapproval. An amendment

1 to the resolution of disapproval is not in order. A
2 motion further to limit debate is in order and not
3 debatable. A motion to postpone, or a motion to pro-
4 ceed to the consideration of other business, or a mo-
5 tion to recommit the resolution of disapproval is not
6 in order. A motion to reconsider the vote by which
7 the resolution of disapproval is agreed to or dis-
8 agreed to is not in order.

9 (3) FINAL PASSAGE.—Immediately following
10 the conclusion of the debate on the resolution of dis-
11 approval and a single quorum call at the conclusion
12 of the debate if requested in accordance with the
13 rules of the appropriate House, the vote on final
14 passage of the resolution of disapproval shall occur.

15 (4) APPEALS.—Appeals from the decisions of
16 the Chair relating to the application of the rules of
17 the Senate or the House of Representatives, as the
18 case may be, to the procedure relating to a resolu-
19 tion of disapproval shall be decided without debate.

20 (e) CONSIDERATION BY OTHER HOUSE.—

21 (1) IN GENERAL.—If, before the passage by one
22 House of a resolution of disapproval of that House,
23 that House receives from the other House a resolu-
24 tion of disapproval, the following procedures shall
25 apply:

1 (A) The resolution of disapproval of the
2 other House shall not be referred to a com-
3 mittee and may not be considered in the House
4 receiving it except in the case of final passage
5 as provided in subparagraph (B)(ii).

6 (B) With respect to a resolution of dis-
7 approval of the House receiving the resolu-
8 tion—

9 (i) the procedure in that House shall
10 be the same as if no resolution of dis-
11 approval had been received from the other
12 House; but

13 (ii) the vote on final passage shall be
14 on the resolution of disapproval of the
15 other House.

16 (2) DISPOSITION OF RESOLUTION.—Upon dis-
17 position of the resolution of disapproval received
18 from the other House, it shall no longer be in order
19 to consider the resolution that originated in the re-
20 ceiving House.

21 (f) RULES OF THE SENATE AND HOUSE.—This sec-
22 tion is enacted by Congress—

23 (1) as an exercise of the rulemaking power of
24 the Senate and the House of Representatives, re-
25 spectively, and as such it is deemed a part of the

1 rules of each House, respectively, but applicable only
2 with respect to the procedure to be followed in that
3 House in the case of a resolution of disapproval, and
4 it supersedes other rules only to the extent that it
5 is inconsistent with such rules; and

6 (2) with full recognition of the constitutional
7 right of either House to change the rules (so far as
8 relating to the procedure of that House) at any time,
9 in the same manner, and to the same extent as in
10 the case of any other rule of that House.

11 **TITLE III—IMPLEMENTATION OF** 12 **HEALTH CARE REFORMS**

13 **SEC. 301. VETSCARE ADVISORY COMMISSION.**

14 (a) ESTABLISHMENT OF COMMISSION.—There is es-
15 tablished a permanent independent commission to be
16 known as the “VetsCare Advisory Commission” (in this
17 section referred to as the “Commission”).

18 (b) DUTIES.—

19 (1) POLICIES ON ACCESS TO AND QUALITY OF
20 CARE.—The Commission shall—

21 (A) review the policies of the Veterans Ac-
22 countable Care Organization and the Veterans
23 Health Insurance Program that affect the ac-
24 cess of veterans to health care and the quality
25 of the health care, including with respect to the

1 VetsCare Federal program, the VetsCare
2 Choice program, and the VetsCare Senior pro-
3 gram; and

4 (B) make recommendations to Congress
5 concerning such access and quality policies, in-
6 cluding by identifying cost savings required to
7 offset such recommendations.

8 (2) REALIGNMENT OF MEDICAL CENTERS.—

9 (A) IN GENERAL.—The Commission shall
10 determine the medical centers of the Veterans
11 Accountable Care Organization for which clo-
12 sure or realignment would be feasible and ad-
13 visable.

14 (B) RECOMMENDATIONS.—Not later than
15 180 days after the date of the enactment of the
16 Act, the Commission shall submit to the Presi-
17 dent, the Secretary of Veterans Affairs, and the
18 appropriate congressional committees, such rec-
19 ommendations for closure and realignment of
20 medical centers described in subparagraph (A)
21 as the Commission considers appropriate.

22 (C) MAINTENANCE OF HEALTH CARE
23 SERVICES.—In carrying out the duties of the
24 Commission under this paragraph, the Commis-
25 sion shall ensure that the availability of health

1 care services for veterans in areas in which clo-
2 sure or realignment is recommended under sub-
3 paragraph (B) is not decreased as a result of
4 any such closure or realignment.

5 (c) REPORTS.—

6 (1) ANNUAL REPORTS ON POLICIES.—Not later
7 than March 1, 2018, and each year thereafter, the
8 Commission shall submit to the President, the Sec-
9 retary of Veterans Affairs, and the appropriate con-
10 gressional committees a report on the policies re-
11 viewed under subparagraph (A) of subsection (b)(1),
12 including any recommendations regarding such poli-
13 cies pursuant to subparagraph (B) of such sub-
14 section.

15 (2) ANNUAL REPORTS ON ISSUES.—Not later
16 than June 1, 2018, and each year thereafter, the
17 Commission shall submit to the President, the Sec-
18 retary of Veterans Affairs, and the appropriate con-
19 gressional committees a report containing an exam-
20 ination of issues affecting the health care programs
21 for veterans under title 38, United States Code, in-
22 cluding implications of changes in health care deliv-
23 ery in the United States and in the market for
24 health care services under such programs.

1 (3) REPORT ON IMPLEMENTATION.—Not later
2 than 90 days after the date described in section
3 101(c)(3), the Commission shall submit to the Presi-
4 dent, the Secretary of Veterans Affairs, and the ap-
5 propriate congressional committees a report on the
6 implementation by the Secretary of this Act and the
7 amendments made by this Act.

8 (4) COMMENTS ON CERTAIN SECRETARIAL RE-
9 PORTS.—If the Secretary of Veterans Affairs sub-
10 mits to Congress (or a committee of Congress) a re-
11 port that is required by law and that relates to the
12 provision of health care to veterans pursuant to title
13 38, United States Code, the Secretary shall transmit
14 a copy of the report to the Commission. The Com-
15 mission shall review the report and, not later than
16 six months after the date of the submittal of the
17 Secretary's report to Congress, shall submit to the
18 appropriate congressional committees written com-
19 ments on such report. Such comments may include
20 such recommendations as the Commission deter-
21 mines appropriate.

22 (5) AGENDA AND ADDITIONAL REVIEWS.—The
23 Commission shall consult periodically with the chair-
24 men and ranking minority members of the appro-
25 priate congressional committees regarding the agen-

1 da of the Commission and progress towards achiev-
2 ing the agenda. The Commission may conduct addi-
3 tional reviews, and submit additional reports to the
4 appropriate congressional committees, from time to
5 time on such topics relating to the program under
6 this title as may be requested by such chairmen and
7 members as the Committee determines appropriate.

8 (6) AVAILABILITY OF REPORTS.—Each report
9 submitted by the Commission under this subsection
10 shall be made publicly available.

11 (d) MEMBERSHIP.—

12 (1) NUMBER AND APPOINTMENT.—The Com-
13 mission shall be composed of 15 members appointed
14 by the Comptroller General of the United States, at
15 least six of whom shall be veterans. The Comptroller
16 General shall make the initial appointment of a
17 member not later than 60 days after the date of the
18 enactment of this Act.

19 (2) QUALIFICATIONS.—

20 (A) IN GENERAL.—The membership of the
21 Commission shall include individuals with na-
22 tional recognition for having expertise in health
23 finance and economics, actuarial science, health
24 facility management, health plans and inte-
25 grated delivery systems, reimbursement of

1 health facilities, allopathic and osteopathic med-
2 icine and kinds of medical treatment, and other
3 related fields, who provide a mix of different
4 professionals, broad geographic representation,
5 and a balance between urban and rural rep-
6 resentatives, including individuals described in
7 subparagraph (B);

8 (B) SPECIFIC INDIVIDUALS TO BE AP-
9 POINTED.—Of the members appointed under
10 paragraph (1)—

11 (i) at least one member shall rep-
12 resent an organization recognized by the
13 Secretary of Veterans Affairs for the rep-
14 resentation of veterans under section 5902
15 of title 38, United States Code;

16 (ii) at least one member shall have ex-
17 perience as senior management for a pri-
18 vate integrated health care system with an
19 annual gross revenue of more than
20 \$500,000,000;

21 (iii) at least one member shall be fa-
22 miliar with Federal Government health
23 care systems, including such systems of the
24 Department of Defense, the Indian Health
25 Service, and Federally-qualified health cen-

1 ters (as defined in section 1905(l)(2)(B) of
2 the Social Security Act (42 U.S.C.
3 1396d(l)(2)(B)));

4 (iv) at least one member shall be fa-
5 miliar with the Veterans Health Adminis-
6 tration but shall not be currently employed
7 by the Department of Veterans Affairs;

8 (v) at least one member shall have ex-
9 perience as senior management for a pri-
10 vate health plan with an annual gross rev-
11 enue of more than \$500,000,000; and

12 (vi) at least one member shall have
13 experience as senior management for a pri-
14 vate health care accountable care organiza-
15 tion with an annual gross revenue of more
16 than \$500,000,000.

17 (C) MAJORITY NONPROVIDERS.—Individ-
18 uals who are directly involved in the provision,
19 or management of the delivery, of items and
20 services covered under this Act or the amend-
21 ments made by this Act shall not constitute a
22 majority of the membership of the Commission.

23 (D) ETHICAL DISCLOSURE.—The Comp-
24 troller General shall establish a system for pub-
25 lic disclosure by members of the Commission of

1 financial and other potential conflicts of interest
2 relating to such members.

3 (3) TERMS.—

4 (A) IN GENERAL.—A member of the Com-
5 mission shall serve for a term of three years,
6 except the members first appointed shall be ap-
7 pointed for staggered terms as the Comptroller
8 General considers appropriate to ensure that
9 the terms of no more than five members expire
10 in the same year.

11 (B) VACANCIES.—Any member appointed
12 to fill a vacancy occurring before the expiration
13 of the term for which the member's predecessor
14 was appointed shall be appointed only for the
15 remainder of that term. A member may serve
16 after the expiration of that member's term until
17 a successor has taken office. A vacancy in the
18 Commission shall not affect its powers, but
19 shall be filled in the same manner in which the
20 original appointment was made.

21 (4) CHAIRPERSON AND VICE CHAIRPERSON.—

22 The Comptroller General shall designate a member
23 of the commission, at the time of appointment of the
24 member, to serve as Chairperson of the Commission,
25 except that in the case of vacancy the Comptroller

1 General may designate another member for the re-
2 mainder of that Chairperson's term. The Commis-
3 sion shall select a Vice Chairperson from among its
4 members by a majority vote.

5 (5) COMPENSATION.—

6 (A) IN GENERAL.—Members of the Com-
7 mission shall be compensated at a rate equal to
8 the daily equivalent of the annual rate of basic
9 pay prescribed for level IV of the Executive
10 Schedule under section 5315 of title 5, United
11 States Code, for each day (including travel
12 time) during which such member is engaged in
13 the performance of the duties of the Commis-
14 sion.

15 (B) OFFICERS OR EMPLOYEES OF THE
16 UNITED STATES.—All members of the Commis-
17 sion who are officers or employees of the United
18 States shall serve without compensation in addi-
19 tion to that received for their services as offi-
20 cers or employees of the United States.

21 (C) TRAVEL EXPENSES.—The members of
22 the Commission shall be allowed travel ex-
23 penses, including per diem in lieu of subsist-
24 ence, at rates authorized for employees of agen-
25 cies under subchapter I of chapter 57 of title 5,

1 United States Code, while away from their
2 homes or regular places of business in the per-
3 formance of services for the Commission.

4 (6) MEETINGS.—

5 (A) IN GENERAL.—The Commission shall
6 meet at the call of the Chairperson.

7 (B) INITIAL MEETING.—Not later than 15
8 days after the date on which eight voting mem-
9 bers of the Commission have been appointed,
10 the Commission shall hold its first meeting.

11 (C) QUORUM.—A majority of the members
12 of the Commission shall constitute a quorum.

13 (d) POWERS.—

14 (1) OBTAINING OFFICIAL DATA.—The Commis-
15 sion may secure directly from any Federal agency
16 such information as the Commission considers nec-
17 essary to carry out this section. Upon request of the
18 Chairperson of the Commission, the head of that de-
19 partment or agency shall furnish such information to
20 the Commission on an agreed upon schedule.

21 (2) DATA COLLECTION.—In order to carry out
22 its functions, the Commission shall—

23 (A) use existing information, both pub-
24 lished and unpublished, where possible, collected
25 and assessed either by its own staff or under

1 other arrangements made in accordance with
2 this section;

3 (B) carry out, or award grants or con-
4 tracts for, original research where existing in-
5 formation is inadequate; and

6 (C) adopt procedures allowing any inter-
7 ested party to submit information for the Com-
8 mission's use in making reports and rec-
9 ommendations.

10 (3) ACCESS OF GAO TO INFORMATION.—The
11 Comptroller General shall have unrestricted access
12 to all deliberations, records, and nonproprietary data
13 of the Commission, immediately upon request.

14 (4) PERIODIC AUDIT.—The Commission shall
15 be subject to periodic audit by the Comptroller Gen-
16 eral.

17 (e) PERSONNEL.—

18 (1) STAFF.—

19 (A) IN GENERAL.—The Chairperson of the
20 Commission may, without regard to the civil
21 service laws and regulations, appoint and termi-
22 nate additional personnel as may be necessary
23 to enable the Commission to perform its duties.

24 (B) COMPENSATION.—The Chairperson of
25 the Commission may fix the compensation of

1 personnel without regard to chapter 51 and
2 subchapter III of chapter 53 of title 5, United
3 States Code, relating to classification of posi-
4 tions and General Schedule pay rates, except
5 that the rate of pay for the executive director
6 and other personnel may not exceed the rate
7 payable for level V of the Executive Schedule
8 under section 5316 of such title.

9 (2) DETAIL OF GOVERNMENT EMPLOYEES.—

10 Any Federal Government employee may be detailed
11 to the Commission without reimbursement, and such
12 detail shall be without interruption or loss of civil
13 service status or privilege.

14 (3) PROCUREMENT OF TEMPORARY AND INTER-

15 MITTENT SERVICES.—The Chairperson of the Com-
16 mission may procure temporary and intermittent
17 services under section 3109(b) of title 5, United
18 States Code, at rates for individuals that do not ex-
19 ceed the daily equivalent of the annual rate of basic
20 pay prescribed for level V of the Executive Schedule
21 under section 5316 of such title.

22 (f) BUDGET REQUEST.—The Commission shall sub-
23 mit requests for appropriations in the same manner as the
24 Secretary of Veterans Affairs, but amounts appropriated

1 for the Commission shall be separate from amounts appro-
2 priated for the Secretary.

3 (g) DEFINITIONS.—In this section:

4 (1) The term “appropriate congressional com-
5 mittees” means the Committees on Veterans’ Affairs
6 of the House of Representatives and the Senate.

7 (2) The term “Veterans Accountable Care Or-
8 ganization” means the corporation established by
9 section 323 of title 38, United States Code, as added
10 by section 101;

11 (3) The term “Veterans Health Insurance Pro-
12 gram” means the program established by section
13 7309 of title 38, United States Code, as added by
14 section 102.

15 (4) The term “VetsCare Choice program”
16 means the program established by section 2601 of
17 title 38, United States Code, as added by section
18 104.

19 (5) The term “VetsCare Federal program”
20 means the program established by section 1701A of
21 title 38, United States Code, as added by section
22 103.

23 (6) The term “VetsCare Senior program”
24 means the program established by section 2611 of

1 title 38, United States Code, as added by section
2 104.

3 **TITLE IV—LONG-TERM CARE**
4 **INSURANCE FOR VETERANS**

5 **SEC. 401. VETERANS' ELIGIBILITY FOR LONG-TERM CARE**
6 **INSURANCE.**

7 (a) IN GENERAL.—Section 9001 of title 5, United
8 States Code, is amended—

9 (1) by redesignating paragraphs (5) through
10 (10) as (6) through (11), respectively;

11 (2) by inserting after paragraph (4) the fol-
12 lowing:

13 “(5) VETERAN.—The term ‘veteran’ has the
14 same meaning given the term in section 101(2) of
15 title 38, United States Code.”;

16 (3) in paragraph (6), as so redesignated—

17 (A) in subparagraph (A), by striking “or
18 (4).” and inserting “(4), or (5).”;

19 (B) in subparagraph (B), by striking “(1)
20 or (3).” and inserting “(1), (3), or (5).”;

21 (C) in subparagraph (C), by striking “or
22 (4)” and inserting “(4), or (5)”; and

23 (D) in subparagraph (D), by striking “or
24 (4)” and inserting “(4), or (5)”;

1 (4) in paragraph (7), as so redesignated, by
2 striking “or (5).” and inserting “(5), or (6).”; and

3 (5) in paragraph (11), as so redesignated—

4 (A) in subparagraph (C), by striking
5 “Commerce; and” and inserting “Commerce;”;

6 (B) in subparagraph (D), by striking
7 “Services.” and inserting “Services; and”; and

8 (C) by inserting after subparagraph (D):

9 “(E) with respect to a veteran, the Sec-
10 retary of Veterans Affairs.”.

11 (b) TECHNICAL AND CONFORMING AMENDMENTS.—

12 Title 5, United States Code, is amended as follows:

13 (1) Section 9002 is amended—

14 (A) in subsection (a), by striking “or (5)”
15 and inserting “(5), or (6)”; and

16 (B) in subsection (e)—

17 (i) in paragraph (2), by striking “or
18 (4)” and inserting “(4), or (5)”; and

19 (ii) in paragraph (4), by striking “sec-
20 tion 9001(9)” and inserting “section
21 9001(10)”.

22 (2) Section 9004(d) is amended by inserting
23 after “withheld under subsection (b)” the following:
24 “, who is an enrollee by virtue of being a veteran de-
25 scribed in section 9001(5) of this title,”.

- 1 (3) Section 9008(c) is amended by striking “(3)
2 or (4)” and inserting “(3), (4), or (5)”.

Remodeling veterans' health care for the 21st century

The Caring for Our Heroes Act would expand choices of providers

By Michael Kussman - - Tuesday, July 26, 2016

ANALYSIS/OPINION:

From 2007 to 2009, I served as undersecretary for health in the U.S. Department of Veterans Affairs (VA). Overseeing the [Veterans Health Administration \(VHA\)](#), I often saw the best of what our nation offers veterans recovering from the wounds of war in a system staffed by committed health professionals devoted to providing quality care.

Unfortunately, I also witnessed the shortfalls of that same system, where bureaucracy and an outdated institutional model created obstacles, waste and missed opportunities for reform. While we worked diligently to set the [VHA](#) on a sustainable course for the future, it was clear the model was under tremendous strain.

In the seven years since my retirement, the strain has only grown greater as the [VHA](#) struggles to adjust to the changing demands for care among a diverse population of veterans.

The current [VHA](#) — a large, centralized bureaucracy trapped in the policies, procedures and assumptions of the last century — is simply unprepared to respond to the health care needs of today's veterans. What is needed is a plan to transform the [VHA](#) to better meet those needs.

A proposal in Congress, the Caring for Our Heroes in the 21st Century Act, offers a promising way forward that will provide that transformation and ensure veterans have access to the timely, high-quality care they deserve.

This legislative draft by Rep. Cathy McMorris Rodgers, a Washington Republican, would enable critical reforms to the [VHA](#) to better reflect the realities of health care in the 21st century.

Paralyzed Veterans of America Outraged Over "Caring for Our Heroes in the 21st Century Act"

Draft Bill Pushes Most Catastrophically Injured and Low-Income Veterans Into Private Pay-As-You-Go Health Care

WASHINGTON, DC--(Marketwired - June 08, 2016) - Paralyzed Veterans of America (Paralyzed Veterans) today voiced its shock over a bill drafted by Rep. Cathy McMorris Rogers (R-WA), and supported by Rep. Doug Lamborn (R-CO), that would radically alter the delivery of health care for the most vulnerable American veterans by burdening them with medical costs that they can't bear, for care that in almost every case, is not the best option.

"The premium support model offered in Congresswoman McMorris' bill will put the lives of catastrophically disabled and low-income veterans in jeopardy by forcing them into private sector systems that already face their own waitlist crises and are ill-equipped to provide the specialized care these veterans need," explained Paralyzed Veterans of America Executive Director Sherman Gillums. "Paralyzed Veterans of America is appalled that a member of our U.S. Congress would ignore the choice made by thousands of veterans who prefer VA health care and take the first step toward absolving Congress of its responsibility to resource and oversee a veteran-centric healthcare system."

The "Caring For Our Heroes in the 21st Century Act" purports to reform the VA by establishing a Veterans Accountable Care Organization and Veterans Health Insurance Support that would incentivize veterans to leave the VA system of care. It provides no mechanism to ensure veterans' care is properly coordinated in the private sector, or that veterans receive the most appropriate care. The Act aims to realign the VA medical centers and designates private health care officials for veterans' hospital, emergency and other medical services, but it does not address the capability of the private sector to manage the volume and quality of care that is comparable to the VA system of care they currently rely on.

"Such actions carried out by our legislators suggest a willful ignorance of the struggle our veterans face," continued Gillums. "If this bill becomes law, who will explain to veterans with spinal cord injuries and severe mental health issues that putting them in line for care with the general population, which is outside of the purview of Title 38 and not monitored by Congress, is somehow better for them? As a veteran who underwent rehabilitation in a VA facility and relied on VA healthcare to stay healthy after suffering severe injury, I find it unconscionable."

"To say that Paralyzed Veterans of America's members are astounded by efforts to weaken a VA system that the most vulnerable veterans rely on is an understatement. We agree with those who are tired of hearing story after story of VA's failings, and we fight on the front lines of this issue to ensure changes

VA-18-0457-A-000099

ensue. We also acknowledge that those changes are happening. But this bill would undermine any progress made, and we strongly oppose this proposal and similar recommendations that mirror this effort. It would essentially make VA a non-governmental entity, which is the very definition of privatized care. In essence, it allows the federal government to renege on the obligation it has to care for our wounded and disabled soldiers for the remainder of their lives after service," concluded Gillums.

About Paralyzed Veterans of America:

[Paralyzed Veterans of America](#) is the only congressionally chartered veterans service organization dedicated solely for the benefit and representation of veterans with [spinal cord injury](#) or [disease](#). For 70 years, we have ensured that veterans have received the [benefits](#) earned through their service to our nation; monitored their care in VA spinal cord injury units; and funded [research and education](#) in the search for a cure and improved care for individuals with paralysis.

As a partner for life, Paralyzed Veterans also develops training and career services, works to ensure [accessibility](#) in public buildings and spaces, provides health and rehabilitation opportunities through sports and recreation and advocates for veterans and all people with disabilities. With more than 70 offices and 34 [chapters](#), Paralyzed Veterans serves veterans, their families and their [caregivers](#) in all 50 states, the District of Columbia and Puerto Rico. Focus on Veterans: Caring for Our Heroes in the 21st Century (Part III)

Veterans want a functional VA and high-quality healthcare. My latest piece of legislation gives them that.

June 10, 2016--Congressman Doug Lamborn

I am pleased to work with GOP Conference Chair [Cathy McMorris Rogers](#), along with many of my Republican colleagues, to introduce the *Caring for our Heroes in the 21st Century Act*. This bill responds to the comments and concerns of veterans throughout the country who are dissatisfied with the VA.

This legislation will...

Restructure and Streamline the Veterans Health Organization

In order to best serve veterans, the Veteran's Health Administration's (VHA) health insurance function should be separate from its function as a provider of hospital and clinical care.

The **Veterans Accountable Care Organization (VACO)**, a non-profit government corporation that is fully separate from the VHA, will manage the Department of Veterans Affairs' (VA) brick and mortar health care facilities and delivery of care to our nation's veterans. The **Veterans Health Insurance Program (VHIP)** will administer veterans' health insurance programs within the VHA. An independent entity will have more latitude to reward high performers, fire poor performers, and monitor the quality of overall veteran health care delivery.

Offer Veterans the Same Choice as their Fellow Americans

Today, our veterans are trapped in a system that offers them little to no choice. They deserve the right to choose what health care plan best fits their individual needs. The *Caring for our Heroes in the 21st Century Act* will offer current and newly enrolled veterans choices: VetsCare Federal, VetsCare Choice, and VetsCare Senior.

Currently enrolled veterans who are happy with their health care can choose to remain in the traditional VA system through the **VetsCare Federal** program. Those who are not happy have the option to move to the **VetsCare Choice** program, which will allow veterans to seek private care while providing premium support aligned with a veteran's Priority Group status. Veterans who are deemed 100 percent disabled will receive 100 percent coverage, and those who need further financial assistance can qualify for additional premium and cost-sharing support.

Veterans over the age of 65, or who receive Medicare due to disability, qualify for the **VetsCare Senior** program to help defray the costs of Medicare payments and supplemental coverage (Medigap). All eligible veterans can still receive service-connected care at VACO facilities, regardless of the program they are participating in. This ensures our VACO medical facilities continue to focus on service-connected injuries, illnesses, and diseases to ensure our nation's veterans get the highest quality of specialized care they need.

Veterans will also be eligible to enroll in the Federal Long Term Care Insurance Program, a benefit currently available to VA employees, or apply the equivalent premium support payment to the purchase of alternative, private long-term care insurance.

Realign Vital Infrastructure to Ensure Greatest Benefit

Our current VA medical infrastructure fails to efficiently meet the needs of America's veterans. Some veterans must travel long distances to receive care because access to VA facilities is limited, while in some areas VA facilities are underutilized because of excess capacity. This inefficient distribution results in high fixed costs for the VA, robbing veterans of funds that should be used to provide health care.

The *Caring for our Heroes in the 21st Century Act* will allow the VetsCare Advisory Commission to recommend for closure underutilized VA facilities, to which Congress can object. The realignment will create efficiencies that free funds to be used for providing quality health care instead of maintaining unneeded infrastructure. The Commission must ensure that the availability of health care services for veterans is not decreased in impacted areas.

Ensure Vigilant Oversight by Experts — Not Bureaucrats

The independent VetsCare Advisory Commission, a nonpartisan commission modeled after the Medicare Payment Advisory Commission, will monitor implementation of the law and provide recommendations to Congress and the Department of Veterans Affairs on veterans' health care reforms moving forward. The Commission, which will be comprised of 15 members including health care experts and veterans, is charged with continuously assessing the quality of veterans' health care and recommending legislative proposals for improving such care for consideration by Congress.

This commission will ensure that the policies we implement on behalf of our veterans are not stagnant, and are constantly being improved to keep up with current innovations in the health care community.

I look forward to hearing from veterans about these proposed changes as we refine our draft legislation and continue to hold the VA accountable for misconduct. Veterans should remain our first priority as we bring the Veterans Administration into the 21st century.

Congressman Doug Lamborn represents Colorado's fifth district, home to over 100,000 veterans. He also sits on the House Veterans Affairs Committee and is spearheading efforts to [bring the VA into the 21st Century](#). This article is the third in a three-part series.

Veterans Groups Face Off Against ‘Caring For Our Heroes In The 21st Century Act’

By Chuck Yarling -
Jun 28, 2016

U.S. Rep. Cathy McMorris Rodgers (R-WA) has recently drafted a 58-page document entitled, “[Caring For Our Heroes in the 21st Century Act](#)”. The document is a “discussion draft” with a goal to modernize health care for our veterans. Its purpose is to provide an “opportunity to discuss ideas for introduction in the future” as an official bill in the House of Representatives.

Bottom line? The bill is designed to fix many of the deficiencies, problems, and published failures that currently exist within the U.S. Department of Veterans Affairs (VA).

However, in a very short period of time, veterans groups have come out on opposite sides of the bill. Concerned Veterans For America (CVA) is for it; Paralyzed Veterans of America (PVA), the American Legion, and Veterans of Foreign Wars are opposed to it.

John Cooper, Press Secretary for the CVA, published a reasonable [explanation](#) of why the bill is needed as well as describes changes such as restructure of the VA, expansion of veterans health care choices and monitors the future progress of veterans’ health reform. He said the bill

Would offer veterans real choice, enable better access and timely delivery of care, and give VA employees an incentive to pursue accountability. The only question is whether Congress will side with veterans, or whether it will allow special interests and entrenched bureaucrats to determine how we as a nation treat our heroes in this century.

However, Paralyzed Veterans of America came out swinging against it. In a [press release](#) PVA Executive Director Sherman Gillums expressed outrage:

The premium support model offered in Congresswoman McMorris’ bill will put the lives of catastrophically disabled and low-income veterans in jeopardy by forcing them into private sector systems that already face their own waitlist crises and are ill-equipped to provide the specialized care these veterans need.

It provides no mechanism to ensure veterans' care is properly coordinated in the private sector, or that veterans receive the most appropriate care.

The Veterans of Foreign Wars also weighed in on the [issue](#):

Politicians, pundits and politically-motivated organizations are using the national crisis in access to care at the Department of Veterans Affairs as justification to dismantle and privatize the VA health care system, with some even proposing that veterans be charged for their service-connected care. The VFW says no!

And The American Legion [reported](#), “a host of billion-dollar federal contractors, private medical enterprises and cottage-industry opportunists.”

The positions of these three veterans groups opposed to the bill have obvious points: one, they aligned themselves with the current VA healthcare system; and, more importantly, they have provided no alternate solutions to any of the reported problems within the VA.

With all due respect to all opposing veterans groups, it appears they have missed the point: The “Caring For Our Heroes in the 21st Century Act” is a draft of a proposed bill. It has no House of Representatives bill number showing it has not yet been introduced. Its purpose at this point in time is to provide a discussion of a future bill. It seems obvious that these groups should enter the discussion process, express their viewpoints, and resolve their differences.

Regardless of your position on “Caring For Our Heroes in the 21st Century Act”, you should provide your own thoughts about the bill.

Contact your [representative](#) now and provide your input!

EXECUTIVE BRIEFING SUMMARY

Meeting with Concerned Veterans for America

June 28th, 2017

2:15 – 2:45 PM

SECVA Suite

POINT OF CONTACT: (b) (6) (VSO Liaison)

PURPOSE OF EVENT:

Decisional
Remarks

Informational
X Other

Pre-Event
Courtesy Call

ATTENDEES:

CVA

Mark Lucas, Executive Director

Dan Caldwell, Director of Policy

VA

Darin Selnick

Brooks Tucker

John Ulliot

Jake Leinenkugel

(b) (6)

OBJECTIVE:

Meet CVA leadership and understand their priorities; Share your vision and priorities with CVA leadership; Discuss public components of Vets CARE Plan and related issues

BACKGROUND:

CVA requested to meet with you. They've indicated that while they've seen you briefly at events, they haven't had the chance to sit down and talk to you. The two senior leaders would like to introduce themselves and tell you more about their organization and their priorities.

They'd also like to discuss how they can work more closely with VA-- in particular the Vets CARE program and the pilots.

The White House has included CVA in its meetings and they've become more supportive of VA. However, traditional VSO remain skeptical of the organization and don't consider them a VSO

BIOGRAPHY:

(next page)

Mark Lucas is the Executive Director of Concerned Veterans for America. Prior to this, Lucas was a Regional Director of Americans for Prosperity, where he had previously served as the Iowa State Director. Under his leadership, the Iowa chapter of AFP grew to be the highest-performing in the organization in only 2 years.

Mark was the youngest-ever elected City Councilman at the age of 19 in his hometown of Wilton, Iowa. Mid-way through his term he was appointed as the Mayor Pro Tem.

During the 2008 presidential primary, Mark was the State Director of the Americans for Fair Taxation. The National Review said the FairTax campaign was the biggest success story of the 2008 primary season.

Mark has served for over 13 years in the Iowa Army National Guard and is a graduate of the US Army Ranger School. He led an infantry rifle platoon along the Afghanistan-Pakistan border as a platoon leader. He was awarded the Combat Infantry Badge and Bronze Star Medal by distinguishing himself for meritorious service in combat.

He received his Business Management degree from the University of Iowa Tippie College of Business with a certificate in Entrepreneurial Management.

He recently moved to Washington DC with his wife (b) (6) and (b) (6)

CVA APPLAUDS SHULKIN'S VISION FOR VETERANS HEALTH CARE CHOICE

Arlington, VA – Today the Senate Veterans Affairs Committee (SVAC) held a **hearing** examining the Veterans Choice Program and the future of the Department of Veterans Affairs (VA) care in the community program. VA Secretary Shulkin testified, unveiling a new vision for expanding choice and community care programs, called the Vets Community Access Rewarding Experience (CARE) program, and announcing a new pilot choice program very similar to what CVA has proposed for years.

Concerned Veterans for America (CVA) supports expanding veterans' health choice beyond the current Choice Program. In the bipartisan *Fixing Veterans Health Care Task Force*, CVA proposes the creation of a government-chartered non-profit and veterans insurance program to oversee the distribution of health care benefits to veterans. In this new model, veterans would be fully empowered to decide where and when to seek care outside of the VA.

Concerned Veterans for America (CVA) Policy Director Dan Caldwell issued the following statement:

"We applaud Secretary Shulkin for proposing reforms that will expand choice and for being willing to test new ideas to deliver health care to our veterans. The current Choice Program was meant to be temporary, has been implemented poorly, and offers unacceptably limited health care options. When it doesn't make sense to use the VA for care, veterans should be able to go outside of it. We look forward to working with Secretary Shulkin, this administration, and members of Congress to develop legislation that will achieve a vision of true health care freedom for veterans.

"Unfortunately, some members of the Senate — in particular, Senator Patty Murray — are opposed to even trying new ideas to deliver health care to our veterans. It is disappointing that some in Congress just want to double down on the status quo at the VA."

In April, the Senate passed and President Trump signed a reauthorization and extension of the *Veterans Choice Act*, which was passed originally in 2014 as a quick fix to the wait list scandal at the VA in Phoenix.

The Veterans Choice Program has been poorly implemented and has not offered the veterans who qualify for it the real choice that the creators of the program envisioned. The "40-mile, 30-day" rule means that, in theory, veterans can only seek care outside the VA if they can't be seen within a month of when they request an appointment or if they can't be seen within a 40-mile radius. Even then, many veterans are still forced to jump through many bureaucratic hoops to access the program.

President Trump and VA Secretary Shulkin have both repeatedly expressed the need to give veterans more choice over their health care. President Trump included choice as part of his 10-point plan to fix the VA while he was on the campaign trail last year.

CVA STATEMENT ON SOLUTION TO CHOICE PROGRAM

Arlington, VA — This week Department of Veterans Affairs (VA) Secretary Shulkin testified before the Senate that funding for the Veteran Choice Program will likely run out later this year, much sooner than originally expected.

When President Trump reauthorized the Choice Program earlier this year, there were changes made to the program – in particular, making the VA the primary payor for care – which may have led to significantly increased spending. In addition, the increased referrals to the program have been larger than anticipated.

Concerned Veterans for America (CVA) Policy Director Dan Caldwell issued the following statement:

“Elected officials should quickly pass legislation that will allow the VA to move existing funds to the Veteran Choice Program, which they are unable to do under current law. Congress authorized the VA to move funds out of the program in 2015 – a measure we opposed – and they should now allow the VA the same flexibility to move funds back into the program.

“Patching up this flawed program year after year is not a permanent solution to the health care issues facing veterans. A systemic overhaul of the VHA is needed to allow veterans to use their benefits whenever and wherever they want and to remove the VA as the middleman.”

The Choice Program, which was enacted under Veterans’ Access to Care through Choice, Accountability, and Transparency Act, was intended as a temporary solution to the wait list scandal of 2014. The Program was flawed — allowing veterans to only receive care at VA-approved facilities if they meet the “30-day, 40-mile” rule, for example — and has been implemented poorly.

For years, CVA has proposed the creation of a government-chartered non-profit to oversee the distribution of health care benefits at the Department

of Veterans Affairs (VA). This entity would empower veterans to use these benefits at his or her own discretion – inside or outside of the VA.

CVA Urges Senate to Improve VA Care in the Community Bill

Arlington, VA – Today, the Senate Veterans Affairs Committee (SVAC) is scheduled to mark-up the Caring for our Veterans Act of 2017. The bill would establish a permanent VA community care program and consolidate the Veterans Choice Program with other community care programs.

Concerned Veterans for America (CVA) Executive Director Dan Caldwell issued the following statement:

“Like President Trump and Secretary Shulkin, CVA believes that veterans deserve more control over their health care at the VA. Keeping the VA as the gatekeeper between veterans and outside care will only continue problems that are present in the VA’s current community care and choice programs. The Caring for our Veterans Act of 2017 contains some good elements but needs improvement to ensure that veterans are being empowered with more control over their health care at the VA. CVA strongly encourages the committee to adopt the amendments proposed by Senator Moran that we believe would strengthen this bill. We look forward to working with the Senate to improve this legislation to ensure that veterans can access the care they have earned.”

The Veterans Choice Program, which was enacted under the Veterans’ Access to Care through Choice, Accountability, and Transparency Act, was implemented in response to the wait list scandal of 2014. It was passed as a stop-gap measure and was never intended to be a permanent solution. The Choice Program has faced several issues and failed to give many veterans real choice in their health care. In its current form, the VA Community Care Act does little to improve the restrictions of the current Choice Program.

For years, CVA has advocated for substantial health care reforms at the VA. In CVA’s Fixing Veterans Health Care Taskforce, the group advocates that veterans should have the option to take their earned health care benefits and use them to access care at the VA or in the private sector.

Darin, Good morning. I am very sorry, but I didn't hear back from you on that last email and now my day is slammed. A friend of mine is getting buried in Arlington on August 31st and that's the next time I am in DC. Any chance we could meet later in the day on the 31st? Say 230-3ish? Very sorry for not following up. (b) (6)

(b) (6) and (b) (6)

It was good to meet with you today.

I wanted to digitally introduce you both to Darin Selnick – who is currently Senior Advisor to Secretary Shulkin at the VA. Darin was previously CVA's Senior Advisor and really helped grow and focus our organization.

Darin – (b) (6) runs Boulder Crest Retreat for veterans and (b) (6) is on their board and also is someone who has done a lot of political and advocacy in Arizona. Both are good contacts to have and they are both very interested in the future of VA care in the community. They also have had some interesting experiences engaging with the VA that I think might be worth you hearing.

(b) (6) and (b) (6) let me know how else I can be helpful.

Thanks,

Dan Caldwell

Darin, Good morning. I am very sorry, but I didn't hear back from you on that last email and now my day is slammed. A friend of mine is getting buried in Arlington on August 31st and that's the next time I am in DC. Any chance we could meet later in the day on the 31st? Say 230-3ish? Very sorry for not following up. (b) (6)

(b) (6) and (b) (6)

It was good to meet with you today.

I wanted to digitally introduce you both to Darin Selnick – who is currently Senior Advisor to Secretary Shulkin at the VA. Darin was previously CVA's Senior Advisor and really helped grow and focus our organization.

Darin – (b) (6) runs Boulder Crest Retreat for veterans and (b) (6) is on their board and also is someone who has done a lot of political and advocacy in Arizona. Both are good contacts to have and they are both very interested in the future of VA care in the community. They also have had some interesting experiences engaging with the VA that I think might be worth you hearing.

(b) (6) and (b) (6) let me know how else I can be helpful.

Thanks,

Dan Caldwell

(b) (6) and (b) (6)

It was good to meet with you today.

I wanted to digitally introduce you both to Darin Selnick – who is currently Senior Advisor to Secretary Shulkin at the VA. Darin was previously CVA's Senior Advisor and really helped grow and focus our organization.

Darin – (b) (6) runs Boulder Crest Retreat for veterans and (b) (6) is on their board and also is someone who has done a lot of political and advocacy in Arizona. Both are good contacts to have and they are both very interested in the future of VA care in the community. They also have had some interesting experiences engaging with the VA that I think might be worth you hearing.

(b) (6) and (b) (6) let me know how else I can be helpful.

Thanks,

Dan Caldwell

It was good to meet with you today.

I wanted to digitally introduce you both to Darin Selnick – who is currently Senior Advisor to Secretary Shulkin at the VA. Darin was previously CVA's Senior Advisor and really helped grow and focus our organization.

Darin – (b) (6) runs Boulder Crest Retreat for veterans and Chris is on their board and also is someone who has done a lot of political and advocacy in Arizona. Both are good contacts to have and they are both very interested in the future of VA care in the community. They also have had some interesting experiences engaging with the VA that I think might be worth you hearing.

(b) (6) and (b) (6) let me know how else I can be helpful.

Thanks,

Dan Caldwell

(b) (6) and (b) (6)

It was good to meet with you today.

I wanted to digitally introduce you both to Darin Selnick – who is currently Senior Advisor to Secretary Shulkin at the VA. Darin was previously CVA's Senior Advisor and really helped grow and focus our organization.

Darin – (b) (6) runs Boulder Crest Retreat for veterans and Chris is on their board and also is someone who has done a lot of political and advocacy in Arizona. Both are good contacts to have and they are both very interested in the future of VA care in the community. They also have had some interesting experiences engaging with the VA that I think might be worth you hearing.

(b) (6) and (b) (6) let me know how else I can be helpful.

Thanks,

Dan Caldwell

(b) (6) and (b) (6)

It was good to meet with you today.

I wanted to digitally introduce you both to Darin Selnick – who is currently Senior Advisor to Secretary Shulkin at the VA. Darin was previously CVA's Senior Advisor and really helped grow and focus our organization.

Darin – (b) (6) runs Boulder Crest Retreat for veterans and Chris is on their board and also is someone who has done a lot of political and advocacy in Arizona. Both are good contacts to have and they are both very interested in the future of VA care in the community. They also have had some interesting experiences engaging with the VA that I think might be worth you hearing.

(b) (6) and (b) (6) let me know how else I can be helpful.

Thanks,

Dan Caldwell

(b) (6) and (b) (6)

It was good to meet with you today.

I wanted to digitally introduce you both to Darin Selnick – who is currently Senior Advisor to Secretary Shulkin at the VA. Darin was previously CVA's Senior Advisor and really helped grow and focus our organization.

Darin – (b) (6) runs Boulder Crest Retreat for veterans and Chris is on their board and also is someone who has done a lot of political and advocacy in Arizona. Both are good contacts to have and they are both very interested in the future of VA care in the community. They also have had some interesting experiences engaging with the VA that I think might be worth you hearing.

(b) (6) and (b) (6) let me know how else I can be helpful.

Thanks,

Dan Caldwell

Hi (b) (6)

No problem. I will be out of town that day, but how about setting up a phone call for some time next week.

Best

Darin

Darin, Good morning. I am very sorry, but I didn't hear back from you on that last email and now my day is slammed. A friend of mine is getting buried in Arlington on August 31st and that's the next time I am in DC. Any chance we could meet later in the day on the 31st? Say 230-3ish? Very sorry for not following up. (b) (6)

(b) (6) and (b) (6)

It was good to meet with you today.

I wanted to digitally introduce you both to Darin Selnick – who is currently Senior Advisor to Secretary Shulkin at the VA. Darin was previously CVA's Senior Advisor and really helped grow and focus our organization.

Darin – (b) (6) runs Boulder Crest Retreat for veterans and Chris is on their board and also is someone who has done a lot of political and advocacy in Arizona. Both are good contacts to have and they are both very interested in the future of VA care in the community. They also have had some interesting experiences engaging with the VA that I think might be worth you hearing.

(b) (6) and (b) (6) let me know how else I can be helpful.

Thanks,

Dan Caldwell

(b) (6) and (b) (6)

It was good to meet with you today.

I wanted to digitally introduce you both to Darin Selnick – who is currently Senior Advisor to Secretary Shulkin at the VA. Darin was previously CVA's Senior Advisor and really helped grow and focus our organization.

Darin – (b) (6) runs Boulder Crest Retreat for veterans and Chris is on their board and also is someone who has done a lot of political and advocacy in Arizona. Both are good contacts to have and they are both very interested in the future of VA care in the community. They also have had some interesting experiences engaging with the VA that I think might be worth you hearing.

(b) (6) and (b) (6) let me know how else I can be helpful.

Thanks,

Dan Caldwell

(b) (6) and (b) (6)

It was good to meet with you today.

I wanted to digitally introduce you both to Darin Selnick – who is currently Senior Advisor to Secretary Shulkin at the VA. Darin was previously CVA's Senior Advisor and really helped grow and focus our organization.

Darin – (b) (6) runs Boulder Crest Retreat for veterans and Chris is on their board and also is someone who has done a lot of political and advocacy in Arizona. Both are good contacts to have and they are both very interested in the future of VA care in the community. They also have had some interesting experiences engaging with the VA that I think might be worth you hearing.

(b) (6) and (b) (6) let me know how else I can be helpful.

Thanks,

Dan Caldwell

(b) (6) and (b) (6)

It was good to meet with you today.

I wanted to digitally introduce you both to Darin Selnick – who is currently Senior Advisor to Secretary Shulkin at the VA. Darin was previously CVA's Senior Advisor and really helped grow and focus our organization.

Darin – (b) (6) runs Boulder Crest Retreat for veterans and Chris is on their board and also is someone who has done a lot of political and advocacy in Arizona. Both are good contacts to have and they are both very interested in the future of VA care in the community. They also have had some interesting experiences engaging with the VA that I think might be worth you hearing.

(b) (6) and (b) (6) let me know how else I can be helpful.

Thanks,

Dan Caldwell

On Thu, Jul 20, 2017 at 12:27 PM, Dan Caldwell <(b) (6)> cv4a.org> wrote:

(b) (6) and (b) (6)

It was good to meet with you today.

I wanted to digitally introduce you both to Darin Selnick – who is currently Senior Advisor to Secretary Shulkin at the VA. Darin was previously CVA's Senior Advisor and really helped grow and focus our organization.

Darin – (b) (6) runs Boulder Crest Retreat for veterans and Chris is on their board and also is someone who has done a lot of political and advocacy in Arizona. Both are good contacts to have and they are both very interested in the future of VA care in the community. They also have had some interesting experiences engaging with the VA that I think might be worth you hearing.

(b) (6) and (b) (6) let me know how else I can be helpful.

Thanks,

Dan Caldwell

(b) (6) and (b) (6)

It was good to meet with you today.

I wanted to digitally introduce you both to Darin Selnick – who is currently Senior Advisor to Secretary Shulkin at the VA. Darin was previously CVA's Senior Advisor and really helped grow and focus our organization.

Darin – (b) (6) runs Boulder Crest Retreat for veterans and Chris is on their board and also is someone who has done a lot of political and advocacy in Arizona. Both are good contacts to have and they are both very interested in the future of VA care in the community. They also have had some interesting experiences engaging with the VA that I think might be worth you hearing.

(b) (6) and (b) (6) let me know how else I can be helpful.

Thanks,

Dan Caldwell

Subject: Re: [EXTERNAL] Fwd: Follow Up Meeting

Darin, Good morning. I am very sorry, but I didn't hear back from you on that last email and now my day is slammed. A friend of mine is getting buried in Arlington on August 31st and that's the next time I am in DC. Any chance we could meet later in the day on the 31st? Say 230-3ish? Very sorry for not following up. (b) (6)

Hi (b) (6)

Checking to see if we are on for lunch tomorrow. If you are, can we meet earlier at 11:30am and can we meet in front of the Department of Veterans Affairs, 810 Vermont Ave, NW, DC.

Thanks

Darin

(b) (6) and (b) (6)

It was good to meet with you today.

I wanted to digitally introduce you both to Darin Selnick – who is currently Senior Advisor to Secretary Shulkin at the VA. Darin was previously CVA's Senior Advisor and really helped grow and focus our organization.

Darin – (b) (6) runs Boulder Crest Retreat for veterans and Chris is on their board and also is someone who has done a lot of political and advocacy in Arizona. Both are good contacts to have and they are both very interested in the future of VA care in the community. They also have had some interesting experiences engaging with the VA that I think might be worth you hearing.

(b) (6) and (b) (6) let me know how else I can be helpful.

Thanks,

Dan Caldwell

Subject: CVA Applauds Bold VA Health Care Reform Bill

For immediate release: November 21, 2017
Contact: press@cv4a.org

CVA Applauds Bold VA Health Care Reform Bill

Arlington, VA – Today, Representative Doug Lamborn (R-CO) introduced the Veterans Empowerment Act, a bill that will fundamentally reform the Veterans Health Administration (VHA) and offer all veterans who use the VA the option to access care in the private sector. Concerned Veterans for America (CVA) is urging veterans and concerned citizens across the nation to contact their legislators in support of the new bill.

The bill expands veterans' health care choices by creating a veterans' health insurance program and allowing veterans to use their benefits inside or outside of the VA system. The bill would also establish better oversight of the VA health care system while increasing transparency regarding the VA's performance.

CVA Executive Director Dan Caldwell issued the following statement:

"The seemingly endless stream of stories about veterans receiving delayed or poor-quality health care at the VA demonstrates the current VA medical system is not set up to effectively serve our veterans. Those who put their lives on the line for our country deserve the best health care possible, and the Veterans Empowerment Act would ensure that they receive it.

"We can't leave the VA medical system in its current state and expect results to improve for our veterans. This is a historic opportunity to finally go beyond the failed status quo at the VA and provide veterans with the best care possible. We applaud Rep. Lamborn for introducing this bill and strongly urge Congress to pass it into law."

Since its inception in 2012, CVA has advocated for reforming and fixing the VA. In 2014, CVA launched the VA Accountability Project, which advocated for more accountability for VA employees and more health care choice for veterans. Later that year, CVA convened the bipartisan Fixing Veterans Health Care Taskforce, which in 2015 released the Fixing Veterans Health Care Task Force Report. This report serves as the group's comprehensive proposal for health care reform at the VA.

In 2014, Congress passed the Veterans Access, Choice, and Accountability Act in response to the VA wait list scandal. This bill created the Veterans Choice Program, which only offered limited choice to veterans who satisfied certain requirements. Under the Choice Program, veterans must meet the "40-mile, 30-day" rule, which only allows veterans to seek care outside the VA if they can't be seen within a month of when they request an appointment or if they can't be seen within a 40-mile radius. Even then, many veterans are forced to jump through bureaucratic hoops to access the program, which was poorly implemented and only intended to serve as a temporary measure.

The Choice Program recently faced a budget shortfall and is expected to run out of money again at the beginning of next year unless it is replaced with a more effective and sustainable method of offering veterans at the VA health care choice.

Subject: CVA Applauds Bold VA Health Care Reform Bill

For immediate release: November 21, 2017
Contact: press@cv4a.org

CVA Applauds Bold VA Health Care Reform Bill

Arlington, VA – Today, Representative Doug Lamborn (R-CO) introduced the Veterans Empowerment Act, a bill that will fundamentally reform the Veterans Health Administration (VHA) and offer all veterans who use the VA the option to access care in the private sector. Concerned Veterans for America (CVA) is urging veterans and concerned citizens across the nation to contact their legislators in support of the new bill.

The bill expands veterans' health care choices by creating a veterans' health insurance program and allowing veterans to use their benefits inside or outside of the VA system. The bill would also establish better oversight of the VA health care system while increasing transparency regarding the VA's performance.

CVA Executive Director Dan Caldwell issued the following statement:

"The seemingly endless stream of stories about veterans receiving delayed or poor-quality health care at the VA demonstrates the current VA medical system is not set up to effectively serve our veterans. Those who put their lives on the line for our country deserve the best health care possible, and the Veterans Empowerment Act would ensure that they receive it.

"We can't leave the VA medical system in its current state and expect results to improve for our veterans. This is a historic opportunity to finally go beyond the failed status quo at the VA and provide veterans with the best care possible. We applaud Rep. Lamborn for introducing this bill and strongly urge Congress to pass it into law."

Since its inception in 2012, CVA has advocated for reforming and fixing the VA. In 2014, CVA launched the VA Accountability Project, which advocated for more accountability for VA employees and more health care choice for veterans. Later that year, CVA convened the bipartisan Fixing Veterans Health Care Taskforce, which in 2015 released the Fixing Veterans Health Care Task Force Report. This report serves as the group's comprehensive proposal for health care reform at the VA.

In 2014, Congress passed the Veterans Access, Choice, and Accountability Act in response to the VA wait list scandal. This bill created the Veterans Choice Program, which only offered limited choice to veterans who satisfied certain requirements. Under the Choice Program, veterans must meet the "40-mile, 30-day" rule, which only allows veterans to seek care outside the VA if they can't be seen within a month of when they request an appointment or if they can't be seen within a 40-mile radius. Even then, many veterans are forced to jump through bureaucratic hoops to access the program, which was poorly implemented and only intended to serve as a temporary measure.

The Choice Program recently faced a budget shortfall and is expected to run out of money again at the beginning of next year unless it is replaced with a more effective and sustainable method of offering veterans at the VA health care choice.

Hi,

Did you folks receive my email?

Is your organization willing to help Veteran patients who are injured as a result of VA medical malpractice/negligence?

Congressman Bilirakis and I caught VA IG Missal in a lie. The VA does not want to investigate VA doctors.

<http://time.com/4758706/donald-trump-veterans-affair-accountability-whistleblower-office/> "Secretary Shulkin's hands will be tied until Congress passes strong accountability legislation," said (b) (6) executive director of Concerned Veterans for America. Lucas said the office was a "positive first step" but not enough to fix the culture at the VA."

CVA Executive Director Lucas / CVA Deputy Executive Director Anderson: (703) 224-3200

You folks are doing a great job for the Veteran community! On your website, the CVA says, "The VA is failing to keep its promise to veterans and military families across the country. And due to the changing size and nature of the veteran population, the VA culture will only get worse if we don't fix it now." You folks are absolutely right!

Would you please provide contact info for the new VA Office of Accountability and WP Protection? So far, it's a well-kept secret. Unfortunately, Dr. Shulkin is the kind of doctor who refuses to take action against other doctors who are injuring Veteran patients – despite what he tells the national media.

Further, I caught IG Missal lying to Congressman Bilirakis when he claimed in writing that he did not have the authority to investigate the falsification of VA medical records. If you want the details and the evidence (which I have), I will provide it upon request. US Senator Rubio's staff hand delivered my complaint against IG Missal to Dr. Shulkin, yet Dr. Shulkin has refused to confirm receipt and he has refused to act. He is the only VA official who has the authority under the Federal IG Act to 'supervise' IG Missal. Dr. Shulkin knows that IG Missal is refusing to hold offending VA doctors accountable – and he refuses to act.

In addition, I have spoken with the USDOJ. The Tampa US Attorney will not conduct a prosecutorial review unless a federal investigation is conducted first. Since the VA OIG has refused to investigate, the VA doctors who hurt me and the Bay Pines VAMC / VISN-8 officials who buried my complaints will not be held accountable. UN – FREAKIN – BELIEVEABLE!

I just spent a week at the Mayo Clinic in MN. The best doctors in the world thoroughly examined me. They have confirmed the medical problems that the VA doctors refused to acknowledge or treat. A two year delay in receiving any VA medical care because of VA medical malpractice/negligence and criminal fraud (a VA doctor deliberately misrepresented my medical condition/falsified my VA medical records to cover-up the medical malpractice/negligence of his VA peers.) The two year inaction of a number of VA doctors created permanent physical injuries – and a lot of severe, disabling pain. The medical evidence I have recovered is now crystal clear – it establishes VA medical malpractice/negligence and criminal fraud, but Dr. Shulkin refuses to act – and he refuses to provide this Veteran patient the courtesy of an explanation!

VA medical malpractice is at a crisis level – and the VA refuses to respond. If this new VA OAWP refuses to investigate, I would appreciate CVA's help in exposing another VA accountability 'sham' to the Veteran community.

Please confirm receipt.

Thanks,

(b) (6)

Subject: Mayo Clinic Experts Join With USF Health Professors of Neurology (and other Non-VA Neurosurgeons) Confirming Veteran's Neuropathy & Spinal Problems

Veteran's Complaints Of VA Medical Negligence and Fraud (falsification of VA medical records) Are Substantiated - Again! Veteran Asks For A VA OAWP Investigation

Question: When Is Dr. Shulkin Going To Act On A Complaint (delivered to his office by US Senator Rubio's staff) Reporting That VA IG Missal Lied to Congressman Bilirakis?

Dr. Shulkin Has Authority Under The Federal IG Act To Supervise VA IG Missal And Hold Him Accountable For Refusing To Do His Job

Dr. Agustines:

Thank-you for your help! I completed the Mayo Clinic diagnostic tests up in Rochester, MN last week as directed. I met with Dr. Peter J.B. Dyck on Friday, 05/12/17. His father and he are world-renowned neurological experts. After undergoing hours of different kinds of spinal MRI's, extensive NCS/EMG testing, and other neurological tests, Dr. Dyck agreed with other non-VA medical experts who have examined me. He said that I do have a neuropathy, along with cervical and lumbar spine problems which as you know is contrary to the VA's position. Further, Dr. Dyck believes S1 nerve impingement is responsible for my severe SI joint pain.

I'm wondering how many more medical expert opinions I have to secure before Dr. Shulkin stops this VA medical negligence cover-up and acknowledges that several VA officials are, in fact, responsible for acts of medical malpractice/negligence (resulting in permanent physical injuries) and fraud (the deliberate falsification of VA medical records)?

Question: Do you believe Dr. Shulkin to be the kind of doctor who is willing to report other VA doctors who act negligently - injuring a Veteran patient and then falsifying VA medical records in an effort to cover-up the negligence? I'm wondering if he adheres to AMA Policy # 9.031 (shown below). I'm also wondering if he has ever reported a negligent, incompetent, or unethical doctor as the AMA Code of Ethics requires. According to the AMA's Council on Ethical and Judicial Affairs, it states, in part, as follows: "Many of the Council's opinions lay out specific duties and obligations for physicians. Violation of these principles and opinions represents unethical conduct and may justify disciplinary action such as censure, suspension, or expulsion from medical society membership." It has been brought to Dr. Shulkin's attention that several negligent, incompetent, and unethical VA doctors hurt me; however, he has yet to ask for an investigation or report these VA doctors.

Please let me know when all of the Mayo records (Dr. Dyck's office notes, MRI's, and all of the test results) are in my VA medical file so that I may obtain copies. You are shown as the requesting VA doctor, so the records should be sent to your attention. Please request a NVCC consult with Dr. Ryan Glasser for me (the neurosurgeon in Sarasota, FL who did my back surgery) so that surgical options for my cervical and lumbar spine problems may be discussed. It took a Congressional inquiry to get Dr. Glasser the VA approval to remove parts of my lumbar spine in order to resolve painful sciatic nerve root impingement problems – problems the VA doctors said I didn't have. Dr. Glasser established that I do have spinal problems requiring medical care.

Over the past six (6) years, I have been forced to endure an extremely painful challenge - all because of VA medical negligence and fraud. I understand the VA doesn't want to hear this. The VA has done everything possible to bury my complaints, but the best neurological experts in this country have just confirmed what many non-VA medical experts have been telling the VA since March 2012; I do, in fact, have a neuropathy and spinal problems requiring medical care. It's disturbing to note that the VA doctors refuse to agree with these non-VA medical experts. The VA doctors have turned a blind eye to the medical evidence to avoid accountability. Various senior VA officials (including the VA OIG) have refused to investigate because the VA clearly does not want to hold these unethical VA doctors and VA administrators accountable for their misconduct, even though negligence and fraud has resulted in permanent physical injuries to a Veteran patient.

Timely and competent VA medical care back in March 2011 would have prevented the fusing of three vertebrae that has resulted in a reversal of the normal curvature of my cervical spine. VA negligence now requires me to undergo annual RFA surgical procedures for pain management because the VA doctors refuse to approve the recommended cervical surgery. Minimally invasive surgery would have repaired/replaced two herniating/leaking cervical discs thereby preventing the surrounding cervical vertebrae from fusing together. (See the above attachments) Further, it took several Congressional inquiries (and over four years) to secure VA approval for badly needed back surgery to free two lumbar nerve roots from spinal impingement. This was no mistake – the films show the spinal impingement. Dr. Triggs deliberately misrepresented my medical condition to avoid medical malpractice/negligence accountability for his VA peers.

A number of VA doctors have disregarded clear and convincing evidence of neurologic and spinal problems, and they have refused to provide a professional standard of care. Without question, it has been established by a number of respected medical experts that Dr. Triggs did enter false statements in my VA medical record – statements which were found by VA paid medical experts (not my experts) to

be in conflict with his own test results. Dr. Triggs deliberately falsified my records in an effort to cover-up acts of medical negligence that had been committed by other VA doctors. The delay that this unlawful and unethical deception caused resulted in permanent physical injuries. For almost two years, I was deprived from receiving the medical care I was entitled to receive by law. Further, the VA (VAMC and VISN-8 officials re: VA Directive 700 - AIB), the VA OMI, and the VA OIG (including Dr. Daigh, Jr.,) has steadfastly refused to investigate in an apparent effort to protect the offending VA officials. So, there has been no accountability to date.

At my request, Congressman Bilirakis inquired as to why the VA OIG had refused to investigate. IG Missal lied to Congressman Bilirakis in his written response dated 11/04/16 when he said he didn't have the 'authority' to investigate. The Federal IG Act not only gives IG Missal the authority to investigate; it also imposes a duty and a responsibility to investigate. Four months later, IG Missal reversed himself under oath in front of the C-SPAN cameras while testifying at a US House Committee on Veterans Affairs hearing on this 'authority' to investigate issue. IG Missal admitted that he does have the authority to investigate, yet he still refuses to do so – without explanation. This isn't a case of insufficient evidence or IG Missal would have said so. This is all about a VA agenda that betrays the Veteran community's trust by refusing to investigate in order to refrain from holding the offending VA doctors and VA administrators accountable for their misconduct.

Now that it has been established beyond any reasonable doubt that acts of VA medical negligence and fraud have occurred, I renew my request for an investigation to establish accountability. I would appreciate your support. On 05/12/17, Dr. Shulkin publicly announced the establishment of the VA Office of Accountability and Whistleblower Protection. As is detailed in the Executive Order announcing this new VA entity, the Executive Director will:

- *Advise and assist the Secretary in using, as appropriate, all available authorities to discipline or terminate any VA manager or employee who has violated the public's trust and failed to carry out his or her duties on behalf of Veterans.

- *Work closely with relevant VA components to ensure swift and effective resolution of Veterans' complaints of wrongdoing at VA.

- *Work closely with relevant VA components to ensure adequate investigation and correction of wrongdoing throughout the VA, and protect employees who lawfully disclose wrongdoing from retaliation.

VA medical negligence reportedly costs American taxpayers over a hundred million dollars a year in injury awards and that amount is estimated to involve less than 10% of the total number of Veteran patients who are actually harmed as a result of delayed, denied, and negligent VA medical care. Medical negligence is a crisis the VA refuses to address. They reportedly do not have enough doctors to service the Veteran community now, so they are not interested in holding 'bad' doctors accountable.

By copying him via this email, I am asking VA OAWP Director Peter O'Rourke to please investigate my complaint of VA medical negligence and fraud in accordance with CIGIE professional investigative standards. As a retired law enforcement investigator and a former civil judge, the evidence I have recovered proves the allegations of VA misconduct I have reported beyond a reasonable doubt. And, if this new entity refuses to investigate, my complaint will serve to expose another VA 'accountability' sham on the Veteran community.

Since the VA OAR (that was established by former VA Secretary McDonald) proved to be a sad joke,

many injured Veteran patients are anxious to see whether the VA OAWP will act in accordance with its published mission statement. I renew my request to Dr. Shulkin that he ask Mr. O'Rourke to investigate my complaints (in addition to my complaint against IG Missal) in an effort to hold all of the offending VA officials accountable. Should Dr. Shulkin refuse to do so (he reportedly refused to confirm receipt of a complaint I filed with him against IG Missal even though a member of US Senator Rubio's staff hand delivered a copy of my complaint to his office), I will ask President Trump to replace Dr. Shulkin for cause if he continues to bury valid complaints from Veteran patients in an effort to cover-up the misconduct of VA doctors and VA administrators.

In closing, the VA's ongoing efforts to avoid accountability are historic. Former Chairman of the US House Committee on Veterans Affairs Jeff Miller was right when he said, "To see all of the deception and incompetence at the VA with no accountability and no action, it is more than just a shame – it is a national disgrace."

I ask that Dr. Shulkin and Mr. O'Rourke please confirm receipt of this email communication. The VA says they adhere to 'I-CARE' values. Now would be a great time to work together to identify a number of VA officials (including senior officials) who need to be held accountable for what they have done. Again, Veterans remain at risk of harm because there has been no accountability assessed against these unethical VA officials.

Sincerely,

(b) (6)

<https://www.usatoday.com/story/news/politics/2017/04/26/trump-order-va-accountability-whistleblower-office/100939062/>

The office will investigate allegations of misconduct – including retaliation against whistle-blowing employees who reported abuses — and seek to identify systemic barriers that have previously hindered the agencies' top leaders from more adequately addressing such problems in the past, including with disciplinary action. VA Secretary David Shulkin told reporters the new office will report directly to him. "Accountability is an important issue to us at VA and something that we're focusing on to make sure that we have employees who work and are committed to the mission of serving our veterans, and when we find employees that have deviated from these values, we want to make sure that we can move them outside of VA and not have them working at VA," he said, adding that Trump's creation of the office by executive order demonstrates how committed the president is to the issue as well. The VA already has an Office of Accountability Review that was created in 2014 to "ensure leadership accountability for improprieties related to patient scheduling and access to care, whistleblower retaliation, and related

matters that impact public trust in VA.” But Shulkin said that office reports to the agency’s general counsel and is focused on senior VA leaders. The new office will look at all VA employees.

<http://www.ama-assn.org/ama/pub/physician-resources/medical-ethics/code-medical-ethics/opinion701.page>

Opinion 1.01 - Terminology

The term "ethical" is used in opinions of the Council on Ethical and Judicial Affairs to refer to matters involving (1) moral principles or practices and (2) matters of social policy involving issues of morality in the practice of medicine. The term "unethical" is used to refer to professional conduct which fails to conform to these moral standards or policies.

Many of the Council’s opinions lay out specific duties and obligations for physicians. Violation of these principles and opinions represents unethical conduct and may justify disciplinary action such as censure, suspension, or expulsion from medical society membership.

Opinion 8.021 - Ethical Obligations of Medical Directors

Medical directors acting within the professional sphere, such as when making decisions regarding medical appropriateness, have an overriding ethical obligation to promote professional medical standards. Adherence to professional medical standards includes:

(1) Placing the interests of patients above other considerations, such as personal interests (eg, financial incentives) or employer business interests (eg, profit). This entails applying the plan parameters to each patient equally and engaging in neither discrimination nor favoritism.

Opinion 9.031 - Reporting Impaired, Incompetent, or Unethical Colleagues

Physicians have an ethical obligation to report impaired, incompetent, and/or unethical colleagues in accordance with the legal requirements in each state and assisted by the following guidelines:

Impairment. Physicians’ responsibilities to colleagues who are impaired by a condition that interferes with their ability to engage safely in professional activities include timely intervention to ensure that these colleagues cease practicing and receive appropriate assistance from a physician health program (see Opinion E-9.0305, "Physician Health and Wellness"). Ethically and legally, it may be necessary to report an impaired physician who continues to practice despite reasonable offers of assistance and referral to a hospital or state physician health program. The duty to report under such circumstances, which stems from physicians’ obligation to protect patients against harm, may entail reporting to the licensing authority.

Incompetence. Initial reports of incompetence should be made to the appropriate clinical authority who would be empowered to assess the potential impact on patient welfare and to facilitate remedial action. The hospital peer review body should be notified where appropriate. Incompetence that poses an immediate threat to the health and safety of patients should be reported directly to the state licensing board. Incompetence by physicians without a hospital affiliation should be reported to the local or state medical society and/or the state licensing or disciplinary board.

Unethical conduct. With the exception of incompetence or impairment, unethical behavior should be reported in accordance with the following guidelines and, considering, as necessary, the right to privacy of any patients involved:

Unethical conduct that threatens patient care or welfare should be reported to the appropriate authority for a particular clinical service. Unethical conduct that violates state licensing provisions should be

reported to the state licensing board. It is appropriate to report unethical conduct that potentially violates criminal statutes to law enforcement authorities. All other unethical conduct should be reported to the local or state professional medical organization.

When the inappropriate conduct of a physician continues despite the initial report(s), the reporting physician should report to a higher or additional authority. The person or body receiving the initial report should notify the reporting physician when appropriate action has been taken. Physicians who receive reports of inappropriate behavior, including reports submitted anonymously, have an ethical duty to critically, objectively, and confidentially evaluate the reported information and assure that identified deficiencies are either remedied or further reported to a higher or additional authority. Information regarding reports or investigations of impairment, or of incompetent or unethical behavior should be held in confidence until the matter is resolved.

Opinion 9.04 - Discipline and Medicine

Incompetence, corruption, or dishonest or unethical conduct on the part of members of the medical profession is reprehensible. In addition to posing a real or potential threat to patients, such conduct undermines the public's confidence in the profession. A physician should expose, without fear or loss of favor, incompetent or corrupt, dishonest, or unethical conduct on the part of members of the profession. Questions of such conduct should be reported and reviewed in accordance with Opinion 9.031, "Reporting Impaired, Incompetent, or Unethical Colleagues."

Subject: VA medical malpractice/negligence is a crisis the VA won't discuss. Injured Veterans are requesting help!

To: US HCVA Chairman Roe

Cc: US HCVA Vice Chairman Bilirakis

US SCVA Chairman Isakson

US Senator Rubio / US Senator McCain

Medical malpractice costs the VA over a hundred million taxpayer dollars a year! I am a victim of VA medical malpractice/negligence. For almost two years, the VHA said I had no spinal problems requiring medical care, so they denied me the medical care I was entitled to receive by law. Over four years after

I first presented in pain, US Congressman Jolly was able to get the VA to approve badly needed back surgery. A non-VA doctor neurosurgeon removed parts of my lumbar spine to correct a serious nerve root impingement. The impingement was clearly seen on my films by all non-VA doctors. Once I exposed the fact that the VA doctors had acted negligently, they turned a blind eye to the medical evidence and they refused to see what all the non-VA doctors pointed out in my films – clear nerve root impingement problems.

VA medical malpractice is a crisis the VA refuses to address. And, with Dr. Shulkin in charge, it appears he is refusing to hold VA doctors accountable no matter how much evidence a Veteran patient provides showing malpractice. The same criticism goes for IG Missal who lied to Congressman Bilirakis to keep from investigating my complaint of a VA doctor falsifying VA medical records to cover-up acts of VA medical malpractice/negligence. I asked Dr. Shulkin to confirm receipt of a complaint against IG Missal for acting unlawfully and unethically in violation of his oath of office several months ago and to date – Dr. Shulkin has refused to act. So, US Senator Rubio sent a senior policy analyst to hand deliver my complaint to Dr. Shulkin's office – and Dr. Shulkin has still refused to confirm receipt. Veterans know what our elected officials apparently don't know; VA officials lie and lie and lie...

Former Chairman Jeff Miller was right when he said, “To see all of the deception and incompetence at the VA with no accountability and no action, it is more than just a shame – it is a national disgrace.”

Well on April 27, 2017 when this new VA task force activates, I have asked Dr. Shulkin to ensure that my complaints of gross patient abuse/medical malpractice/negligence which have resulted in permanent physical injuries are investigated. How much do you want to bet that this VA task force will refuse to investigate? McDonald's new 'VA Accountability Team' refused to investigate and they had a similar mission. Veterans who have been harmed are asking the US House and US Senate Committees on Veterans Affairs to please ensure that our complaints are professionally investigated in accordance with CIGIE standards.

In my case, several VA paid medical experts (two professors of neurology and a neurosurgeon) reviewed the medical evidence and found that VA Dr. Triggs' not only misdiagnosed my spinal problems; the statements he entered into my VA medical file were found to be false and in conflict with his own test results. Dr. Triggs lied in an effort to cover for his VA peers! My back surgery established serious spinal problems that had to be corrected by surgery. So, I did have spinal problems requiring medical care, yet the VA still has refuses to investigate the VA doctors in question and they refuse to correct my records. The VA (even under a new VA Secretary and a new VA IG) remains in a covert denial mode. They provide great PR soundbites to the media, but the fact that Veteran patients know very well is that VA medical malpractice is a crisis that is harming/killing Veterans – and our most senior VA officials refuse to do anything about it – other than cover it up!

The VA refuses to conduct a professional investigation as it does NOT want to hold offending VA doctors accountable. This is why I am asking our elected officials to please act and for the media to please report on this crisis – please.

Thanks,

(b) (6)

Vet 'dumbfounded' after VA drops ball on brain mass diagnosis

By JACK ENCARNACAO | The Boston Herald (Tribune News Service) | Published: May 2, 2017

U.S. Marine combat vet Brian Callahan sat in stunned silence. A doctor at Massachusetts General Hospital had just asked him what the Veterans Administration thought about a brain mass he spotted on Callahan's MRIs.

"I looked at him and I said, 'Excuse me?' " said Callahan, who was seeing the growth for the first time on the neuro-endocrinologist's screen. "He just kept pointing at it with a mouse on all the scans. He just kept looking at me going, 'And the VA's never said anything?' He was dumbfounded."

Callahan felt a moment of vindication, then fear, then anger.

"The VA kept telling me that, you know, there's really nothing wrong," he said. "I was like, finally, I'm not crazy. This is something that's really going on ... I was horrified."

The 30-year-old former lance corporal from Dracut had been a machine gunner with 3/8 Marines in Iraq and Afghanistan. He had been rattled by several improvised explosive device blasts, and got a concussion from one. His November 2016 visit to Mass General was the first time the VA's images of his brain were reviewed by a non-VA doctor.

In the six years Callahan had been going to VA hospitals in Jamaica Plain and West Roxbury for treatment of debilitating seizures, he had never been told anything about the mass, which is benign and located between his pituitary gland and ocular nerve. He said the VA docs always chalked up his symptoms to stress, migraines or vertigo, and told him they couldn't see anything amiss on his brain.

Callahan — with a faulty diagnosis and a low disability rating — continued to struggle with the seizures, lost his job at a diesel trucking company and went on Mass Health, through which he ended up at Mass General.

Good job (b) (6) [redacted] Item: 87 (Attachment 1 of 1)
To: [redacted]@cva.org
From: DJS
Sent: Sat 7/8/2017 7:31:00 PM
Subject: Good job

I saw your interview and town hall on fox and think you did a really nice job. I think your setting the right tone to keep focus on the important issues but showing the President and I your constructive support for our reforms.

It's not easy as you know- lots of resisters are out there-but like you said im optimistic

David Shulkin

Communication Plan
Reinstatement of Puerto Rico Medical Center Director
May 6, 2017

Background

DeWayne Hamlin, the director of the San Juan VA Medical Center, was removed from federal service January 20, 2017.

DeWayne Hamlin's case is still being actively litigated before the MSPB, which has not yet dismissed this matter until such time as the agency can show that it has fully restored Mr. Hamlin back to the way he was before the agency took its removal action. Consequently, given the contentious nature of this case, OGC strongly recommends that VA only (b) (5)

Subject: [EXTERNAL] Freedom of Information Request: All correspondence between CVA + VA
Date: Wednesday, January 10, 2018 1:43:05 PM

January 10, 2018

To Whom It May Concern:

This is a request under the Freedom of Information Act. I hereby request the following records:

All email correspondence between VA officials and officials at the Concerned Veterans For America with email addresses ending in "@cv4a.org" between Jan. 20 and present day. I sent a request earlier for this, and was given tracking number 18-01467-F. I think this request has been closed, as I neglected to properly respond to a request for clarification. If that's the case, please start a new request. But if my last request is live, please tweak. The search terms should include, but are not limited to, "trump" "koch" "accountability" "privatize" "shulkin" "selnick" "VA"

The requested documents will be made available to the general public, and this request is not being made for commercial purposes.

In the event that there are fees, I would be grateful if you would inform me of the total charges in advance of fulfilling my request. I would prefer the request filled electronically, by e-mail attachment if available or CD-ROM if not.

Thank you in advance for your anticipated cooperation in this matter. I look forward to receiving your response to this request within 20 business days, as the statute requires.

Sincerely,

Jasper Craven

Subject: Pilot project - related to existing telemedicine grant

I hope this finds you well. I recall your last email about the strictures around your being an appointee. This email I think respects that and is about a pilot project that would be cost-free to the VA, although it is related to an existing VA contract.

This pilot would harmonize with

the
VA contract awarded to Care Innovations last year fo [REDACTED] (b) (4), (b) (5)

Good morning Secretary Shulkin,

Thank you so much for taking a few minutes to speak with me just before leaving the Winterhaven event in DC on Saturday afternoon. It was truly an honor to meet you. I am currently a graduate student at The Catholic University of America studying social work and I have a passion for working with veterans. Last semester in my social welfare policy class, I wrote a paper regarding post-traumatic stress disorder in veterans and much of my research included you as a key player. I have attached the paper here. I have the utmost respect for the work you are doing at the VA and I am excited to see the progress that will be made in the future. I hope you have a great week and thank you again!

Best regards,

MENTAL HEALTH IN VETERANS

2

Post-Traumatic Stress Disorder and Mental Health Concerns in Military Veterans

The men and women who have served the United States of America as members of the military put their lives on the line and made endless other sacrifices to defend their country. These brave veterans endured hardships that most civilians cannot begin to imagine. As a result, many returned home from deployments and missions with various mental health issues. One of the most common concerns reported after deployment was post-traumatic stress disorder, also known as PTSD. This remains to be the case today as conflicts in Iraq and Afghanistan continue. The military veterans who struggle with PTSD often have trouble receiving the appropriate care and treatment they need, if they come forward to seek help at all. Numerous incidents have recently proven that the Department of Veterans Affairs (VA), committed to the physical and mental health of military members, has been falling short of expectations and failing to deliver the proper care that veterans require. These members of society need the help of others, such as social workers, to advocate on their behalf because they represent such a small portion of the United States population. Social work as a profession is committed to the health and well being of every individual, including military veterans and service members.

Problem Stream**Statistical Evidence**

Post-traumatic stress disorder has existed within the military as long as soldiers have been fighting in combat. The condition was known as “shell shock”, “soldier’s heart” or “battle fatigue” in previous wars (Abrams, 2017; Shaddad, 2017). It finally gained the name it is known by today in the Vietnam War era and was recognized by the American Psychiatric Association as a diagnosable disorder in 1980 (Abrams, 2017). Regardless of these progressive steps, the military continues to encourage strength and machismo in its members. The ethos of the military

is one in which mental illnesses are shameful weaknesses, moral failings and defects not worthy of a warrior (Abrams, 2017). As Abrams (2017) states, the overall notion is that if the wound is not visible, it does not exist.

According to the Census Bureau, there are approximately 20 million veterans living in the United States today (Williams, 2017). Of these veterans, anywhere from 11-30% are estimated to have experienced PTSD in their lifetime, based on service era (National Center for PTSD, 2016). Approximately 11-20% of veterans who served in Operation Iraqi Freedom and Operation Enduring Freedom have PTSD (National Center for PTSD, 2016). The exact number is difficult to pinpoint because PTSD is challenging to diagnose for a number of reasons. As stated, the stigmatization starts early, highlighting emotions and feelings as weaknesses that should not be discussed. Individuals in the military feel pressured to be strong and resilient and see themselves in a role of providing services to others, not vice versa (Shaddad, 2017). A PTSD diagnosis relies heavily on self-reporting and if men and women are shamed into silence, these numbers will continue to be inaccurately low. Fortunately, society is beginning to view mental health with less stigma and as a result, veterans in need of help are more likely to come forward seeking treatment. Direct combat conflicts in Afghanistan and Iraq are ongoing, which means the number of veterans experiencing PTSD is expected to increase over time.

Causes and Consequences

Post-traumatic stress disorder develops in military members as a result of experiencing an extremely stressful or traumatic event during the war such as combat or a non-war traumatic event such as a terrorist attack, violence, sexual assault or serious injury (Ghaffarzadegan, Ebrahimvandi, & Jalali, 2016). PTSD most often results in military members due to a deployment to a combat zone. One study found that service members deployed to Iraq and

MENTAL HEALTH IN VETERANS

4

Afghanistan were more likely to experience symptoms related to both warzone and home front experiences than those who did not deploy (Highland et al., 2015). Symptoms may occur within the first few days after exposure to trauma or they may be delayed for months or years (Government Accountability Office [GAO], 2004). There are four symptoms that individuals experience psychologically as a result of the trauma. These include re-experiencing the event, avoidance of similar stimuli, negative cognition and mood, and increased physical arousal, also known as hyper vigilance, even long after returning to a place of safety (Ghaffarzadegan et al., 2016). These conditions can go unrecognized and unacknowledged by the military, family members and society as a whole, resulting in adverse effects on the service members' moods, thoughts and behaviors (GAO, 2017).

The consequences of this disorder are extensive, severe and far-reaching. PTSD is known to be highly co morbid with other psychological effects or mental illnesses that occur following trauma including depression, anxiety disorders, anger, guilt, shame and violence (Ghaffarzadegan et al., 2016). PTSD is linked to an increased risk for suicide and is more strongly associated with suicide ideation and attempts than any other anxiety disorder (Tanielian & Jaycox, 2008). PTSD increases the risk of substance use disorders because individuals are seeking new methods to cope with the pain (Tanielian & Jaycox, 2008). Individuals suffering are more likely to report being bothered by physical symptoms such as stomach pain, back pain, headaches, dizziness, fainting, shortness of breath, nausea and chest pain (Tanielian & Jaycox, 2008). According to Ghaffarzadegan et al. (2016), PTSD leads to a higher likelihood of losing jobs or being discriminated against in the workplace, social exclusion, lower income, difficulties in renting and obtaining housing, legal difficulties and relationship troubles. The trauma experienced has a negative effect on emotion regulation, leading to a greater risk of anger and

aggression. As a result, PTSD can indirectly affect family members, friends, community members, colleagues and employers (Ghaffarzadegan et al., 2016). The emotional numbing and avoidance aspects of PTSD are associated with poorer parent-child relationships and therefore lead to more severe behavioral and academic problems in children (Tanielian & Jaycox, 2008). Individuals with PTSD are also costly to society because the illness is associated with significant reductions in productivity, a lower probability of working, higher number of missed days at work and lower earnings (Tanielian & Jaycox, 2008). Overall, the symptoms associated with PTSD lead to a reduced functional status and individuals with PTSD report a lower quality of life and wellbeing (Highland et al., 2015; Tanielian & Jaycox, 2008).

While in the military, a troubled mental state can lead to disciplinary infractions, including drug use, insubordination, absence without leave, or criminal behavior, and subsequent separation from the military for misconduct (GAO, 2017). These members are discharged from the military with an “other-than-honorable” label and as a result, they may not be eligible for any VA benefits and services, including health care (GAO, 2017). This topic in particular has led to a strong legislative response to PTSD in the past few years. Between 2004-2005, a number of bills were introduced to legislation with 103 sections regarding PTSD (Purtle, 2014). This occurred as a direct result of service members returning from Iraq and Afghanistan in need of treatment for PTSD. According to Purtle (2014), PTSD policy research is still generally undeveloped but could be a highly powerful tool to prevent and mitigate the effects of the disorder.

From Private Problem to Public Problem

Quite a few notable events have happened over the past few years that brought heightened attention to this issue of veterans’ mental health in what is known as Kingdon’s problem stream. One such event is the protests of National Football League players regarding

MENTAL HEALTH IN VETERANS

6

racial inequality in which they kneel during the national anthem. Although it was not the intention of the protests, the acts have caused citizens to begin discussing how military service members and veterans are treated in the United States. Their wellbeing and respect has become recognized as a high priority and the conversation has encouraged many more people to become involved in the rights of veterans. Stephen Curry, a well-known basketball player for the Golden State Warriors, wrote an article on Veteran's Day this year mirroring these sentiments. Curry argued that the debate around national anthem protests needs to be cast aside to make room for a conversation about the actual ways civilians can help veterans (Payne, 2017). Curry proposes real action regarding access to jobs, medical services, both physical and mental, and readjustment to society (Payne, 2017). Hollywood has also joined the discussion regarding military service members and mental health. Various documentaries have discussed PTSD in depth, including Ken Burns' *The Vietnam War*, *Almost Sunrise* and National Geographic's current docuseries, *The Long Road Home*. These sources portray the way in which military members are discouraged from speaking or preparing for the "unseen wounds of war" and provide harrowing statistics. One of which is 90% of 133 mental health clinicians surveyed reported they received no training on the top recommended PTSD treatments (Russell, 2017).

News outlets and social media have played a significant role in bringing the problem to light as well. Multiple events have occurred in recent years that could be considered isolated incidents but the power of the news spread word throughout the country and made the connection to a larger issue. In 2014, a scandal erupted in Phoenix, Arizona when dozens of veterans died waiting to receive care at the local VA medical center (Boyer, 2017). As a result, the VA secretary, Eric Shinseki, was fired. About two years later, a veteran committed suicide in New Jersey by setting himself on fire after his local clinic staff failed to ensure he had adequate

mental health care (Slack, 2017). Most recently, a young man shot and killed 26 people at a church in Sutherland Spring, Texas. The gunman previously served in the Air Force and had a record of mental illness (Marcos, 2017). According to Marcos (2017), he was discharged from the military for bad conduct, making him ineligible to receive any benefits and services from the VA, including mental health care. This means he was also not screened for PTSD or other service-related illnesses upon leaving the military. This particular story drew the attention of a number of congress members and led to renewed discussion about mental health.

Politics Stream

After the Texas church shooting, a significant number of insider participants emerged as key players in the agenda-setting process. Two Republican representatives from the House, Vice Chairman of the House Veterans' Affairs Committee Gus Bilirakis of Florida and Mike Coffman of Colorado, worked on and supported legislation that would improve access to mental health care after discharge from the military (Marcos, 2017). Elizabeth Esty is a member of the House also on the Veterans' Affairs Committee and a representative for Connecticut's 5th District, advocating for a national commitment to veterans to improve mental health care (Esty, 2017). Esty (2017) is fighting to change a culture that discourages veterans from seeking help when they need it. Recently, House Representative Doug Lamborn of Colorado introduced a new bill called the Veterans Empowerment Act (Caldwell, 2017). The Senate is also taking note of the mental health care issue surrounding military veterans. Senator Dean Heller on the Veterans' Affairs Committee has promised to create a bill in the next month that will improve reporting standards at the VA. Democratic Senator Cory Booker and fellow New Jersey Congress members became more deeply involved with the issue following the veteran suicide at the VA medical center (Slack, 2017).

MENTAL HEALTH IN VETERANS

8

There are a number of advocacy groups, considered outsiders in the agenda-setting model, speaking up on behalf of veterans including Concerned Veterans for America (CVA) with executive director Mark Lucas, The American Legion, and Vietnam Veterans of America. The American people as a whole seem to be receptive to positive change benefitting veterans and mental health. There is less stigmatization associated with mental illness than in previous years and those affected are more often being encouraged to receive help. There are few competing values in regards to improving mental health care for veterans. It appears to be a topic many want to discuss further, with the primary area of focus as the only difference. Some groups, such as Veterans Cannabis Collective Foundation and Veterans for Medical Cannabis Access, are focused on finding new, unique treatments for veterans with PTSD, including medical marijuana. They argue it eases anxiety, sleeplessness, chronic pain and other PTSD symptoms allowing individuals to function as their old selves again (Associated Press, 2017). However, others claim that medical marijuana masks symptoms and the focus should remain on improving the current treatment system within the VA. The Trump administration is currently the most prominent participant in the political stream and has been making positive changes. According to Boyer (2017), President Donald Trump recently stated, “The veterans have poured out their sweat and blood and tears for this country for so long and it’s time that they are recognized and it’s time that we now take care of them”. President Trump selected David Shulkin as the Secretary of the U.S. Department of Veterans Affairs, which has proved to be a big win for veterans’ mental health care. Shulkin has said his top priorities are to shift more of the VA’s resources into providing services unique to veterans, such as treatments for PTSD and traumatic brain injury, and away from services that veterans can easily obtain from private doctors (Westwood, 2017). This change in administration opened a major window of opportunity

VA-18-0457-A-000624

for policy changes. Both legislators and the American people continue to push for more progress as a new possible war looms on the horizon. Many are hoping for research and methods that would reduce or prevent the risk of PTSD in order to slow the issue in the event that more service members are deployed to new combat zones (Highland et al., 2015).

Policy Stream

As this issue has surfaced more prominently since the events of September 11, 2001 and the subsequent wars in Iraq and Afghanistan, a number of policy ideas have floated through the policy stream. Not many address PTSD directly but the disorder does fall under the mental health umbrella that is at the forefront of policy creation regarding veterans right now. As a direct result of the 2014 VA scandal in Phoenix, the Veterans Access, Choice and Accountability Act of 2014 was developed by the Obama administration. It contains the Veterans Choice Program, which allows veterans to seek assistance using their military benefits from private physicians if they have to wait more than 30 days for an appointment at a VA facility or are located more than 40 miles away from the nearest VA facility (Caldwell, 2017). According to Boyer (2017), this program was set to expire in August 2017 without legislation and with nearly \$1 billion in funding unspent. However, on April 19, 2017, President Trump signed a reauthorization of the original act, known as the Veterans Choice Program Extension and Improvement Act, extending stopgap services for veterans to go outside of the VA for medical care (Boyer, 2017; Shulkin, 2017). According to Hansler (2017), this act also allows the VA to share medical information with non-VA agencies providing medical services to veterans to ensure there are no lapses in treatment and that they are receiving the necessary care.

However, the Veterans Choice Program legislation was intended to be a temporary fix to the issues of receiving adequate service at the VA and many veterans groups are calling for more

MENTAL HEALTH IN VETERANS

10

permanent changes. According to Mark Lucas of CVA, Congress needs to simply expand private health care options for veterans and fully empower veterans to decide when and where to get care (Boyer, 2017; Caldwell, 2017). Westwood (2017) claims that David Shulkin supports this notion and has said his plan is to ideally let veterans choose a combination of private and public services. Representative Doug Lamborn from Colorado is taking the steps to accomplish this goal. Towards the end of November, Lamborn introduced the Veterans Empowerment Act as a direct response to falsified patient wait times at the Colorado VA for veterans with PTSD (U.S. Congressman Doug Lamborn, 2017). This act is intended to create a veterans health insurance program that enables veterans to choose to use their benefits either inside or outside of the VA system, without requiring authorization beforehand from the VA (Caldwell, 2017; U.S. Congressman Doug Lamborn, 2017). It also aims to increase oversight and transparency to prevent future cases of abuse and mismanagement (Caldwell, 2017). According to Caldwell (2017), this will allow the VA to concentrate on its original purpose of caring for veterans with service-connected disabilities and veterans are overwhelmingly supportive of such a reform.

Another major piece of legislation recently passed by the House aims to provide mental health care for veterans who received other-than-honorable discharge from the military and as a result, are ineligible for benefits from the VA, including mental health care (Marcos, 2017). According to Marcos (2017), this legislation was authored by Representative Coffman and supported by Representative Bilirakis. The GAO (2017) states that 91,764 service members were separated from the military from 2011 to 2015 due to misconduct charges. Within 2 years prior to separation, 62% of those members were diagnosed with a mental disorder and 16% were diagnosed with PTSD or TBI specifically (GAO, 2017; USA Today, 2017). USA Today (2017) suggests providing more intensive mental screenings to all separating service members and

teaching the individuals to recognize the symptoms of mental illness. The latest proposed bill would cover that recommendation and more. It would ensure the VA provides initial mental health assessments and care services to former service members discharged under other-than-honorable conditions who participated in combat operations or experienced sexual abuse (Marcos, 2017). According to Strassner (2017), veterans with other-than-honorable discharge may also soon be eligible for urgent mental health care from VA facilities if the Senate passes the bill. Most legislators believe these bills are a strong starting point but there is much more work to be done within the VA system. According to Goldsmith (2017), the government must invest in continuing to improve and expand the VA facilities and services to ensure the nation keeps its promise to veterans.

The National Association of Social Workers (NASW) does not have a policy position explicitly discussing mental health in military service members and veterans. However, they do support the population and express this position on their website. The site states that the association is committed to supporting the health and well being of military service members, veterans and their families (National Association of Social Workers [NASW], 2017). It includes various tools and resources available to assist professionals working with this community, including lists of military terms and acronyms, articles on how to assist family members and links to publications on the topic. The NASW also published a set of standards for social work practice with service members, veterans and their families to enhance social workers' awareness of the skills, knowledge, values and sensitivities needed to work effectively with this population (NASW, 2012). This document stresses the importance of taking care of an underserved population that has unique needs and challenges.

Interview

MENTAL HEALTH IN VETERANS

12

Ms. Brigit Mancini worked at the Department of Veterans Affairs in Washington, DC and Myrtle Beach for a total of six years during the height of veterans returning from combat in Iraq and Afghanistan. She worked as a substance abuse counselor, a family support counselor and a senior social worker for the Operation Iraqi Freedom/Operation Enduring Freedom Department. She believes that mental health concerns will continue to increase among the veteran population when more come forward for help as a result of the latest conflicts in the Middle East (B. Mancini, personal communication, November 28, 2017). Ms. Mancini identified a wide variety of both causes and consequences for the issue regarding treatment for mental health disorders at the VA. She explained a primary reason for the backup in care as a result of disconnect between the active military system and the VA. A few years ago, the Obama administration decided on a draw down of troops, meaning those who have been in treatment for a while but are not improving are no longer considered “mission ready” and are medically discharged from active duty (B. Mancini, personal communication, November 28, 2017). This leads to a direct surge and burden within VA hospitals and by the time the facilities are approved to hire more staff, there has already been a substantial gap in treatment. As a result of the drastic increase in clients, veterans are often pushed towards group counseling rather than individual counseling, which many prefer and need (B. Mancini, personal communication, November 28, 2017). Ms. Mancini recommends a stronger coordination between the active duty side and the VA system to ensure streamlined care for individuals. A decrease in active service members means an increase in combat era veteran care so hiring an adequate amount of professionals at the VA should come before the draw down of service members, not simultaneously (B. Mancini, personal communication, November 28, 2017). Going forward, Ms. Mancini expressed concerns that staffing will continue to be a problem among VA facilities, hindering the quality of mental

VA-18-0457-A-000628

health care treatment available to veterans. She stated that the various policies recently implemented regarding the VA system give her hope that the issue will continue to be addressed and necessary improvements will be made in the near future (B. Mancini, personal communication, November 28, 2017).

Conclusion

After a thorough analysis of the issue, it is likely that post-traumatic stress disorder, mental illness and the need for mental health care will continue to be a serious issue among veterans over the next few years. As Goldsmith (2017) states, the surge in demand for treatment is directly caused by this generation returning from Iraq and Afghanistan, as well as Vietnam-era veterans growing older. As the topic of mental illness becomes less stigmatized, more service members and veterans will come forward seeking assistance and the country will see a higher demand for treatment. It appears as though the NASW recognizes this trend as well. In the standards specific to the military population published just five years ago, the association recognizes its ability to provide unique services to these individuals. The standards also emphasize the opportunity social workers have to influence other professionals and stakeholders regarding the importance of responding to the needs of these members (NASW, 2012). The hope is that in the future, even more social workers will be well equipped with the appropriate knowledge and training needed to work with service members and veterans to meet the expected rising demand for treatment. Social workers have the compassion, dedication and desire for justice that military service members and veterans need to heal and help tackle their battles long after returning home from war.

FROM: (b) (6) (OPIA)

RE: VSO Media Round-Table

DATE: 29 June, 2017

TIME: 3:00 – 3:45 p.m.

CONTACTS: (b) (6), (b) (6)

OVERVIEW: OPIA will facilitate a round-table media event with you and the communication directors / social media managers of 21 leading Veterans Service Organizations. Each organization produces print and on-line publications for their respective membership.

This forum allows you to speak directly with multiple VSOs about current and future VA initiatives while answering questions on varied topics important to our stakeholders. Your interaction with our VSOs sustains transparency and builds trust as the department undertakes important modernization efforts.

VSOs will share information garnered from this round-table to place images and articles in their print magazines, on-line news programs, and via social media.

The event is on-the-record.

YOUR ROLE: Provide opening comments and field questions from the assembled VSOs.

LOGISTICS: Micheal Migliara will escort you to the Omar Bradley Conference Room and to your seat. John Ulyot will open the forum and introduce you for your opening comments. The question and answer session follows.

AGENDA: 2:55 p.m. – SECVA escorted to OBCR
2:58 p.m. – Opening Remarks
3:00 – 3:30 p.m. – Q/A
3:30 – 3:35 p.m. – SECVA Closing Comments

ABOUT THE ORGANIZATION: See attached list of the participating Veterans Service organizations.

Veterans Service Organizations participating in the media round-table:

American Veterans: (b) (6) ra
Blinded Veterans Associatio (b) (6) son

Last Modified:	Sun May 07 11:56:13 CDT 2017		

Communication Plan
Reinstatement of Puerto Rico Medical Center Director
May 6, 2017

Background

DeWayne Hamlin, the director of the VA Caribbean Healthcare System, was removed from federal service on January 20, 2017. On Tuesday, May 2, 2017, VA rescinded Mr. Hamlin's removal and has been detailed to the VA Sunshine Healthcare Network office (VISN 8).

Mr. Hamlin, who appealed his removal from the federal service, still has an active litigation before the MSPB, which will only dismiss the matter once the agency can show that it has fully restored Mr. Hamlin back to the way he was before the agency took its removal action. Consequently, given the contentious nature of this case, OGC strongly recommends that VA only (b) (5)

Subject: RE: CVA in the news

Vivieca,

I believe you are referring to Sherman Gillums' (PVA) piece titled "The Removal of Senior Officials Will Be The First Big Test For New VA Secretary" written on February 6th. I spoke to Sherman about this article on Friday after you handed it to me and he mentioned that he spoke to Dr Shulkin about this general topic the week he was nominated to be the Secretary. The topic was on Dr Shulkin's radar because Sherman had written a previous piece in December titled "The one problem that will make or break Trump's pick for VA Secretary", which largely covers the same topic-- accountability of mid-level management within the healthcare system. Sherman seemed pleased with the conversation.

The more recent article highlighted two examples (DeWayne Hamlin- Caribbean and Toby Mathew, Overton Brooks) where poor performers were, as Sherman claims, put on administrative leave and allowed to safe harbor in the VISN collecting government pay check while an investigation was taking place. But it focused on the same topic--accountability and responsibly and quickly removing bad actors.

Sherman appreciated me calling and I get the sense that he knows we are looking into this issue. Since

Sherman's ultimate issue is that removal should mean termination, I recommend we respond when we know we have a firm position on Accountability measures as it relates to temporarily removing leaders accused of wrongdoing. However, if you'd like me to prepare a brief note that let's Sherman know the Secretary is aware of the article, is looking into these two cases, and knows the broader issue must be addressed, I'd be happy to do that.

Subject: CVA in the news

Vivieca, CVA isn't a VSO but wanted to flag this piece for you because I understand that CVA will be at the White House VSO meeting today. This is the most critical statement I've seen from them in recent weeks. It will be interesting to see who they send to the WH meeting today and how vocal they'll be.

"The VA has consistently failed at their number one priority: to provide veterans access to timely health care," said CVA Policy Director Dan Caldwell in a statement. "The fact that VA employees across the country are still engaging in inappropriate scheduling practices shows just how dysfunctional the department still is. Accountability and choice reforms at the VA are simply not an option anymore – they are an urgent necessity."

Ma'am,

If it is more helpful for you, I am happy to task [REDACTED] (b) (6) on your behalf, or at least be in the room for meetings with him so I can make sure he is meeting your intent.

I do not mind that members of my team have direct interaction with senior leadership, in fact, often times that is essential to keep things moving. I just wanted to let you know that I am flexible depending on your preferences.

Thanks!

**Department of
Veterans Affairs**

Memorandum

Date: April 2, 2018

From: General Counsel

Subj: Vacancies Covered by the Federal Vacancies Reform Act

To: Acting Secretary of Veterans Affairs

QUESTION:

(b) (5)

ANSWER:

(b) (5)

ANALYSIS:

A. Background

1. The Federal Vacancies Reform Act (FVRA), codified at 5 U.S.C. §§ 3345-3349d, sets forth:
 - (a) means for temporarily filling a vacant position that is reserved for an individual who is presidentially-appointed and Senate-confirmed (PAS), in this case the Secretary of Veterans Affairs (Secretary); and
 - (b) the limited time period for which any individual(s) can serve in an "acting" role in a vacant PAS position.
2. The FVRA applies to a PAS position when the individual occupying the position "dies, resigns, or is otherwise unable to perform the functions and duties of the office." 5 U.S.C. § 3345(a).
3. On March 28, 2018, the President announced that Dr. David Shulkin would no longer serve as Secretary of Veterans Affairs and designated you to serve as Acting Secretary. The President also announced that he intended to nominate Admiral Ronny Jackson for the position of Secretary.

**IN THE UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF COLUMBIA**

SAMIR HAMEL,
c/o DEMOCRACY FORWARD
FOUNDATION
P.O. Box 34553
Washington, D.C. 20043

and

WILLIAM FISCHER,
c/o DEMOCRACY FORWARD
FOUNDATION
P.O. Box 34553
Washington, D.C. 20043

Plaintiffs,

v.

ROBERT WILKIE,
in his capacity as the person claiming to be
the acting Secretary of Veterans Affairs,
810 Vermont Avenue
Washington, DC 20420

and

U.S. DEPARTMENT OF VETERANS
AFFAIRS,
810 Vermont Avenue
Washington, DC 20420

Defendants.

Case No.

COMPLAINT

1. Plaintiffs Samir Hamel and William Fischer bring this action against Defendants Robert Wilkie, in his capacity as the person claiming to be the acting Secretary of Veterans Affairs, and the U.S. Department of Veterans Affairs (the “Department” or the “VA”), seeking a declaration that Wilkie is not the lawful acting Secretary, and an injunction barring Wilkie and the Department from continuing to represent that Wilkie is the acting Secretary and from taking any action in reliance on Wilkie’s purported authority.

2. According to press reports, the Trump administration and its allies in Congress seek to privatize essential VA services, turning veterans’ health care over to a network of private providers rather than the facilities and physicians that veterans have come to count on. But this case is not about whether privatization is a good idea or a bad idea. This case is about who will make that decision and, more broadly, who possesses the authority to make the many day-to-day decisions regarding veterans’ benefits and care that the Secretary of Veterans Affairs has to make. Specifically, this case is about whether President Trump may circumvent federal statutes and the Constitution to install Wilkie as the acting Secretary of Veterans Affairs, or whether the Deputy Secretary, Thomas G. Bowman, lawfully holds that office instead.

3. The position falls to Deputy Secretary Bowman, not Wilkie, as a matter of law. The VA’s statutory scheme provides that in the event of a vacancy in the Secretary position, the Deputy Secretary shall become acting Secretary. Under the Federal Vacancies Reform Act of 1998 (the “FVRA”), the President may bypass the default order of succession, but only if the previous officeholder dies, resigns, or is otherwise unable to serve in the office—not if the previous officeholder is fired. On March 28, 2018, President Trump unceremoniously fired the Secretary of Veterans Affairs, Dr. David J. Shulkin, by tweet. The President did not, therefore, have legal

authority under the FVRA to fill the vacant Secretary position with an acting officer of his choice. Wilkie's appointment as acting Secretary was unlawful.

4. By disregarding statutory provisions addressing when an individual may be designated to act as an officer in a Senate-confirmed position, the President has also avoided all Congressional checks on his power to fill such positions, and in so doing has violated the Appointments Clause of the Constitution. Nor are Wilkie's new duties as acting Secretary of Veterans Affairs germane to his original duties within the Department of Defense, meaning that he cannot act as Secretary without being specifically appointed to that role.

5. Plaintiffs are veterans who are injured by the President's unlawful appointment of Wilkie, Wilkie's unlawful assumption of authority, and the Department's recognition of it. They receive health care from the VA and are therefore subject to the effects of any decisions Wilkie makes with regard to health care services or other benefits; they are subject to continued, profound uncertainty about how and under what conditions they will receive their benefits; they are deprived of the right to a lawful acting Secretary who will vigorously represent their interests before Congress and the rest of the executive branch; and they face the imminent threat that their health care will be turned over to the private sector.

6. Thus, Plaintiffs respectfully request that the Court declare that Deputy Secretary Bowman is the lawful acting Secretary of Veterans Affairs, and enjoin Wilkie and the Department from continuing to represent that Wilkie is the acting Secretary and from taking any action in reliance on Wilkie's purported authority.

Jurisdiction and Venue

7. The Court has jurisdiction over this action pursuant to 28 U.S.C. § 1331 because Plaintiffs' claims arise under the Constitution and laws of the United States.

8. Venue is proper in this district pursuant to 28 U.S.C. § 1391(e)(1) because Defendants are an agency of the United States and a purported official of the agency sued in his official capacity.

Parties

9. **Plaintiff Samir Hamel** lives with his wife and three children in El Mirage, Arizona. He enlisted in the United States Army Reserve shortly after the September 11th attacks. He served as an Army chaplain until January 2014, when he was honorably discharged. From December 2004 to November 2005, Mr. Hamel deployed to Kuwait, Iraq, and Qatar.

10. Mr. Hamel applied and was enrolled in the VA health care system in 2007. He uses his health benefits on a monthly basis, visiting the Southwest Veterans Affairs Health Care Clinic in Phoenix, Arizona. Mr. Hamel is happy with the health care he has received at the VA; although he has had the option, provided by the VA, to use private service providers, he prefers to use the VA for all of his health care needs, so he can continue to see his own doctor.

11. Mr. Hamel is concerned that the administration will take action to privatize VA health care services. He fears that VA leadership will support and encourage moving veterans like him to private service providers, disrupting his care. If Mr. Hamel could not access VA health care, he would either have to purchase health insurance on the individual market or go without coverage.

12. Mr. Hamel received a home loan through the VA in May 2013 to purchase his current residence. He also used the VA's vocational rehabilitation and employment services to obtain his Masters in Business Administration.

13. **Plaintiff William Fischer** lives in Washington, DC. He served in the United States Marine Corps from March 2001 until he was honorably discharged in March 2009, including a deployment to Fallujah, Iraq in 2004 where he received, among other awards, a Purple Heart.

14. Mr. Fischer is enrolled in the VA health care system. He uses his health benefits for annual check-ups and on a periodic basis as necessary at the Washington, DC VA Medical Center. Mr. Fischer has had a positive experience with the VA. If Mr. Fischer did not have VA health care, he would be forced to rely exclusively on private health coverage.

15. Like Mr. Hamel, Mr. Fischer is concerned about the potential privatization of VA health care services. He fears that privatization would result in worse care for veterans as the VA is set up specifically to meet the needs of veterans and has an institutional expertise unmatched in the private sector.

16. Mr. Fischer also received education assistance through the GI Bill and previously purchased a home using the VA home loan program.

17. As veterans who receive health care and other benefits from the VA, Plaintiffs are injured by the President's unlawful appointment of Wilkie, Wilkie's unlawful assumption of authority, and the VA's acknowledgment of it. They continually receive benefits from the Department pursuant to its regulations, they must comply with the Department's requirements and policies, and any disputes regarding their benefits are resolved by the Secretary and his designees within the Department. They are therefore affected by any decisions Wilkie makes with regard to health care services or other benefits. Beyond these present injuries, Plaintiffs face the imminent threat that their health care will be turned over to the private sector, decreasing their access to health care services and the quality of those services.

18. Because of the dubious legality of Wilkie's appointment as acting Secretary, Plaintiffs are subject to continued, profound uncertainty about how and under what conditions they will receive their benefits. Certainty is essential with respect to medical benefits; Plaintiffs need to know how and whether they can access VA health care services, especially given the possibility

that they could suffer a medical emergency. Plaintiffs are also deprived of the right to a lawful acting Secretary who will vigorously represent their interests before Congress and the rest of the executive branch—and one whose authority is undisputed.

19. **Defendant Robert Wilkie** is the Under Secretary of Defense for Personnel and Readiness and purports to be the acting Secretary of Veterans Affairs. He is sued in his capacity as the person claiming to be the acting Secretary, an official who “is responsible for the proper execution and administration of all laws administered by the Department and for the control, direction, and management of the Department.” 38 U.S.C. § 303.

20. **Defendant Department of Veterans Affairs** is a federal agency headquartered in Washington, DC, charged with “administer[ing] the laws providing benefits and other services to veterans and the dependents and the beneficiaries of veterans.” 38 U.S.C. § 301. The Department is treating Defendant Wilkie as acting Secretary.

The Department Provides Essential Health Care Services and Other Benefits to Veterans Nationwide

21. The Department is the federal agency responsible for ensuring that our collective obligations to those who defended our Nation are fulfilled. As the Supreme Court has recognized, “[t]he solicitude of Congress for veterans is of long standing.” *Henderson ex rel. Henderson v. Shinseki*, 562 U.S. 428, 440 (2011) (quoting *United States v. Oregon*, 366 U.S. 643, 647 (1961)). To that end, the Department administers a complex and extensive benefits system and is charged with fulfilling certain statutory duties and requirements.

22. Of utmost importance, the Department operates a health care system: the Veterans Health Administration (“VHA”). The VHA “provide[s] a complete medical and hospital service for the medical care and treatment of veterans.” 38 U.S.C. § 7301. The VHA “is America’s largest integrated health care system, providing care at 1,240 health care facilities, including 170 medical

centers and 1,061 outpatient sites of care of varying complexity ... , serving 9 million enrolled Veterans each year.”¹ In total, the VA health care system has “an annual budget of approximately \$68 billion.”²

23. Plaintiffs and other veterans receive health benefits by applying to enroll in the VA system in person, by telephone, by mail, or online. Each veteran is assigned to a “priority group,” which determines when he or she will be able to enroll in VA health care and the precise level of benefits they receive. “The enrollment system is based on priority groups to ensure care is available to all enrolled Veterans,” consistent with Congressional budget limitations.³

24. Once veterans have enrolled, they receive a personalized Veterans Health Benefits Handbook that describes their benefits. Those benefits generally include “all the necessary inpatient hospital care and outpatient services to promote, preserve, or restore your health,” including “preventive care, inpatient care, ancillary services, specialty care, and mental health services.”⁴ The handbook informs veterans that “[a]long with your enrollment in the VA health care system comes the assurance that health and treatment services will be available when and where you need them.”⁵ It continues: “You can expect VA’s highly qualified and dedicated health

⁵ *Id.* at 1.

care professionals to meet your needs, regardless of the treatment program, regardless of the location.”⁶ In other words, the VA emphasizes the reliability and stability of VA care.

25. What distinguishes the care provided by the VA from other forms of health coverage is that the VA generally provides health care directly to enrolled veterans, rather than by contracting with private parties, like a typical private health insurer. Veterans receive a Veteran Health Identification Card which they can use to obtain health care at any VA health facility.⁷ When they see a health care provider, Plaintiffs and other veterans pay a minimal or no co-pay.⁸

26. The VA also provides a number of other benefits to the Nation’s veterans. The Veterans Benefits Administration, under the leadership of the Under Secretary for Benefits and the Secretary, is charged with “the administration of nonmedical benefits programs of the Department which provide assistance to veterans and their dependents and survivors.” 38 U.S.C. § 7701. Among other things, the VA provides disability compensation and a pension for disabled veterans (*id.* §§ 1110, 1131, 1521); life insurance payments (*id.* § 1312); housing assistance for homeless veterans (*id.* § 2011); compensation for burial expenses and designated national cemeteries (*id.* §§ 2302, 2402); educational assistance, commonly referred to as the GI Bill (*id.* § 3461); housing and small business loans (*id.* §§ 3702, 3742); and vocational rehabilitation and training (*id.* § 4102).

27. Currently, the Department lacks either an acting or a permanent Under Secretary for Benefits. The position is staffed by an “Executive in Charge.”⁹

**The Secretary Is Responsible for Ensuring Veterans
Get the Health Benefits to Which They Are Entitled**

28. While the Secretary may delegate certain duties to his or her subordinates, it is the Secretary who is ultimately responsible for administering the VA system, for making critical decisions about veterans' benefits, and for advocating on behalf of veterans to other executive branch agencies and officials, to Congress, and to the public at large. Ultimately, the Secretary is charged with achieving "the maximum feasible effectiveness, coordination, and interrelationship of services among all programs and activities affecting veterans," and "shall actively promote the effective implementation, enforcement, and application of all provisions." *Id.* § 523(a).

29. With respect to health coverage, the Secretary is obligated to "furnish hospital and medical services which the Secretary determines to be needed ... to any veteran for a service-connected disability; and ... to any veteran who has a service-connected disability rated at 50 percent or more," and may also furnish nursing home care to certain veterans. *Id.* § 1710(a). To that end, the Secretary must "establish and operate a system of annual patient enrollment," which "manage[s] the enrollment of veterans," as described above. *Id.* § 1705(a).

30. The Secretary is charged with ensuring that the VHA adequately serves the veterans under its care. He or she must "to the extent feasible, design, establish and manage health care programs in such a manner as to promote cost-effective delivery of health care services in the most clinically appropriate setting." *Id.* § 1706(a). And he or she must "establish and conduct a comprehensive program to monitor and evaluate the quality of health care furnished by the Veterans Health Administration." *Id.* § 7311. VA regulations provide that "[p]atients have a right to be treated with dignity in a humane environment," and "have a right to receive, to the extent of eligibility therefor under the law, prompt and appropriate treatment for any physical or emotional disability." 38 C.F.R. § 17.33(a).

31. The Secretary also possesses substantial discretion to extend health care services to those who are not otherwise statutorily entitled to them. For categories of veterans not enumerated in the statute, “the Secretary may, to the extent resources and facilities are available, ... furnish hospital care, medical services, and nursing home care which the Secretary determines to be needed.” 38 U.S.C. § 1710(a)(3). The Secretary can also provide medical care to the survivors and dependents of certain veterans. *Id.* § 1781(a). And the Secretary may provide benefits where an “administrative error” results in non-payment (*id.* § 503(a)), or where a beneficiary suffers loss in reliance on an erroneous decision (*id.* § 503(b)).

32. To fulfill his or her statutory duties, the Secretary has a number of statutory powers. The Secretary can promulgate rules (*id.* § 501); reorganize the Department’s functions (*id.* § 510); decide all questions of law and fact related to benefits determinations (*id.* § 511); delegate functions to his or her subordinates (*id.* § 512); and settle tort claims against the Department (*id.* § 515). The Secretary may also “enter into contracts or agreements with private or public agencies or persons” for “necessary services ... as the Secretary may consider practicable.” *Id.* § 513; *see also id.* §§ 1703 (authorizing the Secretary to enter into contracts for “hospital care and medical services”); 8102 (authorizing the Secretary to acquire medical facilities).

33. As part of his or her duties with regard to ensuring the provision of health care services to veterans, the Secretary has specific statutory obligations to staff the Office of the Under Secretary for Health.

34. The Under Secretary for Health is “the head of, and is directly responsible to the Secretary for the operation of, the Veterans Health Administration.” *Id.* § 305(b). He or she is charged with numerous responsibilities for administering the VHA, including decisionmaking on what types of medical services to outsource from the VHA. *See, e.g.*, 38 C.F.R. §§ 17.52, 17.142.

As such, the Under Secretary for Health directs the administration of the entire VHA and, together with the Secretary, is ultimately responsible for the treatment and care of all veterans like Plaintiffs who receive medical care from the VA.

35. The Under Secretary for Health’s qualifications are set forth by statute: he or she “shall be appointed without regard to political affiliation or activity and solely--

(A) on the basis of demonstrated ability in the medical profession, in health-care administration and policy formulation, or in health-care fiscal management; and
(B) on the basis of substantial experience in connection with the programs of the Veterans Health Administration or programs of similar content and scope.

38 U.S.C. § 305(a)(2).

36. The Secretary is responsible for establishing a commission to recommend individuals to the President for appointment to the Under Secretary for Health position. 38 U.S.C. § 305(c)(1). The membership of this commission must include veteran and medical provider representatives, among others. *Id.* § 305(c)(2). The commission must recommend at least three individuals for appointment, who the Secretary shall forward to the President with any comments he or she considers appropriate. *Id.* § 305(c)(3).

37. The Under Secretary for Health position has been vacant since October 7, 2017, and there is no current nomination for the position.¹⁰ The VHA currently is run by an “Executive in Charge” with the authority to perform the functions and duties of the Under Secretary for Health.¹¹ The Executive in Charge cannot perform non-delegable duties of this position without being appointed as acting Under Secretary, or otherwise complying with succession requirements.

¹⁰ See, e.g., Nikki Wentling, *Chief of VA Health System Steps Down*, Stars & Stripes (Oct. 6, 2017), <https://www.stripes.com/news/chief-of-va-health-system-steps-down-1.491395>; Nominations, S. Comm. on Veterans’ Affairs, <https://www.veterans.senate.gov/nominations> (last visited Apr. 27, 2018).

¹¹ Carolyn Clancy, MD, Dep’t of Veterans Affairs, <https://www.va.gov/directory/guide/manager.asp?pnun=30310> (last visited Apr. 27, 2018).

38. The Secretary is responsible for taking action to fill the Under Secretary for Health position.

39. The Secretary is also responsible for the appointment of numerous positions within the Department, including leadership positions in the Office for the Under Secretary for Health. *See* 38 U.S.C. § 7306(a), (c). These positions are required by statute to meet certain medical qualifications, such as being a qualified doctor of medicine for the Deputy Under Secretary for Health position and a qualified doctor of medicine or of dental surgery or dental medicine for various Medical Director positions. *Id.* § 7306(a). Several of the appointments must be made upon recommendation of the Under Secretary for Health. *Id.* § 7306(c).

40. Several of the leadership positions in the Office of the Under Secretary for Health are empty or staffed by individuals serving in an acting capacity. For example, the Assistant Deputy Under Secretary for Health for Organizational Integration position is vacant. Other key positions, such as the Deputy Under Secretary for Health for Community Care and the Deputy Under Secretary for Health for Policy and Services have acting officials, not permanent appointments.¹²

41. The Secretary is responsible for taking action to fill these important positions with permanent appointees. 38 U.S.C. § 7306.

The Secretary Is Responsible for Representing Veterans' Interests to Congress

42. The Secretary is also responsible for representing the interests of veterans to Congress, both through regular testimony and through written submissions.

¹² *Key Staff, Veterans Health Administration, Dep't of Veterans Affairs*, <https://www.va.gov/directory/guide/keystaff.cfm?id=2001> (last visited Apr. 27, 2018).

43. For example, since the start of this calendar year, the Secretary has testified in support of the Department's budget request¹³ and on the progress of implementing 2017 VA Reform Legislation, including with respect to implementing electronic medical records.¹⁴

44. The Secretary also has regular obligations to submit written reports to Congress.

45. Among these responsibilities, the Secretary is responsible for reporting to Congress on the recommendations of numerous advisory committees related to veterans' concerns. These include six statutorily required advisory committees, as well as non-statutory advisory committees. Their topics include: Former Prisoners of War (38 U.S.C. § 541), Women Veterans (*id.* § 542), Prosthetics and Special-Disabilities Programs (*id.* § 543), Minority Veterans (*id.* § 544), the Readjustment of Veterans (*id.* § 545), and Disability Compensation (*id.* § 546).

46. In general, the authorizing statutes for these advisory committees require the Secretary to appoint the members of the committees; to, on a regular basis, consult with and seek advice of the committee with respect to the subject matter of the committee; and to submit periodic reports by the committees to Congress with any comments concerning the report that the Secretary considers appropriate.

47. At least one such reporting period is imminent. The Advisory Committee on the Readjustment of Veterans' annual report was due to the Secretary by March 31. *See id.* § 545(c)(1). The Secretary has 90 days to transmit to the Committees on Veterans' Affairs of the Senate and

¹³ *Statement of the Hon. David J. Shulkin, MD*, S. Comm. on Veterans' Affairs (Mar. 21, 2018), <https://www.veterans.senate.gov/imo/media/doc/VA%20Shulkin%20Testimony%2003.21.2018.pdf>.

¹⁴ *Statement of the Hon. David J. Shulkin, MD*, S. Comm. on Veterans' Affairs (Jan. 17, 2018), <https://www.veterans.senate.gov/imo/media/doc/Shulkin%20VA%20Testimony%2001.17.2018.pdf>.

House of Representatives a copy of the report, together with any comments and recommendations concerning the report that the Secretary considers appropriate. *See id.* § 545(c)(2).

48. In the past this Advisory Committee has made specific recommendations on the administration of healthcare by VHA. Among these is a recommendation it has made over the course of multiple reports for VHA to implement strategies and policies to enhance coordination of care for individual veteran clients between Vet Center and VA medical center providers. The Committee called for “clear and precise directives from VHA” leadership.¹⁵ The Advisory Committee has also made recommendations related to veteran access to mental health care providers familiar with military culture and combat-theater experience and specific veteran suicide prevention efforts.¹⁶ Similar recommendations should now be before the Acting Secretary to review, and report along with recommendations to Congress.

**The Administration’s Plans to Dismantle the Veterans Health Administration,
Privatize Veterans’ Health Care, and Strip Veterans’ Benefits**

49. As explained above, the Department is charged with ensuring that veterans receive stable, predictable, high-quality health care. However, President Trump and his administration have long supported the privatization of the VA—a decision that would threaten Plaintiffs and other veterans’ health care and increase the cost of providing health care services.

50. During his campaign, then-candidate Trump and other campaign officials advocated for policies that would direct veterans toward private health care providers rather than the VA. Trump’s plan would have generally allowed “veterans to choose a doctor outside the VA

¹⁵ *Advisory Committee of the Readjustment of Veterans, Eighteenth Annual Report*, Dep’t of Veterans Affairs (Feb. 2017), <https://www.va.gov/ADVISORY/Reports/ReportReadjustFeb2017.pdf>.

¹⁶ *Id.*

system,” who would be reimbursed by the VA.¹⁷ In May 2016, one of his senior advisors gave comments that indicated that Trump “would likely push VA health care toward privatization and might move for it to become more of an insurance provider like Medicare rather than an integrated hospital system.”¹⁸ And in a July 2016 speech in Virginia Beach, Trump himself argued that “[v]eterans should be guaranteed the right to choose their doctor and clinics, whether at a VA facility or at a private medical center,” describing the VA as “corrupt and inefficient.”¹⁹

51. Since his election, President Trump has continued to support privatization. During the transition, Trump openly “consider[ed] changing the department to allow some veterans to bypass the VA health-care system completely and get care exclusively from private-sector hospitals and clinics”—a step “which many veterans groups argue is the first step toward privatization.”²⁰ Toward the end of 2017, Trump proposed to eliminate eligibility requirements for the use of private health coverage, which would transfer a greater share of funding from the VA to private providers.²¹ The administration has also suggested that it would consider merging parts

¹⁷ Quil Lawrence, *Is Donald Trump Proposing Privatizing the VA?*, NPR (July 13, 2016), <https://www.npr.org/2016/07/13/485782407/is-trump-proposing-privatizing-the-va>.

of the VA with Tricare, the military's privately administered health care program for troops, families, and retirees.²²

52. "Groups like the Koch brothers-backed Concerned Veterans for America" ("CVA") have driven the privatization agenda by "pushing to loosen current restrictions on veterans receiving private-sector care."²³ CVA, which "stands virtually alone among veterans' groups in its commitment to vastly expanded private options for veterans," "seems to have the Trump administration's ear."²⁴ Indeed, President Trump's most recent plan for the VA closely "resembled the CVA's priorities," with six proposals that "drew directly on CVA ideas."²⁵

53. CVA and other proponents of privatization have also pushed the administration to hire friendly voices for critical positions in the federal government. "Darin Selnick, a former senior advisor to the Koch-funded group," served "as the veterans affairs adviser for the White House's Domestic Policy Council."²⁶ Selnick was "pushed out of the [Department] last year after butting heads with Shulkin over privatization of veterans health services."²⁷ Just days before President

²⁷ Lorraine Woellert, *Shulkin Critic Leaves White House to Return to VA*, Politico (Mar. 26, 2018), <https://www.politico.com/story/2018/03/26/shulkin-va-white-house-486776>.

Trump fired former Secretary Shulkin, however, Selnick returned to a post at the VA.²⁸ President Trump also considered Fox News host Pete Hegseth, the former executive director of CVA, as a potential replacement for Shulkin, as well as Rick Perry, the current Secretary of Energy, who has said that he “supports moving more veterans’ care to the private sector.”²⁹ And President Trump has also leaned on Jeff Miller, a former member of Congress allied with CVA—and now a lobbyist—as his “point man on veterans policy.”³⁰

54. Privatization would imperil Plaintiffs’ and other veterans’ essential health care. A 2016 study by RAND found that the “[q]uality of care delivered by VA is generally equal to or better than care delivered in the private sector.”³¹ Another 2016 RAND study, based on a meta-analysis of 69 articles, confirmed that “[s]tudies of safety and effectiveness indicated generally favorable performance by VA facilities compared to non-VA facilities.”³² That study confirmed a 2010 report from the Department itself, which reviewed 55 studies and concluded that “the available literature suggests that the care provided in the VA compares favorably to non-VA care systems, albeit with some caveats.”³³

55. Moreover, the Department “has developed singular expertise on the medical needs of veterans,”³⁴ in subjects like severe trauma, rare diseases, amputations, burns, exposure to toxic substances like Agent Orange, physical therapy, anxiety, post-traumatic stress disorder, and other service-related ailments. “VHA’s behavioral health programs, particularly with their integration of behavioral health and primary care, are largely unrivalled.”³⁵ Because of its unique competencies, the VA “provides highly integrated treatment specific to the needs of veterans—care that is typically not available at any price to patients outside the VA system.”³⁶

56. Privatization would be more expensive to boot. “Policymakers in both parties argue that offering veterans unrestricted choice between the public veterans health care system and private medical providers would be too expensive and lead to the dismantling of the Veterans Affairs system.”³⁷ The nonpartisan Congressional Budget Office has found that “the structure of VHA and published studies suggest that VHA care has been cheaper than care provided by the private sector.”³⁸ Services provided by the VA in the past “would have cost about 21 percent more if those services had been delivered through the private sector.”³⁹ For these reasons, the Committee for a Responsible Federal Budget estimated that Trump’s 2016 campaign “plan to reform the

veterans affairs system and increase veterans' access to private doctors would cost about \$500 billion" over the next ten years.⁴⁰

57. Most veterans oppose privatization. One survey found that "the vast majority of veterans (87%) believe the federal government should provide a health care system dedicated to the needs of ill, injured and wounded veterans," despite the VA's flaws.⁴¹ Another found that veterans overwhelmingly reject the idea that "the VA health care system should be dismantled by creating a subsidy-based private health insurance for veterans, shutdown completely and outsourced to the private sector, or limited to only serving service-connected conditions."⁴²

The President Fires Secretary Shulkin

58. On February 14, 2017, the Senate confirmed Dr. David J. Shulkin to serve as Secretary of Veterans Affairs by a 100 to 0 vote—the only cabinet secretary in this administration to be confirmed unanimously.⁴³

59. During his tenure, former Secretary Shulkin promised to prevent privatization of VA health services, noting in one statement that: "Many of VA's services cannot be replicated in the private sector. In addition to providing some of the best quality overall health care in the country, VA delivers world class services in polytrauma, spinal cord injury and rehabilitation,

prosthetics and orthotics, traumatic brain injury, post-traumatic stress treatments and other behavioral health programs.”⁴⁴

60. Just over a year after his confirmation, on March 28, 2018, President Trump fired former Secretary Shulkin.⁴⁵

61. That morning, former Secretary Shulkin spoke to the President, who “made no mention of the fact that he was about terminate [him].”⁴⁶ Several hours later, however, the President’s Chief of Staff, John Kelly, called Shulkin to inform him that the President intended to fire him.⁴⁷

62. President Trump then “announced Shulkin’s ouster in a tweet.”⁴⁸ Specifically, President Trump tweeted that he intended to nominate Dr. Ronny L. Jackson as the new Secretary of Veterans Affairs, but was “thankful for Dr. David Shulkin’s service to our country and to our

GREAT VETERANS!”⁴⁹ When asked “if he was essentially fired via the tweet from the president, Shulkin responded: ‘Yes.’”⁵⁰

63. Notwithstanding these public reports, the administration soon began to insist that former Secretary Shulkin had resigned. On March 31, Spokeswoman Lindsey Walters explained that “Secretary Shulkin resigned from his position as Secretary of the Department of Veterans Affairs.”⁵¹ This assertion has been “strongly disputed” by “a person familiar with Shulkin’s dismissal ... [who] not[ed] that he did not submit a resignation letter.”⁵²

64. By April 2, the administration changed its explanation again. White House communications aide Mercedes Schlapp stated that Kelly “called Shulkin and gave him the opportunity to resign.”⁵³ When pressed on whether that meant Shulkin had been fired, Schlapp clarified that “General Kelly offered him the opportunity to resign. At this point, the president said it was time to move on in terms of Veterans Affairs. He thanks Secretary Shulkin for his service.”⁵⁴

65. Former Secretary Shulkin’s dismissal was preceded by months of plotting by administration officials, motivated by disagreements about “how far and how fast to privatize

health care for veterans, a long-sought goal for conservatives like the Koch brothers.”⁵⁵ “[T]he president’s appointees have felt betrayed by what they see as backtracking at the department on access to privately provided health care,” and in December “quietly bypassed the secretary to advance legislation that would open the way for more privately provided health care for veterans.”⁵⁶ In other words, “[t]he fight over the leadership of the department is part of a long-running battle over how to deliver health care to the nation’s veterans.”⁵⁷

66. In an editorial published the day he was fired, former Secretary Shulkin attributed his dismissal to “advocates within the administration for privatizing V.A. health services,” who “saw [him] as an obstacle to privatization who had to be removed.”⁵⁸ Specifically, Shulkin believed that “privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans.”⁵⁹ In Shulkin’s view, “[t]he private sector, already struggling to provide adequate access to care in many communities, is ill-prepared to handle the number and complexity of patients that would come from closing or downsizing V.A. hospitals and clinic.”⁶⁰

⁵⁹ *Id.*

⁶⁰ *Id.* Former Secretary Shulkin repeated his account in an interview with NPR, asserting that “political forces in the Trump administration want to privatize the VA – and that he was standing in the way.” Laurel Wamsley & Scott Neuman, *Fired VA Secretary Says White House Muzzled Him*, NPR (Mar. 29, 2018), <https://www.npr.org/sections/thetwo-way/2018/03/29/597866101/fired-va-secretary-says-white-house-muzzled-him>. According to Shulkin, “[t]here are many political appointees in the VA that believe that we are moving in the wrong direction or weren’t moving fast enough toward privatizing the VA.” *Id.* And he told MSNBC that “[t]here was clear

67. President Trump himself even admitted that he fired Shulkin to accelerate the privatization of the VA, claiming in a speech on March 30 that “[w]e made changes because we want them taken care of, we want them to have choice so that they can run to a private doctor and take care of it, and it’s going to get done.”⁶¹

68. More recently, “[i]n a private meeting ... with major veterans groups,” Chief of Staff Kelly, who delivered the news to former Secretary Shulkin that he had been fired, “repeatedly said that the decision to remove Shulkin was President Donald Trump’s,” thereby “contradict[ing] the White House’s claims about David Shulkin’s departure.”⁶²

69. In nominating Shulkin’s proposed replacement, Dr. Ronny Jackson, the White House did not say that Shulkin resigned—as the White House typically does when nominating a new official to replace an official who resigned.⁶³ Dr. Jackson has since withdrawn his nomination to serve as Secretary of Veterans Affairs, and no new nomination has been announced or submitted to the Senate by the President.⁶⁴

evidence ... that the political appointees inside the VA were working against me and my leadership team because they felt that we were trying to strengthen the VA rather than moving towards privatization.” Phil Helsel, *Fired VA Head Shulkin Says Political Appointees Were Focused on Privatization*, NBC News (Mar. 29, 2018), <https://www.nbcnews.com/politics/politics-news/fired-va-head-shulkin-says-political-appointees-were-focused-privatization-n861351>.

The President Unlawfully Chooses Wilkie Over Deputy Secretary Bowman

70. Federal law presumptively mandates that “the Deputy Secretary shall be Acting Secretary of Veterans Affairs ... in the event of a vacancy in the office of Secretary” (38 U.S.C. § 304), which results in the current Deputy Secretary of Veterans Affairs, Thomas Bowman, serving as the lawful acting Secretary. Before his appointment as Deputy Secretary, Bowman had a lengthy career in VA leadership positions and other policy roles related to veterans’ affairs.⁶⁵

71. Bypassing the legal succession requirements, President Trump appointed Wilkie—the Under Secretary of Defense for Personnel and Readiness—to serve as acting Secretary of Veterans Affairs (again by tweet).⁶⁶ Wilkie purports to serve as acting Secretary, and the Department recognizes him as the Secretary.⁶⁷ He also continues to serve in his original position within the Department of Defense. Aside from his current position as acting Secretary, Wilkie has never served in the Department of Veterans Affairs and has instead spent most of his career in various offices at the Department of Defense.⁶⁸

72. The President appears to have bypassed Deputy Secretary Bowman due to Bowman’s opposition to privatization of VA health services. In an email sent in December 2017, the President’s senior advisor on veterans affairs, Jake Leinenkugel, proposed that the administration replace Bowman with himself, and former Secretary Shulkin with a “strong

⁶⁵ See *Thomas G. Bowman, Deputy Secretary of Veterans Affairs*, Dep’t of Veterans Affairs, https://www.va.gov/opa/bios/bio_bowman.asp (last visited Apr. 27, 2018).

⁶⁸ See *id.*

political candidate,” as retaliation for their positions on privatization.⁶⁹ Leinenkugel described Bowman as an “obstructionist[]” opposed to the administration’s privatization agenda.⁷⁰

73. Then, in February 2018, the Washington Post reported that the administration again sought to fire Deputy Secretary Bowman, who “was said to be at odds with the administration’s plan to expand health care access for veterans through private producers,” as a “warning shot” to former Secretary Shulkin.⁷¹ “Bowman had pushed back on broad privatization efforts, leading Trump to berate him in an Oval Office meeting for his lack of loyalty.”⁷²

Wilkie Takes Control of the Department

74. To date, Wilkie has taken action in reliance on his purported authority as acting Secretary.

75. As of April 27, 2018, the Department had issued five final rules, nine proposed rules, and twenty-nine notices in the few weeks since Wilkie took office, and apparently in reliance on Wilkie’s authority as acting Secretary. The four final rules include rules amending the rating schedule that addresses gynecological conditions and disorders of the breast, amending the rating schedule that addresses eye disabilities, and amending acquisition regulations—rules that affect

how and whether veterans will receive necessary health care—as well as a rule that affects which veterans are eligible for Supplemental Service-Disabled Veterans’ Insurance.⁷³ Five additional rules are currently pending review at the Office of Information and Regulatory Affairs, including a rule pertaining to “Expanded Access to Non-VA Care Through the Veterans Choice Program.”⁷⁴ The Department has also issued guidance regarding staffing, pay administration, histopathology technicians, licensed professional mental health counselors, and Congressional relations.⁷⁵

76. Similarly, as of April 27, 2018, the Department had approved 390 contracts since Wilkie took office.⁷⁶ At the same time, the dubious legality of Wilkie’s appointment has called the Department’s authority to enter contracts into question, including a recent contract regarding the Department’s medical records system which was negotiated but not finalized by former Secretary Shulkin.⁷⁷

77. Because Wilkie is not authorized to enter into these contracts, the availability of the services and materials provided pursuant to them could be jeopardized at any time. Moreover, the Department could be subjected to conflicting and overlapping obligations, draining the Department’s resources and reducing its ability to provide care to Plaintiffs and other veterans.

This problem will only increase with time, as Wilkie takes or approves more and more actions that are subject to invalidation. As a result, Plaintiffs' and other veterans' health care is and will continue to be in imminent danger.

78. Wilkie has used his platform as acting Secretary to advocate on behalf of reforms that would push the VA toward privatization. On April 9, purporting to speak for "America's veterans," he issued a statement urging Congress to pass a bill expanding the VA Choice program, which "allow[s] Veterans to seek care in the private sector."⁷⁸

79. Senior staffers have also left the Department, or have been reassigned within the Department, since Wilkie took office. For example, Scott Blackburn, the acting Executive in Charge for the Office of Information and Technology, left the Department on April 17.⁷⁹

80. In a statement, VA Press Secretary Curt Cashour described the departed officials as "employees who were wedded to the status quo and not on board with this administration's policies or pace of change."⁸⁰ According to Cashour, the VA's leadership "is now firmly aligned with President Trump and his priorities," "speaking with one voice to Veterans, employees and outside stakeholders, such as Congress and veterans service organizations," and "working closely with the White House to implement the president's priorities for VA."⁸¹ Those priorities include "work[ing] with Congress to get community care reform legislation passed" that would increase

⁸¹ *Id.*

access to private health care providers, as well as “finaliz[ing] a decision on the department’s electronic health record (EHR) modernization.”⁸²

81. Until another nominee is selected by the President and confirmed by the Senate, which could take months, Wilkie will likely continue to serve as acting Secretary.

First Claim

Wilkie’s Appointment Violates the Federal Vacancies Reform Act, 5 U.S.C. § 3345 *et seq.*, and the Administrative Procedure Act, 5 U.S.C. § 706

82. Plaintiffs incorporate the foregoing paragraphs as if set forth fully herein.

83. Under the Federal Vacancies Reform Act of 1998, the President “may direct a person who serves in an office for which appointment is required to be made by the President, by and with the advice and consent of the Senate, to perform the functions and duties of the vacant office temporarily in an acting capacity.” 5 U.S.C. § 3345(a).

84. However, the President’s power under the Act is limited; he may do so only if the previous officeholder “dies, resigns, or is otherwise unable to perform the functions and duties of the office.” *Id.* The statute does not permit the President to fill the vacancy if the previous officeholder is removed from office or merely because the office is vacant, regardless of the reason for the vacancy.

85. Former Secretary Shulkin did not “die” or “resign.” Nor was he “unable to perform the functions and duties of the office.” He was ready and willing to continue serving as Secretary of Veterans Affairs. Instead, he was fired by the President.

86. Congress passed the FVRA to eliminate the “threat to the Senate’s advice and consent power” posed by permitting the President to appoint acting officials at will. *N.L.R.B. v.*

⁸² *Id.*

SW Gen., Inc., 137 S. Ct. 929, 936 (2017). The President’s appointment of Wilkie in violation of the terms of the FVRA circumvents Congress’s power over the appointment process entirely.

87. “Unless the President designates another officer of the Government” using his power under the FVRA, which President Trump did not lawfully exercise, “the Deputy Secretary shall be Acting Secretary of Veterans Affairs ... in the event of a vacancy in the office of Secretary.” 38 U.S.C. § 304. Thus, Deputy Secretary Bowman, not Wilkie, is the current acting Secretary of Veterans Affairs, with all of the duties and powers inherent in the office.

88. Because Wilkie is not the lawful acting Secretary, any action that he takes “shall have no force or effect,” and “may not be ratified” by a subsequent Secretary. 5 U.S.C. § 3348(d).

89. The President’s appointment of Wilkie to serve as acting Secretary, Wilkie’s continued representation that he is the acting Secretary of Veterans Affairs, the Department’s recognition that he currently serves in that office, and any actions taken by Wilkie pursuant to his purported authority as acting Secretary are therefore unlawful, violating the FVRA, 5 U.S.C. § 3345 *et seq.*, the Department’s order of succession statute, 38 U.S.C. § 304, and the Administrative Procedure Act, 5 U.S.C. § 706.

Second Claim

Wilkie’s Appointment Violates the Appointments Clause of the Constitution, art. II, § 2, cl. 2

90. Plaintiffs incorporate the foregoing paragraphs as if set forth fully herein.

91. The Appointments Clause mandates that the President “shall nominate, and by and with the Advice and Consent of the Senate, shall appoint Ambassadors, other public Ministers and Consules, Judges of the Supreme Court, and all other Officers of the United States.” U.S. Const. art. II, § 2, cl. 2.

92. Specifically, the Secretary of Veterans Affairs “is the head of the Department” of Veterans Affairs “and is appointed by the President, by and with the advice and consent of the Senate.” 38 U.S.C. § 303.

93. By directing Wilkie to serve as the acting Secretary of Veterans Affairs, the President appointed him to that office within the meaning of the Appointments Clause and Section 303 of Title 38 of the U.S. Code.

94. However, Wilkie was neither nominated by the President nor confirmed by the Senate to serve in that position. Nor did the President lawfully appoint him to that office in an acting capacity under the terms of the FVRA, in derogation of the process established by Congress to protect its authority under the Appointments Clause. Wilkie’s appointment as acting Secretary therefore violates the Appointments Clause.

95. Wilkie’s new duties as acting Secretary of Veterans Affairs—which involve overseeing a massive, complex bureaucracy that provides services to individual veterans—are not germane to his duties as an Under Secretary of Defense, in which he serves in an entirely different federal agency with a different statutory and regulatory mandate. *Cf. Weiss v. United States*, 510 U.S. 163, 172-76 (1994)

96. The President’s appointment of Wilkie to serve as acting Secretary, Wilkie’s continued representation that he is the acting Secretary, the Department’s recognition that he currently serves in that office, and any actions taken by Wilkie pursuant to his purported authority as acting Secretary violate the Appointments Clause and are therefore void.

Third Claim

Plaintiffs Are Entitled to a Declaratory Judgment Under 28 U.S.C. § 2201

97. Plaintiffs incorporate the foregoing paragraphs as if set forth fully herein.

98. Under Section 2201 of Title 28 of the United States Code, “[i]n a case of actual controversy within its jurisdiction, ... any court of the United States, upon the filing of an appropriate pleading, may declare the rights and other legal relations of any interested party seeking such declaration.”

99. There is an actual controversy between Plaintiffs and Defendants regarding Wilkie’s purported authority as acting Secretary of Veterans Affairs. His unlawful appointment calls into question the lawfulness of any actions he has taken or will take while purporting to serve as acting Secretary, and thereby creates profound uncertainty over the standards and procedures by which veterans, including Plaintiffs, will receive the benefits to which they are entitled under federal law.

100. Any cutbacks in or additional requirements for obtaining veterans’ benefits are presumed unlawful and subject to challenge if enacted under Wilkie’s leadership. In particular, any actions the Department might take under Wilkie’s authority to privatize veterans’ health care, including new rules and agency guidance, contracts with third party service providers, and changes to the procedures and manuals that govern veterans’ receipt of health care, would be unlawful.

101. However, many of these changes may well take place without formal rulemaking or other public process which allow Plaintiffs and other veterans to voice their concerns and challenge unlawful action—or even to learn that such action has taken place. Wilkie’s assertion of authority to act in these innumerable ways subjects Plaintiffs to an ongoing risk of imminent harm, as their health care and other benefits could be altered at any time and without other remedy.

102. Conversely, any benefits that Plaintiffs and other veterans might receive while Wilkie purports to serve as acting Secretary, especially any benefits received or anticipated as a consequence of Wilkie’s actions and policies, could be subject to challenge and recoupment by the

Department or third parties if Wilkie's tenure is later found to be unlawful. *See* 38 U.S.C. § 5316.⁸³ Instead of receiving, free and clear, the benefits statutorily owed to them by the Department, Plaintiffs' benefits are subject to a cloud of uncertainty that decreases their value and harms Plaintiffs.

103. A declaration as to the lawful leadership of the VA is essential to resolve the uncertainty and confusion that currently surrounds the relationship between veterans and the Department.

Prayer for Relief

WHEREFORE, Plaintiffs respectfully request that the Court:

1. declare that pursuant to 38 U.S.C. § 304, Deputy Secretary Bowman is the lawful acting Secretary of Veterans Affairs, and further declare that Wilkie's appointment to that position was unlawful and that any actions taken in reliance on Wilkie's purported authority are unlawful and void;
 2. enjoin Wilkie from continuing to represent that he is the acting Secretary of Veterans Affairs, the Department from recognizing that he currently serves in that office, and both Wilkie and the Department from taking any action in reliance on Wilkie's purported authority as acting Secretary of Veterans Affairs;
 3. award Plaintiffs their attorneys' fees, costs, and other disbursements in this action;
- and

⁸³ *Cf.* James Clark, *The VA Takes Back Millions in Benefits from Disabled Vets and Can't Explain Why*, Task & Purpose (May 11, 2017), <https://taskandpurpose.com/va-congress-separation-disability-pay-recoupment/> (discussing recoupment of separation pay before payment of disability benefits).

4. grant Plaintiffs such other relief as the Court deems just and proper.

Dated: April 30, 2018

Respectfully submitted,

/s/ John T. Lewis

DRAFT 1
GI Forever Bill Celebration
September 28, 2017

OPENING

Welcome everyone.
{Acknowledge Post 9-11
Organizations; Big 6 VSOs;
Congressional Staff}

I am glad all of you could
join us today to celebrate
the success we have had
over the past 9 months.

Together we have passed,
and the President has
signed key pieces of
legislation:

1
VA-18-0457-A-000728

- **Accountability**
- **Extension of Choice**
- **Appeals Reform**
- **And of course the GI Forever Bill**

None of this would have been possible without the support of each organization, and the members of Congress represented here today.

I want to thank each one of you and your organizations for all you have done and continue to do for our nation's Veterans.

FOREVER GI BILL

The GI Bill is one of the most important pieces of legislation ever produced in this country.

There have been updates over the years – the Montgomery GI Bill in 1984 and the post-9/11 GI Bill in 2008.

And now, thanks to you, we have the Forever GI Bill.

VA-18-0457-A-000730³

This allows Veterans to access educational benefits throughout their lives, and restores benefits for Veterans hurt by school shutdowns.

It provides benefits to Purple Heart recipients whose injuries forced them to leave military service.

And for those killed in the line of duty - it allows their benefits to be transferred to an eligible dependent.

4
VA-18-0457-A-000731

This is expanding our ability to support Veterans in getting an education, and preparing them for rapidly evolving job market after active-duty service.

After leaving service, most Veterans and their families look for ways to continue to serve and contribute to the security and prosperity of our country.

The Forever GI Bill makes it easier for them to do so.

Sometimes, at VA, we are focused on the work right in front of us that we don't take the time to acknowledge the collective work of the groups here today.

This Bill shows what we can do when we work together.

THE ROAD AHEAD

Though we are clearly making progress, we still have a long way to go.

Just last week we held our annual senior leader business meeting here in DC – bringing together over 600 of our Senior Leaders across the organization.

During that meeting we hosted a panel so that our leaders could hear about the challenges we face directly from Veterans.

One thing that stood out to me was hearing from a Veteran, a Post 9-11 Veteran, about her experiences trying to schedule a medical appointment online.

7
VA-18-0457-A-000734

{EXPOUND}

Clearly, we have a long way to go to make it easier for Veterans to access the benefits available to them.

But together, we can make a difference and build a VA that Veterans deserve.

CLOSING

I know that if we continue working closely together, we will succeed in modernizing VA.

**Thank you all again for
your commitment and hard
work. And congratulations
for passing such an
important piece of
legislation.**

**I look forward to the work
ahead!**

DRAFT 1
GI Forever Bill Celebration
September 28, 2017

OPENING

Welcome everyone.
{Acknowledge Post 9-11
Organizations; Big 6 VSOs;
Congressional Staff}

I am glad all of you could
join us today to celebrate
the success we have had
over the past 9 months.

Together we have passed,
and the President has
signed key pieces of
legislation:

1
VA-18-0457-A-000745

- **Accountability**
- **Extension of Choice**
- **Appeals Reform**
- **And of course the GI Forever Bill**

None of this would have been possible without the support of each organization, and the members of Congress represented here today.

I want to thank each one of you and your organizations for all you have done and continue to do for our nation's Veterans.

VA-18-0457-A-000740²

FOREVER GI BILL

The GI Bill is one of the most important pieces of legislation ever produced in this country.

There have been updates over the years – the Montgomery GI Bill in 1984 and the post-9/11 GI Bill in 2008.

And now, thanks to you, we have the Forever GI Bill.

VA-18-0457-A-000747³

This allows Veterans to access educational benefits throughout their lives, and restores benefits for Veterans hurt by school shutdowns.

It provides benefits to Purple Heart recipients whose injuries forced them to leave military service.

And for those killed in the line of duty - it allows their benefits to be transferred to an eligible dependent.

VA-18-0457-A-000748⁴

This is expanding our ability to support Veterans in getting an education, and preparing them for rapidly evolving job market after active-duty service.

After leaving service, most Veterans and their families look for ways to continue to serve and contribute to the security and prosperity of our country.

The Forever GI Bill makes it easier for them to do so.

Sometimes, at VA, we are focused on the work right in front of us that we don't take the time to acknowledge the collective work of the groups here today.

This Bill shows what we can do when we work together.

THE ROAD AHEAD

Though we are clearly making progress, we still have a long way to go.

Just last week we held our annual senior leader business meeting here in DC – bringing together over 600 of our Senior Leaders across the organization.

During that meeting we hosted a panel so that our leaders could hear about the challenges we face directly from Veterans.

One thing that stood out to me was hearing from a Veteran, a Post 9-11 Veteran, about her experiences trying to schedule a medical appointment online.

7

Jackson News Clips

March 29 – April 12, 2018

1 - Washington Post (AP): [Trump's VA pick draws concern over thin management record](#)

(29 March, Hope Yen and Calvin Woodward, 43.9M uvm; Washington, DC)

President Donald Trump's selection of his White House doctor to run the massive Department of Veterans Affairs triggered concern Thursday among lawmakers and veterans groups about whether he has the experience to manage an agency paralyzed over Trump's push to expand private care. Ronny Jackson, a Navy rear admiral entrusted with the health of the past three presidents, is a lifelong physician whose positions on privatizing operations in the second largest federal department...

[Hyperlink to Above](#)

2 - Washington Post: [Trump's pick to head veterans department faces skepticism over his experience](#)

(29 March, Lisa Rein, Seung Min Kim, Emily Wax-Thibodeaux, and Josh Dawsey, 43.9M uvm; Washington, DC)

The White House was thrown on the defensive Thursday over President Trump's choice to lead the Department of Veterans -Affairs, forcing officials to fend off mounting skepticism that Ronny L. Jackson has the experience to run the government's second-largest agency. Trump announced by tweet late Wednesday that the White House physician would succeed ousted secretary David Shulkin, surprising veterans groups and lawmakers...

[Hyperlink to Above](#)

3 - Wall Street Journal: [Lawmakers Respond Cautiously to Little-Known VA Pick Ronny Jackson - Key senators on panel say they don't know enough about White House doctor to form an opinion about his ability to lead a vast bureaucracy](#)

(29 March, Louise Radnofsky and Peter Nicholas, 43.6M uvm; New York, NY)

Capitol Hill lawmakers reacted guardedly to President Donald Trump's nomination of the White House physician to head the Department of Veterans Affairs, with key members noting that they know little about him. Dr. Ronny Jackson, a U.S. Navy rear admiral who has served as a White House physician during the past three administrations, is slated to succeed Secretary David Shulkin, who was ousted Wednesday.

[Hyperlink to Above](#)

4 - USA Today (Video): [6 big things the new Veterans Affairs chief will have to address](#)

(29 March, Donovan Slack and Dennis Wagner, 36.8M uvm; McLean, VA)

On the front lines at the Department of Veterans Affairs — in the agency's 1,240 hospitals and clinics — it doesn't much matter these days who holds the secretary's job in Washington. David Shulkin, who was fired Wednesday, was the third VA secretary in four years. If President Trump's nominee to lead the agency, physician and Navy Rear Adm. Ronny Jackson, is confirmed, he will be the fourth.

[Hyperlink to Above](#)

5 - Politico: [Trump's VA pick blindsides staff, deepens agency disarray - 'He's got a department that's in turmoil,' a former VA secretary said. 'It's in crisis.'](#) (29 March, Lorraine Woellert, Eliana Johnson and Connor O'Brien, 23.9M uvm; Arlington, VA)

The timing of President Donald Trump's announcement to name Rear Admiral Ronny Jackson to lead Veterans Affairs was a snap decision that surprised his own chief of staff and knocked the government's second-largest agency, already bedeviled by scandal, deeper into disarray. White House chief of staff John Kelly had spoken with David Shulkin by phone Wednesday morning, reassuring the now-former VA secretary that he wouldn't be fired by tweet that afternoon.

[Hyperlink to Above](#)

6 - Task & Purpose: [What's In Store For The Next VA Chief? Let's Break It Down](#) (29 March, James Clark, 102k uvm; New York, NY)

It's been an awkwardly long time coming, but as of yesterday afternoon embattled Veterans Affairs secretary David Shulkin is out of a job. The news comes after a month and a half of uncertainty that began when a scathing inspector general report detailed "serious derelictions" in expensing a Europe trip last summer. And then there were all the accusations and counter accusations of political infighting and rumors of possible replacements — at least all that is over:

[Hyperlink to Above](#)

7 - Washington Post: [Opinions - Surprise: Trump's newest Cabinet nominee has no relevant experience](#) (29 March, Eugene Robinson, 43.9M uvm; Washington, DC)

You can't make this stuff up: President Trump has announced he will nominate a medical doctor who has no discernible management experience to run the second-largest agency in the federal government. Can presidents be sued for malpractice? The man Trump has named to become secretary of veterans affairs, Ronny L. Jackson, happens to be the president's personal doctor.

[Hyperlink to Above](#)

8 - Washington Post (The Fix): [Who is Trump's new Veterans Affairs pick, Ronny Jackson?](#) (29 March, Aaron Blake, 43.9M uvm; Washington, DC)

The seemingly never-ending parade of staff changes in the Trump administration continued apace Wednesday, with the president announcing that Veterans Affairs Secretary David Shulkin is out and that White House physician Ronny L. Jackson will replace him. Jackson's name will be familiar to political watchers across the country for one main reason: He's the physician who delivered what some felt to be a suspiciously rosy picture of Trump's health in January.

[Hyperlink to Above](#)

9 - FOX News: [Ronny Jackson picked by Trump to lead the VA: What to know about the president's physician](#) (29 March, Kaitlyn Schallhorn, 32.5M uvm; New York, NY)

President Trump gave Dr. Ronny Jackson a clean bill of health in March — to run the Department of Veterans Affairs. A Navy rear admiral, Jackson is the president's personal physician who rose to prominence after he addressed the press from the White House briefing room in January to discuss Trump's health.

[Hyperlink to Above](#)

10 - FOX News (Video): [John Brennan: Trump's nomination for VA secretary is 'terribly misguided'](#) (29 March, Nicole Darrah, 32.5M uvm; New York, NY)

Former CIA Director John Brennan once again took a shot at President Trump on Twitter Thursday, saying he believes the decision to nominate Adm. Ronny Jackson to run the Department of Veterans Affairs is "terribly misguided." "I personally know and greatly respect Ronny Jackson....as a terrific doctor and Navy officer," Brennan tweeted. "However, he has neither the experience nor the credentials to run the very large and complex VA.

[Hyperlink to Above](#)

11 - New York Times: [Op-ed - Ronny Jackson's Disturbing Lack of Independence](#) (29 March, Norman L. Eisen and Bandy X. Lee, 30M uvm; New York, NY)

In announcing Dr. Ronny Jackson, the White House physician, as his choice to be the new secretary for veterans affairs, President Trump has taken his latest misstep in what has been the worst presidential personnel process in modern history. We take no pleasure in saying so, including because one of us (Mr. Eisen) worked with Dr. Jackson in the White House, was even treated by him...

[Hyperlink to Above](#)

12 - ABC News (Video): [Veterans groups respond cautiously to VA secretary nomination](#) (29 March, Sarah Kolinovsky, 24.2M uvm; New York, NY)

Despite his active duty status as a Navy rear admiral (lower half) and his medical experience, veterans service organizations are responding cautiously to the nomination of Dr. Ronny Jackson for secretary of Veterans Affairs, with some expressing concern about his lack of managerial experience or what his views are on reforming the VA.

[Hyperlink to Above](#)

13 - The Atlantic: [The Doctor Who Suddenly Got Nine Million Patients - For a position that demands high-level policy expertise, President Trump appointed his personal physician, Ronny Jackson.](#) (29 March, James Hamblin, 23.9M uvm; Washington, DC)

Nine million veterans will soon be under the care of the emergency-physician rear admiral Ronny Jackson, pending confirmation of his appointment Wednesday to lead the U.S. Department of Veterans Affairs. This seemingly mundane appointment—a doctor and naval officer with years of experience as White House physician under both Trump and Obama...

[Hyperlink to Above](#)

14 - The Hill: [White House: Trump has 'full confidence' in presidential physician to lead VA](#) (29 March, Max Greenwood, 11.9M uvm; Washington, DC)

President Trump has "full confidence" in White House physician Ronny Jackson's ability to head the Veterans Affairs (VA) Department, a spokeswoman for the White House said Thursday, despite reported concerns from some aides. "As I said earlier, the president has full confidence in Adm. Jackson," White House deputy press secretary Lindsay Walters told reporters.

[Hyperlink to Above](#)

15 - The Hill: [GOP, vet groups react with caution to Trump VA pick](#) (29 March, Rebecca Kheel, 11.9M uvm; Washington, DC)

Senators and influential veterans groups are withholding judgment on President Trump's pick to lead the Department of Veterans Affairs (VA), a Navy doctor with no experience leading a federal bureaucracy. Both the Republican chairman and the Democratic ranking member of the Senate Veterans Affairs Committee said only that they look forward to meeting Rear Adm. Ronny Jackson. Several veterans groups expressed some concern about Jackson's qualifications...

[Hyperlink to Above](#)

16 - Military.com: [Others Considered for VA Job Before Trump Picked His Personal Doctor](#) (29 March, Richard Sisk, 9M uvm; San Francisco, CA)

Rear Adm. Ronny L. Jackson, the personal physician to President Donald Trump, was not his first choice to replace fired VA Secretary Dr. David Shulkin, the White House said Thursday. "The president did have some early individuals that he was looking at but continuously went back to Dr. Jackson to fulfill this role as VA secretary," White House deputy press secretary Lindsay Walters told reporters.

[Hyperlink to Above](#)

17 - Government Executive: [Lawmakers, Veterans Groups and Former Officials Worry VA Nominee Is Not 'Up to the Job'](#) (29 March, Eric Katz, 870k uvm; Washington, DC)

With David Shulkin now ousted from the Veterans Affairs Department, all eyes are on President Trump's nominated replacement to see where he comes down on the most pressing issue at VA: How large a role should the private sector play in providing health care to veterans? One problem for observers and stakeholders in the veteran community is Trump's pick, Dr. Ronny Jackson, has very little experience in public policy or veterans issues...

[Hyperlink to Above](#)

18 - PBS: [Who is Ronny Jackson, Trump's pick to lead the Department of Veterans Affairs?](#) (30 March, Gretchen Frazee, 22M uvm; Arlington, VA)

Rear Admiral Ronny Jackson has garnered almost universal praise for his skills as a military physician and his character. But his appointment to lead the Department of Veterans Affairs is proving divisive as critics point to his lack of experience managing a large organization.

[Hyperlink to Above](#)

19 - NPR (Morning Edition, Audio): [Trump Pick For VA Secretary May Get Additional Scrutiny](#) (30 March, 22M uvm; Washington, DC)

Noel King talks to Democratic Sen. Richard Blumenthal about President Trump's decision to fire VA Secretary David Shulkin, and the confirmation process of the president's pick to replace him.

[Hyperlink to Above](#)

20 - MSNBC (Video): [Reines: 'There's never been a no vote against a VA nominee, this might be the time to change that record'](#) (30 March, 11.8M uvm; New York, NY)

In yet another White House personnel shakeup, President Trump ousts Secretary of Veterans Affairs David Shulkin and appoints his personal doctor Ronny Jackson. Philippe Reines, former adviser to then-Secretary of State Hillary Clinton, and Shermichael Singleton, former Deputy Chief of Staff for the Department of Housing and Urban Development, discuss with Kristen Welker whether the president's new appointee is qualified for the position.

[Hyperlink to Above](#)

21 - The Hill: [Trump VA pick hesitated to take job: report](#) (30 March, Max Greenwood, 11.8M uvm; Washington, DC)

White House physician Ronny Jackson initially hesitated at the suggestion that he be nominated to lead the Department of Veterans Affairs, The Washington Post reported Thursday. Jackson was reportedly shocked when Trump tapped him for the top job at the nation's second largest government agency, the Post reported, citing senior White House officials.

[Hyperlink to Above](#)

22 - New York Daily News: [A novice in the VA OR: Dr. Ronny Jackson is a very puzzling choice to lead a Veterans Affairs turnaround](#) (31 March, 26.1M uvm; New York, NY)

The 20 million-plus veterans of the U.S. Armed Forces served this country with the eminently deserved expectation that their country would serve them. Now even as the heart of that trust, the VA health care system, recovers from deadly delays in getting patients care, and after summarily dispatching his first head of the U.S. Department of Veterans Affairs, David Shulkin, President Trump inflicts risky experimental treatment, nominating as the new chief a doctor who has never come close to the operating room of managing a large organization — never mind one with nearly 378,800 employees.

[Hyperlink to Above](#)

23 - NPR (All Things Considered, Audio): [Veteran Congressman On Trump's New VA Secretary Nominee](#) (31 March, 22M uvm; Washington, DC)

President Trump has picked Rear Adm. Ronny Jackson to be secretary of Veterans Affairs. Veteran and Rep. Mike Coffman (R-Colo.) tells NPR's Michel Martin why he supports the new leadership.

[Hyperlink to Above](#)

24 - The Washington Post (Video): [Does Trump believe in the value of expertise, or does he disdain it?](#) (31 March, Dan Balz, 43.9M uvm; Washington, DC)

The shake-up at the Department of Veterans Affairs — out with Secretary David Shulkin and potentially in with White House physician Ronny L. Jackson — is being portrayed, correctly, as President Trump surrounding himself with Cabinet officials with whom he feels personally comfortable. A broader question arises, however, over the extent to which this president prizes or disparages expertise.

[Hyperlink to Above](#)

25 - Politico Magazine: [When Our President Put His Doctor in Charge of Everything](#) (31 March, Marius Stan and Vladimir Tismaneanu, 23.9M uvm; Arlington, VA)

No one knows more about leaders' bodies than their personal physicians. Notoriously, Joseph Stalin mistrusted the Kremlin doctors, whom he suspected of trying to poison him and the other Soviet magnates. In February 1953, a month before Stalin passed away, they were arrested and horribly tortured. The ones still left alive were too terrified to treat him as he lay dying in March.

[Hyperlink to Above](#)

26 - CBS News (Face the Nation, Video): [Sen. Bernie Sanders on "Face the Nation," April 1, 2018](#) (1 April, 26M uvm; New York, NY)

President Trump announced the ouster of David Shulkin as secretary of Veterans Affairs this week, nominating longtime White House physician Adm. Ronny Jackson as his replacement. Shulkin had come under withering criticism from lawmakers on Capitol Hill over his travel expenses and a blistering inspector general's report on conditions at the VA.

[Hyperlink to Above](#)

27 - CBS News (Video): [Sen. Bernie Sanders says privatizing the VA a "very, very bad idea"](#) (1 April, Emily Tillett, 26M uvm; New York, NY)

Sen. Bernie Sanders, I-Vermont, says that he thinks it's too early to tell what President Trump's pick to take over leadership at the embattled Department of Veterans Affairs "stands for," but cautioned that privatizing the VA to be a "very, very bad idea." Former VA Secretary Shulkin became the latest member of Mr. Trump's cabinet to be terminated last week. The president announced that he was replacing Shulkin in a series of tweets, and said he would nominate Adm. Ronny Jackson, who had been serving as the president's doctor, to replace him.

[Hyperlink to Above](#)

28 - Politico: [Sanders: 'We know nothing' about Trump's VA pick](#) (1 April, Connor O'Brien, 23.9M uvm; Arlington, VA)

Sen. Bernie Sanders wouldn't commit to supporting President Donald Trump's pick to lead the Department of Veterans Affairs, Rear Adm. Ronny Jackson, on Sunday. In an interview on CBS' "Face the Nation," the Vermont independent noted that Jackson, Trump's personal physician, is a virtual unknown on veterans issues. He also expressed concerns the Trump administration is pushing to privatize the nearly \$200 billion bureaucracy...

[Hyperlink to Above](#)

29 - The Hill: [Sanders: I will work against any VA nominee backing privatization](#) (1 April, Mallory Shelbourne, 11.9M uvm; Washington, DC)

Sen. Bernie Sanders (I-Vt.) said Sunday he will work against any Veterans Affairs (VA) nominee who supports privatizing the agency. "I will do everything I can as a member of the veterans committee not to approve any nominee who is not going to strengthen the VA and who will oppose privatization," Sanders told CNN's "State of the Union."

[Hyperlink to Above](#)

30 - Miami Herald: [Trump's doc shouldn't be a slam dunk to lead Veterans Affairs](#) (1 April, Editorial Board, 8.9M uvm; Miami, FL)

The U.S. Department of Veterans Affairs has enough problems. It doesn't need one in the form of a leader who, very possibly, has no idea what he's doing. In yet another nomination made under President Trump's "You'll do — for now" philosophy of hiring the "very best people," White House physician Ronny Jackson is up for the vital job of secretary of Veterans Affairs.

[Hyperlink to Above](#)

31 - Washington Examiner: [Bernie Sanders: Ronny Jackson will bend to pressure to privatize the VA](#) (1 April, Kyle Feldscher, 4.8M uvm; Washington, DC)

Sen. Bernie Sanders, I-Vt., said he thinks Dr. Ronny Jackson will likely be tasked with privatizing the U.S. Department of Veterans Affairs due to his lack of experience manning a large organization. Sanders said on CNN's "State of the Union" Jackson, the White House physician and a rear admiral in the U.S. Navy, doesn't know much about heading a large bureaucracy.

[Hyperlink to Above](#)

32 - Newsday: [Senate should be wary of Dept. of Veterans Affairs nominee](#) (1 April, Editorial Board, 3.2M uvm; Melville, NY)

Caring for our nation's military veterans was one of Donald Trump's most consistent promises on the presidential campaign trail, and certainly one of his least controversial. Getting veterans the care they need is a nonpartisan priority. But the increased quality of care Trump promised hasn't come. Facilities on Long Island and in many other communities are falling apart. The Department of Veterans Affairs is increasingly being exposed as dangerous and dysfunctional.

[Hyperlink to Above](#)

33 - Las Vegas Sun: [Heller's dilemma: Side with Trump or veterans on VA pick](#) (1 April, Editorial Board, 1.5M uvm; Las Vegas, NV)

Assuming Donald Trump follows through in nominating Dr. Ronny Jackson to lead the Department of Veterans Affairs, Sen. Dean Heller will soon face an ugly consequence for becoming a team player for the president. For Heller, Jackson's confirmation offers a lose-lose proposition. Either he votes against Jackson and runs the risk of getting dinged by Trump before the midterm elections, or he votes for Jackson and alienates veterans groups that have raised concerns about the White House doctor's qualifications for the position.

[Hyperlink to Above](#)

34 - Times Union: [Editorial: VA pick insults veterans](#) (1 April, Editorial Board, 1.5M uvm; Albany, NY)

The health and welfare of millions of veterans rest on what feels more like a casting call. Donald Trump has long promoted himself as a champion of military veterans, but when he finally had a chance last week as president to demonstrate that they were more than political props for him, he failed miserably. In the same cavalier way in which he has appointed so many people who have turned out to be disasters in their jobs...

[Hyperlink to Above](#)

35 - Montana Standard: [For pity's sake, don't privatize Veterans Affairs](#) (1 April, Editorial Board, 202k uvm; Butte, MT)

Just when it was starting to look like Montana's veterans could expect a little more stability from the federal agency charged with providing their health care, another major shakeup at the Department of Veterans Affairs has placed the future of their care in doubt. Of course, the VA has long stood on shaky ground. However, the current push toward privatization, if successful, could completely erode the foundations of this critical agency and leave millions of veterans...

[Hyperlink to Above](#)

36 - Washington Examiner: [Ron Johnson: Trump 'deserves' a VA secretary who agrees with him on policy](#) (1 April, Naomi Lim, 4.8M uvm; Washington, DC)

Sen. Ron Johnson, R-Wi., agreed Sunday President Trump was right to fire former Veterans Affairs Secretary David Shulkin. "Well, I think the IG report's pretty troubling," Johnson told NBC, referring to VA inspector general Michael Missal's finding that Shulkin improperly used taxpayer dollars for a trip to Europe with his wife in July.

[Hyperlink to Above](#)

37 - U.S. News & World Report (AP): [Shulkin Says He Has 'Comfort' With Potential Successor at VA](#) (2 April, Hope Yen, 24M uvm; Washington, DC)

Former Veterans Affairs Secretary David Shulkin downplayed concerns about his potential successor's lack of managerial experience Monday, saying the key for improving the VA will be surrounding White House doctor Ronny Jackson with a good team "because no one person can do this alone." Shulkin and the White House have engaged in a highly public campaign surrounding his departure from the VA last week. Shulkin said he was fired.

[Hyperlink to Above](#)

38 - Military Times: [White House doctor could face the most contentious VA confirmation process ever](#) (2 April, Leo Shane III, 2.1M uvm; Springfield, VA)

Ronny Jackson's nomination to become the next Veterans Affairs secretary could become the most contentious confirmation process since the department was founded 30 years ago. But that's also a fairly low bar. Since the department was elevated to a Cabinet-level post back in 1988, no senator has ever voted against a VA secretary pick.

[Hyperlink to Above](#)

39 - The Vindicator: [Trump's choice to lead VA raises questions on intent](#) (3 April, Editorial Board, 193k uvm; Youngstown, OH)

The physician who gave President Donald J. Trump a squeaky clean bill of health could soon lead the Department of Veterans Affairs, even though he lacks the experience to manage an enormous agency that has long been steeped in controversy. Trump's nomination of Rear Admiral Ronny Jackson, the White House physician since President George W. Bush's administration, has raised eyebrows on Capitol Hill and triggered concerns among veterans service organizations.

[Hyperlink to Above](#)

40 - Washington Post: [Perspective - I've seen what a mess Veterans Affairs is. Ronny L. Jackson can't fix it. Trump's new pick to lead the cabinet is a fine doctor. That doesn't mean he can handle a massive, dysfunctional bureaucracy.](#) (2 April, Mikki Kendal, 43.9M uvm; Washington, DC)

The mission of the Department of Veterans Affairs was laid down in the wake of the Civil War, in a promise by President Abraham Lincoln to care for the men who fought, as well as their widows and orphans. The scope of that promise has broadened as women have enlisted. It is the only department that focuses exclusively on caring for veterans and their families in times of crisis spawned by injury, illness and death, a mission most Americans would agree is vital, if not sacred.

[Hyperlink to Above](#)

41 - Fierce Healthcare: [5 things to know about Ronny Jackson, Trump's pick to replace Shulkin at the VA](#) (2 April, Paige Minemyer, 141k uvm; Washington, DC)

President Donald Trump fired David Shulkin as Department of Veterans Affairs secretary last week and tapped White House physician Ronny Jackson as Shulkin's replacement. Trump praised Jackson as "highly respected" in his Twitter announcement, and White House Press Secretary Sarah Huckabee Sanders echoed the sentiment in a tweet of her own, saying that he and other cabinet nominees should be confirmed "without delay."

[Hyperlink to Above](#)

42 - Aiken Standard: [Column: Surprise: Trump's newest cabinet nominee has no relevant experience](#) (2 April, Eugene Robinson, 68k uvm; Aiken, SC)

You can't make this stuff up: President Trump has announced he will nominate a medical doctor who has no discernible management experience to run the second-largest agency in the federal government. Can presidents be sued for malpractice? The man Trump has named to become secretary of veterans affairs, Dr. Ronny Jackson, happens to be the president's personal physician.

[Hyperlink to Above](#)

43 - Truthout: [Trump's New VA Pick Appears Poised to Rubber-Stamp Privatization of Veterans Affairs](#) (3 April, Michael Corcoran, 422k uvm; Chicago, IL)

For the last year, Veterans Affairs Secretary David Shulkin insisted the VA would not be privatized on his watch. Now, thanks to a Koch-supported coup at the top of the second-largest department in government, his watch has ended -- and the battle over privatization persists. For years the Koch brothers have been hovering around the Department of Veterans Affairs and its \$186 billion budget like vultures surrounding a carcass.

[Hyperlink to Above](#)

44 - We Are The Mighty: [No one was ready for President Trump's next VA secretary](#) (3 April, Ben Brimelow, 3.6M uvm; New York, NY)

Questions have emerged about the managerial ability of White House physician Admiral Ronny L. Jackson, President Donald's Trump pick to run the Department of Veterans Affairs, the federal government's second-largest agency. If confirmed, Jackson would replace David Shulkin as the secretary of veterans affairs. Trump announced his decision to fire Shulkin on March 28, 2018.

[Hyperlink to Above](#)

45 - MedPage Today: [Jackson's Nomination to Run VA Brings Questions, Lack of management experience cited as major issue](#) (3 April, Joyce Frieden, 1.5M uvm; New York, NY)

Reaction to President Trump's nomination of White House physician Ronny Jackson, MD, as Secretary of Veterans Affairs (VA) has leaned toward the negative, with most people questioning whether Jackson has the experience needed to run the vast department. "I am deeply concerned about the nominee," Joe Chenelly, executive director of AMVETS, a veterans service organization, said in a press release.

[Hyperlink to Above](#)

46 - KWTX (CBS-10): [Waco: Chris Kyle's family hopes new secretary will change VA culture](#) (3 April, John Carroll, 315k uvm; Waco, TX)

The brother and father of slain American Sniper Chris Kyle say they hope that Texas born and reared Navy Rear Adm. Ronny L. Jackson, whom the president has nominated as the next secretary of veterans affairs will change the culture in the VA to get veterans help more quickly. "Our veterans are not being taken care of here in America, no way, absolutely not," Kyle's father, Wayne said.

[Hyperlink to Above](#)

47 - Creators Syndicate: [Marching Orders for Trump's New VA Secretary](#) (4 April, Betsy McCaughey, 318k uvm; Hermosa Beach, CA)

Since President Trump ousted Veterans Affairs Secretary David Shulkin, the question reverberating in Washington is whether Trump's new pick, Rear Adm. Ronny Jackson, is capable of heading a department with 360,000 employees and 9 million vets under its care. Senate Democrats carp he lacks experience running "a complex organization."

[Hyperlink to Above](#)

48 - Hawaii Tribune-Herald: [Senate should be wary of Veterans Affairs nominee](#) (4 April, 135k uvm; Hilo, HI)

Caring for our nation's military veterans was one of Donald Trump's most consistent promises on the presidential campaign trail, and certainly one of his least controversial. Getting veterans the care they need is a nonpartisan priority. But the increased quality of care Trump promised hasn't come.

[Hyperlink to Above](#)

49 - WUSF (NPR-89.7, Audio): [For Veterans Groups, Questions Surround Trump's VA Nominee](#) (6 April, Carson Frame, 197k uvm; Tampa, FL)

Some veterans groups say they're uncertain about the future of care at the Department of Veterans Affairs, after President Trump ousted Secretary David Shulkin and nominated White House physician Ronny Jackson to head the agency.

[Hyperlink to Above](#)

50 - Lubbock Avalanche-Journal: [Levelland native talks about nomination as head of VA](#) (7 April, Karen Michael, 194k uvm; Lubbock, TX)

Levelland native Dr. Ronny Jackson -- the rear admiral who is President Donald Trump's nominee as secretary of the Department of Veterans Affairs -- knows he will someday be a veteran and his sons will be veterans.

[Hyperlink to Above](#)

51 - Tampa Bay Times: [Editorial: For the sake of Tampa Bay veterans, Senate should scrutinize Trump's VA pick](#) (7 April, 4.8M uvm; Saint Petersburg, FL)

President Donald Trump's decision to fire Veterans Affairs Secretary David Shulkin and to replace him with presidential physician Dr. Ronny Jackson has outsized ramifications for the Tampa Bay area, given the large number of veterans here and the expansive and unique role that two major VA health centers play on both sides of the bay. Whether Jackson is the right

person for the job, or whether this amounts to yet another glaring example of gross cronyism in the Trump White House, remains to be seen.

[Hyperlink to Above](#)

52 - Washington Post: [Ronny Jackson, Trump's pick for Veterans Affairs, may pass up \\$1 million to join the Cabinet](#) (8 April, Andrew deGrandpre, 43.9M uvm; Washington, DC)
President Trump's controversial nomination of Ronny L. Jackson to head the Department of Veterans Affairs has grown further complicated by the Navy physician's pending military promotion, which he could be forced to pass up — along with an estimated \$1 million in future retirement income — if confirmed for the Cabinet post.

[Hyperlink to Above](#)

53 - USA Today (Video): [VA pick Ronny Jackson: 'I've got what it takes' to lead the troubled agency](#) (8 April, Donovan Slack, 36.8M uvm; McLean, VA)
President Trump's pick to lead the Department of Veterans Affairs is dismissing concerns that he lacks the experience necessary to take over the massive agency, which has more than 300,000 employees and 1,200 medical facilities. Ronny Jackson, a Navy rear admiral, has been a White House physician since 2006 but has little executive management experience.

Some lawmakers are unsure how to proceed with President Trump's pick for Veterans Affairs secretary because he also has a pending military promotion, The Washington Post reported Sunday. Trump nominated Rear Adm. Ronny Jackson to be promoted from a one-star admiral to a two-star admiral just days before the president ousted Veterans Affairs Secretary David Shulkin. Trump named Jackson as Shulkin's replacement, pending Senate confirmation.

1 - Washington Post (AP): [Trump’s VA pick draws concern over thin management record](#) (29 March, Hope Yen and Calvin Woodward, 43.9M uvm; Washington, DC)

President Donald Trump’s selection of his White House doctor to run the massive Department of Veterans Affairs triggered concern Thursday among lawmakers and veterans groups about whether he has the experience to manage an agency paralyzed over Trump’s push to expand private care.

Ronny Jackson, a Navy rear admiral entrusted with the health of the past three presidents, is a lifelong physician whose positions on privatizing operations in the second largest federal department and addressing ballooning health care costs are unknown. First named to the top White House post by President Barack Obama, he would be new to running a big bureaucracy if given leadership over a department of 360,000 employees serving 9 million veterans.

In a statement, Trump praised Jackson as “highly trained and qualified.” But representatives of veterans aren’t sold on the choice, or on Trump’s decision a day earlier to fire VA Secretary David Shulkin.

“There is little that we know about Dr. Ronny Jackson’s vision and qualifications,” said Paul Rieckhoff, founder and CEO of Iraq and Afghanistan Veterans of America. “Our concern is whether President Trump was more interested in picking a secretary who would be politically loyal rather than someone who can work across the aisle to fix long standing problems of bureaucratic delay.”

Similar doubts were expressed by Veterans of Foreign Wars, which praised Jackson’s military background in a statement but pointed to a nominee biography devoid of “any experience working with the VA or with veterans, or managing any organization of size, much less one as multifaceted as the Department of Veterans Affairs.” AMVETS echoed such sentiments.

“We look forward to a rigorous confirmation hearing,” Rieckhoff said.

Montana Sen. Jon Tester, top Democrat on the panel that will consider the nomination, said he had yet to determine if Jackson “is up to the job.”

It’s not clear from Jackson’s military service record how much, if any, management experience he has. His military assignments did not appear to include supervision over a large department or unit. His Navy biography says he deployed to Iraq with a Marine unit and served as the emergency physician in charge of resuscitative medicine for a trauma platoon.

Jackson joined the White House medical team in 2006 and is perhaps best known for his appearance before the press corps in January, announcing the results of Trump’s first physical in a performance that showed he was quick-witted and unfailingly complimentary of Trump.

Marveling at the 71-year-old president’s good health, Jackson opined, “It’s just the way God made him.”

A White House official said Shulkin himself had recommended Jackson for an undersecretary position at the VA in the fall, and Trump ultimately decided he was more comfortable with Jackson than with other top candidates. The official was not authorized to discuss personnel matters and spoke on condition of anonymity.

If confirmed by the Senate, Jackson would face immediate crises, like a multi-billion dollar revamp of electronic medical records now in limbo that members of Congress fear will prove too costly and wasteful, and a budget shortfall in the coming weeks in its private-sector Veterans Choice program.

Trump is seeking an aggressive expansion of the Choice program to make it easier for veterans to see private doctors outside the VA system at government expense, but proposals are stalled in Congress following a failed effort last week.

“We’re going to have real choice,” Trump said in Ohio. “That’s why I made some changes, because I wasn’t happy with it.”

Jackson’s nomination comes as Trump’s new Cabinet nominees begin to pile up in the Senate. That is certain to stir weeks of confirmation battles this spring when senators, especially those running for re-election, may prefer to shift focus away from the changes at the White House.

None of the nominees, including the president’s new picks for secretary of state and CIA director, is expected to sail to easy confirmation. The GOP-led Senate is narrowly divided 51-49 and Democrats — and some Republicans — are preparing to ask tough questions. Even though Congress has an otherwise slim legislative agenda before campaign season, prolonged confirmation fights could jam up the Senate and influence the election.

Pending Jackson’s confirmation, Robert Wilkie, a former Pentagon undersecretary for personnel and readiness, is serving as the acting head of the VA.

Lawmakers said they needed to learn more about Jackson’s record.

Republican Sen. Johnny Isakson of Georgia, chairman of the Senate Veterans Affairs Committee that will review the nomination, declined to indicate his support. He stressed that he looked forward to “meeting Admiral Jackson and learning more about him.” Isakson, a

moderate, has expressed skepticism in the past toward nominees who expressed strong views in favor of privatization.

Sen. Bernie Sanders, independent of Vermont and a former chairman of the panel, cautioned that Jackson would not be approved if he supported privatizing the VA. “Our job is to strengthen the VA in order to provide high-quality care to our veterans, not dismember it,” he said.

Shulkin, a physician and the lone Obama administration holdover in Trump’s Cabinet, was unceremoniously fired late Wednesday by Trump in a tweet. Shulkin had enjoyed support from Trump for much of his first year in the administration but support eroded last month after a bruising ethics scandal and political infighting at VA.

Dan Caldwell, executive director of the conservative Concerned Veterans for America, said the group is keeping an “open mind” about Jackson’s nomination. Some of the names that had been in circulation for the post had previous ties to the group, which supports giving veterans greater access to private doctors outside the VA system.

“We’d like to hear more about his positions to reform and fix the VA,” Caldwell said. “He has a very distinguished service record and it would be unfair to outright dismiss him — you have to be very professional to reach his rank.”

A native of Levelland, Texas, Jackson, 50, graduated from Texas A&M with a degree in marine biology, then from medical school at the University of Texas Medical Branch.

He headed to the Navy, then in 2005 joined a 2nd Marines regiment. Jackson was deployed to Iraq as the physician in charge of resuscitative medicine for a trauma platoon, according to the White House.

Ned Price, a National Security Council spokesman under Obama, described the doctor as “the guy you always want to be around” because he’s affable and funny. But Price said it was difficult to believe the nomination was unrelated to the “glowing assessment” of Trump’s health that the doctor had provided.

2 - Washington Post: [Trump’s pick to head veterans department faces skepticism over his experience](#) (29 March, Lisa Rein, Seung Min Kim, Emily Wax-Thibodeaux, and Josh Dawsey, 43.9M uvm; Washington, DC)

The White House was thrown on the defensive Thursday over President Trump’s choice to lead the Department of Veterans -Affairs, forcing officials to fend off mounting skepticism that Ronny L. Jackson has the experience to run the government’s second-largest agency.

Trump announced by tweet late Wednesday that the White House physician would succeed ousted secretary David Shulkin, surprising veterans groups and lawmakers, who were not

notified beforehand and scrambled to learn the policy views of someone whose positions on the chronic challenges facing VA are unknown.

Jackson is a career naval officer who was an emergency trauma doctor in Iraq before spending the past 12 years as a White House physician. But his résumé lacks the type of management experience usually expected from the leader of an agency that employs 360,000 people, has a \$186 billion annual budget and is dedicated to serving the complex needs of the country's veterans.

"It's great that he served in Iraq and he's our generation. But it doesn't appear that he's had assignments that suggest he could take on the magnitude of this job, and this makes Jackson a -surprising pick," said Paul Rieckhoff, chief executive of Iraq and Afghanistan Veterans of America.

Jackson was taken aback by his nomination, said senior White House officials, who spoke on the condition of anonymity to discuss internal deliberations. After aides gauged his interest in recent days, he hesitated to take on such a big job. But the president continued to push and told his senior staff Monday that the doctor was his top choice. A senior White House official described an informal interview process, without the extensive vetting that typically accompanies a Cabinet selection.

Navy Rear Adm. Ronny L. Jackson, the lead White House doctor, said on Jan. 16 that President Trump's "overall health is excellent." (Bastien Inzaurrealde/The Washington Post)

"The President has full confidence in Dr. Jackson's abilities to give our veterans the care they've earned," spokesman Raj Shah said.

The White House planned to announce Wednesday that Shulkin would leave the administration and be replaced on an interim basis by Robert Wilkie, undersecretary for defense personnel and readiness at the Defense Department, until a nominee was found.

But Trump preempted the plan when he tweeted that he intended to nominate Jackson, administration officials said.

The active-duty rear admiral had been a behind-the-scenes figure while serving the past three administrations as a White House physician, but he moved into the spotlight in January when he delivered a glowing assessment of Trump's physical and mental health to reporters, which aides said endeared him to the president.

The White House on Thursday defended Trump's choice of Jackson, saying his hands-on experience as a doctor would serve him well as Veterans Affairs secretary.

"He knows what soldiers need on the battlefield and what they need when they come home as veterans," deputy White House press secretary Lindsay Walters told reporters aboard Air Force One en route to Cleveland, where Trump delivered a speech on his infrastructure plan. "The president has full confidence in his pick and trusts he will be able to give veterans the care they deserve."

Key congressional Republicans publicly took a cautious approach to the nomination.

“We are doing our homework on Dr. Jackson,” said Amanda Maddox, spokeswoman for Sen. Johnny Isakson (R-Ga.), chairman of the Senate Veterans’ Affairs Committee, which will hold Jackson’s nomination hearing. Trump called Isakson after announcing that he had picked the doctor to replace Shulkin, she said.

“His name was never floated around,” Maddox said, “so we are doing our due diligence.”

Trump’s decision to upend VA’s leadership comes as Senate Republicans were already worried about other potentially difficult nominations in the months leading up to midterm elections, when they want to focus their message on the recently passed tax cuts rather than deal with more upheaval in the administration.

“Any time Republicans are not selling the tax bill over the next seven months is a missed opportunity,” said GOP strategist Brian Walsh, a former spokesman for the National Republican Senatorial Committee. “I will say Senate Republicans are a little more insulated by the nature of the seats that are up. But there’s no question that these are unhelpful distractions.”

The stack of Trump nominees includes Gina Haspel, who was picked this month to be the director of the Central Intelligence Agency and is facing opposition from members of both parties because of her ties to the agency’s past use of brutal interrogation measures on terrorism suspects, which critics say amounted to torture.

Senate Republicans have told White House officials in recent days that the process of confirming CIA Director Mike Pompeo to replace Rex Tillerson as secretary of state is going to be challenging even though he is expected to be approved, according to two people briefed on the discussions. Democratic senators said privately when Pompeo was tapped to replace Tillerson that they expect far fewer Democrats to back him than the 14 who voted for him to lead the CIA.

Senior Senate Republicans have privately expressed frustration over the personnel battles that have raged since the beginning of Trump’s presidency and recently told the White House that they did not want to have to consider a series of nominees this year, according to aides and officials who have heard the complaints.

The move to dismiss Shulkin — as well as the lack of communication about Jackson — only fueled concerns on Capitol Hill that the administration was not doing enough to help Congress defend or even respond to the president’s rush of personnel changes.

Jackson’s policy views are unknown, particularly on the most pressing issue facing VA: how much access veterans should have to private doctors outside the system at government expense. Shulkin’s moderate views on the subject, which were at odds with many administration officials, helped end his tenure.

VA secretary is one of Washington’s most unforgiving jobs even for someone with extensive management experience. Shulkin, also a physician, had run large hospital systems — including VA’s — before taking the job. His predecessor, Robert McDonald, was a chief executive of Procter & Gamble. The secretary before him was a decorated retired Army general, Eric K. Shinseki, who was forced out after managers in the far-flung health system were found to have fudged waitlists for veterans’ medical appointments.

As recently as February, Jackson was a candidate to run VA's health-care arm, the Veterans Health Administration, the country's largest health-care system, with 1,200 hospitals and medical clinics. On the day of his interview, he told a selection panel that the president was unwilling to let him leave his White House job, according to two people familiar with the discussion.

The panel interviewed him informally anyway, asking him how he would drive change in such a large organization but not about his views on policy. One person who sits on the panel, and who spoke on the condition of anonymity because its proceedings are confidential, said they didn't think Jackson had the requisite skills to transition from overseeing a team of about 20 doctors, nurses and physician assistants in the White House medical office to overseeing the health administration.

"I don't remember him coming in trying to convince us he had the experience to do the job. He did not inflate his qualifications," this person said. "The tone was, 'Maybe I don't have the same kind of experience as others who came before me in the job.'"

Jackson's former colleagues in the Obama White House, who have publicly praised him in the past, said his nomination caught them off guard as they swapped text messages to ask how an extremely likable but unlikely candidate could end up running VA in the Trump administration.

"I've seen him managing a staff of a couple dozen, which he did to perfection," said Ned Price, a National Security Council spokesman under Obama who recalled that he was treated by Jackson for a toe injury in the Philippines.

"But how that would translate to managing the second-largest department in federal government I have no idea," Price said. "He has competence and integrity. I don't think he's going to fly around the world first-class or be buying thousands of dollars in furniture. But can he run VA? Anyone's guess is as good as mine."

Colleagues described the schedule of the White House physician as grueling, with continual foreign and domestic travel, always at the president's side.

Some Democrats warned that if Jackson embraced the idea of privatizing more of VA's health coverage, his nomination would be met with stiff resistance.

"I will carefully review Dr. Jackson's qualifications to determine whether he has the best interests of our Veterans at heart or whether he, like many in the Trump administration, wants to push VA down the dangerous path of privatization," Sen. Tammy Duckworth (D-Ill.), a wounded Iraq veteran, said in a statement.

At the American Legion, the country's largest veterans organization, senior officials were putting together ideas to help Jackson acquaint himself with the agency and its challenges.

"He's going to have a huge learning curve," Executive Director Verna Jones said, "but we stand ready to assist and educate him."

Robert Costa and Julie Tate contributed to this report.

3 - Wall Street Journal: [Lawmakers Respond Cautiously to Little-Known VA Pick Ronny Jackson - Key senators on panel say they don't know enough about White House doctor to form an opinion about his ability to lead a vast bureaucracy](#) (29 March, Louise Radnofsky and Peter Nicholas, 43.6M uvm; New York, NY)

Capitol Hill lawmakers reacted guardedly to President Donald Trump's nomination of the White House physician to head the Department of Veterans Affairs, with key members noting that they know little about him.

Dr. Ronny Jackson, a U.S. Navy rear admiral who has served as a White House physician during the past three administrations, is slated to succeed Secretary David Shulkin, who was ousted Wednesday. Mr. Trump indicated on Thursday that he removed Dr. Shulkin because change at the agency was coming too slowly. The secretary had also been the subject of a travel-expenses scandal.

The lead Republican and Democratic senators who will decide whether to confirm Dr. Jackson said they didn't yet know enough to form an opinion about his ability to lead a bureaucracy of 370,000 employees. The department, which is the second-biggest government agency, is also still recovering from a 2014 scandal in which employees were found to have falsified records to hide delays in patient care.

"I look forward to meeting Adm. Jackson and learning more about him," said Sen. Johnny Isakson (R., Ga.), chairman of the Committee on Veterans' Affairs, which will vote on confirmation.

Sen. Jon Tester of Montana, the top Democrat on the panel, offered a near-identical sentiment, adding that he is looking forward to "seeing if he is up to the job."

Veterans service organizations and some other lawmakers have expressed skepticism about Dr. Jackson, raising concern over the propriety of an active-duty military officer holding a political appointment, and saying his biography showed scant experience at running a bureaucracy on the scale he would inherit.

"He's more of a hands-on physician—not a lot of desk time in terms of administrative leadership," said Rep. Mike Coffman (R., Colo.), a member of the House Veterans' Affairs Committee who was among Dr. Shulkin's harshest critics.

It's unclear how Dr. Jackson would address the issue of his active military status, including whether he would seek to relinquish it before securing confirmation to the new job.

Dr. Jackson's confirmation will come as senators are debating legislation that would increase veterans' ability to seek non-government medical care. Congress is approaching an early June deadline to agree to new funds for the existing system allowing some veterans to go outside the VA for care, or to create a new policy allowing all veterans to participate.

"I made some changes, because I wasn't happy with the speed with which our veterans were taken care of," Mr. Trump said Thursday in a speech in Ohio. "We want them to have choice so that they can run to a private doctor and take care of it."

The White House informed Mr. Isakson's committee of the leadership change in a courtesy call Wednesday; a timeline for proceeding with the nomination, or preliminary introduction meetings,

wasn't discussed, a spokeswoman said. Mr. Isakson and Dr. Jackson spoke by phone Thursday afternoon, in an informal introduction, the spokeswoman said.

Past and present White House officials have praised Dr. Jackson as a steady force, deft in caring for different presidents and cabinet members. They said they found him friendly, bright and knowledgeable about medicine, including on issues specifically affecting veterans.

"If you're not calmly decisive, the job of White House physician ain't for you," said Paul Winfree, a former deputy director of Mr. Trump's Domestic Policy Council.

Dr. Jackson has been sought out for management positions before, though on a significantly smaller scale. Toward the end of the Obama administration, he was invited to interview by the Cleveland Clinic for an international posting managing a handful of people because of his affability, versatility and experience with VIPs, a person familiar with the interview said.

The federal agency Dr. Jackson would inherit is notoriously riven with competing power centers, and has now churned through three secretaries in four years.

Dr. Shulkin came directly from a health-care management background into the Obama administration when he took over the VA. He stayed on for Mr. Trump and initially received high reviews. He lost credibility recently when the VA inspector general found that, during a trip to Europe, he improperly accepted Wimbledon tennis tickets, misspent thousands of dollars of taxpayer money on his wife's airfare and improperly used a department employee as a "personal travel concierge."

Dr. Shulkin denied wrongdoing. He repaid the \$4,312 cost of his wife's airfare and then sent the U.S. Treasury a check equal to the amount of the tennis tickets.

Mr. Trump's advisers had openly explored possible successors for Dr. Shulkin in recent weeks, including having conversations with potential candidates, people familiar with the matter had said.

Still, the nomination of Dr. Jackson stunned some White House aides, who hadn't known the president was even considering his physician for the role.

It became clearer Thursday that Mr. Trump had been thinking about moving Dr. Jackson to the VA for months. Last fall, Dr. Shulkin recommended that Dr. Jackson take an undersecretary job at the department, a White House official said. At that time, Dr. Jackson and the president discussed plans for improving the VA—talks that set in motion the announcement on Thursday.

Lindsay Walters, a White House spokeswoman, on Thursday said the White House believed Dr. Jackson had "bipartisan respect."

"The president did have some early individuals that he was looking at but continuously went back to Dr. Jackson to fulfill this role as VA secretary," she added. "The president has full confidence in his pick and trusts he will be able to give veterans the care they deserve."

Some lawmakers expressed dismay over the treatment and departure of Dr. Shulkin, which could linger into the new confirmation process. "By once again choosing chaos over consistent leadership, Donald Trump is hurting veterans around the country," said Illinois Democratic Sen. Tammy Duckworth, who is a retired U.S. Army lieutenant colonel.

4 - USA Today (Video): [6 big things the new Veterans Affairs chief will have to address](#)

(29 March, Donovan Slack and Dennis Wagner, 36.8M uvm; McLean, VA)

On the front lines at the Department of Veterans Affairs — in the agency's 1,240 hospitals and clinics — it doesn't much matter these days who holds the secretary's job in Washington.

David Shulkin, who was fired Wednesday, was the third VA secretary in four years. If President Trump's nominee to lead the agency, physician and Navy Rear Adm. Ronny Jackson, is confirmed, he will be the fourth.

Each has sought to fix the department, laying out visions and priorities — Shulkin's top priority was "access," making sure veterans get appointments when they need them. His predecessor, former Procter and Gamble CEO Bob McDonald, focused on staffing, training and veteran-centered customer service.

But year after year, critical deficiencies remain and veterans are bearing the brunt of the failures. Here are some key, seemingly intractable shortfalls that continue to plague the system — and that Jackson will face if confirmed.

Veterans are still waiting

The furor over VA health care exploded in 2014 when whistle-blowers in Arizona divulged that thousands of patients were backlogged at the Phoenix veterans hospital, and some of them had died awaiting care. VA investigators soon determined that medical center administrators knew about the crisis, yet put out fraudulent wait-time data to collect bonus pay.

The problems weren't just in Phoenix. A USA TODAY investigation in 2016 found supervisors instructed employees to falsify patient wait times at VA medical facilities in at least seven states. And employees at 40 VA medical facilities in 19 states and Puerto Rico regularly "zeroed out" veteran wait times.

A few weeks after Shulkin was sworn in last year, the VA inspector general released a report finding widespread inaccuracies in scheduling records at a dozen hospitals in North Carolina and Virginia. The records vastly understated how long veterans were waiting for appointments and prevented as many as 13,000 from getting VA-funded care in the private sector — an option they were entitled to if they waited longer than 30 days. At the time, Shulkin said the findings were based on outdated rules and that he had instituted new regulations to prevent such problems in the future.

But just two weeks ago, another inspector general investigation found the problems continued.

Looking at 64 VA hospitals and clinics in a swath of states from Kentucky to Illinois, investigators found scheduling staff entered the wrong dates in the system in more than 5,000 cases. That masked how long veterans were actually waiting for specialty care and mental health appointments.

They estimated 2,500 of those waited longer than a month, but the scheduling system falsely showed only 1,300 waited that long. Even in the cases accurately reflected in the system, they concluded, most weren't offered the chance to get care in the private sector.

"VA data continues to be a high-risk area," wrote Larry Reinkemeyer, VA assistant inspector general for audits and evaluations.

Quality of care

The VA's lowest performing hospitals remained at the bottom of the pack on the agency's own internal quality measures for two years in a row.

The VA regularly scores its medical centers based on dozens of quality factors, including death and infection rates, instances of avoidable complications and wait times. The agency uses a five-star scale with one being the worst and five being the best.

The rankings compare VA hospitals against each other but the number of one-star hospitals is not constant. Medical centers in that bracket can be elevated to two stars based on quality-of-care factors.

Among the facilities who received only one star in both 2015 and 2016 were the VA hospital in Phoenix and another in Memphis, Tenn. One Memphis employee dubbed the facility a "house of horrors" when USA TODAY obtained internal documents revealing reported threats to patient safety soared in recent years from 700 to more than 1,000.

One veteran had to have his leg amputated after a VA provider there left a piece of plastic tubing in a critical blood vessel during a procedure.

On a number of patient safety factors, the VA overall on average scores better than the private sector on many key patient-safety measures, including instances of avoidable death, respiratory failure, and infection. But there are vast disparities among VA hospitals, according to VA data collected from October 2015 to March 2017.

The death rate for surgical patients with treatable complications ranged from zero at the VA hospital in Sacramento, Calif., to more than 20% in Miami; Columbia, Mo.; and Washington, D.C. In Long Beach, Calif., it was 29%. That's more than double the private sector average of 14%, according to Medicare data.

Bureaucratic breakdowns

In Washington, the VA inspector general issued a rare emergency report last year saying that patients were in imminent danger at the hospital. The facility had dirty sterile storage areas and was regularly running out of critical supplies needed for surgeries and other procedures, including patches to seal blood vessels and tubes for kidney dialysis.

Shulkin quickly removed the hospital director there and sent teams from headquarters to try to fix the problems. But an inspector general report released this month found that VA officials at every level — local, regional and national — knew about the problems for years but didn't fix them.

Investigators found “a culture of complacency and a sense of futility pervaded offices at multiple levels.”

“In interviews, leaders frequently abrogated individual responsibility and deflected blame to others,” the investigation report says. “Despite the many warnings and ongoing indicators of serious problems, leaders failed to engage in meaningful interventions of effective remediation.”

Morale at the agency has taken a beating amid the constant drumbeat of crises. Employees ranked it as the second to worst agency to work for among large departments last year. The only department scoring lower was Homeland Security.

The inspector general singled out frontline workers at the Washington hospital, saying they went to great lengths to make do and they may be the only reason no patients were actually harmed.

“The OIG did not find evidence of adverse clinical outcomes, a condition that is largely attributable to front-line care providers who were committed to providing the best possible care by borrowing supplies, improvising, or personally ensuring patients received what they needed,” the investigation report said.

Vetting failures

The VA has had persistent difficulties recruiting and keeping enough medical care providers to meet veterans needs.

In 2015, one in six critical VA jobs — intake workers, doctors, nurses and assistants — were unfilled, a USA TODAY investigation found. Though the agency has made headway, there are still shortfalls.

In some cases, that has created an incentive to hire medical care providers with problem records that may have prevented them from getting jobs in the private sector.

A VA hospital in Oklahoma knowingly hired a psychiatrist sanctioned for sexual misconduct who went on to sleep with a VA patient, according to internal documents obtained by USA TODAY. A Louisiana VA clinic hired a psychologist with felony convictions. The VA ended up firing him after they determined he was a “direct threat to others” and the VA’s mission.

The Iowa City VA hospital knowingly hired John Henry Schneider last year, a neurosurgeon who had racked up more than a dozen malpractice claims in two states and had his license revoked in one.

After USA TODAY revealed the case in December, the VA forced him out and discovered that conflicting VA policies allowed its hospitals to illegally hire doctors with revoked licenses for 15 years. Shulkin ordered the policies rewritten but with the current process, that could take up to two years.

In a report released Monday, the inspector general found vetting failures go beyond medical providers. Investigators determined that the VA did not conduct required background checks on more than 6,000 employees and managers failed to properly document and oversee background checks.

“As a result, VA cannot reliably attest to the suitability of its largest workforce, exposing veterans and employees to individuals who have not been properly vetted,” the report said. “Unless internal controls and data are improved, VA and the public lack assurance that VHA has a workforce suitable for serving our nation’s veterans.”

Hiding shoddy care

The agency has failed for years to ensure medical care providers found to have provided poor care are reported to state licensing boards or to a national database created to prevent them from crossing state lines and endangering other patients.

In one case in Maine revealed in a USA TODAY investigation, the VA found a podiatrist had harmed 88 patients but didn’t report him to the national database and took years to report him to state boards. By the time the VA told his patients, one of them, U.S. Army veteran April Wood, had decided to have her leg amputated after two failed surgeries by the podiatrist.

The investigation found VA hospitals also signed secret settlement deals with dozens of doctors, nurses and health care workers in recent years that included promises to conceal serious mistakes — from inappropriate relationships and breakdowns in supervision to dangerous medical errors — even after forcing them out of the VA.

In response to the story last fall, Shulkin required increasing vetting of future such deals and he ordered policies on reporting to state boards and the national database rewritten. Again, five months later, the new policies still are not in place and could take months or years more.

Politics

Jackson, Trump's pick to be the new secretary, has no experience running a huge government agency, and dealing with veterans’ health care challenges will require deft politics and bureaucratic acumen.

His predecessor, Shulkin, was ousted despite being well regarded in Congress and assured of job security by Trump.

Now, a White House physician and former Navy admiral faces not just a plethora of VA maladies, but partisan politics and special interests that bitterly disagree on the cures.

The most perilous and important controversy involves decisions on privatizing veterans’ healthcare.

Powerful unions and veteran service organizations, such as the American Legion, oppose a radical change, and they are supported by most Democrats on Capitol Hill. But Republicans and key advocacy groups, such as Concerned Veterans for America, are demanding a system that would let veterans decide whether they go to the VA for care, or get private treatment subsidized by the government.

On Thursday, Trump suggested that Shulkin was dismissed because he was not aggressive enough in promoting the private-care option.

The existing Choice Program, which ate up billions of dollars and had to be re-funded, promises to be even more expensive if expanded. And those costs already have included tens of millions of dollars in improper payments to contractors.

Veteran enrollment for healthcare has skyrocketed, and Congress continues to expand benefits for those already in the system, with care for Agent Orange victims and high-cost medications for hepatitis patients. Bringing in enough funding to meet that demand also requires political aplomb.

5 - Politico: [Trump's VA pick blindsides staff, deepens agency disarray - 'He's got a department that's in turmoil,' a former VA secretary said. 'It's in crisis.'](#) (29 March, Lorraine Woellert, Eliana Johnson and Connor O'Brien, 23.9M uvm; Arlington, VA)

The timing of President Donald Trump's announcement to name Rear Admiral Ronny Jackson to lead Veterans Affairs was a snap decision that surprised his own chief of staff and knocked the government's second-largest agency, already bedeviled by scandal, deeper into disarray.

White House chief of staff John Kelly had spoken with David Shulkin by phone Wednesday morning, reassuring the now-former VA secretary that he wouldn't be fired by tweet that afternoon. Hours later, Kelly had to phone Shulkin again telling him plans had changed.

Trump declared Jackson's nomination on Twitter at 5:31 p.m. The tweet was big news — not just to the public, but to some senior aides, according to one White House official.

The chaos — by now a typical part of the president's management style — has for months upended Kelly's attempts to ensure that an unorthodox White House adheres to traditional processes. But while White House aides are left unpacking the day's events, the drama at the VA is just beginning.

Deputy Secretary Thomas Bowman, a Trump appointee who is the agency's No. 2, is widely expected to leave soon, either by choice or by force. Kelly and other aides wanted Bowman gone before Shulkin left to avoid installing the deputy at the helm, even temporarily. Bowman had pushed back on broad privatization efforts, leading Trump to berate him in an Oval Office meeting for his lack of loyalty.

Trump got around the Bowman problem by naming Robert Wilkie, an undersecretary at the Department of Defense, to the temporary job. A Capitol Hill veteran and member of Trump's transition team, Wilkie is a former senior adviser to Sen. Thom Tillis (R-N.C.), who supports expanding service members' access to private doctors.

"He's got a department that's in turmoil. It's in crisis. There's warfare there," said Anthony Principi, who led the agency under former President George W. Bush. "And you have an acting secretary who doesn't know the VA."

But if and when Bowman departs, Wilkie will be left with a shallow bench at an agency already paralyzed by political mistrust, some veterans' advocates say. The VA's health and benefit agencies — which administer tens of billions of dollars in health programs, pensions, survivor

benefits and other forms of assistance to some 9 million service members — have been without Senate-confirmed officials since the Obama administration.

Veterans Affairs is the second-largest federal agency, behind only the Department of Defense, with 377,000 employees. And it has proven unwieldy even when led by highly decorated, experienced administrators such as Eric Shinseki, a retired four-star Army general who resigned during the Obama administration amid a scandal over lengthy wait times and faulty scheduling practices for medical appointments.

Shinseki was followed by Bob McDonald, an Army veteran and former Procter & Gamble CEO. Shulkin, McDonald's successor, was the first non-veteran to lead the VA.

As recently as two weeks ago, the Trump White House was still making overtures to potential candidates for the top job, according to a person with direct knowledge of the inquiries. Trump reportedly agonized over the decision, changing his mind several times, a senior administration official said.

“Instead of going through the paces to convince the best possible person to take this job, they’re going with the person who’s still on active duty in the Navy and can’t say no to the commander in chief,” said one Obama White House aide, who spoke highly of Jackson as a doctor and individual. “You could look at it as them giving up trying to find a competent commander or manager to fix the problems.”

Shulkin had come under fire after a VA inspector general's report accused him of improperly accepting tickets to the Wimbledon tennis tournament and using his agency staff to arrange a sightseeing tour of Denmark and England. He repaid the VA for the trip. The longtime hospital administrator, who was engaged in open warfare with conservatives in the department intent on privatizing the VA, contended he was set up.

Veterans' groups remained loyal to Shulkin, whom they saw as their best line of defense of against privatization. During his campaign, Trump made promises that veterans would be allowed to seek medical treatment outside the VA's system, statements taken by some to mean a step toward handing the system to commercial companies to manage.

Jackson, while well-liked by both Republicans and Democrats, is a cipher on privatization and other policy issues. With no agency experience to speak of, veterans suspect he could be installed as a figurehead, leaving lower-level appointees to steer the agency toward privatization.

“He’s a blank slate. Nobody knows really anything about his competency or capacity for this job,” said Paul Rieckhoff, CEO of Iraq and Afghanistan Veterans of America. “We especially know that being a veteran doesn’t qualify you to run the VA any more than being a soldier qualifies you to run the DoD.”

Principi urged Jackson to move quickly on his own agenda.

“The new secretary, really, if he wants to accomplish anything, has to hit the deck running and has to bring in some very, very good people,” he said. “I hope and pray he’s a success. Because if he’s not, American veterans are going to be the losers.”

6 - Task & Purpose: [What's In Store For The Next VA Chief? Let's Break It Down](#) (29 March, James Clark, 102k uvm; New York, NY)

It's been an awkwardly long time coming, but as of yesterday afternoon embattled Veterans Affairs secretary David Shulkin is out of a job. The news comes after a month and a half of uncertainty that began when a scathing inspector general report detailed "serious derelictions" in expensing a Europe trip last summer. And then there were all the accusations and counter accusations of political infighting and rumors of possible replacements — at least all that is over:

Rear Adm. Ronny Jackson, the president's appointed White House physician, who drew national attention when he complimented President Trump on his "incredibly good genes," has been tapped to lead the Department of Veterans Affairs — pending approval by the Senate. Given that this leadership post has been described as "one of the most difficult jobs in government" — which has stymied generals, CEOs and health care executives — we thought it was time to give you a rundown of what's in store for the next officeholder, by the numbers:

More than 1,243 health care facilities. These Veterans Health Administration facilities include 170 VA Medical Centers, and 1,063 outpatient sites — making it the largest health care system in the United States.

9,000,000 veterans.. That's the number who receive medical care from VA, and many of these patients are older and suffer from multiple traumas and injuries that require specialized care: amputations, traumatic brain injuries, post-traumatic stress disorder, military sexual trauma, and as of 2013, half of all VA patients suffer from chronic pain, to name just a few. And as many as 2 million patients receive in-facility care, according to an American Legion statement.

20,000,000 veterans in the United States... we think. There could be far more veterans than we realize, since an individual's military history isn't tracked by the census bureau, which is a concern since the VA relies on headcount of its target population to get a feel for the size and scope of the services it needs to provide.

\$10,000,000,000 contract for Electronic Health Records. A long-term plan to modernize the VA's health records system could be jeopardy, with Shulkin's dismissal coming just as the VA was set to finalize the acquisition of a new electronic health record system.

2nd largest federal agency. The only one bigger is the Department of Defense.

\$186,000,000,000 budget for fiscal year 2018.

360,000 employees spread across three separate administrations within the department; the Veterans Health Administration, Veterans Benefit Administration, and the National Cemetery Administration.

23 years active duty. Jackson's Navy career began in 1995, and includes postings as an instructor, diving medical officer, diving safety officer, from Panama City, Florida Sigonella, Italy, to Norfolk, Virginia. By 2005 he deployed to Taqaddum, Iraq as part of a Surgical Shock Trauma platoon.

3 presidents. While still in Iraq in 2006, Jackson was selected as a White House physician and served as the supervising physician for the Camp David Presidential Retreat under the George W. Bush administration. Later he led the White House Medical Unit as its director and was the appointed White House physician for Presidents Barack Obama and Donald Trump.

Soon to be 7 VA secretaries in 4 years. The department has been beset by turmoil and scandal. Eric Shinseki resigned from his post as VA chief following the 2014 wait-list scandal the department. Since then, the VA has gone through three sitting secretaries, and is on its third acting secretary, with Robert Wilkie, previously the Pentagon's undersecretary of personnel and readiness, now tasked as the interim chief until Shulkin's replacement is approved by the Senate.

[Back to Top](#)

7 - Washington Post: [Opinions - Surprise: Trump's newest Cabinet nominee has no relevant experience](#) (29 March, Eugene Robinson, 43.9M uvm; Washington, DC)

You can't make this stuff up: President Trump has announced he will nominate a medical doctor who has no discernible management experience to run the second-largest agency in the federal government.

Can presidents be sued for malpractice?

The man Trump has named to become secretary of veterans affairs, Ronny L. Jackson , happens to be the president's personal doctor. More to the point, given Trump's perpetual hunger for sycophancy, is the fact that Jackson showered the president with hyperbolic Dear-Leader-style praise during a widely viewed television appearance in January.

Trump has "incredibly good genes," the White House physician said in describing a examination he had given the president. Trump's overall health is "excellent." His "cardiac assessment" put him "in the excellent range." If his diet were a bit better, "he might live to be 200 years old." In any event, "I think he will remain fit for duty for the remainder of this term and even for the remainder of another term if he's elected."

That is an unusual way to describe a 71-year-old man whose height was reported as a generous 6 feet 3 inches , and weight at an eyebrow-raising 239 pounds, which classifies him as overweight — but conveniently one pound short of obese. Jackson's are odd words characterizing a man whose cheeseburger-laden diet my doctor would describe as suicidal and whose coronary calcium scan results, according to many other physicians, indicate some degree of heart disease and a clearly elevated risk of heart attack.

I assume Jackson has been more, shall we say, plain-spoken with the president about his health than he was with the public. But am I suggesting that flattery, rather than merit, is what makes him Trump's choice to replace ousted VA Secretary David Shulkin? Absolutely, because no other explanation makes sense.

Pliability may also be playing a role. In a New York Times op-ed, Shulkin wrote that he believed he was being sacked because he opposed a push by the Trump administration "to put VA health care in the hands of the private sector."

Shulkin is a physician, but before he took over VA, he also had experience running hospitals. With no comparable administrative background, Jackson — if confirmed by the Senate — would take over a sprawling agency with about 360,000 employees, a \$186 billion budget and responsibility for providing medical care to 9 million veterans who deserve better, faster service than they now receive.

Shulkin was one of several high-ranking Trump appointees under fire for lavish spending on the taxpayers' dime. He was also a holdover from the Obama administration, and even though the job is perhaps the least partisan in the Cabinet, that prior association clashed with Trump's bratty determination to oppose everything President Barack Obama supported and support everything he opposed.

But Shulkin, by most accounts, had stabilized VA's vast system of hospitals and health clinics. What he refused to do was support the notion of privatizing veterans' health care — an idea pushed by some of the political appointees the White House had installed under him.

"I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans," Shulkin wrote in his Times op-ed. "The private sector . . . is ill-prepared to handle the number and complexity of patients that would come from closing or downsizing VA hospitals and clinics, particularly when it comes to the mental health needs of people scarred by the horrors of war."

Shulkin wrote that "in recent months" the political environment in Washington had become "toxic, chaotic, disrespectful and subversive," making it impossible for him to do his job. "It should not be this hard to serve your country," he wrote.

But it should be hard to get a job running any organization as big, complex and vital as the Department of Veterans Affairs. Perhaps Jackson has an innate genius for management that awaits only the opportunity to flower. If not, Trump will be doing a grave disservice to men and women who are owed the nation's thanks and gratitude.

I can't say I'm surprised. Trump put neurosurgeon Ben Carson in charge of the Department of Housing and Urban Development, despite Carson having zero experience in housing policy. He put Betsy DeVos in charge of the Department of Education, despite her apparent unfamiliarity with actual schools. He put politician Rick Perry in charge of the Department of Energy, which Perry wanted to eliminate until he learned what the agency does.

Perry actually said that during his confirmation hearing. One doesn't know whether to laugh or cry.

[Back to Top](#)

8 - Washington Post (The Fix): [Who is Trump's new Veterans Affairs pick, Ronny Jackson?](#) (29 March, Aaron Blake, 43.9M uvm; Washington, DC)

The seemingly never-ending parade of staff changes in the Trump administration continued apace Wednesday, with the president announcing that Veterans Affairs Secretary David Shulkin is out and that White House physician Ronny L. Jackson will replace him.

Jackson's name will be familiar to political watchers across the country for one main reason: He's the physician who delivered what some felt to be a suspiciously rosy picture of Trump's health in January. But he's an interesting pick for a whole host of other reasons.

For one, Jackson is something of a nonpartisan pick. Like Shulkin, he served in the Obama administration, where he was also President Barack Obama's White House physician. A native of Texas and a graduate of Texas A&M and University of Texas Medical Branch, he's a rear admiral in the U.S. Navy who has spent decades practicing medicine in the military. Jackson was nominated for a promotion to rear admiral (upper half) as recently as last week, which would give him his second star. According to his Navy biography, he was deployed to Iraq in the mid 2000s to head up an emergency medical unit tasked with resuscitating troops.

While there, he was chosen to join President George W. Bush's White House as a physician. In 2013, Obama promoted him to the top job in the West Wing. Trump elected to keep him on. In that role, Jackson oversees not just Trump's health, but also that of the first family and White House staff and guests. He mostly stayed behind the scenes but made headlines after treating a girl who got bit by one of the Obamas' dogs in January 2017.

Navy Rear Adm. Ronny L. Jackson, the lead White House doctor, said on Jan. 16 that President Trump's "overall health is excellent." (Bastien Inzaurrealde/The Washington Post)

Jackson reached his highest degree of notoriety in January, when he delivered a promised review of Trump's health. Trump, who at 70 was the oldest newly elected president ever, is known to eschew exercise and dine on fast food. There have also been persistent questions — especially among his critics — about his mental health. And Trump's medical reviews during the campaign were both ridiculously hyperbolic — claiming he would be the most healthy president ever — and omitted key pieces of information, including a hair-loss drug Trump takes.

Jackson's review played up a cognitive test Trump had passed that seeks out early signs of dementia and other kinds of mental deterioration. He said Trump had "incredible genes" and (seemingly) joked that if Trump's diet had been better he might live to be 200 years old. He denied Trump had heart disease even as the data suggested he might. He listed Trump's weight at 239 pounds, which left Trump exactly one pound shy of the definition of "obese" and spawned a whole host of dubious reactions. (Call it the "girther" movement.)

The whole thing earned Jackson a send-up during the cold open of "Saturday Night Live."

Despite the ridicule, members of the Obama administration vigorously defended Jackson as a patriot and an honest man.

If nothing else, Jackson's ascension seems to reinforce that the best way to get ahead in the Trump administration is to say nice things about him. Some defended Jackson's credentials, but that review will likely be a topic at his confirmation hearings.

Perhaps the main reason Jackson is a somewhat controversial pick, though, is his lack of management experience. VA has been a department beset by scandals in recent years — including before Shulkin — and has proved a logistical and bureaucratic nightmare. Jackson has headed up medical units in the White House and Iraq, but he has never dealt with anything close to the scale of what he's set to take on. It may be the toughest Cabinet job in the entire administration, in fact.

Trump, though, as he often does, has gone with a nontraditional pick who said things he liked on television.

9 - FOX News: [Ronny Jackson picked by Trump to lead the VA: What to know about the president's physician](#) (29 March, Kaitlyn Schallhorn, 32.5M uvm; New York, NY)

President Trump gave Dr. Ronny Jackson a clean bill of health in March – to run the Department of Veterans Affairs.

A Navy rear admiral, Jackson is the president's personal physician who rose to prominence after he addressed the press from the White House briefing room in January to discuss Trump's health. While Jackson said the president needs to lose some weight, he said the physical exam he conducted showed overall that Trump was in good physical and mental health.

Trump fired Secretary David Shulkin on March 28, and Robert Wilkie is serving as interim secretary until Jackson is confirmed.

He has a marine biology degree

From Texas, Jackson, 50, graduated from Texas A&M University in 1991 with a degree in marine biology, according to his Navy biography. He graduated from the University of Texas Medical Branch with his medical degree in 1995.

That same year, Jackson joined the Portsmouth Naval Medical Center – located just outside Chesapeake, Virginia – which kicked off his active duty military career. It was there that he finished an internship in transitional medicine.

Later, he would return to the naval center to complete his residency in emergency medicine, graduating at the top of his class in 2004.

Jackson is a veteran

Jackson was deployed to Iraq after he joined the 2nd Marines in 2005, according to his Navy biography.

He served as the emergency medicine physician in charge of resuscitative medicine for a forward deployed Surgical Shock Trauma Platoon.

He's been a White House physician since Bush

While still in Iraq, Jackson was tapped as a White House physician in 2006. He has overseen the physicians for Camp David presidential retreats, led the White House Medical Unit and directed the executive health care for the Cabinet and senior staff members, according to his biography.

It was former President Barack Obama who selected Jackson to fill the position of physician to the president.

The Associated Press contributed to this report.

[Back to Top](#)

10 - FOX News (Video): [John Brennan: Trump's nomination for VA secretary is 'terribly misguided'](#) (29 March, Nicole Darrah, 32.5M uvm; New York, NY)

Former CIA Director John Brennan once again took a shot at President Trump on Twitter Thursday, saying he believes the decision to nominate Adm. Ronny Jackson to run the Department of Veterans Affairs is "terribly misguided."

"I personally know and greatly respect Ronny Jackson....as a terrific doctor and Navy officer," Brennan tweeted. "However, he has neither the experience nor the credentials to run the very large and complex VA. This is a terribly misguided nomination that will hurt both a good man and our veterans."

Trump announced via Twitter Wednesday his intention to replace current VA Secretary David Shulkin with Jackson, a 50-year-old Navy rear admiral who has served as personal physician to the president since 2013, when he was appointed by former President Obama, after being tapped to serve as a White House doctor in 2006.

Jackson's also a veteran. He was deployed to Iraq after he joined the 2nd Marines in 2005, according to his Navy biography.

Jackson's nomination triggered some concern among lawmakers and veterans groups about his experience to manage a federal agency, but Trump praised the lifelong doctor as "highly trained and qualified."

Trump decided to oust Shulkin from his Cabinet after he served just over a year in office. An internal VA watchdog found last month that Shulkin improperly accepted Wimbledon tennis tickets and that his then-chief of staff had doctored emails to justify his wife traveling to Europe with him at taxpayer's expense.

The swipe from Brennan, now an analyst for NBC News and MSNBC, isn't the first he's made against Trump.

Just last week, he suggested that the Russians "may have something" against the president, and days prior to that in response to former FBI official Andrew McCabe's firing: "When the full extent of your venality, moral turpitude, and political corruption becomes known, you will take your rightful place as a disgraced demagogue in the dustbin of history."

Fox News' Kaitlyn Schallhorn and Elizabeth Llorente, along with The Associated Press, contributed to this report.

[Back to Top](#)

11 - New York Times: [Op-ed - Ronny Jackson's Disturbing Lack of Independence](#) (29 March, Norman L. Eisen and Bandy X. Lee, 30M uvm; New York, NY)

In announcing Dr. Ronny Jackson, the White House physician, as his choice to be the new secretary for veterans affairs, President Trump has taken his latest misstep in what has been the worst presidential personnel process in modern history.

We take no pleasure in saying so, including because one of us (Mr. Eisen) worked with Dr. Jackson in the White House, was even treated by him, and can testify that he is a very capable physician. But that good opinion of Dr. Jackson, which was widely held in the Obama administration, by no means qualifies him to run one of the largest, most complex and troubled cabinet agencies in the federal government.

Indeed, the very affability of Dr. Jackson's approach when it comes to his current presidential patient is perhaps his greatest disqualification, followed closely by his lack of relevant management experience and the apparent absence of a normal pre-nomination personnel vetting.

Dr. Jackson's January examination of President Trump, and subsequent news conference, give us great pause because they evinced a disturbing lack of independence — one of the most important qualities in a cabinet member. Dr. Jackson startled observers by not only finding the president healthy, but declaring he would remain so in the future. The doctor even looked into his crystal ball to predict good health for a second term, a pronouncement extending seven years into the future and so more fit for a fortuneteller than a scientist.

Some expert observers also felt Dr. Jackson may have understated the president's heart disease, and even fudged the president's height (his driver's license says 6 feet 2 inches; Dr. Jackson reported 6 feet 3 inches) because the lower number would have forced the doctor to admit his patient was obese. When asked why he had such glowing things to say about the president's health when Mr. Trump gorges on McDonalds, guzzles diet Coke, and seldom exercises, Dr. Jackson said: "Some people have just great genes. I told the president that if he had a healthier diet over the last 20 years, he might live to be 200 years old."

That is hardly the objectivity that America needs from its cabinet members. But Dr. Jackson's worst failing was his purported examination of the president's psychological fitness, resulting in his pronouncement that "the president is mentally very, very sharp." The examination came at a time when there was widespread public discussion about the president's mental state, driven by reporting about some of the president's startling behind-the-scenes behavior. The scrutiny was so intense that the president himself asked Dr. Jackson for testing.

But the test that Dr. Jackson administered was not fit for his conclusion. It was a short examination known as the Montreal Cognitive Assessment, which is generally used as a screen for Alzheimer's and similar symptoms. One of us (Dr. Lee) is a mental health professional who has expertise in these examinations, and would never have utilized this narrow test under these circumstances. It is the equivalent of pronouncing a patient cancer-free because she has a good complexion.

A full history should have been taken and a standardized battery of tests given, such as the Minnesota Multiphasic Personality Inventory. Among the other, more appropriate tests that should also have been considered are the Wisconsin Card Sorting Test, the California Verbal Learning Test and the Stroop Test. The MoCA examination was simply not sufficient under the circumstances to support Dr. Jackson's declaration that he had "absolutely no concerns" about the president's cognitive ability or neurological functions.

All of this matters because, if Dr. Jackson cannot be trusted to act independently when it comes to the president's mental and physical health, we cannot be confident that he will do so when it comes to the fitness of the Department of Veterans Affairs. The department has the sacred charge of repaying our soldiers for their service by providing them with health care and other support. If Dr. Jackson tells the president — and the country — what Mr. Trump wants to hear about his own health, how can we trust him to honestly and rigorously diagnose the ailments of the V.A., and to treat them appropriately?

Having a candid V.A. secretary is all the more important because the department faces profound challenges. Since 2014, it has dealt with a pattern of negligent treatment at hospitals operated by one of its agencies, the Veterans Health Administration. Outgoing Secretary David Shulkin revealed yesterday that he had fought Trump administration proposals to privatize services provided by the V.A. — a move that could undermine the quality of health care provided to our veterans. Dr. Jackson's treatment of the president does not inspire confidence that he will take on the V.A.'s problems with the brutal honesty that the job demands.

Dr. Jackson's nomination is also undermined by the fact that although he is a medical professional, he lacks the management experience that the job demands. The V.A. secretary is responsible for a department that provides health care services to over nine million individuals. While Dr. Jackson has served his country with distinction, both in Iraq and as the White House physician, managing a relatively small medical team is not preparation for leading a vast and sprawling bureaucracy. The V.A. is one of the most complex health care management jobs in the world, and ideally would be run by someone with experience operating hospital systems or health businesses or enterprises, and large ones.

The nomination fits a pattern of cronyism, with the president appointing those of dubious qualifications to patronage jobs across the administration. The president's former golf caddy is now the White House social media director. A contractor married to one of the Trump's former household staff members now has a job at the Environmental Protection Agency. And a longtime friend of the Trump family who has been involved in planning golf tournaments and Eric Trump's wedding is the head of the New York and New Jersey office of the Department of Housing and Urban Development. And now he has appointed his White House doctor to oversee the health care of millions of veterans.

Finally, in addition to concerns about independence and qualifications, it appears that Dr. Jackson had not undergone the normal vetting process for White House presidential personnel. Reportedly, the tweet-from-the-hip nomination of Dr. Jackson by the president surprised even his own advisers. That suggests that Dr. Jackson has not in fact received the careful review that is normally completed before such an announcement.

One of us worked (just down the hall from Dr. Jackson, actually) on vetting hundreds of senior administration officials. Very presentable and capable individuals — sometimes even those with existing security clearances — are sometimes disqualified by the rigorous personnel investigations that are normally undertaken for cabinet positions. Such cabinet-level vets complement but are more thorough than a typical pre-existing security clearance, and can uncover conflicts, misdeeds or other disqualifying information.

We are not suggesting that vetting will uncover anything improper, but caution is warranted, since many of Mr. Trump's nominees have had unprecedented conflicts and other issues.

12 - ABC News (Video): [Veterans groups respond cautiously to VA secretary nomination](#)
(29 March, Sarah Kolinovsky, 24.2M uvm; New York, NY)

Despite his active duty status as a Navy rear admiral (lower half) and his medical experience, veterans service organizations are responding cautiously to the nomination of Dr. Ronny Jackson for secretary of Veterans Affairs, with some expressing concern about his lack of managerial experience or what his views are on reforming the VA.

Jackson has served as White House Physician in the past three administrations and in January gave President Donald Trump a glowing health review. Recently, Trump nominated Jackson to receive a second star, promoting him to the rank of full rear admiral. Jackson has deployed to Iraq as an emergency medicine physician in charge of resuscitative medicine for a forward-deployed Surgical Shock Trauma Platoon.

Iraq and Afghanistan Veterans of America, an organization serving the post-9/11 generation of veterans, say it looks "forward to learning more about Dr. Ronny Jackson's vision and qualifications." The statement underscores the fact that Jackson lacks significant managerial experience as he is poised to lead the government's second largest agency, which cares for more than nine million veterans and has an annual budget of nearly \$200 billion.

"Nobody really knows who is he. Is he an empty vessel? Does he have strong views on privatization, or reforming the VA?" asked IAVA CEO and Founder Paul Rieckhoff during an appearance on CNN Thursday morning. "So the confirmation hearings are going to be really really important. The Senate, House, time for you guys to step up and grill this guy and find out if he is qualified to not only run the agency but care for our veterans in a time of war."

IAVA welcomed the news that "finally puts an end to weeks of painful speculation that was negatively impacting VA and veterans nationwide," referring to media reports that President Trump had lost confidence in Secretary Shulkin. IAVA pointed out that in a recent survey, only 24% of the organization's members approved of the job Shulkin was doing.

Veterans of Foreign Wars (VFW) echoed IAVA's hesitation about Jackson's experience. "The VFW will be closely monitoring the Senate confirmation process, because what Dr. Jackson's bio does not reflect is any experience working with the VA or with veterans, or managing any organization of size, much less one as multifaceted as the Department of Veterans Affairs," VFW Director of Communications Joe Davis said in a statement.

The conservative group Concerned Veterans for America expressed more optimism about the change, saying in a statement "We are hopeful that this change will end the recent distractions at the VA and put the focus back on advancing policy that will ensure veterans get the health care and other benefits they have earned. The Trump administration has made great progress over the last year reforming and fixing the VA, however, there is still much work to be done."

The American Legion declined to comment directly on Jackson's qualifications. Instead, the group highlighted their intention to work "directly with the President through this transition and going forward, and providing him an increased level of advice and feedback on the issues important to America's veterans."

13 - The Atlantic: [The Doctor Who Suddenly Got Nine Million Patients - For a position that demands high-level policy expertise, President Trump appointed his personal physician, Ronny Jackson.](#) (29 March, James Hamblin, 23.9M uvm; Washington, DC)

Nine million veterans will soon be under the care of the emergency-physician rear admiral Ronny Jackson, pending confirmation of his appointment Wednesday to lead the U.S. Department of Veterans Affairs.

This seemingly mundane appointment—a doctor and naval officer with years of experience as White House physician under both Trump and Obama—is of great consequence. It comes at a time when the VA is in need of a politically savvy expert on health-care administration, budgeting, and resource allocation, as the system is on the brink of major changes that bear on national security. The system has proven to require a leader who can thread multiple bureaucratic needles with his or her eyes closed. Jackson does not clearly fit this bill.

The VA is the second-largest federal department, overseeing 1,243 health-care facilities including 170 hospitals, which tend to be a ghostly network of dim, mid-century structures that bear the scars of serving as constant political battlefields. They tend to have bad food and no marble and bizarre gift shops that I've seen sell knives and cured meats. Yet VA hospitals seem to underscore the waste of the glitz of five-star-hospital-style academic medical centers. The system punches above its weight in the quality and safety of care it delivers compared to most of the private health-care industry.

While it is crucial to have experienced veterans and physicians in the upper echelons of a system like this, the work is mostly about politics and economics. Jackson is not an expert in policy, and he lacks work experience in health-care administration or management. His chief credential is that he is a physician. I'm also a physician, and—ask anyone—I'm wholly unqualified to lead a hospital system, much less to lead the one most crucial to our national security.

Even as a doctor, Jackson's judgment has been dubious at times. The press conference in January where he extolled President Trump's soundness of mind suggested allegiance to the president above the public or the profession: "I've found no reason whatsoever to think that the president has any issues whatsoever with his thought process," Jackson said, after having administered a 10-minute test for dementia in which the president was asked to do basic math, identify zoo animals, and draw a clock. (A useful and good test, the results of which were, I've argued, overstated in the context of widespread physician concern over the president's soundness of mind.)

Professional bearing intact, Jackson also said that the borderline-obese (BMI 29.9), 71-year-old president—who does not exercise and eats McDonald's to excess (Filet-o-Fish, no less) and is known for angry outbursts and drinks around 144 ounces of Diet Coke per day and barely sleeps—is in "very good health, excellent health." He speculated that the president would

remain fit for service until the end of a second term and said he told Trump that “if he had a healthier diet over the last 20 years, he might live to be 200 years old.”

As David Axelrod, former adviser to President Obama and now the director of the University of Chicago Institute of Politics, responded publicly to the appointment: “Dr. Jackson is a good and honorable person, [a] fine doctor and career military, but you do get the sense that this [appointment] has as much to do with his boffo press conference on the president’s physical [exam] as anything else.”

Trump has become known for proximity-based, loyalty-based promotions made with apparent haste. Jackson may simply have been the only doctor in Trump’s field of view. With doctors Oz and Phil being televisually obligated, and Harold Bornstein all the way up in New York ... who else is there?

Though if the move was deliberate to a policy end, it was a savvy move from the perspective of those who would like to see the VA privatized. There has been a creeping movement to privatize elements of the VA system, backed by the Koch brothers, among others. At a policy level, the concept is worthy of consideration and debate. Some experts argue that certain elements being privatized could improve quality and decrease costs.

But that doesn’t seem to be what’s happening. The outgoing VA secretary David Shulkin made this clear on Thursday in an op-ed in The New York Times. He argued that some public-private cooperation had been fruitful: “We have expanded access to health care by reducing wait times, increasing productivity, and working more closely with the private sector.” But he also warned that the push toward complete privatization was not being undertaken in good faith. Shulkin writes:

It seems that these successes within the department have intensified the ambitions of people who want to put VA health care in the hands of the private sector. I believe differences in philosophy deserve robust debate, and solutions should be determined based on the merits of the arguments. The advocates within the administration for privatizing VA health services, however, reject this approach. They saw me as an obstacle to privatization who had to be removed. That is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans.

With Shulkin out of the way, the next secretary of the VA would need to approach the job with strong moral bearing and willingness to resist political expedience for the sake of improving the system. Without this force, special interests could sway the system toward privatization at a cost to taxpayers and veterans.

[Back to Top](#)

14 - The Hill: [White House: Trump has 'full confidence' in presidential physician to lead VA](#) (29 March, Max Greenwood, 11.9M uvm; Washington, DC)

President Trump has “full confidence” in White House physician Ronny Jackson’s ability to head the Veterans Affairs (VA) Department, a spokeswoman for the White House said Thursday, despite reported concerns from some aides.

"As I said earlier, the president has full confidence in Adm. Jackson," White House deputy press secretary Lindsay Walters told reporters.

"The president did have some early individuals that he was looking at but continuously went back to Dr. Jackson to fulfill this role as VA secretary and ultimately decided that his health care experience, his distinguished career in the medical profession, was something that would be beneficial at the VA," she continued.

"At the end of the day, as I said earlier, the status quo was not working. We need somebody who understands the health care system," she said.

Trump continued a spate of shake-ups in his Cabinet on Wednesday by dismissing VA Secretary David Shulkin and tapping Jackson, a rear admiral in the Navy and the current White House physician, for the role.

The New York Times reported Wednesday that some White House aides had privately expressed concern about the decision to nominate Jackson for the VA's top job, because of his lack of experience managing a large organization.

At the same time, some aides acknowledged that Trump's relationship with Jackson carried more weight in making the decision than the physician's prior experience, the Times reported. Jackson gave Trump his first physical in office earlier this year.

Walters told reporters Thursday that Jackson "has bipartisan respect" in Congress, and said his experience in the Navy gives him an insight into "what soldiers need on the battlefield and what they need when they come home as veterans."

She also said the decision to oust Shulkin and nominate Jackson was in no way part of an effort to privatize veterans' health care, as Shulkin had implied in an op-ed he wrote the day after his ouster.

[Back to Top](#)

15 - The Hill: [GOP, vet groups react with caution to Trump VA pick](#) (29 March, Rebecca Kheel, 11.9M uvm; Washington, DC)

Senators and influential veterans groups are withholding judgment on President Trump's pick to lead the Department of Veterans Affairs (VA), a Navy doctor with no experience leading a federal bureaucracy.

Both the Republican chairman and the Democratic ranking member of the Senate Veterans Affairs Committee said only that they look forward to meeting Rear Adm. Ronny Jackson. Several veterans groups expressed some concern about Jackson's qualifications, but did not immediately oppose him, saying that questions need to be answered during the confirmation process.

"We look forward to understanding more about the qualifications of Admiral Ronny L. Jackson, MD to helm the VA during this critical time," Carl Blake, executive director of Paralyzed Veterans of America, said in a statement. "The VA has a broad mission and the secretary must be someone who is eminently qualified to lead the nation's second largest cabinet agency."

VA-18-0457-A-000799

On Wednesday night, Trump announced on Twitter that he'd tapped Jackson to replace David Shulkin, who fell out of the president's good graces after turmoil over the direction of private health care for veterans and a scathing inspector general report accusing him of misusing taxpayer dollars on a trip to Europe.

Shulkin's firing was expected, but Jackson was not among the names circulating as possible replacements.

Statements from lawmakers and veterans groups poured in Wednesday night, heavily praising Shulkin for his service at the department.

When it came to Jackson, though, the statements were generally shorter and more neutral.

"I look forward to meeting Admiral Jackson and learning more about him," Senate Veterans Affairs Chairman Johnny Isakson (R-Ga.) said in a statement.

In a separate statement, committee ranking member Sen. Jon Tester (D-Mont.) likewise said he looks "forward to meeting Admiral Jackson soon and seeing if he is up to the job."

Jackson was first thrust into the public spotlight when he gave Trump a clean bill of health in January during a lengthy and unusual press briefing at the White House.

Jackson told reporters that a cognitive test showed "no reason whatsoever to think the president has any issues whatsoever with his thought processes." He also proclaimed Trump's "overall health is excellent," crediting the president's "good genes" despite a well-known penchant for fast food and lack of exercise.

Jackson has served as a White House physician since 2006 and was promoted by former President Obama in 2013 to become the physician to the president.

Just last week, Trump nominated Jackson for a promotion in rank from rear admiral (lower half) to rear admiral. Jackson is expected to retire from active duty if confirmed.

A Texas native who received his doctorate of medicine from the University of Texas Medical Branch, Jackson started his naval career in 1995 at the Portsmouth Naval Medical Center in Virginia, according to his Navy biography.

In 2005, Jackson deployed as part of the Surgical Shock Trauma Platoon in Taqaddum, Iraq. There, he served as the emergency physician in charge of resuscitative medicine.

His bio lists several awards, including the Defense Superior Service Medal, the Legion of Merit, the Navy/Marine Corps Commendation Medal and the Navy/Marine Corps Achievement Medal.

But it makes no mention of any work on veterans issues.

Still, the White House says Trump has "full confidence" in Jackson, adding he believes the department needs someone who understands health care.

If confirmed, Jackson would take the helm at the government's second largest bureaucracy at a time when the VA is still regaining trust after a 2014 scandal over long and falsified wait times for veterans seeking health care.

In addition to overseeing 1,700 health-care sites serving almost 9 million veterans annually, the doctor would be in charge of benefits delivery, 360,000 employees and a nearly \$200-billion budget.

Jackson would also come in during a raging debate over legislation to expand a program known as Choice that provides private health care to some veterans -- a concern seen as central to Shulkin's undoing.

At issue is how much to expand the program. Veterans groups and Democrats fear the White House wants to essentially privatize veterans health care, which they warn would not be able to address the unique challenges veterans face.

Jackson's position on the issue is unknown, though the White House said Thursday in response to accusations made by Shulkin that "there are no discussions about privatizing" the VA.

Veterans service organizations, which are congressionally chartered and hold substantial sway over veterans issues in Congress, raised questions about Jackson's qualifications.

AMVETS listed several questions for Jackson, including how someone who's never held a command is qualified to lead a massive bureaucracy and what his qualifications are to address issues outside of health care including claims, appeals, benefits and cemetery affairs.

"I am deeply concerned about the nominee," AMVETS Executive Director Joe Chenelly said in a statement. "Veterans' lives depend on this decision, and the Trump administration needs to substantiate that this active-duty Navy officer is qualified to run a \$200 billion bureaucracy, the second largest agency in the government."

Disabled American Veterans (DAV) said they look forward to "learning more about the qualifications and views" of Jackson and expressed concern about a leadership vacuum.

"At a time of critical negotiations over the future of veterans healthcare reform, VA today has no secretary, no under secretary of health or benefits, and the named acting secretary has no background in health care and no apparent experience working in or with the department," DAV Commander Delphine Metcalf-Foster said in a statement, referring to acting Secretary Robert Wilkie, who comes from the Pentagon.

"We certainly expect the next secretary to continue the path set by VA, Congress and veterans organizations in recent years to strengthen the VA healthcare system while ensuring that all enrolled veterans have timely access to quality care, whenever and wherever they need it."

Still, Vietnam Veterans of America (VVA) said Jackson will understand veterans' needs.

"We are pleased that he is a combat veteran with firsthand knowledge of the trauma of war, and as such, will understand what our veterans need," VVA National President John Rowan said in a statement.

VA secretaries typically receive strong bipartisan support in their confirmation. Shulkin was confirmed unanimously, as was his predecessor Bob McDonald. The secretary before that, Eric Shinseki, was confirmed by voice vote.

Nominees only need a simple majority to be confirmed. But Republicans only have a two-seat advantage over Democrats in the Senate, and one Republican, Sen. John McCain (Ariz.), has not voted in months as he receives cancer treatment in his home state.

Republicans on the Senate Veterans Affairs Committee appeared inclined to support Jackson.

"I look forward to working with Dr. Ronny Jackson on modernizing and reforming the VA, fixing the VA Choice Program, and implementing the major reforms that Congress has passed over the last year," Sen. Thom Tillis (R-N.C.) said in a statement.

Sen. Jerry Moran (R-Kan.), who in January accused Shulkin of "double-talk" in negotiating on Choice, said the VA secretary needs to focus on changing the department's bureaucracy.

"Rear Admiral Jackson has a career in service and I look forward to discussing his plans for the VA to make certain veterans receive access to care they deserve," Moran said in a statement.

Committee Democrats, meanwhile, promised close scrutiny of Jackson's qualifications and his position on privatization.

"I will seriously scrutinize the president's nominee, Ronny Jackson, because our nation's veterans deserve the best," Sen. Richard Blumenthal (D-Conn.) said in a statement.

Sen. Bernie Sanders (I-Vt.), who caucuses with Democrats, was more blunt.

"The Senate Committee on Veterans Affairs should not approve any nominee for secretary who supports the privatization of the VA," he said in a statement.

16 - Military.com: [Others Considered for VA Job Before Trump Picked His Personal Doctor](#) (29 March, Richard Sisk, 9M uvm; San Francisco, CA)

Rear Adm. Ronny L. Jackson, the personal physician to President Donald Trump, was not his first choice to replace fired VA Secretary Dr. David Shulkin, the White House said Thursday.

"The president did have some early individuals that he was looking at but continuously went back to Dr. Jackson to fulfill this role as VA secretary," White House deputy press secretary Lindsay Walters told reporters.

She said Trump "ultimately decided that his [Jackson's] health care experience, his distinguished career in the medical profession, was something that would be beneficial at the VA."

Walters added that Trump "has full confidence in Admiral Jackson" to fulfill the demanding job at the Department of Veterans Affairs despite his lack of experience in running large organizations.

Walters did not name the others who were considered to head the VA, but they reportedly included Toby Cosgrove, former head of the \$8 billion Cleveland Clinic health care system, and Pete Hegseth, an Army National Guard veteran of Iraq, former head of the advocacy group Concerned Veterans of America and co-host of the weekend "Fox & Friends" program.

Cosgrove, a Vietnam veteran, was among those invited in 2016 to Trump's Mar-a-Lago estate in Florida to be interviewed for the VA post before Trump settled on Shulkin, a holdover from the Obama administration.

Others who were under consideration as VA secretary included former Rep. Jeff Miller, R-Florida, who had been chairman of the House Veterans Affairs Committee; retired Army Lt. Gen. Keith Kellogg; Michael Kussman, a former VA undersecretary of health; and Leo Mackay Jr., a former VA deputy secretary who is now senior vice president at Lockheed Martin Corp., The Associated Press reported.

The surprise announcement of his nomination Wednesday afternoon, his status as a relative unknown on Capitol Hill, and the ongoing turmoil at the VA indicate Jackson will have little in the way of a honeymoon period if he is confirmed by the Senate.

Shulkin wasn't even out the door when Jackson faced a barrage of conflicting demands from the White House, Congress and the major Veterans Service Organizations (VSOs).

The immediate concern is the upcoming decision by the VA to award a contract that could run up to \$10 billion and is aimed at finally giving the agency electronic health records. There are also the perennial disagreements on what to do about benefits, wait times, suicides, PTSD, corruption, caregivers and the crumbling infrastructure at VA hospitals.

However, at the top of Jackson's to-do list is reaching a final resolution on the extension and expansion of the Veterans Choice Program, which allows vets to opt for private health care.

Proponents, including Trump, see Choice as guaranteeing that vets get the best health care available; opponents, including the VSOs, see overreliance on Choice as threatening the core mission of VA as the primary provider and payer for the care of nine million vets annually.

In leaving, Shulkin sidestepped the scandal over his travel expenses. He portrayed himself as the victim of palace intrigues hatched by White House political appointees advocating the full "privatization" of VA health care.

In an op-ed for The New York Times, Shulkin wrote that the political appointees, at the White House and within the VA, "saw me as an obstacle to privatization who had to be removed."

"That is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans," he said.

In testimony to the House Veterans Affairs Committee earlier this month, Shulkin warned that the Choice program could run out of money as early as June.

Sen. Johnny Isakson, R-Georgia, chairman of the Senate Veterans Affairs Committee, had co-sponsored a bill that would have extended Choice while keeping the decision on whether vets could go to private doctors within the VA, but the bill was not included in the \$1.3 billion omnibus spending package signed by Trump last week.

Isakson has pledged to renew his efforts on Choice when Congress returns after the Easter recess. In a statement Thursday, he also hinted at the conflicts with the White House by heaping praise on Shulkin and pointing to improvements at the VA in the past year.

Shulkin "has made a tremendous impact toward improving the lives of veterans," Isakson said. "He has been instrumental in all that we have accomplished in the last year, and I thank Dr. Shulkin for his dedicated service to our country and our veterans."

As for Jackson's nomination, Isakson said, "I look forward to meeting Admiral Jackson and learning more about him."

If confirmed by the Senate, Jackson, who has little administrative experience and none in running an organization such as the VA, could be expected to rely on the insider knowledge of the No. 2 at the agency, Deputy VA Secretary Thomas Bowman. The VA, the largest healthcare system in the United States, has 370,000 employees and a budget of nearly \$200 billion.

However, Bowman, a retired Marine colonel and military attorney, has already been targeted for removal by Jake Leinenkugel, a former brewery company executive and now a senior White House adviser on veterans issues.

In December, Leinenkugel wrote in an email to Camilo Sandoval, a political appointee at the VA, that they should lobby for the ousters of both Shulkin and Bowman. The email was first reported by The Washington Post and later obtained by Military.com.

Isakson and the VSOs came to the defense of Bowman, a long-time former staffer on the Senate Veterans Affairs Committee.

"Tom Bowman is a veteran and a patriot, a public servant and a good man," Isakson said in a statement. "If this is true, it will be a mistake, and I am deeply disappointed in the president. Veterans will suffer because of this decision if it's true."

The VSOs have partly blamed the moves against Shulkin and Bowman, and the efforts at privatization, on the work of the advocacy group Concerned Veterans for America, which is funded by the conservative Koch brothers organization.

In a statement, CVA's executive director, Dan Caldwell, said that Shulkin "made significant headway in reforming the department, but ultimately became a distraction from the important task of improving health care for our veterans."

Without mentioning Choice, Caldwell said, "Congress needs to continue work with the president to pass legislation that will give veterans more health care options and better access to care through the VA."

In a statement, Sen. John McCain, R-Arizona, chairman of the Senate Armed Services Committee, said of Choice that "much more work remains to improve the Veterans Choice Program and ensure our nation's heroes have access to the best possible services."

"Let me be very clear: none of us committed to reform wants to privatize care. We simply believe the VA must put the needs of veterans first, and ensure they receive timely, quality and uncompromised health care, whether that's in the VA or in the community," McCain said.

Sen. Jack Reed, D-Rhode Island, ranking member of the Senate Armed Services Committee, said, "I admire Dr. Jackson's service to the nation, but I don't know if he is the right person to lead the VA."

"One thing is clear -- the Trump administration seems to devolve further into turmoil by the day," Reed said. "I hope the level of dysfunction that has engulfed other parts of the administration does not impact the care that our veterans receive."

[Back to Top](#)

17 - Government Executive: [Lawmakers, Veterans Groups and Former Officials Worry VA Nominee Is Not 'Up to the Job'](#) (29 March, Eric Katz, 870k uvm; Washington, DC)

With David Shulkin now ousted from the Veterans Affairs Department, all eyes are on President Trump's nominated replacement to see where he comes down on the most pressing issue at VA: How large a role should the private sector play in providing health care to veterans?

One problem for observers and stakeholders in the veteran community is Trump's pick, Dr. Ronny Jackson, has very little experience in public policy or veterans issues. Veterans service organizations and lawmakers were effusive in their praise of Shulkin, while expressing disappointment in his firing and noting the new relationships they would have to now forge.

"I don't know if he ever set foot in a VA [facility]," Louis Celli, the national VA director at American Legion, a group that represents more than 2 million veterans, said of Jackson. By the time the secretary designate is fully able to understand all the issues facing the department, Celli said, "this administration could be over."

As VA secretary, Jackson would be responsible for managing 370,000 employees spread across 3,000 facilities. Administering veterans disability benefits, education subsidies and cemeteries number among the department's dozens of lines of business. Still, its responsibility to provide health care to veterans is by far its biggest operation—the Veterans Health Administration runs the largest hospital network in the country—and is what led Jackson, a physician, to get the job.

Trump "ultimately decided that his health care experience, his distinguished career in the medical profession was something that would be beneficial at the VA," Lindsay Walters, a White House spokeswoman, told reporters Thursday. "At the end of the day . . . the status quo was not working. We need somebody who understands the health care system."

While Jackson has served as White House physician since 2006 and the president's personal doctor since 2013, his background is atypical for VA secretaries. While Shulkin was the first to helm the department without himself being a veteran, he had served at VA as an undersecretary as head of the Veterans Health Administration. He had previously led multiple private medical centers and health systems. His predecessor was Bob McDonald, who came from the private sector but whose nomination was met with plaudits because of his experience leading the Fortune 50 company Procter & Gamble. McDonald replaced Eric Shinseki, who had previously served as chief of staff of the Army.

In a New York Times op-ed published after his firing, Shulkin warned that his political enemies from within the Trump administration pushed him out not due to the scandals surrounding him but because of ideological differences about the future of VA.

"I have been falsely accused of things by people who wanted me out of the way," Shulkin said. "But despite these politically based attacks on me and my family's character, I am proud of my record and know that I acted with the utmost integrity. Unfortunately, none of that mattered."

Shulkin added that the environment surrounding him became "so toxic, chaotic, disrespectful and subversive" that he could no longer accomplish his job. He said his opponents within the department, whom he repeatedly vowed to oust, were fighting to privatize VA health care and saw him as a barrier in achieving that goal.

"They saw me as an obstacle to privatization who had to be removed," Shulkin said. "That is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans."

Opponents of privatization, including Shulkin, nearly all veterans service organizations and key lawmakers on both sides of the aisle on Capitol Hill, could breathe at least a momentary sigh of relief when Trump announced Jackson as his nominee to be the next VA secretary. Jackson is in many ways an unknown, but is not associated with any previous push to minimize the government's role in providing veterans health care as were some of the other candidates Trump was reportedly considering.

"I am deeply concerned about the nominee," said Joe Chenelly, executive director of AMVETS, another congressionally chartered veterans service organization. "Veterans' lives depend on this decision, and the Trump administration needs to substantiate that this active-duty Navy officer is qualified to run a \$200 billion bureaucracy, the second largest agency in the government."

AMVETS added it was pleased Jackson had a medical background, but noted VA is "more than healthcare."

"What qualifications does the president's nominee have to address claims, appeals, benefits and cemetery affairs?" the group asked.

Celli noted that even McDonald, a veteran who came to the department with vast managerial experience, took a while to fully "wrap his arms around the entire mission of what VA was" and was therefore only able to make a significant impact in two or three areas of VA's operation.

President Obama was wise to recognize he needed a veteran who had also run a large company with a big budget and many employees, much like VA itself, McDonald told Government Executive.

"That intersection is very small and I think [Obama] recognized that," McDonald said. "While Adm. Ronny must be a great doctor, the question the Senate will need to address is does he have sufficient management experience."

Even Shulkin seemed to suggest the job requires a large learning curve.

"No one is naturally prepared to take on a task like this," Shulkin told NPR on Thursday. Jackson would not be met with political leadership at the department to help guide him through

the ins and outs of its medical network, as Trump has yet to nominate an undersecretary to head VHA.

"Given the state of the VA today, the most important thing is the leadership experience of a very large organization," McDonald said. Having medical experience would only be the third top priority, McDonald said, after being a veteran.

Several groups expressed concern over the fate of reforms VA had already initiated under Shulkin. The now former secretary was in the process of realigning the department's regions, or Veterans Integrated Service Networks, and the larger structure of the department. He had worked with oversight committees in Congress on a proposal to consolidate existing programs giving veterans access to private sector care on the government's dime and easing veterans access to such programs, while maintaining a tight balance with those who tend to have a knee-jerk reaction against any reform that could be construed as VA privatization. The existing Veterans Choice Program is expected to run out of funding this summer. He had won approval for his plan to shutter underutilized facilities and had already help shepherd measures to expedite firing of problematic employees and reform the disability appeals process through Congress and into law.

"I have enjoyed getting to know Secretary Shulkin, and I'm glad to call David a friend," said Rep. Phil Roe, R-Tenn., who chairs the House Veterans Affairs Committee. "I think he's done a fantastic job and I hate to see him go."

Roe pledged to work with Jackson and build "a strong relationship with him also." Roe's counterparts in the Senate made clear they would not automatically grant their approval, as will be necessary for his confirmation.

"I look forward to meeting Admiral Jackson and learning more about him," Sen. Johnny Isakson, chairman of the Senate VA committee, said after praising Shulkin for the "tremendous impact" he made during his tenure.

Sen. Jon Tester, D-Mont., was even more non-committal.

"Moving forward, the VA needs a strong leader at the top who will listen to veterans, strengthen the VA and work with Congress to implement bipartisan reform," Tester said. "I look forward to meeting Rear Adm. Jackson soon and seeing if he is up to the job."

McDonald suggested Trump's selection could mark a departure from the path on which he and Shulkin put the department, which the former secretary said he formulated after hundreds of visits around the country to listen to VA beneficiaries.

"Veterans don't want the privatization of the VA," McDonald. "I hope President Trump is listening to veterans."

The American Legion's Celli speculated that Trump's choice of Jackson was a matter of happenstance rather than qualification. His selection was not as "draconian" as he and many had feared, Celli said, but it still appeared as if Jackson got the nod because he was "someone with military experience who [Trump] just happened to know." Celli was at least pleased that Jackson's demeanor and medical abilities were "above reproach," but said he would still have to prove himself beyond that to earn the support of the veteran community.

“Great, he’s a nice guy,” Celli said. “There’s a lot of nice guys out there.”

[Back to Top](#)

18 - PBS: [Who is Ronny Jackson, Trump’s pick to lead the Department of Veterans Affairs?](#) (30 March, Gretchen Frazee, 22M uvm; Arlington, VA)

Rear Admiral Ronny Jackson has garnered almost universal praise for his skills as a military physician and his character. But his appointment to lead the Department of Veterans Affairs is proving divisive as critics point to his lack of experience managing a large organization.

On Wednesday, President Donald Trump named Jackson, the top White House physician, to replace David Shulkin, a holdover from the Obama administration, as secretary of Veterans Affairs.

The nomination immediately sparked criticism over Jackson’s limited management experience. The Department of Veterans Affairs has a \$182 billion budget and hundreds of medical facilities and offices across the country. The agency has 385,233 employees, a spokesperson for the agency said.

“I personally know and greatly respect Ronny Jackson ... as a terrific doctor and Navy officer,” former CIA Director John Brennan tweeted Thursday. “However, he has neither the experience nor the credentials to run the very large and complex VA. This is a terribly misguided nomination that will hurt both a good man and our veterans.”

Others defended Jackson, citing his decades-long career as a military physician and ability to perform in high stress situations and coordinate large operations.

“Ronny Jackson will be just damn fine in management skills,” said Dan Bongino, a former Secret Service special agent who worked with Jackson on the presidential protective division from 2006 to 2011. Bongino has since run for political office as a Republican and been a conservative commentator on numerous television programs.

Jackson has served under three presidents, which gives him bipartisan appeal. Both Democrats and Republicans say he is a superb doctor.

Trained in emergency medicine in the U.S. Navy, Jackson was appointed as a White House physician in 2006 under President George W. Bush. In 2013, President Barack Obama appointed him as physician to the president. He now serves in that same role under Trump.

Jackson is not well known outside of Washington, but he attracted national attention recently after conducting Trump’s medical exam, when he gave the president a glowing assessment at a press conference.

“The president’s overall health is excellent,” Jackson said at the time. “His cardiac performance during his physical exam was very good. He continues to enjoy the significant long-term cardiac and overall health benefits that come from a lifetime of abstinence from tobacco and alcohol.”

Jackson put the president at 6-foot-3 and 239 pounds, sparking widespread memes and photo comparisons to famous athletes online that poked fun at whether those numbers were accurate.

Yet those who have worked with Jackson say Americans should look past that episode and focus on his years of experience coordinating advance medical teams for presidential visits abroad.

As part of his job at the White House, Jackson helped create a contingency plan in case of a medical emergency so the president could receive the best treatment as quickly as possible.

The job has required coordinating with the Secret Service, foreign government leaders, and hundreds of medical staff to determine the closest medical facilities in locations where the president traveled, what their treatment specialties were, and whether they had access to things like a helicopter landing pad, for example.

“Quite literally the president’s life is in his hands,” Bongino said.

It is a high-stress environment, according to Jonathan Wackrow, another Secret Service agent who served under the Obama administration from 2009 to 2014. The president’s physician must handle the presidential family’s medical needs, the everyday stresses of the White House, political influences and constant travel.

“What Dr. Jackson has always done is put his head down and move forward,” Wackrow said. “He is going to take on this challenge like he has everything else in his career.”

Jackson graduated from Texas A&M University in 1991 with a bachelor’s degree in marine biology. He attended medical school at the University of Texas Medical Branch.

After graduating he became an instructor at the Naval Diving and Salvage Training Center in Panama City, Florida. He went on to serve as a diving medical officer for an explosive ordnance disposal unit in Sigonella, Italy, and a diving safety officer at the Naval Safety Center in Norfolk, Virginia.

He later served as an emergency medicine physician in Iraq before joining the White House.

If he is confirmed by the Senate, Jackson would be the first Veterans Affairs secretary to have served in either the Iraq or Afghanistan wars — an experience that will likely resonate with the more than 2.7 million soldiers who have been deployed to the countries since 2001.

“It means he will relate with the people who he is serving,” said Melissa Bryant, the chief policy officer for the advocacy group Iraq and Afghanistan Veterans of America. “But it doesn’t necessarily translate into managing the bureaucracy.”

Even those who support Shulkin’s resignation said Jackson will have a steep learning curve.

“The VA is a very complicated and complex medical system. There is a lot that anybody will need to learn about it,” said Dan Caldwell, the policy director for Concerned Veterans for America, an advocacy group funded by the conservative billionaire Koch brothers.

There are also questions about whether Jackson would be required to retire from the military or be granted a waiver from Congress because active members of the military are generally barred from holding civilian office.

And for all his military and experience, Johnson is still a largely unknown quantity in the larger veterans community.

At the fore of many veterans group's minds is whether Jackson might privatize more agency services. In a New York Times op-ed after he was fired by Trump, Shulkin warned that the department has "become entangled in a brutal power struggle," with political appointees seeking to "privatize veteran health care," a point he echoed in an interview Wednesday with the PBS NewsHour. Shulkin, who has been under fire for an inspector general report that suggested he misused government funds during a trip to Europe, added the chaos surrounding that debate played a role in his ouster.

When he was asked by the NewsHour's Judy Woodruff whether Jackson might push for more privatization, Shulkin said he had not discussed the issue with his successor.

"But I certainly hope he's going to continue the work that I've been doing to move the department to transform it in a better way," Shulkin said of Jackson. "I will certainly do everything I can to help Dr. Jackson succeed in that role," he added.

Shulkin is one of several top administration officials dismissed by Trump in recent weeks. The president has also recently ousted Rex Tillerson as secretary of state, and nominated CIA Director Mike Pompeo as his replacement. He also picked John Bolton, a former U.S. ambassador to the United Nations, to replace National Security Adviser H.R. McMaster. Bolton, unlike Shulkin and Pompeo, do not require Senate confirmation.

Veterans advocates said they would follow Jackson's confirmation process closely. If he does get the Senate's stamp of approval, Caldwell argued, Jackson would have one major advantage: he has the trust of President Trump, at least for now.

19 - NPR (Morning Edition, Audio): [Trump Pick For VA Secretary May Get Additional Scrutiny](#) (30 March, 22M uvm; Washington, DC)

Noel King talks to Democratic Sen. Richard Blumenthal about President Trump's decision to fire VA Secretary David Shulkin, and the confirmation process of the president's pick to replace him.

Transcript:

NOEL KING, HOST:

President Trump has nominated White House physician Ronny Jackson to replace David Shulkin as the secretary of Veterans Affairs. But Doctor Jackson will still need to be confirmed by the Senate. One man who will help decide whether Jackson gets the job is Connecticut Democrat Richard Blumenthal. He's on the Senate committee for veterans affairs (ph), and he was also a reservist in the Marines in the 1970s. Good morning, Senator.

RICHARD BLUMENTHAL: Good morning to you. Thank you for having me.

KING: We're glad to have you. Before we move on to Ronny Jackson, I want to quickly get your take on the firing of Dr. Shulkin. What's your understanding of why he was let go?

BLUMENTHAL: I take the president at his word - that he was dissatisfied with his performance. But he contributed a lot to the VA at very difficult times. And I think that Dr. Jackson is going to face a buzz saw of skepticism and scrutiny about his management expertise and ability to face exactly the challenges that Dr. Shulkin eventually found unsurmountable (ph).

KING: We'll talk about that buzz saw in a second. But we did talk to Dr. Shulkin on MORNING EDITION yesterday, and he suggested that one issue behind his being let go may have been his views on privatization at the VA. Let me have you listen to him for a sec.

(SOUNDBITE OF ARCHIVED BROADCAST)

DAVID SHULKIN: It's essential for national security and for the country that we honor our commitment by having a strong VA. I was not against reforming VA, but I was against privatization. Do you think his use played a role in his dismissal?

BLUMENTHAL: There is no question that a segment and maybe a dominant part of the Trump administration is looking to privatize the VA health care system. Dr. Shulkin resisted it and rightly so. I have no question that his opposition to privatization played a role in his dismissal. And it will play a role in the confirmation hearings that Dr. Jackson face because he's going to have to state unequivocally and clearly that he, too, opposes privatization for his nomination to be confirmed in my view.

KING: Will you ask him during the confirmation hearing if he does?

BLUMENTHAL: I will not only ask him to state his views, I will eventually demand, respectfully, but still very directly that he commit that he will sustain and, in fact, improve the current VA health care system rather than abandoning it, in effect, to a privatized system that relies on private providers rather than the VA facilities. There is a role for private providers when the wait are too long or the length of time and distance are too large. But the VA health care facility serves, very well, many veterans needs. And it should be improved to be a first-rate, world-class system rather than gradually reduced and abandoned.

KING: Dr. Jackson is a career military doctor. He also served as a personal doctor to President Obama. But the VA is a very big bureaucracy. Do you have specific concerns about his ability to lead such a large organization?

BLUMENTHAL: You know, the VA is kind of like the Mount Everest of public management challenges. It is the second largest agency in the government. It's a sprawling bureaucracy of 360,000 people with a budget of 186 billion. And it will present a challenge. And I have very strong questions about Dr. Jackson's expertise and experience to lead that kind of very, very challenging management bureaucracy.

KING: Questions that you will get to put to him. Senator Richard Blumenthal, Democrat of Connecticut, thank you so much.

BLUMENTHAL: Thank you.

20 - MSNBC (Video): [Reines: 'There's never been a no vote against a VA nominee, this might be the time to change that record'](#) (30 March, 11.8M uvm; New York, NY)

In yet another White House personnel shakeup, President Trump ousts Secretary of Veterans Affairs David Shulkin and appoints his personal doctor Ronny Jackson. Philippe Reines, former adviser to then-Secretary of State Hillary Clinton, and Shermichael Singleton, former Deputy Chief of Staff for the Department of Housing and Urban Development, discuss with Kristen Welker whether the president's new appointee is qualified for the position. The panel also joins Ari Melber, host of MSNBC's The Beat, to weigh in on the breaking news of a federal judge denying Stormy Daniels' motion to depose Trump.

[Back to Top](#)

21 - The Hill: [Trump VA pick hesitated to take job: report](#) (30 March, Max Greenwood, 11.8M uvm; Washington, DC)

White House physician Ronny Jackson initially hesitated at the suggestion that he be nominated to lead the Department of Veterans Affairs, The Washington Post reported Thursday.

Jackson was reportedly shocked when Trump tapped him for the top job at the nation's second largest government agency, the Post reported, citing senior White House officials.

The sources said that when aides initially gauged Jackson's interest, he hesitated. But Trump continued to push for the nomination, insisting that the White House physician was his top choice.

One senior White House official described the interview process to the Post as very informal and without the extensive vetting typical for a Cabinet appointment.

The choice of Jackson has prompted concern among some White House aides, who have privately expressed unease about Jackson's lack of experience managing a large organization.

The New York Times reported Wednesday that some aides acknowledged that Trump's personal relationship with Jackson carried more weight in the decision to nominate him to the VA job than the doctor's professional experience.

Jackson performed Trump's first physical exam since taking office in January, and assured reporters of the president's good health in an hourlong press briefing shortly after that.

The White House has insisted that Trump has full confidence in Jackson's ability to lead the VA, and has pointed to his experience in the Navy as a valuable asset.

[Back to Top](#)

22 - New York Daily News: [A novice in the VA OR: Dr. Ronny Jackson is a very puzzling choice to lead a Veterans Affairs turnaround](#) (31 March, 26.1M uvm; New York, NY)

The 20 million-plus veterans of the U.S. Armed Forces served this country with the eminently deserved expectation that their country would serve them.

Now even as the heart of that trust, the VA health care system, recovers from deadly delays in getting patients care, and after summarily dispatching his first head of the U.S. Department of Veterans Affairs, David Shulkin, President Trump inflicts risky experimental treatment, nominating as the new chief a doctor who has never come close to the operating room of managing a large organization — never mind one with nearly 378,800 employees.

The distinguished career of Rear Admiral Ronny Jackson, a medical doctor, has put him everywhere from the Iraq battlefield to the deep sea, demonstrating impressive courage and resourcefulness, starting from humble roots in Texas.

In recent years he has served as the White House physician, in which capacity he pronounced Donald J. Trump to be in excellent health. His team of 58 or so medical pros treats a few thousand executive employees, including cabinet members and senior staff.

No doubt Trump is fond of Jackson, and Jackson in no position to decline the demand of his commander-in-chief. So it must fall to the Senate to make full use of its confirmation powers to press Jackson on the hows, whys and wherefores of delivering complex services across more than 1,200 facilities.

This, after the VA's inspector general laid at Shulkin's feet alarming failures that ranged from inventory mismanagement to costly accounting laxity to misapplication of anesthesia. And Shulkin was an experienced hospital administrator who once ran New York City's own Beth Israel.

If Jackson cannot prove himself poised to do any better, he should not get the job.

Congress must also stay alert to forces eager to meddle with VA's core mission and services by putting vets' health care in the hands of for-profit businesses, a possibility Shulkin warned of after his firing in an extraordinary New York Times Op-Ed.

"I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits," he wrote, "even if it undermines care for veterans."

To the extent private players can deliver better services for less money, go for it. Indeed, greater freedom to visit private physicians was a breakthrough in solving the VA's patient-care crisis.

But Shulkin's dark prognosis casts doubt that improving the VA's own services is part of the plan. A Department of Veterans Affairs that fails to put veterans first, middle and last will be unworthy of the name.

[Back to Top](#)

23 - NPR (All Things Considered, Audio): [Veteran Congressman On Trump's New VA Secretary Nominee](#) (31 March, 22M uvm; Washington, DC)

President Trump has picked Rear Adm. Ronny Jackson to be secretary of Veterans Affairs. Veteran and Rep. Mike Coffman (R-Colo.) tells NPR's Michel Martin why he supports the new leadership.

MICHEL MARTIN, HOST:

We're going to start the program today with the recent shakeup at the Department of Veterans Affairs. President Trump nominated Rear Admiral Ronny Jackson, the top White House physician, to replace Dr. David Shulkin as secretary of the Department of Veterans Affairs. It's a huge and complex job overseeing medical facilities around the country, hundreds of thousands of employees, not to mention programs that distribute hundreds of millions of dollars in benefits to veterans and beneficiaries. Jackson will need to be confirmed by the Senate before he officially steps into the job.

Needless to say, no one veteran can speak for all veterans, but we thought we'd like to hear from one of the military veterans serving in Congress, so we called Republican Congressman Mike Coffman. He represents Colorado's 6th District. He serves on the House Armed Services Committee, and he's with us now from Aurora. Congressman, thanks so much for joining us.

MIKE COFFMAN: Thanks for having me.

MARTIN: You served in both the Army and the Marine Corps. So if I may, thank you for that. So I understand that you have expressed the frustration that the incumbent of that position, whoever it is, needs to clean house. The question is, does Dr. Jackson have the kind of experience leading a large, complex organization to not just clean house but then to fix the house? Do you think he has that experience?

COFFMAN: Well, no matter how good he is, no matter what experiences he has, if he's not going clean the house, the VA will not change. It did not change under Secretary Shulkin. It did not change under Secretary McDonald. It did not change under Secretary Shinseki before then because none of them took the actions to clean house at the top. And I think that he clearly needs a strong deputy secretary who has a lot of administrative skills in terms of managing an organization that is over half the size of the United States Army.

MARTIN: Some of the veterans organizations, and frankly, some members of Congress, suspect that the real agenda here is to move faster toward privatization. Do you think that that's true?

COFFMAN: No. I know Secretary Shulkin had raised that issue. But, no, I think it's going to be the preservation of the Choice Act, which essentially states if a veteran lives a certain distance away from a VA facility or if a veteran can't get an appointment wait time within a reasonable period of time that that veteran have access to community providers that augment the capacity of the VA health care system. That program is temporary. Now we want to reauthorize it and make it permanent, make it work. It's not working very well. But that's not privatization. I think that that's just a red herring.

MARTIN: I'm wondering if you have any sense of what the Senate's posture is toward this nomination. Do you have any sense of - what are you hearing?

COFFMAN: I think he needs - in order to be confirmed, I believe he's going to have to dispel this notion of privatization. He certainly can be supportive of augmenting the Department of Veterans Affairs with community providers under the Choice program. But if he does do what Secretary Shulkin says he will do, which I don't believe he will do, he will not be confirmed.

MARTIN: Before we let you go, Congressman, it's an election year. There's a Democrat running against you, Jason Crow, who is also a veteran. A number of veterans are, you know, running this year. I wonder if you feel that that kind of interest in running for office among veterans might be part of the thing that creates a change here?

COFFMAN: Well, I think that it's good that we have veterans running and serving in Congress, either it's on the veterans committee or on the Armed Services Committee. I think there are a deficit of veterans serving on those committees that are entrusted to make very key policy decisions. And I think that that's the individual to understand those issues is another veteran.

MARTIN: That's Congressman Mike Coffman, Republican of Colorado, who represents the 6th Congressional District in Colorado. He was kind enough to join us from Aurora. Congressman, thanks so much for speaking with us today.

COFFMAN: Oh, thanks so much for having me.

[Back to Top](#)

24 - The Washington Post (Video): [Does Trump believe in the value of expertise, or does he disdain it?](#) (31 March, Dan Balz, 43.9M uvm; Washington, DC)

The shake-up at the Department of Veterans Affairs — out with Secretary David Shulkin and potentially in with White House physician Ronny L. Jackson — is being portrayed, correctly, as President Trump surrounding himself with Cabinet officials with whom he feels personally comfortable. A broader question arises, however, over the extent to which this president prizes or disparages expertise.

Defenders of the president can point to his national security team to rebut suggestions that he resists recruiting people with experience and expertise to advise him. Though he has run through more than his share of foreign policy advisers, one reality is that they have mostly brought either military, business or relevant congressional experience to their positions.

That was certainly true of his early team: Defense Secretary Jim Mattis, national security adviser H.R. McMaster, Secretary of State Rex Tillerson, CIA Director Mike Pompeo and Homeland Security Secretary John F. Kelly, who has since become White House chief of staff. McMaster and Tillerson are on their way out, however, with Pompeo nominated for State and John Bolton selected as the president's third national security adviser.

Bolton comes to the job with many critics, who see him as far too hawkish at such a dangerous time internationally. But he is no novice when it comes to the issues, nor is he a stranger to the inner workings of government and the bureaucracy. For Pompeo's replacement, Trump has picked CIA Deputy Director Gina Haspel, a career intelligence official. She could face a challenging confirmation process but nonetheless has strong support from former intelligence community officials for her capabilities and experience.

The domestic side of Trump's Cabinet is another story. Shulkin was a holdover from the Obama administration and early on was praised — even singled out — by Trump for his leadership of an agency long plagued by scandal and inefficiencies. Though he had the background to run the agency, he leaves under a cloud of his own making — the misuse of taxpayer money that drew

a rebuke from the department's inspector general. In his final weeks, he ran a divided agency bunkered in his office, as portrayed vividly by The Washington Post's Lisa Rein. Shulkin is among several Trump Cabinet officers who have faced ethical questions.

Trump concluded a change was needed and looked no farther than inside his own White House, tapping Jackson, even though the White House physician has had no experience running a big operation, let alone something as complicated and dysfunctional as VA. What counted in the decision seemed to be Jackson's compelling performance briefing reporters about the president's physical examination.

Look beyond VA.

Ben Carson was one of the world's foremost pediatric neurosurgeons before he entered politics, and he had a compelling personal story of rising from the inner city of Detroit to the highest ranks of medicine. But he had never served in government, nor did he have specific credentials to oversee the Housing and Urban Development Department. His main qualification seems to have been running against and later endorsing Trump.

Carson has made little substantive mark at HUD, though he has recently been caught up in the embarrassment of having a \$31,000 dining set ordered for his private office. Testifying before Congress, Carson declined to accept full responsibility for the purchase, saying he had left redecorating to his wife and others and "dismissed myself from the issues." Days later, he took responsibility.

At the Education Department, Secretary Betsy DeVos arrived on a mission — to build up charter schools and to push for school choice and school vouchers, while reducing the federal government's role in education — issues she championed as a Republican activist and philanthropist in Michigan. She has no experience in the classroom, nor has she overseen a local school district or served in a state government education position, the backgrounds of recent education secretaries.

That DeVos was a polarizing choice was not a surprise, given the policies she believes in and her political advocacy before coming to Washington. Her lack of preparation about the status of public education and schools was displayed most recently on national television earlier this year when she was interviewed on CBS's "60 Minutes" and repeatedly could not answer questions from correspondent Lesley Stahl.

Others in the administration — Environmental Protection Agency head Scott Pruitt the most prominent — reject the overwhelming scientific consensus about climate change.

Expertise isn't everything. Vietnam showed how even the so-called best and brightest could lead the country astray. It was then-House speaker Sam Rayburn (D-Tex.) — who after hearing then-vice president Lyndon B. Johnson rave about the brains and credentials of the Cabinet assembled by President John F. Kennedy — reportedly said, "Well, Lyndon, they may be every bit as intelligent as you say, but I'd feel a whole lot better if just one of them had run for sheriff, once."

Rayburn's instincts proved tragically correct, showing that brains alone weren't sufficient for those in positions of responsibility and that both an absence of hubris and a connection to everyday Americans were vital to the careful exercise of power. But he also understood, as one

of the strongest House speakers in history, that to be successful, he needed an intimate understanding of the institution and the people he was leading.

In today's political climate, skepticism of expertise is widespread.

During a television interview ahead of the Brexit vote, Michael Gove, a British Conservative Party official, was read a list of domestic and foreign leaders, including then-president Barack Obama, who were uniformly warning that leaving the European Union would have dire consequences for the United Kingdom.

"I think the people in this country have had enough of experts with organizations with acronyms saying that they know what is best and getting it consistently wrong," Gove famously replied.

He was proved right when the British public voted narrowly to leave the E.U., a vote that foreshadowed the even bigger earthquake months later in the 2016 U.S. presidential election, when Trump defeated Hillary Clinton, the embodiment of the country's political and cultural elite.

Trump played on those anti-expertise sentiments as a candidate, appealing to voters to reject the establishment's policies and leadership, and instead to trust themselves and especially him, a political novice. He carried that viewpoint to an extreme when, at the Republican National Convention, he declared, "I alone can fix it."

Trump's presidency continues as an extension of that pronouncement, with the nation's leader increasingly trusting in himself rather than those around him on critical decisions. Some — not all, but some — of his personnel choices underscore the related belief, that expertise or relevant experience is overrated, perhaps even a handicap. It is an experiment, to say the least, and a risky one at that.

[Back to Top](#)

25 - Politico Magazine: [When Our President Put His Doctor in Charge of Everything](#) (31 March, Marius Stan and Vladimir Tismaneanu, 23.9M uvm; Arlington, VA)

No one knows more about leaders' bodies than their personal physicians. Notoriously, Joseph Stalin mistrusted the Kremlin doctors, whom he suspected of trying to poison him and the other Soviet magnates. In February 1953, a month before Stalin passed away, they were arrested and horribly tortured. The ones still left alive were too terrified to treat him as he lay dying in March.

An avowed Stalinist, the late Romanian dictator Nicolae Ceausescu held a different vision for his medical entourage. Not only did he trust his doctors, he also made one of them—professor Theodor Burgele—the country's minister of health. Even by the standards of Romanian dictatorships, this was new. So as U.S. President Donald Trump taps the White House physician to head the Department of Veterans Affairs, a vast and sprawling bureaucracy, he might want to brush up on some recent Romanian history.

It's not that Burgele, the former rector of the respected Bucharest Institute of Medicine and Pharmacy (the country's top medical school), was not a capable person. He was, but his administrative experience was limited to a small-size bureaucracy. He was said to be an excellent urologist, a decent person and a respected professor. As a surgeon, he was highly regarded. But the Ministry of Health was a different business. What Ceausescu wanted to

emphasize with such an appointment was that human life was a state affair and that he, as the supreme leader, could sweep aside any past criteria of administrative competence. According to our sources, Dr. Burghela was quite reluctant to accept the ministerial job, but no one in the Securitate-controlled regime could say NO to Ceausescu without facing unpleasant consequences. So, Burghela said yes and served between 1972 and 1975. During this period, he reluctantly complied with Ceausescu's increasingly erratic orders and eventually, he resigned.

Another telltale case was Dr. Iulian Mincu, Ceausescu's last personal doctor, whom he entrusted with designing the notorious Rational Nourishment Program, a set of draconian policies imposed in the 1980s to justify starvation in the name of medical progress. Ersatz food (adulterated oil made from unrefined soy, fake cheese fluffed up with flour, dregs of meat like chicken claws, fake coffee called "Nechezol," and so on) proclaimed superior to natural products. In the meantime, the regime could export food for hard currency. For instance, one ration card for one person in the city of Gala i, eastern Romania, from the late 1980s contained: Bread—300gr/daily; poultry—1 kilo/month; pork or beef—500gr/month, or meat cans from Czechoslovakia or the Soviet Union as replacements; other meat products (salami, sausages, usually made of soy)—800gr/month; salted cheese—500gr/each trimester; butter—100gr/month; oil—750ml/month; sugar—1 kilo/month; corn flour—1 kilo/month; flour—1 kilo/each semester; eggs—8 to 12/month; and a supplement for hard workers, meaning 300 more grams monthly for diverse products.

In spite of his dismal record—including a deliberate concealment of HIV and AIDS data in the 1980s—Dr. Mincu was resurrected after the Romanian December 1989 revolution as Minister of Health under the reign of Ceausescu's authoritarian successor, Ion Iliescu. During a research interview in 2007 conducted by one of this article's authors (Marius Stan), Mincu stood by his bizarre food ideas and denied any wrongdoing.

One of the lessons from these two Romanian stories is that expertise matters decisively. Another is that proximity to the leader (even if he or she is democratically elected, as Trump was) does not qualify one for running huge bureaucracies in need of urgent overhaul. Managing complex organizations is a skill in its own right. Putting someone unqualified in charge of a massive system such as the Romanian Ministry of Health could lead to amateurism, improvisation and, eventually, mission failure. In our case, it did—twice.

This seems to be the case right now in Washington: A person with impressive credentials in terms of running small medical units, Dr. Ronny Jackson, has suddenly been catapulted to the top of a government agency dealing with veteran affairs—thanks in no small measure, it seems, to his robust defense of Trump's personal health. Yet taking the president's blood pressure or even performing surgery, the Romanian case suggests, has nothing to do with being in charge of major institutions that affect the lives of millions. Ceausescu was certain that personal loyalty to him was the most important quality of any top official. He shared this illusion with most of the last century's dictators. Is this now a litmus test for promotion in the Trump administration? At the end of the Ceausescu regime, the Romanian health system was a complete disaster. Intrahospital infections and scarcity of medical drugs were rampant. Doctors' salaries were miserable and, in order to increase their incomes, many expected to be paid with Kent cigarettes, whiskey, and other coveted goods. As a result of the restrictive reproductive health policies enforced under the 25-year Ceausescu dictatorship, Romania ended the 1980s with the highest recorded maternal mortality of any country in Europe—159 deaths per 100,000 live births in 1989.

One can only hope America's veterans will fare better. For Ceausescu, such promotions meant an assertion of his autocratic ruling style. Like Italy's Benito Mussolini, he saw himself as the successor to Roman emperors. And, as we know, Caligula could appoint anyone to any position, even the Roman Senate. On the other hand, no one is ever better placed than a personal doctor to subvert the tyrant's glorious self-image with a few well-placed details—see Li Zhisui's devastating critique of Mao Zedong as a manipulative egomaniac who boasted about his unorthodox sexual appetites. Dare we quote William Gladstone's suddenly apt admonition? "The disease of an evil conscience is beyond the practice of all the physicians of all the countries in the world."

Marius Stan is research director of the Hannah Arendt Center at the University of Bucharest. Vladimir Tismaneanu is professor of politics at the University of Maryland, College Park. They have a co-authored book coming out from Cambridge University Press in May 2018, Romania Confronts its Communist Past. Democracy, Memory, and Moral Justice.

[Back to Top](#)

26 - CBS News (Face the Nation, Video): [Sen. Bernie Sanders on "Face the Nation," April 1, 2018](#) (1 April, 26M uvm; New York, NY)

President Trump announced the ouster of David Shulkin as secretary of Veterans Affairs this week, nominating longtime White House physician Adm. Ronny Jackson as his replacement. Shulkin had come under withering criticism from lawmakers on Capitol Hill over his travel expenses and a blistering inspector general's report on conditions at the VA.

Sen. Bernie Sanders, an independent from Vermont, is the ranking member of the Senate Budget Committee and former chairman of the Senate Committee on Veterans Affairs. He joined us to discuss the reforming the VA, Jackson's nomination and more.

The following is a transcript of the interview with Sanders that aired Sunday, April 1, 2018, on "Face the Nation."

MARGARET BRENNAN: We turn now to Vermont independent Senator Bernie Sanders who sits on the Senate Veterans Affairs Committee. He joins us from Burlington in his home state this morning. Senator the VA is the largest health care system in this country. Will you support Dr. Ronnie Jackson as the nominee?

SEN. BERNIE SANDERS: Well we know nothing about what Dr. Jackson stands for and what his vision is for the VA. But Margaret this is what I will tell you. What concerns me very much is that right now in Washington we have a family called the Koch brothers, third wealthiest family in America a family that is prepared with a few of their other billionaire friends to spend four hundred million dollars on the coming elections. They are now the most powerful political force in America, stronger than the Democratic National Committee or the Republican National Committee. Their view has been we have got to privatize, privatize and privatize. And what Dr. Shulkin, who Trump just fired this week has told us is that the reason for his firing is that he resisted privatization of the Veterans Administration. Now I work very closely with the major veterans organizations, the American Legion, VFW, DAV Vietnam vets all of the veterans organizations. And what they say is they want to strengthen the VA not dismember it, not privatize it. So we will see what Dr. Jackson has to say.

BRENNAN: Well the White House says at this time they have no intent to privatize the VA. Do you know what the Trump administration policy is?

SANDERS: Yeah of course I do. They have been putting more and more money into the private sector with VA money. I do not believe them on that issue. I think they are listening to the Koch brothers and I think that that is a very, very bad idea. If you listen to veterans all across this country as I do they will tell you sure there are problems with the VA but by and large once they get into the system they are proud of the quality that the - quality care that the VA provides in fact the American Legion has just come out with a publication which vigorously opposes privatization. So I do believe that the Trump administration no matter what they are now saying I think they are working on behalf of the Koch brothers, look these are the guys, Koch brothers who want to privatize everything. You have a Trump administration that in their budget, the Trump budget proposed 500 billion dollar cuts in Medicare. Trillion dollar cuts in Medicaid. You have a Secretary of Education who doesn't believe in public education a head of the EPA.

BRENNAN: Sir on the issue of the VA you did last year vote for a bill that allowed at least more leeway for veterans and their doctors -

SANDERS: Right.

BRENNAN: - to decide whether they wanted to opt in for private care. So it sounds like you are open to some private sector option here.

SANDERS: Well there has always been private sector option if you live in a rural community you don't want 75, 80 year old veterans to travel two hours to get a physical examination. If there is a VA facility in the country that is not treating veterans in a timely manner of course you want to allow veterans to go to the private sector. That is the case now that has always been the case. But what the Koch brothers want and what I feared the Trump administration wants is to rip that wide open and to take many. We got a 200 billion dollar veterans budget.

BRENNAN: Yeah.

SANDERS: There are special corporate interests that want a big chunk of that money. We must not allow that to happen.

BRENNAN: Senator we have to take a quick break and we'll talk to you on the other side of it. We'll be right back.

SANDERS: Thank you.

(COMMERCIAL BREAK)

BRENNAN: Welcome back to "Face the Nation." I'm Margaret Brennan. We're back now with Vermont independent Senator Bernie Sanders who is going to be asking some tough questions of that next nominee to be the VA secretary, Senator. The VA says the average wait time at some facilities can be as long as 100 days. President says he's not happy with the speed of reform there. What is the source of this problem?

SANDERS: Well look the VA is the largest integrated health care system in the country. And as I said previously if you asked the veterans organizations they by and large think the VA is providing good quality care. You know Margaret there is a lot of attention paid to the VA

because it's a government agency. But I've got news for you. People all over this country when they want to get to a doctor or they need hospital care they don't get in the very next day. So I am sure that there are some VA facilities where the waiting time is too long. That has got to be addressed. There are other VA facilities for example I know here in Vermont that if you are dealing with a psychiatric crisis, an emotional crisis you get in that day that's pretty good. So the VA does a lot of good things. It has problems. We have got to improve the VA. But I think we've got to listen to the veterans of this country and not privatize it.

BRENNAN: Senator you also sit on the Environment Committee and you've been a harsh critic of EPA Administrator Scott Pruitt. He's facing a number of questions about ethics and these new reports that he rented a residence here in Washington partly owned by the wife of a top energy lobbyist whose firm did business with the EPA. Do you think your committee should hold hearings on this?

SANDERS: I do. But I think the issue goes well beyond that problem. The issue goes to the fact that the vast majority of people in this country understand that climate change is real. It is already doing devastating problems throughout our nation and throughout the world and yet we have a president and a head of the EPA who do not even recognize the reality of climate change let alone the need to transform our energy system away from fossil fuel to energy efficiency and sustainable energy. So you got a guy who's head of the EPA now who is nothing more than a front man for the fossil fuel industry and that is a very serious problem and the Congress has got to stand up and oppose that line of policy.

BRENNAN: I imagine you oppose the lowering of emission standards that the administration is expected to announce this week.

SANDERS: Well, of course. I mean what we have got to do is understand that we have over the last number of years made success against air pollution and against water pollution. We have made some success in transforming our energy system and the idea to go back and listen to the short term needs of the coal industry or the oil industry makes no sense to me at all. Look, here is the truth. What the scientific community is telling us is that climate change is one of the great environmental crises facing this planet and if we don't get a handle on that we're going to be leaving this planet - a planet to our kids, that is not healthy or habitable. We've got to address that. The Trump administration is moving in exactly the wrong direction.

BRENNAN: Sir you have been critical of the Israeli government's decision to use lethal force against Palestinian demonstrators killing 15 wounding over 700. The Trump administration has stopped short of calling on Israel for restraint. Should they explicitly do so.

SANDERS: Yes they should look, Gaza as I think everybody knows is a humanitarian disaster. The unemployment rate there is beyond comprehension. And there is just enormous unrest. What the function of the United States government should be right now is to sit down with the Israelis sit down with the Palestinians and figure out how, we can rebuild Gaza and also to tell the Israelis that when you've got tens and tens of thousands of people protesting, they cannot overreact and the idea of 15 or so people being killed and hundreds being wounded is - is to me unacceptable.

BRENNAN: We should note the Palestinian Authority already did boycott a meeting at the White House recently to talk about rebuilding Gaza. Senator thank you so much for your time.

We'll be right back with our political panel.

27 - CBS News (Video): [Sen. Bernie Sanders says privatizing the VA a "very, very bad idea"](#) (1 April, Emily Tillett, 26M uvm; New York, NY)

Sen. Bernie Sanders, I-Vermont, says that he thinks it's too early to tell what President Trump's pick to take over leadership at the embattled Department of Veterans Affairs "stands for," but cautioned that privatizing the VA to be a "very, very bad idea."

Former VA Secretary Shulkin became the latest member of Mr. Trump's cabinet to be terminated last week. The president announced that he was replacing Shulkin in a series of tweets, and said he would nominate Adm. Ronny Jackson, who had been serving as the president's doctor, to replace him.

"I work very closely with the major veterans organizations, the American Legion, VFW, DAV, Vietnam vets, all of the veterans organizations. And what they say is they want to strengthen the VA, not dismember it, not privatize it. So we will see what Dr. Jackson has to say," said Sanders.

Transcript: Sen. Bernie Sanders on "Face the Nation," April 1, 2018

Shulkin came under fire for a series of blunders including reported insurgencies inside his own department and improper use of travel expenses. The former secretary said he was ousted over internal and administration disputes over privatizing the VA.

"Privatization leading to the dismantling of the department's extensive health care system is a terrible idea. The department's understanding of service-related health problems, its groundbreaking research and its special ability to work with military veterans cannot be easily replicated in the private sector," Shulkin wrote in an op-ed for the New York Times last week.

Sanders agreed, saying that while the VA has problems that need to be addressed, "We've got to listen to the veterans of this country and not privatize it."

"If you listen to veterans all across this country as I do they will tell you sure there are problems with the VA but by and large once they get into the system they are proud of the quality care that the VA provides."

He added, "There is a lot of attention paid to the VA because it's a government agency. But I've got news for you. People all over this country, when they want to get to a doctor or they need hospital care, they don't get in the very next day. So I am sure that there are some VA facilities where the waiting time is too long. That has got to be addressed. There are other VA facilities -- for example, I know here in Vermont that if you are dealing with a psychiatric crisis, an emotional crisis you, get in that day. That's pretty good."

28 - Politico: [Sanders: 'We know nothing' about Trump's VA pick](#) (1 April, Connor O'Brien, 23.9M uvm; Arlington, VA)

Sen. Bernie Sanders wouldn't commit to supporting President Donald Trump's pick to lead the Department of Veterans Affairs, Rear Adm. Ronny Jackson, on Sunday.

In an interview on CBS' "Face the Nation," the Vermont independent noted that Jackson, Trump's personal physician, is a virtual unknown on veterans issues. He also expressed concerns the Trump administration is pushing to privatize the nearly \$200 billion bureaucracy, citing the conservative agenda of the influential donors Charles and David Koch.

"We know nothing about what Dr. Jackson stands for and what his vision is for the VA," Sanders said.

Trump replaced VA Secretary David Shulkin last week after months of criticism over reports he misused government travel. Shulkin has since said he was forced out for pushing back against efforts to privatize veterans services.

Jackson's nomination came as a surprise. And the pick has raised questions about his qualifications to manage the myriad health services and benefits provided by VA and whether the administration is indeed pressing to privatize more veterans services.

"I do believe that the Trump administration, no matter what they are now saying, I think they are working on behalf of the Koch brothers," Sanders said, adding they "want to privatize everything."

"They have been putting more and more money into the private sector with VA money. I do not believe them on that issue," he added. "I think they are listening to the Koch brothers and I think that that is a very, very bad idea."

While he helped negotiate additional funding for veterans to access private medical care, Sanders, a former Senate Veterans' Affairs chairman, has said beefing up VA's budget and health services should be the priority.

"The VA does a lot of good things. It has problems. We have got to improve the VA," Sanders said. "But I think we've got to listen to the veterans of this country and not privatize it."

[Back to Top](#)

29 - The Hill: [Sanders: I will work against any VA nominee backing privatization](#) (1 April, Mallory Shelbourne, 11.9M uvm; Washington, DC)

Sen. Bernie Sanders (I-Vt.) said Sunday he will work against any Veterans Affairs (VA) nominee who supports privatizing the agency.

"I will do everything I can as a member of the veterans committee not to approve any nominee who is not going to strengthen the VA and who will oppose privatization," Sanders told CNN's "State of the Union."

The comments from Sanders come after Trump announced Rear Adm. Ronny Jackson, who currently serves as the presidential physician, would replace David Shulkin as the Secretary of Veterans Affairs.

Shulkin penned an op-ed in The New York Times opposing the privatization of the agency after his exit and saying there are officials within the administration pushing for it.

Sanders, a member of the Senate Veterans' Affairs Committee, said veterans' organizations argue the agency should be strengthened rather than privatized. He also blamed billionaire brothers Charles and David Koch, arguing their influence over the Trump administration is what's pushing privatization.

"So what you're looking at under the leadership of the Koch brothers, is a massive effort to privatize agencies of the United States government and give them over to private corporations," said Sanders. "That is what the removal of Shulkin is all about."

The Koch brothers did not contribute to Trump's presidential campaign, breaking with years of donations to Republican candidates.

30 - Miami Herald: [Trump's doc shouldn't be a slam dunk to lead Veterans Affairs](#) (1 April, Editorial Board, 8.9M uvm; Miami, FL)

The U.S. Department of Veterans Affairs has enough problems. It doesn't need one in the form of a leader who, very possibly, has no idea what he's doing.

In yet another nomination made under President Trump's "You'll do — for now" philosophy of hiring the "very best people," White House physician Ronny Jackson is up for the vital job of secretary of Veterans Affairs.

If confirmed by the Senate, Jackson will replace David Shulkin, a rare and respected Obama administration holdover who sullied his tenure by not only misusing taxpayers' funds to take a swell trip to London and Copenhagen. His wife's expenses were also paid for by the government. A bit of business, indeed, was done — meetings and such — but then there was the shopping, the castle tours and tickets to the Wimbledon tennis finals, free of charge, in violation of rules that ban gifts to government employees.

Shulkin defended the trip, blamed the media — in this case the Washington Post, which broke the story — and worst of all, lied about it. In addition, he enlisted colleagues to assist in the coverup. According to a VA inspector general's report, Vivieca Wright Simpson, Shulkin's chief of staff, rejiggered documents to make it seem as if Shulkin had received an award in Copenhagen. He didn't. In fact, no such award existed.

Simpson, ahem, has retired. Last week, Shulkin was out, rightly.

In Miami alone, the Veterans Administration's medical facilities do not always measure up, failing the people who have put their lives on the line for this country through military service, but putting those lives in danger again when they need that care back home. In February, an

investigation confirmed discrepancies in HIV test results when some veterans were also tested by an outside lab.

Last fall, an inspection found the public cafeteria in Miami's VA healthcare system egregiously unsanitary — pest droppings, unrefrigerated foods and the like. Though hospitalized vets were not served meals from this cafeteria, the point is that no one should be exposed to the dangers of unclean conditions. And that's just in one region. The VA is the second-largest department in the federal government, with almost 400,000 employees and more than 1,200 health-care facilities.

President Trump nominated Jackson to replace Shulkin. Jackson's credentials as a medical doctor are solid. His ability to run this consistently challenged system? Not so much in evidence. In fact, there is little in his professional background that shows he has what it takes to ensure the VA can truly serve its clients. This is one more nomination that should not be rubber-stamped.

The Senate, if it truly cares for the nation's veterans, will ask Jackson the tough, uncomfortable questions and say No if he's deemed deficient.

[Back to Top](#)

31 - Washington Examiner: [Bernie Sanders: Ronny Jackson will bend to pressure to privatize the VA](#) (1 April, Kyle Feldscher, 4.8M uvm; Washington, DC)

Sen. Bernie Sanders, I-Vt., said he thinks Dr. Ronny Jackson will likely be tasked with privatizing the U.S. Department of Veterans Affairs due to his lack of experience manning a large organization.

Sanders said on CNN's "State of the Union" Jackson, the White House physician and a rear admiral in the U.S. Navy, doesn't know much about heading a large bureaucracy. If he's the one Trump picked to replace David Shulkin, ousted on Wednesday, Sanders said, then he must be in favor of privatization.

"He has no experience in this area but I would strongly suspect that if you get rid of Shulkin, who opposed privatization, and you put in Dr. Jackson, that is what his mission will be," Sanders said.

Sanders, an independent who caucuses with the Democrats, said one only needs to look at the past decisions of the Trump administration to know what the end result will be.

Sanders said the Koch brothers, powerful Republican donors, are going to push for privatization and the administration will likely accede.

"What the Koch brothers believe is not just that we have to privatize the Veterans administration, they want to privatize Medicare, and the Trump administration had a \$500 billion cut in Medicare," he said. "They want to privatize Medicaid. They had a trillion-dollar cut in Medicaid. They're beginning to go after Social Security."

"We have a secretary of education who does not believe in public education. A secretary of the environment, EPA, who does not believe in environmental protection. So, what you're looking at

under the leadership of the Koch brothers is a massive effort to privatize agency of the U.S. government and give them over to private corporations.”

[Back to Top](#)

32 - Newsday: [Senate should be wary of Dept. of Veterans Affairs nominee](#) (1 April, Editorial Board, 3.2M uvm; Melville, NY)

Caring for our nation’s military veterans was one of Donald Trump’s most consistent promises on the presidential campaign trail, and certainly one of his least controversial. Getting veterans the care they need is a nonpartisan priority.

But the increased quality of care Trump promised hasn’t come.

Facilities on Long Island and in many other communities are falling apart. The Department of Veterans Affairs is increasingly being exposed as dangerous and dysfunctional. Last week, as was expected, Trump fired the secretary of veterans affairs, David Shulkin, who could never rise above his ethical violations and his shoddy leadership. His designated replacement is Navy Rear Adm. Ronny Jackson, the White House physician for the past three administrations who garnered praise from Trump for performing well during a news conference about the results of the president’s physical exam.

While Jackson is highly regarded as a physician, his resume does not include a shred of evidence that he can lead the government’s second-largest bureaucracy (it has a \$186 billion budget) and probably its most dysfunctional. This might be the toughest management job in Washington.

Before the Senate confirms Jackson, it must elicit his views on further privatization of medical care, which other Trump appointees are recklessly pushing as a way to dismantle the agency instead of providing improved service. And unless the Senate can ensure that Jackson can overcome his lack of management experience and create a solid plan for building a leadership team that can improve care, it should reject his nomination.

Here on Long Island, the problems are increasingly daunting, and care for our veterans is suffering. Last month, we learned that the Northport VA Medical Center was again forced to stop performing surgeries when a faulty air conditioner forced the hospital to close all five of its operating rooms. The shutdown went on for about a week, and 18 surgeries had to be rescheduled while the \$58,000 repair was performed.

That’s only the latest breakdown at the Northport facility, where surgeries were halted for four months in 2016 when another air-conditioning system failure sent metal fragments flying into the air, threatening to contaminate patients with open wounds. Another cooling system problem a year earlier led to pipe ruptures and a \$12 million repair. And in January, Northport had to close its 42-bed veterans homeless shelter after the heat failed.

A recent report estimated the cost of Northport’s repair and renovation to be \$273 million. Long Island’s 130,000 veterans rely heavily on the facility, which has traditionally maintained a top reputation. Its quality cannot be allowed to decline.

If Jackson is confirmed, Trump, who has a warm personal relationship with his nominee, must make sure their communications remain constant. Jackson will need the president's full support to get the VA running properly and all of its facilities up to par, including Northport.

We owe these veterans. There can be no reneging. — The editorial board

33 - Las Vegas Sun: [Heller's dilemma: Side with Trump or veterans on VA pick](#) (1 April, Editorial Board, 1.5M uvm; Las Vegas, NV)

Assuming Donald Trump follows through in nominating Dr. Ronny Jackson to lead the Department of Veterans Affairs, Sen. Dean Heller will soon face an ugly consequence for becoming a team player for the president.

For Heller, Jackson's confirmation offers a lose-lose proposition. Either he votes against Jackson and runs the risk of getting dinged by Trump before the midterm elections, or he votes for Jackson and alienates veterans groups that have raised concerns about the White House doctor's qualifications for the position.

Granted, Jackson deserves a fair confirmation hearing, and maybe during his testimony he'll be able to convince Americans that he's the perfect person for the job.

But that's an enormous maybe, given Jackson's razor-thin resume for the job.

The biggest organization Jackson has overseen numbers in the several dozens. The VA employs 360,000 people, has a \$186 billion budget and is the second-largest entity in the federal government, ranking only behind the Pentagon.

This is an organization that was once led by the former CEO of Procter & Gamble, a former member of the U.S. House and a former high-ranking official with the Disabled Veterans of America, among others.

Jackson's qualifications appear to be that he served in the Navy and is apparently a fine doctor. Trump reportedly also likes how Jackson looks and thought he did a nice job in handling the January news conference in which he reported the results of Trump's physical examination.

But where Trump saw greatness, others saw a toady whose glowing remarks about Trump seemed like they could have been copied from Kim Jong Un's physician.

Jackson described a man who is noticeably overweight, disdains vigorous exercise and regularly gorges on fast food as being in "excellent" health, and went as far as to say that if Trump had eaten more healthily during the last several years he might "live to be 200." He predicted that Trump would be fine throughout this term and even through a second term. "It's just the way God made him," Jackson said.

This may sound like satire, but for veterans groups it's no joke. It's potentially a life-and-death matter, as advocates have raised concerns that the Trump administration is angling toward privatizing the VA's health services. Privatization, they believe, would erode the quality of care and lead to higher costs.

The outgoing VA secretary, David Shulkin, fueled advocates' concerns in saying the Trump administration saw him as "an obstacle to privatization who had to be removed." The White House responded by saying Shulkin's ouster was not an indication that the administration was moving toward privatization.

But considering that conservatives like the Koch brothers are pushing for the change, veterans advocates are justifiably uneasy.

For Heller, the nomination process comes at an inopportune time politically. Although Trump cleared a path for Heller to the general election by encouraging Danny Tarkanian to seek a House seat instead of opposing Heller, Heller will be heavily targeted by Democrats in the general election and can scarcely risk alienating Trump's base.

Heller has already faced Trump's wrath. After he initially voted not to repeal the Affordable Care Act, Trump "joked" that Heller would come around if he wanted to "remain a senator." Heller did so, and he has been subjugating himself to Trump ever since.

If the Jackson nomination plays out as expected and the doctor proves to be as bad as a nominee as he looks on paper, Nevada's veterans will be watching him closely to see who he cares more about — the nation's 21 million veterans or Trump.

[Back to Top](#)

34 - **Times Union:** [Editorial: VA pick insults veterans](#) (1 April, Editorial Board, 1.5M uvm; Albany, NY)

THE ISSUE:

The president picks his White House doctor to run the second largest federal agency.

THE STAKES:

The health and welfare of millions of veterans rest on what feels more like a casting call.

Donald Trump has long promoted himself as a champion of military veterans, but when he finally had a chance last week as president to demonstrate that they were more than political props for him, he failed miserably.

In the same cavalier way in which he has appointed so many people who have turned out to be disasters in their jobs, Mr. Trump named his White House physician as secretary of veterans affairs. He thus thrust a man with no experience running a big bureaucracy to the helm of the second-largest federal agency. If the Senate goes along with this, Dr. Ronny L. Jackson, a Navy rear admiral, would go from monitoring the president's health to overseeing a department of more than 366,000 employees.

By all accounts, Dr. Jackson is a nice guy. But this is as absurd as taking a pleasant cashier off the register to be CEO of McDonalds, or plucking a friendly delivery boy off his route to run FedEx.

Dr. Jackson's main qualification to head a department bigger than any branch of the military or the Department of Homeland Security seems to be his talking up of the president's health in January, when he credited Mr. Trump with what he assumed must be "incredibly good genes." Mr. Trump could hardly have been more bombastic himself.

All this might be delightfully surprising in a reality TV show sort of way were the stakes not so high. The VA's mission is not one to take lightly. It's responsible for the health care of more than 9 million veterans served by its 145 hospitals, 300 vet centers, and more than 1,200 outpatient sites. It also handles disability and education benefits, home loans, life insurance, pensions and vocational rehabilitation for millions of vets. Choosing a leader for it should not be treated like a casting call.

Dr. Jackson would succeed David J. Shulkin, who was trying to reform a department in need of modernization and marred by scandal over long waiting lists. Dr. Shulkin, however, had a scandal of his own stemming from his overseas travel, giving Mr. Trump a ready excuse to fire him.

There are concerns that this is part of a conservative small-government quest to end the VA as veterans have known it and privatize its work. A lack of competence at the top would no doubt bolster the case for a radical overhaul. That, however, is not something that should be done in haste or on ideological whim any more than the pick for the secretary of veterans affairs should be the last person to check the president's vitals.

Mr. Trump, who never served in the military thanks to five deferments, may see this all as part of the chaos on which he seems to thrive, and which has left his administration with more high-level turnover in 14 months than some presidents have had in entire terms. But the veterans he claims to cherish don't need what passes for excitement in Mr. Trump's life. They've had quite enough, thank you. That's the message the Senate should send back to Mr. Trump if he doesn't rethink this ridiculous appointment.

[Back to Top](#)

35 - Montana Standard: [For pity's sake, don't privatize Veterans Affairs](#) (1 April, Editorial Board, 202k uvm; Butte, MT)

Just when it was starting to look like Montana's veterans could expect a little more stability from the federal agency charged with providing their health care, another major shakeup at the Department of Veterans Affairs has placed the future of their care in doubt.

Of course, the VA has long stood on shaky ground. However, the current push toward privatization, if successful, could completely erode the foundations of this critical agency and leave millions of veterans — and tens of thousands of Montanans — without the support they earned in service to our country.

The VA's experiment with privatization through the Veterans Choice Program provides a good example of the potential risk. The program was created in 2014 in response to audits that found many veterans faced long waiting periods before they could see a physician. Some even died while they were waiting for an appointment, and some VA employees fudged the data to make it appear they had met the official 14-day target.

Congress passed the Veterans Choice bill to fix the problem by creating a new program that would allow veterans who live more than 40 miles away from the nearest VA clinic to see health care providers in their own community. Obviously, this held a lot of appeal for veterans in rural states like Montana. But U.S. Sen. Jon Tester, D-Montana, a ranking member of the Senate Veterans' Affairs Committee, favors scrapping the program and replacing it with a different system.

The bill provided roughly \$2 billion to hire more physicians and nurses, build more facilities and expand services for underserved populations, such as women and those seeking mental health care. Unfortunately, from its inception, Veterans Choice has relied on third-party administrators to manage the program, and their track record has shown a lot of room for improvement. One of the health insurance companies awarded a major contract, Health Net, was severely chastised just last month in a letter from Tester and Sen. Mike Crapo, R-Idaho.

"Our home state providers deserve better than the miserable customer service provided to them by Health Net, who appears to be devoting even less attention to the Choice Program as its expiration nears," wrote the two senators, who also noted providers' complaints that the company has not paid them on time, and when they attempt to collect their payments, Health Net either puts them on hold or ignores them altogether.

In March 2016, Health Net was acquired by an even larger company, the publicly traded Centene Corporation, for a reported \$6.8 billion. Any hopes that the acquisition would lead to improved services were soon dashed when, last year, a whistleblower alerted authorities to Health Net's complete failure to schedule appointments for some veterans in New Hampshire, some of whom had to wait for longer than six months to schedule an appointment despite the fact that they suffered from life-threatening conditions.

That scandal, among others, helped prompt President Donald Trump to sign an executive order providing better protections for whistleblowers within the agency and establishing a more streamlined system of accountability.

Montana is still working through its own whistleblower scandal. A dentist with the Montana Veterans Affairs Health Care System in Billings, Kelly Hale, reported that veterans faced long wait times due to problems with the clinic's management. The report was confirmed through an internal investigation that found problems dating back to mid-2016. After the investigation, the head of dental services, Robert Bourne, resigned but was rehired on a fee basis so he could continue providing dental services.

The Montana VA then put Hale through a misconduct review and tried to terminate his employment. That action is on hold while the Merit System Protection Board weighs whether it was taken in retaliation for Hale's whistleblowing. Meanwhile, Hale remains a paid staff member but is not allowed to see patients, meaning that for many months in 2017, patients were referred to the nearest VA dental clinic — in Sheridan, Wyoming. This past February, the VA finally hired another dentist, but Hale's case is still pending.

Also in February, the Montana VA issued a press release explaining how it is working to overcome an ongoing shortage of primary care providers. In Montana, the system is required to have about 37 full-time-equivalent positions, but only about 34.5 were filled at last count. Further, providers accounting for 5.5 of those positions have announced they are either leaving or reducing their hours.

The VA responded by explaining that it has already scheduled 8.5 to be filled by the end of May, which would bring it above the 37-position threshold. It is actively recruiting to fill vacant positions in Billings and Helena, and will rely on temporary relief from other providers to meet any other needs throughout its network of 15 facilities in Montana.

Last month, the Montana VA learned it will at last be able to move forward with expansion plans at several of these clinics, including the expansion and upgrade of facilities in Missoula and construction of new sites in Butte, Helena and Fort Harrison.

The exact construction costs are not yet known, but it's likely to cost many millions of dollars. The investment is worth every penny — so long as every one of those pennies goes to providing the best possible care to veterans. Money spent on anything else is money wasted.

In fact, recognition of this value — that private profit off the backs of our veterans is wrong — may have been why former Veterans Affairs Secretary David Shulkin was fired last week. President Trump has already announced that he would like to replace Shulkin with White House physician Ronny L. Jackson.

Shulkin said he suspects he was targeted by supporters of privatization. It likely also had something to do with allegations of ethics violations. An internal investigation found that Shulkin accepted tickets to Wimbledon, and that he not only brought his wife with him on a trip to Europe at taxpayer expense, he directed his chief of staff to go back and change emails in an attempt to justify it. Shulkin denies these accusations.

Nevertheless, his apparent abuse of public dollars for private benefit was soundly criticized, even by his most loyal supporters. It's a lesson that ought to resound throughout the agency.

The VA is still struggling to overcome major problems. Whoever eventually replaces Shulkin must have the depth of experience and expertise to tackle these problems, and the wisdom to avoid creating new ones — and that includes the misguided push to privatize the VA.

[Back to Top](#)

36 - Washington Examiner: [Ron Johnson: Trump 'deserves' a VA secretary who agrees with him on policy](#) (1 April, Naomi Lim, 4.8M uvm; Washington, DC)

Sen. Ron Johnson, R-Wi., agreed Sunday President Trump was right to fire former Veterans Affairs Secretary David Shulkin.

"Well, I think the IG report's pretty troubling," Johnson told NBC, referring to VA inspector general Michael Missal's finding that Shulkin improperly used taxpayer dollars for a trip to Europe with his wife in July.

"Presidents do deserve and have advisers that actually agree with them on policies. And apparently, there were some policy disputes," Johnson continued in reference to alleged disagreements between Trump and Shulkin over the direction of the VA, particularly regarding whether aspects of the department be privatized.

But Johnson added he would not have dismissed Shulkin via social media.

"The president does need to understand the effect it has on attracting other people," he said.

Trump announced Shulkin's departure on Twitter Wednesday, adding that Navy Rear Adm. Ronny Jackson, who has served as White House physician for former Presidents George W. Bush, Barack Obama, as well as Trump, would be nominated to replace Shulkin.

[Back to Top](#)

37 - U.S. News & World Report (AP): [Shulkin Says He Has 'Comfort' With Potential Successor at VA](#) (2 April, Hope Yen, 24M uvm; Washington, DC)

Former Veterans Affairs Secretary David Shulkin downplayed concerns about his potential successor's lack of managerial experience Monday, saying the key for improving the VA will be surrounding White House doctor Ronny Jackson with a good team "because no one person can do this alone."

Shulkin and the White House have engaged in a highly public campaign surrounding his departure from the VA last week. Shulkin said he was fired. The White House said he resigned.

On Monday, Shulkin told CNN there was no reason he would resign. He said he had been given a heads-up on his ouster by Chief of Staff John Kelly moments before President Donald Trump tweeted it.

Shulkin said he supports the person President Donald Trump selected to replace him.

"I have comfort because I know Dr. Jackson," Shulkin said. "Dr. Jackson is a very honorable man who wants to do the right thing."

Shulkin's comments represented a different tone from the fractious back-and-forth Sunday when the White House hit back at Shulkin for claiming that he was fired from his job and that he was only informed about it shortly before President Donald Trump tweeted about his replacement.

The Trump administration says he left his job willingly amid a bruising ethics scandal and mounting rebellion within the agency.

On Sunday, chagrined by Shulkin's public statements blaming his ouster on unfair "political forces" in the Trump administration, the White House circulated a "talking points" memo to some veterans groups in a bid to discredit him.

The three-page memo, obtained by The Associated Press, points out seven "lies" that it said Shulkin had spread. They include statements in which he minimizes a VA watchdog report in February that concluded he violated ethics rules by accepting free Wimbledon tennis tickets. The VA inspector general has previously found Shulkin made misleading statements about the trip to investigators and the news media.

In television interviews earlier Sunday, Shulkin said he had not submitted a resignation letter, or planned to, and was only told of Trump's decision to replace him shortly before the Twitter announcement. He said he had spoken to Trump by phone earlier that day about VA improvements, with no mention of his job status, and was scheduled to meet with the president the next morning.

"I came to run the Department of Veterans Affairs because I'm committed to veterans," Shulkin said. "And I would not resign because I'm committed to making sure this job was seen through to the very end."

Last week, Trump named Defense Department official Robert Wilkie to the acting position, bypassing Shulkin's deputy secretary, Tom Bowman. Bowman has come under criticism for being too moderate to push Trump's agenda.

Under federal law, a president has wide authority to temporarily fill a federal agency job if someone "dies, resigns, or is otherwise unable to perform the functions and duties of the office." There is no mention of a president having that authority if the person is fired. Still, it's unclear if courts would seek to draw a legal distinction between a firing and a forced resignation, if that is indeed what happened to Shulkin.

The day after announcing he was replacing Shulkin, Trump told a rally in Richfield, Ohio, that he had been dissatisfied with efforts to improve the VA. Shulkin had enjoyed Trump's support for much of his first year in the administration, but that eroded in February after mounting ethics questions and political infighting at the VA.

Wilkie, now listed on the VA website as acting secretary, took over Shulkin's duties last week.

The back and forth over the circumstances behind Shulkin's departure — and what it could mean for Wilkie's status — comes as the nomination of Jackson is drawing concern among lawmakers and veterans groups. They worry the Navy rear admiral and lifelong physician lacks the experience to manage an enormous agency paralyzed over Trump's push to expand private care.

Trump's new Cabinet nominees also are beginning to pile up in the Senate, likely leading to weeks of confirmation battles and other delays in the run-up to congressional midterm elections in November. That could mean an extended reign for an acting VA secretary.

Shulkin's dismissal comes amid a broader shakeup of top Trump administration officials and accusations of excessive spending by Cabinet officials. Also currently under fire are Environmental Protection Agency Administrator Scott Pruitt, Interior Secretary Ryan Zinke and Housing and Urban Development Secretary Ben Carson.

Shulkin had agreed to reimburse the government more than \$4,000 after the VA's internal watchdog concluded last month that he had improperly accepted Wimbledon tennis tickets and that his then-chief of staff had doctored emails to justify his wife traveling to Europe with him at taxpayer expense. Shulkin also blamed internal drama at the agency on a half-dozen or so rebellious political appointees, insisting he had White House backing to fire them.

Associated Press writer Darlene Superville contributed from Palm Beach, Florida.

[Back to Top](#)

38 - Military Times: [White House doctor could face the most contentious VA confirmation process ever](#) (2 April, Leo Shane III, 2.1M uvm; Springfield, VA)

Ronny Jackson's nomination to become the next Veterans Affairs secretary could become the most contentious confirmation process since the department was founded 30 years ago.

But that's also a fairly low bar.

Since the department was elevated to a Cabinet-level post back in 1988, no senator has ever voted against a VA secretary pick. All of the confirmations have been unanimous or near-unanimous votes (with a handful of lawmakers absent), or procedural votes where no opposition was formally recorded.

That includes former VA Secretary David Shulkin, confirmed by a 100-0 vote in February 2017. His total support from the Senate was frequently touted by President Donald Trump in public appearances, including one just a few weeks before Shulkin was fired by the president over social media on March 28.

In fact, no nominee for a confirmable department post over the last 30 years — totaling more than 150 individuals — has ever received a vote of opposition from the Senate, underscoring the non-partisan nature of VA work.

Rear Adm. Ronny Jackson, the White House physician, is a relative unknown in the veterans community.

By: Leo Shane III

That means even a single vote against Jackson's confirmation could send a message of irreversible political division on the once seemingly untouchable approach to the department issues.

Jackson, who retired from the Navy last week as a rear admiral with 23 years of service, was a surprise nominee for the post. He's an Iraq War veteran who served under three presidents as the top White House medical officer, and is best known for giving Trump a clear bill of health in January.

But little is known about his familiarity with the department, which boasts a budget this fiscal year of more than \$186 billion and a staff of more than 370,000 employees. Senate Democrats have openly questioned the pick, and hinted he may not receive the same support as past nominees.

"I admire Dr. Jackson's service to the nation, but I don't know if he is the right person to lead the VA," Sen. Jack Reed, D-R.I., and ranking member on the Senate Armed Services Committee, said in a statement last week. "The VA is a large and intricate agency that requires steadfast leadership and an understanding of how to run a complex organization."

Sen. Tammy Duckworth, D-Ill., is a combat-wounded Iraq War veteran and a frequent critic of the Trump administration. Like Reed, she promised to "carefully review Dr. Jackson's qualifications to determine whether he has the best interests of our veterans at heart."

But she also accused Trump of wanting “to push VA down the dangerous path of privatization” and warned that “the next VA secretary must be able to protect the department from becoming consumed by partisan politics.”

Former Senate Veterans’ Affairs Committee Chairman Bernie Sanders, I-Vt., similarly said the Senate “should not approve any nominee for secretary who supports the privatization of the VA,” a charge which he has also leveled at Trump. The current top Democrat on the committee, Montana Sen. Jon Tester, said simply that he is “looking forward to meeting Admiral Jackson soon and seeing if he is up to the job.”

Few Republicans in the chamber have offered strong praise for Jackson thus far, though none have offered serious public concerns, either.

No timetable has been set for the confirmation hearings. Senate officials still have not received the formal nominating paperwork from the White House, which will start the background check and confirmation process.

That work typically takes between one and two months. Senate leaders have said they hope to move quickly on the work to ensure a vote on Jackson’s nomination before the summer.

Confirmation votes by the Senate on VA secretary nominees

David Shulkin, 100-0 (Feb. 13, 2017)
Bob McDonald, 97-0 (July 29, 2014)
Eric Shinseki, voice vote (Jan. 20, 2009)
James Peake, voice vote (Dec. 14, 2007)
John Nicholson, voice vote (April 11, 2003)
Anthony Principi, 100-0 (Jan. 23, 2001)
Togo West Jr., voice vote (April 28, 1998)
Jesse Brown, unanimous consent (Jan. 23, 1993)
Edward Derwinski, 94-0 (March 2, 1989)

[Back to Top](#)

39 - The Vindicator: [Trump’s choice to lead VA raises questions on intent](#) (3 April, Editorial Board, 193k uvm; Youngstown, OH)

The physician who gave President Donald J. Trump a squeaky clean bill of health could soon lead the Department of Veterans Affairs, even though he lacks the experience to manage an enormous agency that has long been steeped in controversy.

Trump’s nomination of Rear Admiral Ronny Jackson, the White House physician since President George W. Bush’s administration, has raised eyebrows on Capitol Hill and triggered concerns among veterans service organizations.

There is nothing in Dr. Jackson’s background to suggest he could lead a government agency with a \$200 billion budget and a staff of 370,000 spread across 3,000 facilities.

While providing health care to veterans is the main focus of the VA – the Veterans Health Administration operates the largest hospital network in the U.S. – there are other important services veterans depend on.

Disability benefits, education subsidies and cemeteries are just a few of the numerous programs available to the men and women who served this country.

The VA is second only to the Department of Homeland Security in terms of its budget and its importance.

That is why Trump's nomination of Dr. Jackson is so troubling. It seems that he is being rewarded for saying the president is in "excellent health" and "fit for duty."

Jackson claimed Trump had "incredible genes" that kept him healthy despite his well-documented affinity for fast food and abhorrence of exercise.

"It's called genetics. I don't know," the doctor said at one point. "Some people have just great genes. I told the president that if he had a healthier diet over the last 20 years, he might live to be 200 years old. I just don't know."

He added, "It's just the way God made him."

It is no secret that the billionaire real- estate developer from New York City expects to be showered with high praise from those around him and does not like to be second-guessed.

Secretary fired

Indeed, his nomination of Jackson to be secretary of the Department of Veteran Affairs came in the wake of his firing of David Shulkin, who was cool to the idea of privatizing some of the health-care services.

Shulkin, who is not a veteran but had served at VA as head of the Veterans Health Administration, was popular with veterans service organizations and lawmakers.

In an opinion piece published in the New York Times after his firing, Shulkin sought to set the record straight by saying he had been fired and had not resigned, as the White House claimed.

"I have been falsely accused of things by people who wanted me out of the way," the former secretary of the VA wrote. "But despite these politically based attacks on me and my family's character, I am proud of my record and know that I acted with utmost integrity. Unfortunately, none of that mattered."

As for the campaign by some Trump insiders to privatize the delivery of health care, Shulkin wrote:

"They saw me as an obstacle to privatization who had to be removed. This is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans."

That goes to the heart of the matter and must be the focus of confirmation hearings in Congress.

The website Government Executive Management quoted Joe Chenelly, executive director of AMVETS, as saying, "I am deeply concerned about the nominee. Veterans' lives depend on this decision, and the Trump administration needs to substantiate that this active-duty Navy officer is qualified to run a \$200 billion bureaucracy, the second largest agency in government."

AMVETS also has this question that members of Congress should pursue when they meet with Jackson:

"What qualifications does the president's nominee have to address claims, appeals, benefits and cemetery affairs?"

Throughout the 2016 presidential campaign and since he took office in January 2017, Trump has claimed to be the greatest advocate for the military and veterans this country has ever had.

Yet, the Republican president did not hesitate to get rid of an individual who enjoyed wide support among veterans. Indeed, Shulkin's popularity stems from the fact that he has put in place programs and initiatives that address past problems with the delivery of services, especially health care.

Given the conflicting reports regarding the VA secretary's departure, we believe President Trump should tell the American people if he wants health-care services to be privatized.

40 - Washington Post: [Perspective - I've seen what a mess Veterans Affairs is. Ronny L. Jackson can't fix it. Trump's new pick to lead the cabinet is a fine doctor. That doesn't mean he can handle a massive, dysfunctional bureaucracy.](#) (2 April, Mikki Kendal, 43.9M uvm; Washington, DC)

The mission of the Department of Veterans Affairs was laid down in the wake of the Civil War, in a promise by President Abraham Lincoln to care for the men who fought, as well as their widows and orphans. The scope of that promise has broadened as women have enlisted. It is the only department that focuses exclusively on caring for veterans and their families in times of crisis spawned by injury, illness and death, a mission most Americans would agree is vital, if not sacred.

Yet every administration going back decades has failed to appoint a leader capable of guiding the agency to fulfill its mission. Ronny L. Jackson, President Trump's pick to lead the department after Secretary David Shulkin was fired, will continue that legacy. And veterans will continue to pay for it.

Whether the problem was covering up shoddy health care or questionable hiring practices, there is no question that Shulkin was ill-equipped for the position. His predecessor, Bob McDonald, did not adequately address staffing problems and wait times that were present before and during his tenure, and still remain. During the quality-of-care scandal at Walter Reed Army Medical Center, President George W. Bush appointed three men to the role of Veterans Affairs secretary. Since the position was created in 1989, 16 leaders have been appointed or stepped in as acting secretary, and the department continues to fail veterans.

I'm a veteran and former employee of the department. Although I enjoyed some aspects of my work as a veterans services representative, I'm the first to admit that VA is deeply dysfunctional. The reasons are well documented and myriad: chronic understaffing, limited investment in infrastructure, an ever-changing array of guidelines for who is eligible for benefits, and what those benefits consist of from year to year. It's a complicated system prone to backlogs that can run more than two years deep — in part because of the administrative issues that arise when management and funding don't match need.

Jackson is an experienced physician and a rear admiral with an awareness of the medical concerns of military members and their families. He's certainly qualified to work for a VA facility, and quite possibly qualified to run a medical department, with the support of a good staff.

What he lacks experience in is responding to the concerns of veterans. Hospitals don't run on doctors alone. Doctors don't direct cleaning schedules, seek donors, or do dozens of other things that make their work possible.

Veterans Affairs isn't just hospitals treating injuries. It's compensation and pensions, it's mental health care, rehab, and programs to house homeless veterans. It is a massive department with a staff of almost 378,000 people, a small city of workers that serves about 22 million veterans and their families. In raw numbers, that means every staff member has 58 veterans relying on them to do their jobs. In actual numbers, it means that every veterans services representative can have a caseload in the hundreds. It's a hard job, made worse when the people making decisions about policy have no idea what the population being served needs, or how to provide it. And it's just one aspect of the multistep process required to help veterans build a new life.

Cases are often far more complicated than they appear. A veteran who is chronically unemployed can't simply be referred to a job program. A VSR needs to examine the reasons for unemployment. That might mean compensation for depression or for post-traumatic stress disorder, drawing on VA benefits. On the medical side, that means a referral to therapy, possibly a program for substance abuse if the veteran is self-medicating. If the unemployment has led to homelessness, housing assistance is needed through the HUD VASH, which brings in yet another side of the department. And this would be just one case handled by one representative.

Is it possible to learn? Absolutely. To be a good VSR, you need two months of classes, at eight hours a day. Then you need at least six months of supervised on-the-job training. It is a lot of paperwork and memorization and asking questions about conditions you may have never imagined were possible for one person to face. It's complex work on the best day with all the training and experience. Jackson has no training in so much as building a file. He lacks experience in managing a large staff, directing any federal department, or even directing troops at this scale. He doesn't understand the work or the people who do it, and that's not how effective leadership models are built in any industry.

Jackson's only apparent qualification, besides a medical degree, is being able to stand in front of a lectern and respond to reporters. He has that in common with Ben Carson, another doctor who was appointed to a Cabinet position and who has not generated anything but scandals and subpar policy decisions. In the parade of failed appointees under this administration, Jackson is almost the least objectionable, if you ignore the effect his inexperience will have on a system that is not adequately serve a vulnerable population.

I was a good soldier. I'm a successful writer. But I wasn't especially good at being a VSR, and ultimately I recognized that my talents could be put to better use elsewhere. One can only hope

that after Jackson gets past feeling flattered by the attention, he'll set aside his ego long enough to recognize that he isn't qualified to lead this department at this time. Veterans deserve better.

41 - Fierce Healthcare: [5 things to know about Ronny Jackson, Trump's pick to replace Shulkin at the VA](#) (2 April, Paige Minemyer, 141k uvm; Washington, DC)

President Donald Trump fired David Shulkin as Department of Veterans Affairs secretary last week and tapped White House physician Ronny Jackson as Shulkin's replacement.

Trump praised Jackson as "highly respected" in his Twitter announcement, and White House Press Secretary Sarah Huckabee Sanders echoed the sentiment in a tweet of her own, saying that he and other cabinet nominees should be confirmed "without delay."

However, veterans' groups expressed concern about Jackson's lack of experience in managing government agencies, let alone one the size of the VA. A former VA official told Politico that his "first reaction" to the announcement was "OMG."

"[Jackson] has no experience," the official told the publication. "The VA is the hardest department to manage because it is so political."

Jackson's experience—or lack thereof—will certainly be a point of contention in his confirmation hearings. Here are a few more facts to know about Trump's pick to head the VA:

1. He has served in three presidential administrations.

Jackson first joined the White House medical staff in 2006 during the Bush administration, according to his Navy biography, and has directed the Executive Health Care for the President's Cabinet and Senior Staff. He was named Physician to the President by President Barack Obama in 2008, a role he continued under Trump.

Jackson has also served as physician supervisor for the Camp David presidential retreat.

2. Jackson is still an active duty soldier.

Jackson was serving in Iraq as an emergency physician and specializing in resuscitating troops when he was notified that he would be joining the White House Medical Unit. He began active duty naval service in 1995, according to his biography.

The White House announced on March 23 that it had nominated Jackson for a promotion to rear admiral (upper half), which would make him a two-star admiral, CNN reported.

3. He caught Trump's eye after announcing the results of the president's physical in January.

The president was impressed with Jackson's performance at a January press conference where he revealed the results of Trump's annual physical, CBS News reported. A source told CBS that Trump is also personally fond of Jackson.

At the press conference, Jackson answered reporters' questions about Trump's health for more than an hour, saying that if the president had maintained a healthier diet over the past 20 years, "he might live to be 200 years old."

4. His stance on key VA issues is an unknown.

Where Jackson stands on crucial issues at the agency he could soon command is not publicly known, according to Politico. This extends to privatizing the department's health system. Shulkin said that his opposition to VA privatization is the main reason he was pushed out.

Jackson does have Trump's ear, though. Richard Tubb, M.D., the longest-tenured White House physician and Jackson's mentor, told CBS that White House doctors have been "figuratively Velcro-ed" to Trump since he won the election.

"On Jan. 20, 2017, Dr. Jackson became that Velcro," Tubb said.

5. Shulkin has praised his potential replacement

Following his ouster, Shulkin didn't mince words about what it was like at the VA, writing in a New York Times op-ed last week that "the environment in Washington has turned so toxic, chaotic, disrespectful and subversive" that he struggled to accomplish his goals at the agency.

However, he told ABC News that Jackson, despite his lack of experience, should be able to build a team around him that will allow him to succeed at the VA if he's confirmed. Shulkin told CNN that Jackson is a friend, and that he "will do everything that I can" to help him in the transition.

[Back to Top](#)

42 - Aiken Standard: [Column: Surprise: Trump's newest cabinet nominee has no relevant experience](#) (2 April, Eugene Robinson, 68k uvm; Aiken, SC)

You can't make this stuff up: President Trump has announced he will nominate a medical doctor who has no discernible management experience to run the second-largest agency in the federal government.

Can presidents be sued for malpractice?

The man Trump has named to become secretary of veterans affairs, Dr. Ronny Jackson, happens to be the president's personal physician. More to the point, given Trump's perpetual hunger for sycophancy, is the fact that Jackson showered the president with hyperbolic Dear-Leader-style praise during a widely viewed television appearance in January.

Trump has "incredibly good genes," Jackson said in describing the physical examination he had given the president. Trump's overall health is "excellent." His "cardiac assessment" put him "in the excellent range." If his diet had been a bit better, "he might live to be 200 years old." In any event, "I think he will remain fit for duty for the remainder of this term and even for the remainder of another term if he's elected."

That is an unusual way to describe a 71-year-old man whose height was reported as a generous 6 feet 3 inches and weight at an eyebrow-raising 239 pounds, which classifies him as overweight – but conveniently just one pound short of obese. Jackson's are odd words for a man whose cheeseburger-laden diet my doctor would describe as suicidal and whose coronary calcium scan results, according to many other physicians, indicate some degree of heart disease and a clearly elevated risk of heart attack.

I assume Jackson has been more, shall we say, plain-spoken with the president about his health than he was with the public. But am I suggesting that flattery, rather than merit, is what makes him Trump's choice to replace ousted VA Secretary David Shulkin? Absolutely, because no other explanation makes sense.

Pliability may also be playing a role. In a New York Times op-ed, Shulkin wrote that he believed he was being sacked because he opposed a push by the Trump administration "to put VA health care in the hands of the private sector."

Shulkin is also a physician, but before he took over at the VA he had experience running hospitals. With no comparable administrative background, Jackson – if confirmed by the Senate – would take over a sprawling agency with 360,000 employees, a \$186 billion budget and responsibility for providing medical care to 9 million veterans who deserve better, faster service than they now receive.

Shulkin was one of several high-ranking Trump appointees under fire for lavish spending on the taxpayers' dime. He was also a holdover from the Obama administration, and even though the job is perhaps the least partisan in the cabinet, that prior association clashed with Trump's bratty determination to oppose everything Obama supported and support everything he opposed.

But Shulkin, by most accounts, had stabilized the VA's vast system of hospitals and health clinics. What he refused to do was support the notion of privatizing veterans' health care – an idea pushed by some of the political appointees the White House had installed under him.

"I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans," Shulkin wrote in his op-ed. "The private sector ... is ill-prepared to handle the number and complexity of patients that would come from closing or downsizing VA hospitals and clinics, particularly when it comes to the mental health needs of people scarred by the horrors of war."

Shulkin wrote that "in recent months" the political environment in Washington has become "toxic, chaotic, disrespectful and subversive," making it impossible for him to do his job. "It should not be this hard to serve your country," he wrote.

But it should be hard to get a job running any organization as big, complex and vital as the Department of Veterans Affairs. Perhaps Jackson has an innate genius for management that awaits only the opportunity to flower. If not, Trump will be doing a grave disservice to men and women who are owed the nation's thanks and gratitude.

I can't say I'm surprised. Trump put neurosurgeon Ben Carson in charge of the Department of Housing and Urban Development, despite Carson having zero experience in housing policy. He put Betsy DeVos in charge of the Department of Education, despite her apparent unfamiliarity with actual schools. He put politician Rick Perry in charge of the Department of Energy, which Perry wanted to eliminate until he learned what the agency does.

Perry actually said that at his confirmation hearing. One doesn't know whether to laugh or cry.

[Back to Top](#)

43 - Truthout: [Trump's New VA Pick Appears Poised to Rubber-Stamp Privatization of Veterans Affairs](#) (3 April, Michael Corcoran, 422k uvm; Chicago, IL)

For the last year, Veterans Affairs Secretary David Shulkin insisted the VA would not be privatized on his watch. Now, thanks to a Koch-supported coup at the top of the second-largest department in government, his watch has ended -- and the battle over privatization persists.

For years the Koch brothers have been hovering around the Department of Veterans Affairs and its \$186 billion budget like vultures surrounding a carcass. The billionaires have been pushing a radical legislative agenda, using the front group Concerned Veterans for America. Their goal is to dismantle the Veterans Health Administration (VHA) -- the only system of socialized medicine in the United States -- to the benefit of for-profit providers.

So, one can only imagine the glee felt in the Kochs' offices on Thursday when the president finally sent Shulkin packing. The VA Chief had retained the support of most Veterans Service Organizations (VSOs), which generally are opposed to privatization of the VHA, but it was not enough to save his job. This is a strong indicator of the Kochs' influence over the Trump administration on veterans' issues.

Experts and advocates now fear that Ronny Jackson, the White House doctor and Trump's pick to replace Shulkin, will rubber-stamp the Koch agenda. "I think [Jackson] will be a puppet that will put the VHA and the VA on a starvation diet," said Suzanne Gordon, a journalist and author who covers the VA, in an interview with Democracy Now.

Among the legislation the Kochs are pushing is the Veterans Community Care and Access Act (S.2184, which was introduced by Sens. John McCain and Jerry Moran), the Veteran Empowerment Act (HR.4457, introduced by Rep. Doug Lamborn), which seek to privatize much of the VHA, and the Vet Protection Act (HR.1461), which would weaken the rights of VA employees.

Passing this legislative agenda would radically remake the VA in the Kochs' image. Can anyone stop it from happening?

Privatization of VA Enters Mainstream Debate

Shulkin's firing brought one silver lining for those seeking to preserve the VHA. The drama surrounding the firing -- and the curveball appointment of Trump's physician to replace him -- has elevated the issue of the privatization of the VHA into the national debate.

Shulkin did not go quietly after his dismissal. He penned an op-ed in The New York Times and appeared on shows like "Meet the Press" to pointedly explain why he was removed.

"They saw me as an obstacle to privatization who had to be removed," Shulkin wrote in the Times. "That is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans.

"His ringing defense of the VA in the New York Times is very important for people to read. I'm sad that [he] didn't articulate that kind of defense earlier," Gordon said. "But the fact that he's [speaking out on privatization] now is really to be commended."

Shulkin's language was not very different from that of Sen. Bernie Sanders, who said at a news conference in Vermont, "The firing of Shulkin has everything to do with the administration's desire to privatize the VA, and I think that that is a disastrous idea."

This has led to a rare public discussion of VA privatization -- and the role of the Koch brothers in advancing the cause -- in the dominant media. Jackson's confirmation hearings could provide more chances to educate the public about the Koch's war on the VHA. Democratic opponents will have a chance to step up and confront Jackson on these privatization efforts in public.

The fact that Trump chose his own White House doctor to replace Shulkin only adds to the media's interest in the pick. It seems likely that the process of replacing Shulkin will take place with a much wider audience than it would have if Trump had made a less controversial decision.

"We know nothing about what Dr. Jackson stands for and what his vision is for the VA," Sanders said of Jackson on CBS's Face the Nation.

Koch-Approved Legislation: Exploitation of Choice

This mysterious physician, however, may well end up running the largest health care system in the United States.

So, what do the Kochs have planned for the new VA chief? They do not make you search hard for these answers. In Concerned Veterans for America's statement responding to Shulkin's firing, they celebrate that the "distractions" are over and quickly pivot to their legislative agenda.

"Concerned Veterans for America's grassroots leaders flew in from around the country earlier this month and held nearly 100 meetings with legislative leaders to discuss the group's policy agenda," the statement reads.

It then lists its legislative agenda. The top two bills it is pushing would, to varying degrees, fundamentally alter the VHA through privatization: the Veterans Community Care and Access Act (S.2184) and the Veterans Empowerment Act (HR.4457), which is sponsored by Rep. Doug Lamborn, a Republican from Colorado.

These two pieces of legislation must be considered in the context of the 2014 VA Scandal, when VA employees were accused of falsifying records about long wait times. After the wait-time scandal, a bipartisan agreement called Veteran Choice Act of 2014, allowed veterans who do not live near a VA clinic, or are subject to long wait times, to seek care at a private provider.

There was no real opposition to this plan, which created the Veteran Choice Program, and it was supposed to be an emergency measure. "This particular program was authorized as a temporary fix in the midst of a crisis," said Allison Jaslow, executive director of Iraq and Afghanistan Veterans of America, in an interview with The Atlantic. "We always viewed it as an experiment."

This experiment, however, has turned into the primary means by which the GOP is trying to privatize the VA. The program was set to expire this year, but Trump extended it in April and

December 2017. Now GOP legislation, supported by the Koch brothers, would, as Nikki Wentling of the Stars and Stripes reported, "overhaul the controversial Choice program and create a network of community medical providers that veterans could use at taxpayers' expense."

The more radical of the Kochs' two bills is Lamborn's legislation, which was introduced in November. The Veterans' Empowerment Act, as Wentling describes, "mirrors a proposal from the conservative group, Concerned Veterans for America, which is part of the Koch brothers' political network, to create a government-chartered organization to operate a new veterans health insurance system."

The bill drew immediate resistance from opponents of privatization, such as the Veterans of Foreign Wars (VFW). "We hope that it has absolutely no chance of becoming law," said Carlos Fuentes, legislative director for the VFW, in response to Lamborn's bill.

The Kochs, who, according to The Wall Street Journal, are spending millions to influence this debate, praised the bill. In an op-ed for The Hill, Dan Caldwell, executive director of Concerned Veterans for America, said the bill would "truly expand veterans' health care choice in an effective and sustainable way."

The Veterans Community Care and Access Act (S.2184, which is sometimes called McCain-Moran) is similar to the Lamborn bill but not quite as militant. Unlike with the Lamborn act, under McCain-Moran the VA is maintained "as a gatekeeper to private-sector treatment," Wentling reports, whereas the VA can be bypassed entirely under the Veterans Empowerment Act.

"The bill would require the VA to use objective data on healthcare demand to set standards for access and quality, and to identify and bridge gaps in veterans' care -- whether in VA or community facilities," according to a press release from Moran about the bill.

"It is as if they want the VA staff to serve as billers for the private sector," Gordon told Truthout.

The McCain-Moran legislation goes well beyond the accommodations made for rural veterans as envisioned by the Choice program. Some estimate that "McCain-style privatization" could triple the cost of veterans' care to almost \$450 billion a year.

Both the Lamborn and McCain-Moran bills also overlook the possibility that the private sector is not ready for the specific health needs of veterans, according to a Rand Report published in March, which studied New York State providers. The report found that private providers knew "little about the military or veterans" and are "not routinely screening for conditions common among veterans," among other critiques.

"These bills have lots of nice words, about empowerment, or choice, but what those bills do is hurt veterans," said William Attig, executive director of the Union Veterans Council, AFL-CIO, in an interview with Truthout. "There is a lot of money for some to make by farming out services to the private sector, but what the VHA needs is to be fully funded, not privatized."

The Kochs' attack on the VA is also an attack on federal employees and public-sector unions. Their legislative agenda includes the Vet Protection Act (HR.1461), which makes it easier to fire employees and tries to weaken public sector unions.

Concerned Veterans for America says the bill would involve monitoring "the amount of time VA employees can devote to union activities during work hours and ensure clinicians are doing the work the VA hired them to do -- care for patients."

The law is an attack on the collective bargaining rights of federal employees at the VA, according to the National Federation of Federal Employees.

"This legislation does not help veterans or taxpayers. Rather, it serves only to weaken federal employee unions," the union said in response to the proposal.

The Fight Ahead

These big legislative efforts are ongoing, as are other acts of "stealth privatization," such as hiring freezes, and plans laid out in the Trump VA budget, which undermine the VA without an act of Congress. These practices are likely to continue.

From a wider-angle lens, the goal of the Koch brothers is not just to pass these bills to dismantle the VHA, but to undermine the very idea of government-run health care.

However, while the Kochs have enormous resources invested in their effort to dismantle the VA, there is organized resistance from most Veterans Service Organizations, as well as from progressives like Bernie Sanders, who seek to defend government-run health care on principle.

With the Koch brothers' role in trying to privatize the VHA now a matter of national debate, the best way to maximize opposition to their agenda is to make sure the US public knows who is most hurt by it: veterans.

44 - We Are The Mighty: [No one was ready for President Trump's next VA secretary](#) (3 April, Ben Brimelow, 3.6M uvm; New York, NY)

Questions have emerged about the managerial ability of White House physician Admiral Ronny L. Jackson, President Donald's Trump pick to run the Department of Veterans Affairs, the federal government's second-largest agency.

If confirmed, Jackson would replace David Shulkin as the secretary of veterans affairs. Trump announced his decision to fire Shulkin on March 28, 2018.

Though Jackson has an impressive resume as a career naval officer who served as an emergency trauma doctor in Iraq, as well as a White House physician for the 12 years, he seems to lack any management experience.

Considering the VA has 360,000 employees and a \$186 billion annual budget, that has some people worried.

"It's great that he served in Iraq and he's our generation. But it doesn't appear that he's had assignments that suggest he could take on the magnitude of this job, and this makes Jackson a -surprising pick," Paul Reckhorn, the chief executive of Iraq and Afghanistan Veterans of America, told the Washington Post.

Shulkin had managed several hospitals before, including some that were part of the VA, and almost all of his predecessors were either high ranking managers in the private sector, or military leaders.

Senior White House officials told the Washington Post that Jackson "was taken aback by his nomination," and was reportedly hesitant to take the position. One official described an "informal interview" process, without the traditional Cabinet-level vetting.

The White House had reportedly planned to announce that Shulkin would leave on March 28, 2018, with an interim director to run the department until a permanent head could be found. Trump apparently changed that plan when he tweeted that Jackson was his pick to lead the VA.

Virtually nothing at all is known about Jackson's views on the issues that currently face the VA, like Trump's views on privatization of elements of the VA.

"We are doing our homework on Dr. Jackson," Amanda Maddox, a spokeswoman for the chairman of the Senate Veterans' Affairs Committee, Sen. Johnny Isakson, told the Washington Post.

"His name was never floated around," Maddox said, "so we are doing our due diligence."

It is unclear if Democrats will support Jackson's nomination. Senator Tammy Duckworth of Illinois, an Iraq veteran who lost both of her legs when the helicopter she was co-piloting was shot down, released a statement saying that she would "carefully review" his qualifications.

"The next VA Secretary must be able to protect the department from becoming consumed by partisan politics," Duckworth said.

"I hope Dr. Jackson is someone who is willing and able to do that by continuing the important tradition of VA Secretaries working in a bipartisan manner."

[Back to Top](#)

45 - MedPage Today: [Jackson's Nomination to Run VA Brings Questions, Lack of management experience cited as major issue](#) (3 April, Joyce Frieden, 1.5M uvm; New York, NY)

Reaction to President Trump's nomination of White House physician Ronny Jackson, MD, as Secretary of Veterans Affairs (VA) has leaned toward the negative, with most people questioning whether Jackson has the experience needed to run the vast department.

"I am deeply concerned about the nominee," Joe Chenelly, executive director of AMVETS, a veterans service organization, said in a press release. "Veterans' lives depend on this decision, and the Trump administration needs to substantiate that this active-duty Navy officer is qualified to run a \$200-billion bureaucracy, the second largest agency in the government."

Chenelly posed several questions that he said needed to be answered about Jackson, including:

"Is it appropriate for an active-duty military officer to run a federal agency?"

"With an official bio that does not seem to contain any indication that he's held a command, is the president's nominee fully prepared to lead such a massive bureaucracy?"

"While we are pleased this nominee has a medical background, the VA is much more than healthcare. What qualifications does the president's nominee have to address claims, appeals, benefits, and cemetery affairs?"

Michael Carome, MD, director of Public Citizen's Health Research Group, was even more blunt. "Dr. Jackson appears to lack the type of management experience that the VA secretary position demands," he wrote in an email to MedPage Today. "There are undoubtedly dozens of other individuals who would be more qualified, but many are likely unwilling to serve under President Trump."

But not everyone agreed. "The questions ... raised about his [lack of] experience in managing a large bureaucracy [are] relevant, but there is a lot of precedence about having the deputy secretary being the main management person," said Gail Wilensky, PhD, senior fellow at Project HOPE, in Bethesda, Md. "The bigger question is, do you know what you know and know what you don't know?"

If Jackson doesn't have management experience, "he needs to understand the importance of working as a team with regard to the skill sets he doesn't have, and if he understands that, most potential problems are relatively easily resolved."

Mike Haynie, PhD, director of the Institute for Veterans and Military Families at Syracuse University, said that while Jackson's background will become clearer during the nomination process, the change in leadership also raises other issues.

"The conversation should be much greater than just about Dr. Jackson," he said in an email. "What is missing is the larger issue of the other key vacancies across the agency – to include the Undersecretary for Health and Undersecretary for Benefits. These are key leadership roles, and the absence of leaders in these roles will further complicate Dr. Jackson's transition."

Jackson, a rear admiral in the Navy, has served as White House physician since 2006, according to his official bio. He has served as an instructor at a naval diving and salvage training center as well as an emergency physician in Iraq before being selected for the White House post. He has served as director of the White House medical unit but there is no other reference in his biography of having run a larger organization.

President Trump announced on Twitter on March 28th that he would be nominating Jackson to replace Shulkin, although there is some dispute over whether Shulkin was fired or he resigned. Shulkin maintains he was fired while the White House says he resigned. The Trump administration and Shulkin were at odds over whether the VA should become more privatized.

Privatization would hurt the agency, said Eugene Gu, MD, a surgery resident at the VA medical center in Nashville, Tenn., who has been speaking out on the issue. "Privatizing means veterans are shipped off to a small private hospital in whatever community they're in," he said in a phone interview. "They're not going to get the same level of integrated care ... What they should be focusing on is giving veterans the best care that they deserve, which means investing more money into [this] single-payer nationally integrated health system."

Right now, privatization is being used as a crutch to avoid fixing problems within VA facilities, he continued. For example, Gu said that at the hospital he works at, broken sterilization equipment is not being fixed because, under the current Choice program allowing veterans to go outside the VA for care, staff can just send surgery patients elsewhere.

"How can you have a hospital without completely working sterilizing system? That should be a scandal," said Gu. Although it's true that the hospital can send surgery patients elsewhere, "that delays their care. If we didn't have [the] Choice [program] they would have been working around the clock to fix the sterilizer and we would have clean tools to operate on patients ... Relying on [Choice] is a disservice to veterans."

Haynie urged going slow on expanding privatization. "A wholesale dismantling of the VA healthcare system is not in the best interest of veterans, or American medical education," he said. "The administration has made it clear they want to see more choice for veterans when it comes to their healthcare, but it is important to expand choice in a way that preserves the core integrity of the VA healthcare system."

Although Jackson would be new to the VA, no one should assume he will be a pushover for those who want to increase privatization, Wilensky said. "Most of the flag officer-level people I've met in the military are not so easy to manipulate.... He has spent his adult life in the military, where they rely on government-funded healthcare."

[Back to Top](#)

46 - KWTX (CBS-10): [Waco: Chris Kyle's family hopes new secretary will change VA culture](#) (3 April, John Carroll, 315k uvm; Waco, TX)

The brother and father of slain American Sniper Chris Kyle say they hope that Texas born and reared Navy Rear Adm. Ronny L. Jackson, whom the president has nominated as the next secretary of veterans affairs will change the culture in the VA to get veterans help more quickly.

"Our veterans are not being taken care of here in America, no way, absolutely not," Kyle's father, Wayne said.

"We're hopeful that somebody has been placed there that understands our veterans and understands what they are going through," he said.

Kyle's sons Chris and Jeff both served overseas in foreign wars.

Chris, known as the American Sniper, was shot and killed at a gun range five years ago in Erath County while attempting to help a troubled vet.

President Donald Trump has been moving to privatize some healthcare for veterans, saying he wants them to get the help they need.

"We need to address it immediately. Get them the care that they need and get the problem resolved," the elder Kyle says.

"I hate to say this, but to me the VA has up until now been like a revolving drug dispensary. These young men and women have become addicted to prescription drugs and they become like zombies."

Jackson is a Texas native, a 1991 graduate of Texas A&M University and a 1995 graduate of the University of Texas Medical Branch.

On the subject of school safety, both Kyle and his son Jeff believe veterans could be one answer to making campuses safer for students.

Jeff Kyle says schools should hire two to three Veterans per campus to guard the students.

"Making sure that their mental health is checked out, there's plenty of guys, men and women, both out there that are well trained and ready to standby and you know do what is necessary to protect these kids."

His father Wayne agrees.

"I just feel like we could make better use of our veterans if there are unemployed then put them to work."

[Back to Top](#)

47 - Creators Syndicate: [Marching Orders for Trump's New VA Secretary](#) (4 April, Betsy McCaughey, 318k uvm; Hermosa Beach, CA)

Since President Trump ousted Veterans Affairs Secretary David Shulkin, the question reverberating in Washington is whether Trump's new pick, Rear Adm. Ronny Jackson, is capable of heading a department with 360,000 employees and 9 million vets under its care. Senate Democrats carp he lacks experience running "a complex organization."

Experience is overrated. President Obama's VA Secretary, Robert McDonald, failed miserably, despite having run Procter & Gamble. Vets died on phony wait lists on McDonald's watch.

Jackson's last combat role was with a surgical shock trauma unit in Iraq. Sounds like good preparation for battling the killer VA bureaucracy.

Jackson also shares Trump's vision of putting vets in the driver's seat about their own medical care. Here's what Jackson can learn from his predecessors' failures.

Lesson 1: Make vets the priority, not protecting the VA bureaucracy. Shulkin refused to do that.

Trump has pledged to fix the Veterans Choice Program so vets can see private doctors when they decide it's necessary. VCP was created in 2014 after revelations that sick vets were dying on wait lists at VA hospitals. VCP is supposed to allow vets to get private care if they live far from a VA facility or have waited too long. But VCP's red tape makes seeing an outside doctor almost impossible. That's deliberate. Senator Bernie Sanders, who co-authored VCP legislation, relies on union campaign contributions and will do just about anything to protect union jobs at the VA. Keeping vets trapped at the VA with no alternatives is a job protection racket.

Shulkin was part of that racket, too. He misled Trump and Congress with double talk about reforming VCP "in a way that will work for veterans and work for VA." But protecting VA bureaucracy shouldn't be a consideration, when vets' lives are at stake.

Shulkin showed his true colors when Congress passed last month's big spending package. Trump and congressional Republicans had pushed hard to include VA reforms helping vets see outside doctors.

But the key person to sell this to Congress was Shulkin, and he equivocated, allowing Democrats to block its passage. It was a setback for Trump and vets. No wonder Shulkin was canned days later — not because of flimsy travel expense abuse allegations.

Lesson 2: Cut wait times in half at the VA.

Shulkin claimed success in reducing waits, but that's questionable. VA bureaucrats are still fudging the numbers, according to the inspector general.

Here's a remedy. A whopping 47 percent of VA health care users are 65 or older. They need angioplasty and bypass surgery like other seniors. They use the VA to avoid Medicare's out-of-pocket expenses, because their median annual income is only \$24,000. Picking up their co-pays would cost very little and encourage them to use Medicare instead of the VA Bingo, and it would cut VA wait times by nearly half, making room for younger vets to get combat-related care only the VA can provide.

Lesson 3: Don't count on VA bureaucrats to fess up when things go wrong. Jackson should use unannounced audits to uncover dangerous conditions at medical facilities, instead of trusting officials to report them up the chain of command.

An inspector general report last month exposed "a breakdown of core services" at medical centers under Shulkin's command. At the Washington, D.C., facility, under Shulkin's nose, patients were needlessly overexposed to anesthesia due to inventory mismanagement. After patients were put under, surgeons sometimes discovered they were out of equipment and had to race across the street to borrow it from another hospital or reschedule the procedure. Shulkin claims he could "not recall" ever being notified of such problems. He expected to be notified?

Pundits are predicting a confirmation battle. The smart money should be on Jackson. He's combat tested. Disregard the partisan drivel about his lack of experience running a big organization. It's coming from the same people who had no problem making a community organizer the president.

Betsy McCaughey is a senior fellow at the London Center for Policy Research and a former lieutenant governor of New York State.

48 - Hawaii Tribune-Herald: [Senate should be wary of Veterans Affairs nominee](#) (4 April, 135k uvm; Hilo, HI)

Caring for our nation's military veterans was one of Donald Trump's most consistent promises on the presidential campaign trail, and certainly one of his least controversial. Getting veterans the care they need is a nonpartisan priority.

But the increased quality of care Trump promised hasn't come.

Facilities on Long Island and in many other communities are falling apart. The Department of Veterans Affairs is increasingly being exposed as dangerous and dysfunctional. Last week, as was expected, Trump fired the secretary of veterans affairs, David Shulkin, who could never rise above his ethical violations and his shoddy leadership. His designated replacement is Navy Rear Adm. Ronny Jackson, the White House physician for the past three administrations who garnered praise from Trump for performing well during a news conference about the results of the president's physical exam.

While Jackson is highly regarded as a physician, his resume does not include a shred of evidence that he can lead the government's second-largest bureaucracy (it has a \$186 billion budget) and probably its most dysfunctional. This might be the toughest management job in Washington.

Before the Senate confirms Jackson, it must elicit his views on further privatization of medical care, which other Trump appointees are recklessly pushing as a way to dismantle the agency instead of providing improved service. And unless the Senate can ensure that Jackson can overcome his lack of management experience and create a solid plan for building a leadership team that can improve care, it should reject his nomination.

On Long Island, the problems are increasingly daunting, and care for veterans is suffering. Last month, it was learned that the Northport VA Medical Center again was forced to stop performing surgeries when a faulty air conditioner forced the hospital to close all five of its operating rooms. The shutdown went on for about a week, and 18 surgeries had to be rescheduled while the \$58,000 repair was performed.

That's only the latest breakdown at the Northport facility, where surgeries were halted for four months in 2016 when another air-conditioning system failure sent metal fragments flying into the air, threatening to contaminate patients with open wounds. Another cooling system problem a year earlier led to pipe ruptures and a \$12 million repair. And in January, Northport had to close its 42-bed veterans homeless shelter after the heat failed.

A recent report estimated the cost of Northport's repair and renovation to be \$273 million. Long Island's 130,000 veterans rely heavily on the facility, which has traditionally maintained a top reputation. Its quality cannot be allowed to decline.

If Jackson is confirmed, Trump, who has a warm personal relationship with his nominee, must make sure their communications remain constant. Jackson will need the president's full support to get the VA running properly and all of its facilities up to par.

We owe these veterans. There can be no reneging.

[Back to Top](#)

49 - WUSF (NPR-89.7, Audio): [For Veterans Groups, Questions Surround Trump's VA Nominee](#) (6 April, Carson Frame, 197k uvm; Tampa, FL)

Some veterans groups say they're uncertain about the future of care at the Department of Veterans Affairs, after President Trump ousted Secretary David Shulkin and nominated White House physician Ronny Jackson to head the agency.

Navy Rear Admiral Ronny Jackson has served as a White House physician during the last three presidential administrations, starting with George W. Bush.

It's typically a low-profile position, but Jackson had a rare moment in the media spotlight in January, when he appeared in the White House briefing room to release the results of President Trump's annual physical.

"All clinical data indicates that the President is currently very healthy, and that he will remain so for the duration of his presidency," Jackson declared. "I told the President that if he'd had a healthier diet over the last 20 years that he might live to be 200 years old."

Some observers speculate that Jackson's glowing report on President Trump's health played a role in the President's decision to nominate him as Secretary the Department of Veterans Affairs. President Trump ousted Secretary David Shulkin after a turbulent 14 months in the position.

"I think that Donald Trump was enamored by having Ronny Jackson go out and say something like that before the press corps," said Will Fischer at the left-leaning political action committee VoteVets. "And it was that moment that I think Ronny Jackson probably became Donald Trump's new VA secretary."

A native Texan, Jackson joined the active duty Navy in 1995 after finishing medical school at the University of Texas Medical Branch in Galveston. He went on to graduate from the Navy's Undersea Medical Officer program, and specialized in resuscitating troops during the Iraq war in 2005 and 2006.

But Fischer suspects that his nomination may be part of a larger push to privatize the VA.

"There is a coordinated effort being led by Donald Trump and others to destroy and privatize our VA healthcare system," Fischer said.

Other veterans groups are taking more of a "wait and see" attitude and asking a lot of questions.

"We were surprised," said American Legion Executive Director Verna Jones. "He seemed to have just come out of nowhere."

The VA is one of the largest healthcare systems in the world, with a budget of almost 200 billion dollars and around 350 thousand employees. Jones says Jackson will have a lot on his plate, and that the American Legion will try to support him.

"There are 20 million veterans in the United States and nine million are enrolled in the VA," Jones said. "So the new secretary's going to have to come in and manage all of that."

He also would take over the agency at a tumultuous time. President Trump ousted Shulkin after about 13 months on the job. Shulkin called the Washington environment "toxic, chaotic, disrespectful and subversive."

Richard Delgado of the San Antonio Coalition for Veterans and Families said Jackson's military experience is appealing in such an environment and could help him get a handle on the VA.

"With him being an admiral, that also shows his leadership style and the type of person that he is," Delgado said. "You don't make admiral just willy nilly."

Outside San Antonio's Audie Murphy Memorial VA hospital, Army veteran Melissa Cervantes was caught off guard by news that the VA would be getting a different leader

"I felt like Shulkin had more experience," Cervantes said. "I don't know anything about this one coming in."

Cervantes said she worries the change will affect quality of care for her and her husband, who's also a veteran.

"Everyone has different plans, agendas," Cervantes said. "You never know what the new person coming in is going to do, whether they care about veterans or not."

A White House official told CNN that Jackson will resign his commission and retire from active duty if he's confirmed as VA Secretary. In the interim, Robert Wilkie, the Undersecretary of Defense for Personnel and Readiness, will be the acting VA secretary.

This story was produced by the American Homefront Project, a public media collaboration that reports on American military life and veterans. Funding comes from the Corporation for Public Broadcasting and the Bob Woodruff Foundation.

[Back to Top](#)

50 - Lubbock Avalanche-Journal: [Levelland native talks about nomination as head of VA](#)
(7 April, Karen Michael, 194k uvm; Lubbock, TX)

Levelland native Dr. Ronny Jackson -- the rear admiral who is President Donald Trump's nominee as secretary of the Department of Veterans Affairs -- knows he will someday be a veteran and his sons will be veterans.

"I'm going to be a vet one day soon. If I do get confirmed, I won't stay on active duty, I'll be a vet right away," Jackson said Thursday in a phone interview with the Avalanche-Journal, the first interview he did after being nominated.

Jackson, currently the physician to the president, noted that it's in his best interest and his children's best interest to do what is right for veterans. He is also a United States Navy rear admiral.

"I've been overseas, and I've been deployed in combat zones with Marines and soldiers and airmen and sailors, and I've seen first-hand what they go through, the injuries and the things they come home with. I've seen how that happens, and how devastating it is to them and their families. I just want to make sure that we do our part as a country and we let them know that we appreciate that and we take care of them," Jackson said.

Veterans are like anyone else -- they don't see themselves as entitled or eligible for anything that normal people don't expect, the VA nominee said. Veterans just want good quality care and they want to know that they have access to care.

"We owe the vets the absolute best care that's available out there," Jackson said.

The naval officer was appointed as a White House physician under President George W. Bush, whom he calls "Bush 43" to distinguish him from his father, President George H.W. Bush, whom Jackson calls "Bush 41". He served as First Lady Laura Bush's personal physician, and also spent a lot of time at the Bush ranch in Texas with the family.

"I was the first lady's assigned physician. I traveled everywhere she went," Jackson said. "She and I got along really well, as did President Bush and I, because we were all from Texas. Obviously I grew up just due north from where they grew up."

He continued as a White House physician under President Barack Obama, when several of the physicians who had seniority at the time left for a variety of reasons.

"I kind of got catapulted toward the top of the docs who were currently there, as far as seniority goes," Jackson said, noting that he was the deputy director of the White House medical unit for about a year before becoming director. Then Obama appointed him as his personal physician.

As a personal physician to the president, Jackson does not wait in his office for the president to have a medical problem.

"I take care of basically the entire White House compound. I oversee all of the care here," Jackson said, adding that over 18 acres, that's about 7,000 people.

"We do urgent care here, anybody who is injured or they are sick, they come see us. We do a lot of travel medicine, because, of course, we have a lot of travelers here, so immunizations and travel preparation, we do all of that," Jackson said. "And we do, basically, a lot of primary care as well, and I take care of and end up being a primary-care provider for most of the senior folks in the White House who work in the East Wing and the West Wing, the president's senior staff and cabinet members."

When Obama left in 2017, Jackson said he was ready to retire because he had 20-plus years in the military and a new administration was coming into the White House.

"Typically, anyone who's in an appointed spot in one administration, they won't carry on to the next administration, especially when it changes from one party to the other," he said.

"I made a lot of good relationships in the Bush 43 administration, and some of the people that were working on the Trump transition had been a part of the Bush 43 administration, and they knew me," Jackson said. "They talked to President Trump about it, and I talked about it with him, and he just immediately appointed me as his physician as well."

Some national critics have acknowledged that Jackson is a great doctor while also questioning his experience in management, particularly of a large agency like the VA.

"I've been in leadership school for 23 years now. ... And I've been able to rise to the level of an admiral, a flag officer in the Navy. I didn't just stumble into that. So I've gotten a lot of leadership

background, I've got a lot of leadership experience as a Navy officer, and I've got a lot of day-to-day leadership experience," he said. "You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life and death decisions.

"I think I've got what it takes, and you know, I don't buy into that argument at all."

Despite his assertion that he didn't stumble into the VA nomination, Jackson said much of his life has been serendipitous.

When he started college, he never dreamed of going to medical school or becoming a doctor.

After taking classes at South Plains College and going on to Texas A&M in Galveston to pursue a degree in marine biology, Jackson found himself with a problem common to college students: he needed money. He applied for a job at the University of Texas medical school in Galveston as an autopsy assistant and found it interesting.

"It sounds a little bit gross, but you know, it was pretty educational. They would teach me a lot of stuff about different disease processes as we were doing an autopsy. That's what got me interested in medical school," Jackson said.

His mother, Norma, also told the A-J in a Jan. 26 story that her son had never wanted to be a doctor.

"He was fixing to graduate, and he called me and his daddy, and told us he had decided he wanted to be a doctor. And we thought, 'What in the world?' But anyway, he made a doctor, and we're glad for that," Norma Jackson said.

He didn't have any plans of joining the military, either, but didn't have money for medical school. Once he was admitted, he called a Navy recruiter who had told him to call back once he was admitted to a medical school, and he learned about a program in which he could be a Navy diver and a doctor.

"I really liked diving, so I signed on," he said.

He never dreamed of becoming a White House physician, but he was nominated by his specialty leader, who is responsible for all emergency medicine doctors in the Navy.

"I didn't even know the job existed," Jackson said. "I just got an email out of nowhere saying that I'd been nominated for a job at the White House. Luckily, it was on an old email account that I wasn't checking very often, but I saw it before the deadline, but only shortly before the deadline, maybe just four or five days."

He scrambled to get an application package in.

"I kind of cut a lot of corners," Jackson said.

But a few months later, he got an email out of the blue, and this one said he was one of three physicians selected for an interview. Unfortunately, it was 2005 and he was stationed in Iraq.

"Once again, I thought that was it -- this is where the road stops because I wasn't going to be able to be back in D.C. for an interview, because I was once again in the middle of the desert," Jackson said. But his supervisor wanted him to succeed.

That supervisor was Lt. Gen. John E. Wissler, who had been a military aide to Bush 41. Wissler summoned him to his office and told him to pack his bags for a flight on a transport plane full of broken helicopters back to the United States.

After a crazy few days in Washington D.C. , had to get a new suit because he'd lost 40 pounds in Iraq, and interviewed for three days at the White House. He got the job that launched him on an unthinkable trajectory to possibly get a seat on the president's cabinet.

"I really haven't planned my life out real meticulously. I've just kind of tried to enjoy what I'm doing and do a good job, and one thing has led to another," Jackson said.

Looking back at growing up in Levelland, Jackson said: It was an experience that I appreciate now more as I've gotten older and I've lived all over the world. Levelland and that part of West Texas is just a special place with people that are like nowhere else in the world," Jackson said. "It instilled a lot of small town values with me that I've carried with me throughout my career. So you know, I can't say enough good things about West Texas. I'm proud to be a West Texan."

Jackson said he misses the people of Levelland, but not the sand storms and weather extremes. He remembers Levelland as a place that had only two restaurants: The Spot and The Chat 'n' Chew. He preferred The Spot, he said.

"It's grown a little bit," he said.

Those West Texas values probably led him into the Navy.

"My parents, they didn't really have the money to fork over and help me pay for med school," Jackson said. "My mom and dad kind of instilled in me, and I think a lot of other people when I was growing up in Levelland were the same way, they didn't like to spend money they didn't have."

51 - Tampa Bay Times: [Editorial: For the sake of Tampa Bay veterans, Senate should scrutinize Trump's VA pick](#) (7 April, 4.8M uvm; Saint Petersburg, FL)

President Donald Trump's decision to fire Veterans Affairs Secretary David Shulkin and to replace him with presidential physician Dr. Ronny Jackson has outsized ramifications for the Tampa Bay area, given the large number of veterans here and the expansive and unique role that two major VA health centers play on both sides of the bay. Whether Jackson is the right person for the job, or whether this amounts to yet another glaring example of gross cronyism in the Trump White House, remains to be seen. But the Senate needs to use the confirmation process to explore not only Jackson's management ability but his vision for a health system that despite all its faults delivers critical care for millions of Americans.

Shulkin was an Obama-era holdover and his firing was no surprise, coming after a critical report in February by the VA inspector general's office that faulted him for improperly accepting

Wimbledon tickets during an official trip to Europe last summer. Shulkin needs to answer for his conduct, but his bigger offense may have been to slow-walk the administration's efforts to privatize VA health care services. While Shulkin agreed to explore limited privatization in some service areas and markets, he also recognized that the VA delivered a unique level of care to a specialized patient base. He was widely lauded in his tenure for improving accountability in the VA's entrenched bureaucracy and for moving to modernize the VA's delivery of care.

Jackson has won admirers for his service under two presidents prior to Trump as White House physician and for his distinguished career in emergency medicine. His service with a trauma unit in Iraq certainly makes him familiar with and sensitive to the VA's patient profile and the vital role the agency plays in caring for wounded warriors. But what appears to have propelled him to a Cabinet nominee was Jackson's televised appearance this year strongly hailing Trump's physical condition. Having the president's confidence is invaluable. But it should reflect core competence in a nominee, not merely fealty to any single president.

Jackson's lack of management experience is an obvious concern for anyone hoping to lead the nation's largest integrated health care system. With more than 1,700 hospitals and other health care facilities, and nearly 40,000 providers, the VA is the second-largest federal department, and there is nothing automatic about delivering quality, responsive services to 20 million veterans. The VA has rebounded from the recent scandals of secret waiting lists, but its bureaucratic culture still protects many incompetent leaders and outdated practices that harm its quality of care. And that in turn has colored the VA's public narrative. For all its faults, the VA has been recognized in recent years for outperforming non-VA facilities in outpatient services. And in the most recent survey of customer satisfaction, released in February, VA patients rated their experience higher than did those who were treated in private hospitals.

The next secretary needs to recognize the unique role the VA plays in treating complex cases that involve the intersection of blunt physical trauma and post-traumatic stress. The next leader needs to recognize the challenge of meeting the evolving patient profile, as older veterans require more care and as younger ones cope with regaining physical and emotional skills necessary to get back into civilian life.

The agency also needs to plan for the special needs that veteran-heavy states like Florida — which ranks third in the nation's veteran population, with 1.6 million — are facing. With 200,000 veterans in Pinellas and Hillsborough counties alone, the VA needs to continue investing in a modern health care delivery system. The Senate should press Jackson on how he would fulfill this mission and examine his commitment to put the interests of veterans ahead of any political agenda by this administration.

52 - Washington Post: [Ronny Jackson, Trump's pick for Veterans Affairs, may pass up \\$1 million to join the Cabinet](#) (8 April, Andrew deGrandpre, 43.9M uvm; Washington, DC)

President Trump's controversial nomination of Ronny L. Jackson to head the Department of Veterans Affairs has grown further complicated by the Navy physician's pending military promotion, which he could be forced to pass up — along with an estimated \$1 million in future retirement income — if confirmed for the Cabinet post.

Jackson, a one-star admiral and the president's White House doctor, was nominated by Trump for promotion to be a two-star admiral in the days leading up to VA Secretary David Shulkin's

departure late last month. The White House has said Jackson intends to remain on active duty until the Senate confirms him to become VA secretary, at which point he would retire from the service. A Navy spokesman said there's been no change in the admiral's duty status.

The dual nominations and a lack of clarity from the White House have left lawmakers flummoxed about how to proceed, said a Senate aide who spoke on the condition of anonymity to offer a candid assessment of Jackson's unusual circumstances. The situation is symptomatic of broader frustration on Capitol Hill, particularly among Senate Republicans, with the administration's contentious personnel moves. They have complained that the time and effort required to consider multiple Cabinet nominations — the top jobs at VA, the State Department and CIA all are pending — is an unwanted distraction during a challenging midterm election cycle.

"This whole situation is very much out of the norm," the Senate aide said. "There's some question here whether [Jackson's] flag officer nomination will move forward given his VA nomination. It's all TBD, because he can't serve in both positions concurrently, so it wouldn't make sense for the Senate to move the nominations concurrently."

The timing most likely is coincidental, as the military evaluates those eligible for promotion months before their nominations are sent to Congress.

[VA's acting secretary takes over: 'I don't think he has any idea what he's gotten himself into']

The White House did not respond to questions seeking clarity on whether it intends to deconflict Jackson's two nominations, if the admiral has discussed his pending promotion with Trump or if it's the president's goal for Jackson to be promoted before he joins the Cabinet.

The dilemma adds another dimension to Trump's surprising announcement that he had chosen Jackson, whose flattering assessment of the president's health was met with skepticism earlier this year, to lead the government's second-largest agency — and arguably its most challenged. His nomination stunned lawmakers, advocacy groups and former White House colleagues dubious of his qualifications or suspicious of Trump's desire to expand a program that enables veterans to seek medical care outside the VA network.

In an interview published over the weekend by the *Avalanche-Journal* in Lubbock, Tex., Jackson, a Texas native, pushed back against his critics and suggested that his military experience has prepared him for the challenges he would face leading such a sprawling and complex bureaucracy.

"I've been in leadership school for 23 years now," he told the newspaper, "... and I've been able to rise to the level of an admiral, a flag officer in the Navy. I didn't just stumble into that. So I've gotten a lot of leadership background, I've got a lot of leadership experience as a Navy officer, and I've got a lot of day-to-day leadership experience. You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life-and-death decisions.

"I think I've got what it takes, and you know, I don't buy into that argument at all."

Jackson is well liked inside the White House, where he's worked for the past 12 years, and he is respected by those who know him and have been in his care. Trump is said to have marveled at Jackson's January appearance in the White House briefing room, where he praised the

president's physical wellness and cognitive acuity. Before settling in Washington, Jackson was deployed to Iraq, where he led an emergency trauma unit responsible for treating troops grievously wounded during one of the war's most violent stretches.

He was surprised, however, by the president's offer to run VA, White House officials have said, and initially questioned whether, as a career Navy officer with limited managerial experience, he's an optimal candidate to lead an agency of more than 360,000 employees.

By all accounts, "he's an extremely sharp officer and a terrific doc," said Barry McCaffrey, a retired Army general who served as President Bill Clinton's drug czar. "If he retired from the military with two stars and went back to civilian life, he would have career prospects for sure. But after 12 years in the White House . . . the only qualification he has [to run VA] is the confidence of the president.

"I think it's 50-50 he is confirmed. And if he's confirmed, I have great empathy. Why would he succeed? The answer is: Because the president put him there."

Jackson's political views and his positions on key policy questions have not surfaced publicly, though he told the *Avalanche-Journal* that military veterans "want to know that they have access" to medical care.

"We owe the vets the absolute best care that's available out there," he said. It's unclear whether Jackson was weighing in specifically on the administration's drive to outsource more medical services. There is deepening concern among those who oppose that effort that the admiral won't stand up to those closest to Trump who have proposed the most aggressive measures. As such, it is believed Jackson will face a difficult confirmation.

Separately, a move to VA could entail financial sacrifice. As a Cabinet secretary, Jackson would earn a salary of \$210,000, though a pay freeze has the rate locked at \$200,000 through the end of this year. That's up significantly from the \$150,000 he earns as a one-star admiral and the \$170,000 he would make as a two-star, according to current Defense Department pay tables. But as a senior officer living in Washington, he also rates thousands of dollars annually in housing allowance plus other special incentive pay the military makes available to medical professionals.

In the long term, a higher rank would qualify Jackson for a more generous pension, which is determined in part by a service member's final pay grade and years of service. Assuming Jackson lives to age 90, the difference before taxes is \$6.4 million versus \$5.3 million, according to estimates based on the Defense Department's retirement pay calculator.

Specialists with First Command Financial Services, which offers financial planning and advice for the military community, independently verified these results at The Washington Post's request but cautioned that other variables could influence Jackson's decision-making in forgoing the promotion in favor of joining Trump's Cabinet.

For instance, he would probably boost his future marketability and earning power in the private sector if he can demonstrate success while running VA. Chief executives of major medical networks can command sizable salaries, and Jackson, 50, though of age to retire from the military, is at the outset of his prime earning years.

There's also the satisfaction that comes from working in service to the nation -and for those who've sacrificed on its behalf, said Arnold Punaro, a retired Marine general who also spent many years on the staff of the Senate Armed Services Committee, overseeing, among other matters, the promotion confirmation process.

"It's been my experience," Punaro said, "that senior military officers — like Admiral Jackson — aren't motivated by money. They're motivated by service. They're motivated by mission."

Senate leaders have not set a date for Jackson's confirmation hearing or a vote on his nomination for promotion.

This article was updated to include Jackson's comments to the Lubbock Avalanche-Journal.

53 - USA Today (Video): [VA pick Ronny Jackson: 'I've got what it takes' to lead the troubled agency](#) (8 April, Donovan Slack, 36.8M uvm; McLean, VA)

President Trump's pick to lead the Department of Veterans Affairs is dismissing concerns that he lacks the experience necessary to take over the massive agency, which has more than 300,000 employees and 1,200 medical facilities.

Ronny Jackson, a Navy rear admiral, has been a White House physician since 2006 but has little executive management experience.

"You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life and death decisions," he told the Lubbock Avalanche-Journal in his first interview since Trump announced his intent to nominate Jackson March 28. "I think I've got what it takes, and you know, I don't buy into that argument at all."

"Dr. Ronny," as colleagues call him, rose to national prominence in January when he conducted a White House press conference after giving the president a check up and mental acuity exam and proclaimed Trump's "overall health is excellent." But little has been publicly reported beyond his official bio on the Pentagon website.

For that reason, some lawmakers and veterans' groups have said they are withholding judgment on his nomination to be VA secretary.

"Dr. Jackson's bio does not reflect any experience working with the VA or with veterans, or managing any organization of size, much less one as multifaceted as the Department of Veterans Affairs, so the VFW will be closely monitoring his Senate confirmation process," the Veterans of Foreign Wars said in a statement.

Trump announced his intent to nominate Jackson in a tweet March 28. At the same time he fired David Shulkin from the secretary's post, saying he wasn't happy with the pace of improvements to the VA and wanted veterans to have more options for private care.

Shulkin wrote in an op-ed at the time that he believed he was removed because he refused to privatize the agency. He told USA TODAY that he believes Jackson can do the job if he builds the right team around himself.

Jackson, in his interview with the Lubbock Avalanche-Journal, did not outline his views on giving veterans more options to get VA-sponsored health care in the private sector. But he said, "We owe the vets the absolute best care that's available out there."

"I've been overseas, and I've been deployed in combat zones with Marines and soldiers and airmen and sailors, and I've seen first-hand what they go through, the injuries and the things they come home with," Jackson said.

"I've seen how that happens, and how devastating it is to them and their families. I just want to make sure that we do our part as a country and we let them know that we appreciate that and we take care of them."

The VA has been buffeted by scandal since 2014, when news reports revealed veterans had died waiting for appointments in Phoenix while schedulers kept secret wait lists masking how long they were waiting.

Since then, USA TODAY has reported on poor quality of care, misdiagnoses, supply shortages and failures in hiring and firing medical providers, among other problems that still plague the VA.

If confirmed, Jackson will be the fourth VA secretary in four years.

[Back to Top](#)

54 - CNN (Video): [Trump's VA pick says he's 'got what it takes' to be secretary](#) (8 April, Devan Cole, 29.8M uvm; Atlanta, GA)

Ronny Jackson, President Donald Trump's physician and pick for secretary of the Department of Veterans Affairs, said in his first interview since being nominated that he's "got what it takes" to lead the department.

In a Sunday profile of Jackson in the Lubbock Avalanche-Journal, a newspaper located near Jackson's hometown of Levelland, Texas, the White House doctor said: "I've been in leadership school for 23 years now. ... And I've been able to rise to the level of an admiral, a flag officer in the Navy. I didn't just stumble into that. So I've gotten a lot of leadership background."

"You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life and death decisions," Jackson told the paper.

Jackson, whom Trump picked to be the VA's next secretary last month, first worked in the White House under President George W. Bush, where he was assigned to care for first lady Laura Bush. After Bush left office, then-President Barack Obama appointed Jackson as his own physician, and he maintained the role under Trump.

Jackson, a rear admiral, told the paper that former Bush employees who were on the Trump transition team helped him keep his job under Trump.

"Some of the people that were working on the Trump transition had been a part of the Bush 43 administration, and they knew me," Jackson told the paper. "They talked to President Trump about it, and I talked about it with him, and he just immediately appointed me as his physician as well."

If confirmed, Jackson said he "won't stay on active duty, I'll be a vet right away." His predecessor, who was dismissed by Trump last month, was not a veteran, which was widely noted after he was nominated in 2017.

According to the paper, Jackson noted in his interview that it's in "his best interest and his children's best interest to do what is right for veterans."

"We owe the vets the absolute best care that's available out there," Jackson said.

CNN's Kevin Liptak contributed to this report.

55 - The Hill: [Trump VA nominee: 'I think I've got what it takes'](#) (8 April Mallory Shelbourne, 11.9M uvm; Washington, DC)

President Trump's nominee to take over the Department of Veterans Affairs (VA) said in a new interview that he has "what it takes" to lead the agency.

"You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life and death decisions," Rear Adm. Ronny Jackson, who currently serves as the White House physician, told the Lubbock Avalanche-Journal.

"I think I've got what it takes, and you know, I don't buy into that argument at all."

Trump announced Jackson as his choice to serve as the new VA secretary late last month in a tweet, in which he also announced the departure of embattled Secretary David Shulkin.

"I am pleased to announce that I intend to nominate highly respected Admiral Ronny L. Jackson, MD, as the new Secretary of Veterans Affairs," Trump wrote on Twitter on March 28.

"In the interim, Hon. Robert Wilkie of [the Department of Defense] will serve as Acting Secretary. I am thankful for Dr. David Shulkin's service to our country and to our GREAT VETERANS!"

Shulkin later claimed he did not resign from the position, though the White House maintains he stepped down from his post.

Senators have said they look forward to hearing from Jackson as he goes through the confirmation process.

Jackson told the Texas newspaper that veterans deserve "the absolute best care that's available out there."

"I just want to make sure that we do our part as a country and we let them know that we appreciate that and we take care of them," he told the Journal.

[Back to Top](#)

56 - The Hill: [Senate braces for showdown over Trump's nominees](#) (8 April, Jordain Carney, 11.9M uvm; Washington, DC)

The Senate is barreling toward a showdown over President Trump's latest Cabinet shuffle, with three critical departments looking for new leaders and more that could follow.

Republicans are preparing for a weeks-long battle as they try to confirm CIA Director Mike Pompeo to be secretary of State and CIA deputy director Gina Haspel to succeed him.

Haspel's nomination in particular is controversial, and the GOP has little margin for error given Sen. Rand Paul's (R-Ky.) opposition to both of Trump's picks.

"I mean that's going to take a lot of floor time," Sen. John Thune (R-S.D.), the No. 3 Senate Republican, told The Hill. "Who knows how long and how much the Democrats are going to want to weigh in with some of those. But it will for sure be time consuming. That's not going away."

Senators also will need to consider Ronny Jackson, the top White House physician, to replace David Shulkin as Department of Veterans Affairs secretary.

GOP senators have largely remained mum over Jackson's nomination, which has come under scrutiny given the physician's lack of experience in running a large bureaucratic organization.

"I've never met him, don't know him. And what I do know does suggest that he needs to demonstrate that he has the qualifications, the capabilities despite the lack of experience," Sen. Jerry Moran (R-Kansas), a member of the Senate Veterans Affairs Committee, told NPR.

Nominations need just a simple majority to clear the Senate. But with a fragile 51-seat grip on the chamber, Republicans have no room for error.

Democrats haven't signaled if they will unanimously vote against the three nominees.

The White House, GOP leadership and outside groups are expected to pressure red and purple state Democrats up for reelection to vote for Trump's picks, and there's reason to think some Democrats could see reason to vote for one or more of the nominees.

Haspel is seen as facing a more challenging confirmation battle than Pompeo, as several key Republican senators remain on the fence.

Sen. John McCain (R-Ariz.), who has been absent from Washington for months as he battles brain cancer, wants Haspel to detail her views and involvement on Bush-era "enhanced interrogation techniques," which are now widely viewed as torture, saying the issue is critical to the Senate's consideration of her nomination.

Director of National Intelligence Dan Coats would not commit to fully declassifying all information on Haspel's involvement in the techniques but said "every effort will be made to fully explain exactly what her role was and what wasn't."

Outside groups and advocates are already gearing up for an intense fight.

Dozens of former Pompeo staffers released a letter on Friday urging support for his nomination. The letter said that Pompeo had "never shied away from speaking the truth" and that his "leadership at State will empower American diplomacy, strengthen America's influence and make the world a better place."

Progressive and human rights groups want the Senate to reject Haspel's nomination over her role in interrogations at a so-called black site prison and the destruction of videotapes documenting the waterboarding sessions of an al Qaeda suspect there.

Several Democratic senators—including Sen. Ron Wyden (D-Ore.), a member of the Senate Intelligence Committee—have already come out against her.

The Senate Intelligence Committee hasn't yet scheduled a hearing date for Haspel.

Pompeo is scheduled to testify before the Senate Foreign Relations Committee on Thursday. Aides to several Democratic senators on the panel noted their bosses are also expected to meet privately with him.

The fight comes as Republicans and Democrats bicker over the length of time it has taken to consider Trump nominees.

Under the rules, senators can force up to 30 hours of post-cloture debate time, eating up days of Senate floor time. It has taken Trump's nominees an average of 84 days to be confirmed, according to a tracker from The Washington Post and the Partnership for Public Service.

Changing the rules to speed up votes for Trump's nominees has been under discussion among Senate Republicans for roughly a year.

GOP Sen. James Lankford's (Okla.) proposal would cut down debate time from 30 hours to eight hours for most nominations once they've overcome an initial hurdle that shows they have the simple majority to pass. Most Cabinet-level nominations would not qualify for the shorter debate time under Lankford's proposal.

A GOP aide told The Hill that the proposal could see movement in the Rules Committee in May. Sen. Roy Blunt (R-Mo.), the next chairman of the committee, predicted the proposal will get a vote, adding that "Republicans have every right to be offended by the way the rules have been abused."

Republicans are putting the fight over Trump's nominees at the center of their messaging heading into the 2018 election.

"Even if we were to lose the House and be stymied legislatively, we could still approve appointments, which is a huge part of what we do," Majority Leader Mitch McConnell (R-Ky.) told the Kentucky Today editorial board.

It's unlikely that the current slate of confirmation fights will be the final Cabinet shakeup senators face amid speculation that several officials—including EPA Administrator Scott Pruitt, Attorney General Jeff Sessions and Housing and Urban Development Secretary Ben Carson—could be next on the chopping block.

[Back to Top](#)

57 - Washington Examiner: [VA pick Ronny Jackson: 'I've got what it takes'](#) (8 April, Kelly Cohen, 4.8M uvm; Washington, DC)

The man picked by President Trump to take over as head of the Department of Veterans Affairs says he's "got what it takes" to lead the troubled agency.

"I think I've got what it takes, and you know, I don't buy into that argument [that I lack experience] at all," Ronny Jackson said in a profile of him published in the Lubbock Avalanche-Journal on Sunday.

The Texas native was appointed to be the doctor to the president by former President Barack Obama in 2013, and retained by President Trump. Last month, Trump announced he planned to replace David Shulkin with Jackson as the VA secretary.

"I've been in leadership school for 23 years now. ... And I've been able to rise to the level of an admiral, a flag officer in the Navy. I didn't just stumble into that. So I've gotten a lot of leadership background, I've got a lot of leadership experience as a Navy officer, and I've got a lot of day-to-day leadership experience," Jackson told the newspaper.

He added: "You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life and death decisions."

Jackson, a Navy rear admiral, first worked in the White House under former President George W. Bush. He told the paper that former Bush employees who were on Trump's presidential transition team helped him remain in his role in the Trump administration.

"Some of the people that were working on the Trump transition had been a part of the Bush 43 administration, and they knew me," Jackson explained. "They talked to President Trump about it, and I talked about it with him, and he just immediately appointed me as his physician as well."

Jackson also said he "won't stay on active duty" and will "be a vet right away."

"I've been overseas, and I've been deployed in combat zones with Marines and soldiers and airmen and sailors, and I've seen first-hand what they go through, the injuries and the things they come home with. I've seen how that happens, and how devastating it is to them and their families. I just want to make sure that we do our part as a country and we let them know that we appreciate that and we take care of them," he said.

[Back to Top](#)

58 - The Hill: [Senate uncertain how to proceed on dual Trump nominations for White House physician: report](#) (8 April, Brett Samuels, 11.9M uvm; Washington, DC)

VA-18-0457-A-000865

Some lawmakers are unsure how to proceed with President Trump's pick for Veterans Affairs secretary because he also has a pending military promotion, The Washington Post reported Sunday.

Trump nominated Rear Adm. Ronny Jackson to be promoted from a one-star admiral to a two-star admiral just days before the president ousted Veterans Affairs Secretary David Shulkin. Trump named Jackson as Shulkin's replacement, pending Senate confirmation.

However, the timing of the two nominations has created confusion on how to proceed, The Washington Post reported. To lead the VA, Jackson may be forced to give up his military promotion and roughly \$1 million in future pension earnings.

The White House has said Jackson will remain on active duty until he is confirmed to run the VA. However, the White House did not respond to inquiries from the Post about whether it will address Jackson's conflicting nominations.

Jackson, who has served as the presidential physician since 2013, has drawn criticism from outside groups and some lawmakers who worry he does not have the managerial experience to run an operation as large as the VA.

The White House brushed aside those concerns, saying Trump has "full confidence" in Jackson to replace Shulkin.

Shulkin was fired amid intense scrutiny after an inspector general report found he spent most of his time during a trip to Europe last summer sightseeing rather than conducting official business and improperly accepted tickets to a Wimbledon tennis match as a gift.

Following his ouster, Shulkin defended his tenure, speculated he was pushed out because he opposed privatization and railed against the "toxic" atmosphere in Washington.

[Back to Top](#)

59 - Military Times: [VA secretary nominee brushes off criticism over inexperience](#) (9 April, Leo Shane III, 2.1M uvm; Springfield, VA)

President Donald Trump's pick to take over the Department of Veterans Affairs downplayed his management inexperience in his first public interview since his nomination, saying his time in the military has honed his leadership skills.

Dr. Ronny Jackson, who has served as White House physician since 2006, told the Lubbock Avalanche-Journal of Texas, his hometown newspaper, that he has heard the criticism concerning his ability to take over the nearly \$200 billion department with 385,000-plus employees.

But he remains undeterred.

"I've been in leadership school for 23 years now ... and I've been able to rise to the level of an admiral, a flag officer in the Navy," he said. "I didn't just stumble into that. So I've gotten a lot of

leadership background, I've got a lot of leadership experience as a Navy officer, and I've got a lot of day-to-day leadership experience

"You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life and death decisions."

Jackson was a surprise pick as the next VA secretary, following the dismissal of David Shulkin from the role last month.

He is an Iraq war veteran who deployed as an emergency medicine physician with the Surgical Shock Trauma Platoon in Taqaddum, Iraq, in 2005. He served as the White House doctor for Trump and also former presidents George W. Bush and Barack Obama, directing health care for not only the commander in chief but their senior staff and Cabinet officials.

Jackson told the *Avalanche-Journal* he had planned to retire from the military after Obama's presidency ended, but Trump convinced him to stay on staff. Now, he's poised to make the move from leading a small medical staff at the White House to a Cabinet secretary post.

He acknowledged it's a promotion he never expected.

"I really haven't planned my life out real meticulously," he told the paper. "I've just kind of tried to enjoy what I'm doing and do a good job, and one thing has led to another."

Jackson still has not retired from the military, but White House officials said he intends to do so as his confirmation process progresses. Active duty military officers cannot serve in Cabinet roles.

Although not a veteran yet himself, Jackson said he is familiar with the needs of his fellow service members and is focused on delivering "the absolute best care" to them.

"I've been overseas, and I've been deployed in combat zones with Marines and soldiers and airmen and sailors, and I've seen first-hand what they go through, the injuries and the things they come home with," he said.

"I've seen how that happens, and how devastating it is to them and their families. I just want to make sure that we do our part as a country, and we let them know that we appreciate that and we take care of them."

No timetable has been set for Jackson's confirmation hearings.

[Back to Top](#)

60 - ConnectingVets: [IAVA hopes VA Secretary nominee is the right choice](#) (9 April, Eric Dehm, 24k uvm; New York, NY)

The maelstrom continues to swirl atop the Department of Veterans Affairs. Shulkin is out, Wilkie is the acting secretary and Rear Admiral Ronny Jackson came out of left field as President Trump's nominee to permanently fill the position.

It's been a wild few weeks in regards to veteran issues on Capitol Hill, and Iraq and Afghanistan Veterans of America (IAVA) has been closely watching as it has all unfolded. Chief Policy

Officer Melissa Bryant says the organization has concerns over recent events, but maintains hope that it will all work out in the best interests of veterans.

During an appearance on the Morning Briefing, Bryant said the upcoming hearings on Admiral Jackson's nomination should shed quite a bit of light on the nominee's qualifications, and his vision for the future of the VA. At this point, Bryant believes it unfair to reach any conclusion on Jackson as there's simply not enough information available on him and until his thoughts on important matters like privatization are known, IAVA will maintain a "wait and see" approach to the presidential physician's nomination.

Bryant's full interview, focusing on the VA and other issues like the omnibus spending bill and IAVA's "Big 6" legislative items is available below.

[Back to Top](#)

61 - **ConnectingVets:** [VA pick Ronny Jackson says he's up for the job](#) (9 April, Matt Saintsing, 24k uvm; New York, NY)

President Donald Trump's pick to lead VA wants veterans to know he's up to the task and is dismissing fears he's not qualified to lead the second largest government agency, one with more than 300,000 employees.

Randy Jackson certainly has the medical chops as a Navy doctor, but veterans groups were largely caught off guard when Trump tweeted his intent to nominate him as Secretary of Veterans Affairs. In his first media appearance since Trump nominated him, Jackson says he's more than just a Naval officer.

"You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life and death decisions," Jackson told the Lubbock Avalanche-Journal.

"I think I've got what it takes, and you know, I don't buy into that argument at all."

Trump announced his intent to nominate Jackson March 28 in a tweet, citing his displeasure with the slow pace of improvements under David Shulkin's tenure.

Shulkin penned an op-ed the day after he was fired taking to task what he calls the administration's attempt to privatize the agency. However, Shulkin told USA TODAY that he believes Jackson can do the job, but he has to build the right team around himself.

In his interview with the Avalanche-Journal, Jackson didn't outline any policy or his views on how best to give veterans care. He did say, however, that "we owe the vets the absolute best care that's available out there."

"I've been overseas, and I've been deployed in combat zones with Marines and soldiers and airmen and sailors, and I've seen first-hand what they go through, the injuries and the things they come home with," said Jackson.

The VA has been beleaguered by scandals since 2014, when it was revealed veterans had died while waiting for appointments at a VA clinic in Phoenix, Ariz.

VA-18-0457-A-000868

If confirmed, Jackson will be the fourth Secretary of Veterans Affairs in four years.

62 - Becker's Hospital Review: [How a military promotion could complicate Dr. Ronny Jackson's VA nomination](#) (9 April, Leo Vartorella, 441k uvm; Glencoe, IL)

President Donald Trump's nomination of White House physician Ronny Jackson, MD, to lead the Department of Veterans Affairs has been complicated by his simultaneous promotion to two-star admiral, according to The Washington Post.

President Trump nominated Dr. Jackson for the promotion in late March, but he cannot stay on active duty and also direct the VA. A Senate aide told The Washington Post that lawmakers are confused on how to proceed with the dual nomination tasks. Dr. Jackson will retire from active duty upon assuming the role of VA secretary, but he stands to gain nearly \$1 million in pension benefits if the Senate confirms his promotion before retiring.

"This whole situation is very much out of the norm," the unnamed Senate aide told The Washington Post. "There's some question here whether [Dr. Jackson's] flag officer nomination will move forward given his VA nomination. It's all [to be determined], because he can't serve in both positions concurrently, so it wouldn't make sense for the Senate to move the nominations concurrently."

Dr. Jackson's nomination has faced criticism over his lack of formal management experience, but he believes his military career has adequately prepared him for the job's responsibilities.

"I've been in leadership school for 23 years now," Dr. Jackson told the Lubbock Avalanche-Journal, ". . . and I've been able to rise to the level of an admiral, a flag officer in the Navy. I didn't just stumble into that. So I've gotten a lot of leadership background, I've got a lot of leadership experience as a Navy officer, and I've got a lot of day-to-day leadership experience. You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life-and-death decisions."

[Back to Top](#)

63 - Task & Purpose: [Trump's VA Pick Faces A Dilemma Most Troops Would Love To Have](#) (9 April, Adam Weinstein, 102k uvm; New York, NY)

I'm about to suggest something that would've been unthinkable to me as an E-3: Put yourself in the admiral's shoes.

You're 23 years into a terrific career as a naval physician. For 12 of that, you've been the president's doctor, administering checkups to three very different POTUSes — high-stakes business, sure, but you've been doing it longer than most service members do anything.

You've got a star on your shoulder, and you've just been selected to collect a second one... along with a nice bump to \$14,268.30 in base monthly pay — which would also add a welcome

boost to your already-rich retirement pension, whenever you feel like actually retiring. You're a spry 50, so no need to worry about that just now.

But then a president asks you to do a daunting job you have no hard experience for: joining his Cabinet to run the Department of Veterans Affairs, the nation's second-largest publicly funded institution. You'll face a tough Senate confirmation. If confirmed, you'll enter a snake's nest of competing interests and ponderous bureaucracies, where your standing with the POTUS who hired you is in doubt from day to day.

Also, you'll have to forgo that second star and retire from the only organization that's employed you since med school. Like, now.

Such is the dilemma that Rear Adm. (lower half) Ronny Jackson, U.S. Navy, faces this week, as he prepares for Senate hearings about his nomination to run VA.

Jackson, a highly respected physician, first garnered headlines when he declared after President Donald Trump's first physical that the portly POTUS "might live to be 200 years old... He has incredibly good genes, and it's just the way God made him." Whatever else may have transpired between Jackson and Trump since then, the boss evidently has the impression that Jackson's got the right stuff to run 1,250 hospitals and clinics serving 9 million veterans across the U.S.

We should have such problems, you say: Take the extra star and the \$171,000 admiral's salary, or get out with an annual retirement of more than \$50,000 to take a prestigious six-figure job working directly for the president of the United States?

Of course, there's a lot more to it than money. Here are three reasons Jackson isn't living the dream, so much as facing a nightmare:

His choice isn't really a choice.

You're an active duty military officer, and the president asked you point blank to do a thing that is neither illegal nor immoral. Could you really say no? Perhaps, but most officers wouldn't, even if they hated the proposal. And though he's all in, it's not at all clear where Jackson really stands on his job offer; White House sources tell the Washington Post that the admiral "initially questioned whether, as a career Navy officer with limited managerial experience, he's an optimal candidate to lead an agency of more than 360,000 employees."

He's being set up for failure.

Lately, Jackson's been expressing enthusiasm about the job Trump offered him. "I've been able to rise to the level of an admiral, a flag officer in the Navy. I didn't just stumble into that," he told a hometown paper when asked what qualified him to run VA. "I think I've got what it takes." That's undoubtedly true! But far more politically savvy hospital administrators and CEO types — like David Shulkin and Robert McDonald — have been smashed by the daily grind of nervous veterans' groups, rattled civil servants, and strident political lobbyists who cloy the VA secretary on a daily basis. The uniform provided Jackson a modicum of safety: Tell your truth and take your orders. (Not that it did Lt. Gen. H.R. McMaster any good.) Now you're a civilian, and you going to have to bring bad news the president's way — with a lot more at stake than another star.

He's probably not gonna make it that far.

Nominating a sitting flag officer to run VA is largely unprecedented — Gen. Omar Bradley did it after World War II, until pro-privatization vets' groups pushed him out in 1946 — and nominating a flag officer with a promotion pending before the Senate has caused a bunch of procedural problems that the Trump administration doesn't seem to care about, leaving “lawmakers flummoxed about how to proceed,” one Senate aide suggested to the Washington Post. “There's some question here whether [Jackson's] flag officer nomination will move forward given his VA nomination. It's all TBD, because he can't serve in both positions concurrently, so it wouldn't make sense for the Senate to move the nominations concurrently.” Senators are already expected to squeeze Jackson hard, on television, on his qualifications and preparations for a Cabinet post. The pending promotion just gives them another reason to question whether the VA post is the best use of Jackson's talents — and whether the White House that tapped him has its crap together.

In the end, this grunt's dream — which prestigious six-figure gig to take? — is a career officer's nightmare: Jackson could avoid an iffy nomination and a thankless job while collecting a \$25,000-a-year promotion... but that would require him to say “No, sir” to a president. So far, Jackson's doing what you'd expect a career officer to do: trying to polish this turd. For his sake and the sake of vets all over America, here's hoping that shit will keep a shine for a while.

[Back to Top](#)

64 - Washington Post: [Senate Republicans express concerns about Trump's choice to lead Veterans Affairs](#) (11 April, Seung Min Kim, 43.9M uvm; Washington, DC)

Ronny L. Jackson, President Trump's choice to lead the Department of Veterans Affairs, is facing mounting skepticism from Senate Republicans over whether he has the management experience to lead the nation's second-largest bureaucracy.

The comments from several GOP senators, particularly those with influence on veterans' issues, signal Jackson will have to work overtime to convince not just Democrats but Trump's own party that he is qualified to oversee the beleaguered agency. That challenge comes at a time when Senate Republicans are already juggling other controversial nominations that will consume much of the political oxygen on Capitol Hill.

Jackson has served three administrations under both parties as the White House physician yet has little management experience on his résumé as he gears up to take over a sprawling agency of 360,000 workers and deal with the vexing challenges of providing health care and benefits to military veterans. Republicans say they know little to nothing about Jackson and are quickly studying up as they prepare for one-on-one meetings with the nominee.

“Certainly, I do have concerns about his experience, as far as managing people,” said Sen. John Boozman (R-Ark.), who sits on the Senate Committee on Veterans' Affairs, which will vet Jackson's nomination. “There is some concern about whether he's been in a position to lead an organization like that.”

Sen. Jerry Moran (R-Kan.), another committee member, also expressed worries about Jackson.

White House physician Ronny L. Jackson is facing questions about whether he has the right experience to lead the Department of Veterans Affairs. (Jabin Botsford/The Washington Post)

"The VA is a difficult place to manage, regardless of what your background experience is. I want to know more about how he believes that he's capable of fulfilling those responsibilities, and I have a wide array of questions in regard to his experience and background," Moran said. "I need to be convinced that he can make a difference at a department in which the culture and the upper echelons of its leadership need to have somebody who can take charge."

At best, Jackson is getting a tepid reaction from Senate Republicans, many of whom had praised his ousted predecessor, David Shulkin, even if they occasionally clashed with him over policy. Democrats were also vocal supporters of Shulkin, the sole Cabinet holdover from the Obama administration and who was the rare Trump-appointed official who sailed through the Senate with no objections.

A White House spokesman did not return a request for comment Tuesday on the Senate Republicans' concerns surrounding Jackson's qualifications. But the White House has defended Jackson's credentials in the past, and the physician himself laid out his leadership background in an interview with a local newspaper in Texas published over the weekend.

"I've been in leadership school for 23 years now. . . . And I've been able to rise to the level of an admiral, a flag officer in the Navy. I didn't just stumble into that," he told the Lubbock Avalanche-Journal.

He added: "I think I've got what it takes, and you know, I don't buy into that argument at all."

Democrats are also questioning whether Jackson can handle oversight of the massive bureaucracy, which is second only to the Pentagon in size. And they're making it clear that Jackson's nomination will be intertwined with the broader fight about whether veterans should have more access to private doctors at taxpayers' expense.

Shulkin had worked with senators on a bipartisan compromise that would largely keep VA in control if veterans can obtain private health care, while removing some restrictions. But the White House has pushed for a more aggressive turn toward privatization, which has alarmed Democrats and some veterans' groups who worry about outsourcing so much of veterans' care.

Sen. Patty Murray (D-Wash.) said she wants to hear from Jackson that he is "unequivocally opposed to privatization."

"This is also a concern across the board, from all sides and from the veterans organizations that want to see a VA that was promised to them," Murray said. "We don't want to send the millions of veterans out into a system where the doctors meeting them may not be qualified."

Compounding the challenges for the Trump administration is that Jackson is just one of a handful of Cabinet vacancies that the Senate is suddenly facing after a recent wave of dismissals and resignations.

Republicans are scrambling to quickly install Mike Pompeo as secretary of state. His nomination to be CIA director was supported by 15 members of the Senate Democratic Caucus last year, but he will face a much more sharply partisan confirmation battle to become the nation's chief diplomat. Gina Haspel's nomination to succeed Pompeo at the CIA will be a greater challenge for the administration, with both Democrats and Republicans raising questions about her involvement in the agency's "enhanced interrogation" program, which critics say is tantamount to torture.

Both nominees are already facing opposition from Sen. Rand Paul (R-Ky.). Pompeo's confirmation hearing is scheduled for Thursday. Haspel's paperwork has yet to be submitted to the Senate and a hearing is not on the books. Jackson's hearing has yet to be scheduled.

Senators are also carefully watching the controversies surrounding Scott Pruitt, the embattled administrator of the Environmental Protection Agency, which would be another challenging vacancy to fill in an election year.

Republican lawmakers are much more eager to focus on touting their legislative accomplishments, such as the recently passed tax law, rather than grueling confirmation battles that will only ignite partisan tensions in the Senate.

"The confirmations, they're important," Moran said. "But it is very difficult for us to deal with other issues, any things that are pending, that are important to the country when we're consumed with confirmations, and confirmations that are ones that we had confirmed within the last year or so. And so it reduces the time in which we have to pursue other important issues for the country."

"It would be good to have consistency [among the Cabinet secretaries] to develop the relationships on Capitol Hill," said Sen. Mike Rounds (R-S.D.). "I think today, that is lacking with this administration."

Senate Republicans and the White House have hammered Democrats, most recently this week, for stalling key administration nominees. But by adding more Cabinet-level picks to the Senate's to-do list, the administration is only further delaying consideration of those lower-level picks.

The White House keeps a list of nominees that ranks each of them by priority, according to one GOP official familiar with the tally. Once Cabinet-level nominations are moved to the top, it moves other picks down, potentially for months, the official said.

Sen. Jon Tester (Mont.), the top Democrat on the veterans' committee, said he urged Jackson to submit his paperwork to the Senate soon so a review of his qualifications can begin.

"I think both the management experience as well as his view on where he wants to take VA is really going to be important," Tester said. "I'm very concerned about VA right now."

When asked if he believes Jackson is qualified to run the agency, Sen. Johnny Isakson (R-Ga.), who chairs the veterans' committee, said, "I don't know enough to know anything."

"I'm a blank slate," said Isakson, who has spoken on the phone with Jackson. Senate Majority Leader Mitch McConnell (R-Ky.) has yet to comment on Jackson's nomination.

Sen. Thom Tillis (R-N.C.), a member of the veterans' committee, also said he has yet to make a judgment on whether Jackson is qualified. Sen. Dan Sullivan (R-Alaska), a fellow committee member, said he wants to question Jackson about "his experience, or lack thereof, on the management side."

"That's the most difficult, frustrating bureaucracy in Washington," Sullivan said. "I think most people would absolutely agree with that."

[Back to Top](#)

65 - The Hill: [VA privatization fight could erupt in confirmation hearing](#) (11 April, Nathaniel Weixel, 11.9M uvm; Washington, DC)

Long-simmering tensions about privatizing the Department of Veterans Affairs (VA) could erupt into a confirmation battle over President Trump's pick to lead the department.

Trump's decision to oust former VA Secretary David Shulkin late last month and replace him with White House physician Ronny Jackson stoked speculation that the White House wants to allow veterans more access to private-sector health-care providers.

In an op-ed published in The New York Times just hours after he was removed, Shulkin blamed his ouster on forces within the administration that he said are pushing hard for privatization "The advocates within the administration for privatizing VA health services ... saw me as an obstacle to privatization who had to be removed," Shulkin wrote.

Dismantling the department's health-care system "is a terrible idea," Shulkin wrote, adding that the private sector "is ill-prepared to handle the number and complexity of patients that would come from closing or downsizing VA hospitals and clinics."

Groups like the Koch brothers-backed Concerned Veterans for America (CVA) are pushing to loosen current restrictions on veterans receiving private-sector care.

Democrats and veterans' advocates are concerned that the White House is taking those calls for privatizing the VA system seriously, but the VA denied last week that there is any push to privatize its health system.

"There is no effort underway to privatize VA, and to suggest otherwise is completely false and a red herring designed to distract and avoid honest debate on the real issues surrounding veterans' health care," the agency said in a statement.

Democrats and veterans' advocacy groups have been wary of Republican efforts to privatize the VA since before Trump took office.

In a 2016 campaign rally in Virginia Beach, Trump called the VA corrupt and inefficient.

"Veterans should be guaranteed the right to choose their doctor and clinics, whether at a VA facility or at a private medical center," Trump said. "We must extend this right to all veterans."

Senate Democrats and veterans groups have not yet drawn any hard lines against Jackson, partly because they said they don't know what his positions are.

Verna Jones, the executive director of the American Legion, said she would have to sit down and speak with Jackson before passing judgment on his nomination.

"It seems like people are putting the cart before the horse. Jackson hasn't had a confirmation and none of us know his views," Jones said. "To be clear, the Legion opposes privatization. How all this ties into Jackson — we owe it to him to wait and see."

Jackson is an active-duty Navy admiral who has worked as the White House physician for three presidents. Lawmakers have expressed skepticism over whether Jackson, who doesn't have experience working with the VA or managing a health-care organization, has the qualifications to run the agency.

Senate Democrats on the Veterans' Affairs Committee said they also don't know where Jackson stands on privatization. Still, they don't trust the administration's motives and are gearing up for a fight.

Sen. Jon Tester (D-Mont.), the ranking Democrat on the committee, told The Hill he has only had a brief phone call with Jackson since Trump nominated him for the position.

"There are two areas of concern ... one is privatization and the other is management. So that's what we're going to focus on," Tester said.

"Our job is to strengthen the VA in order to provide high-quality care to our veterans, not dismember it," Sen. Bernie Sanders (I-Vt.) said in a statement. "The Senate Committee on Veterans Affairs should not approve any nominee for secretary who supports the privatization of the VA."

Sen. Richard Blumenthal (D-Conn.) told The Hill privatization is a "serious concern" that he hopes to address with Jackson.

A spokeswoman for the VA committee said a hearing would be scheduled as soon as Jackson submits his paperwork and finishes a background check.

Jackson's nomination could also spotlight legislation that is intended to make it easier for veterans to get care outside the VA system without completely privatizing the system.

The legislation from Tester and Senate Veterans' Affairs Committee Chairman Johnny Isakson (R-Ga.) has backing from major veterans groups such as the American Legion and Veterans of Foreign Wars.

The bill would overhaul VA Choice, a temporary program that allows veterans to seek care outside the VA network — but only in cases where they have to wait more than 30 days for an appointment or drive more than 40 miles to a facility.

It would eliminate the waiting period and distance requirements and allow veterans to seek community care outside the VA if veterans and their providers agree it's the best method of treatment.

But the Koch-backed CVA has lobbied hard against it, because they think it doesn't loosen regulations enough.

Opposition has also come from the left. House Democrats blocked the bill from being included in the omnibus funding bill that passed last month because they think it moves the VA too far toward privatization.

A Senate VA committee aide said Isakson has spoken to Majority Leader Mitch McConnell (R-Ky.), and hopes to bring the bill to the floor for a stand-alone vote in the next few weeks.

[Back to Top](#)

66 - American Thinker: [VA privatization debate could derail new secretary's confirmation](#)
(11 April, Rick Moran, 4.8M uvm; El Cerrito, CA)

When Donald Trump fired his secretary of Veterans Affairs, David Shulkin, and named his personal physician, Rear Admiral Ronny Jackson, to replace him, red flags went up on Capitol Hill and among some veterans groups who oppose privatizing the V.A.

Indeed, in a parting shot to his detractors within the administration, Shulkin wrote an op-ed in the New York Times warning against forces inside the White House that want to privatize the entire agency.

The Hill:

In an op-ed published in the New York Times just hours after he was removed, Shulkin blamed his ouster on forces within the administration that he said are pushing hard for privatization[.]

"The advocates within the administration for privatizing V.A. health services ... saw me as an obstacle to privatization who had to be removed," Shulkin wrote.

Dismantling the department's health care system "is a terrible idea," Shulkin wrote, adding that the private sector "is ill-prepared to handle the number and complexity of patients that would come from closing or downsizing V.A. hospitals and clinics."

Groups like the Koch brothers-backed Concerned Veterans for America (CVA) are pushing to loosen current restrictions on veterans receiving private sector care.

Very few veterans groups want to eliminate the V.A. or downsize it. But it's a convenient red herring for liberal groups and Democrats in Congress to bash Trump:

"There is no effort underway to privatize VA, and to suggest otherwise is completely false and a red herring designed to distract and avoid honest debate on the real issues surrounding veterans' health care," the agency said in a statement.

Democrats and veterans' advocacy groups have been wary of Republican efforts to privatize the VA since before Trump took office.

In a 2016 campaign rally in Virginia Beach, Trump called the VA corrupt and inefficient.

"Veterans should be guaranteed the right to choose their doctor and clinics, whether at a VA facility or at a private medical center," Trump said. "We must extend this right to all veterans."

Senate Democrats and veterans groups have not yet drawn any hard lines in the sand [sic – a line in the sand...? –DJB] against Jackson, partly because they said they don't know what his positions are.

Verna Jones, the executive director of the American Legion, said she would have to sit down and speak with Jackson before passing judgment on his nomination.

"It seems like people are putting the cart before the horse. Jackson hasn't had a confirmation and none of us know his views," Jones said. "To be clear, the Legion opposes privatization. How all this ties into Jackson – we owe it to him to wait and see."

That's a rare sentiment in these partisan times. But Democrats will also look to diminish Jackson by claiming he is unqualified to lead such a large agency:

Jackson is an active-duty Navy admiral who has worked as the White House physician for three presidents. Lawmakers have expressed skepticism over whether Jackson, who doesn't have experience working with the VA or managing a health care organization, has the qualifications to run the agency.

Senate Democrats on the Veterans' Affairs Committee said they also don't know where Jackson stands on privatization. Still, they don't trust the administration's motives and are gearing up for a fight.

AT contributor Ed Timperlake, a former V.A. assistant secretary, weighed in on Jackson's qualifications:

The selection of Admiral Jackson is being attacked on the issue of his lack of significant command qualifications. In fact, Jackson's immediate experience will ultimately prove to be a boon for the VA. Navy doctors are trained professionals for big-deal thinking. I would never typecast a Navy doctor with the rank of Admiral as someone who doesn't understand how to take command of an organization the size of the VA.

As for privatization of the V.A., it's not going to happen. Every major veterans group is opposed to privatizing the agency, and most Republicans oppose it, too. But the scandals in recent years involving unacceptable wait times for veterans who need care have begun the process of much needed reforms that include some care being supplied in certain circumstances by the private health care industry. As Mr. Timperlake points out, there may be issues with timely payments by the government to private providers, which he recommends an agency-wide audit to discover. But with so many returning veterans from Iraq, Afghanistan, and other combat zones who have serious health issues, it seems that an expansion of choices for veterans is logical and necessary.

How this impacts Jackson's confirmation isn't clear, except that Democrats will seek any opportunity to damage the president, and the Jackson nomination is setting up to give them exactly what they want.

[Back to Top](#)

67 - Herald-Tribune (Creators Syndicate): [McCaughey: Marching orders for Trump's new VA secretary](#) (11 April, Betsy McCaughey, 871k uvm; Sarasota, FL)

Since President Donald Trump ousted Veterans Affairs Secretary David Shulkin, the question reverberating in Washington is whether Trump's new pick, Rear Adm. Ronny Jackson, is capable of heading a department with 360,000 employees and 9 million vets under its care.

Senate Democrats carp he lacks experience running “a complex organization.”

Experience is overrated. President Barack Obama’s VA Secretary, Robert McDonald, failed miserably, despite having run Procter & Gamble. Vets died on phony wait lists on McDonald’s watch.

Jackson’s last combat role was with a surgical shock trauma unit in Iraq. Sounds like good preparation for battling the killer VA bureaucracy.

Jackson also shares Trump’s vision of putting vets in the driver’s seat about their own medical care. Here’s what Jackson can learn from his predecessors’ failures.

Lesson 1: Make vets the priority, not protecting the VA bureaucracy. Shulkin refused to do that. Trump has pledged to fix the Veterans Choice Program so vets can see private doctors when they decide it’s necessary. VCP was created in 2014 after revelations that sick vets were dying on wait lists at VA hospitals. VCP is supposed to allow vets to get private care if they live far from a VA facility or have waited too long. But VCP’s red tape makes seeing an outside doctor almost impossible. That’s deliberate. Sen. Bernie Sanders, who co-authored VCP legislation, relies on union campaign contributions and will do just about anything to protect union jobs at the VA. Keeping vets trapped at the VA with no alternatives is a job-protection racket.

Shulkin was part of that racket, too. He misled Trump and Congress with double talk about reforming VCP “in a way that will work for veterans and work for VA.” But protecting VA bureaucracy shouldn’t be a consideration, when vets’ lives are at stake.

Shulkin showed his true colors when Congress passed last month’s big spending package. Trump and congressional Republicans had pushed hard to include VA reforms helping vets see outside doctors.

But the key person to sell this to Congress was Shulkin, and he equivocated, allowing Democrats to block its passage. It was a setback for Trump and vets. No wonder Shulkin was canned days later -- not because of flimsy travel expense abuse allegations.

Lesson 2: Cut wait times in half at the VA.

Shulkin claimed success in reducing waits, but that’s questionable. VA bureaucrats are still fudging the numbers, according to the inspector general.

Here’s a remedy. A whopping 47 percent of VA health care users are 65 or older. They need angioplasty and bypass surgery like other seniors. They use the VA to avoid Medicare’s out-of-pocket expenses, because their median annual income is only \$24,000. Picking up their co-pays would cost very little and encourage them to use Medicare instead of the VA Bingo, and it would cut VA wait times by nearly half, making room for younger vets to get combat-related care only the VA can provide.

Lesson 3: Don’t count on VA bureaucrats to fess up when things go wrong. Jackson should use unannounced audits to uncover dangerous conditions at medical facilities, instead of trusting officials to report them up the chain of command.

An inspector general report last month exposed “a breakdown of core services” at medical centers under Shulkin’s command. At the Washington, D.C., facility, under Shulkin’s nose,

VA-18-0457-A-000878

patients were needlessly overexposed to anesthesia due to inventory mismanagement. After patients were put under, surgeons sometimes discovered they were out of equipment and had to race across the street to borrow it from another hospital or reschedule the procedure. Shulkin claims he could “not recall” ever being notified of such problems. He expected to be notified?

Pundits are predicting a confirmation battle. The smart money should be on Jackson. He’s combat-tested. Disregard the partisan drivel about his lack of experience running a big organization. It’s coming from the same people who had no problem making a community organizer the president.

[Back to Top](#)

68 - Fayetteville Observer: [Our View: Does VA nominee have the right stuff?](#) (11 April, Editorial Board, 439k uvm; Fayetteville, NC)

We hope Robert Wilkie enjoys the challenge of running the Department of Veterans Affairs, because he may have the job for a bit longer than his “acting secretary” title might indicate. Storm clouds are already gathering for President Trump’s nominee for the permanent position, Navy Rear Adm. Ronny Jackson.

Storm clouds, and rough seas, may be appropriate for the man whose unconventional route to the nomination was primarily hitting it off with the commander in chief while serving as his personal physician.

His path to becoming a flag officer certainly involved command responsibilities at times, and he’s by all descriptions an excellent physician, dedicated to medicine, and he clearly sees the need for providing great care for the nation’s veterans.

But we don’t see anything that prepares him to run the federal government’s second-largest bureaucracy, supervising more than 360,000 workers spread across the country in an unwieldy bureaucracy, providing health care and benefits to veterans.

Members of the Senate Committee on Veterans Affairs, which will hold hearings on his nomination, are keptical. That includes the committee’s Republican members. One of them, Sen. Jerry Moran of Kansas, told The Washington Post that, “The VA is a difficult place to manage, regardless of what your background experience is. I want to know more about how he believes that he’s capable of fulfilling those responsibilities and I have a wide array of questions in regard to his experience and background.” Moran added that, “I need to be convinced that he can make a difference at a department in which the culture and the upper echelons of its leadership need to have somebody who can take charge.”

That was the undoing of former VA Secretary David Shulkin, a physician with a resume that included running big hospital systems. Shulkin was the sole cabinet holdover from the Obama administration and as recently as last summer, the president said he was the last member of his cabinet who’d hear the Trump trademark, “You’re fired.” Six months later, that’s exactly what Shulkin heard after he was caught in the nasty crossfire of VA bureaucrats trying to thwart him, and of others determined to privatize many VA services. Shulkin stood with most national veterans groups in opposing privatization. But other high-ranking VA leaders succeeded in undermining him and it was clear that he was losing control of the organization.

Asked about his lack of large-scale management experience in a GateH Gouse Media interview, Jackson said, "I've been in leadership school for 23 years now. ... And I've been able to rise to the level of admiral, a flag officer in the Navy." Jackson added that, "You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life-and-death decisions. I think I've got what it takes, and you know, I don't buy into that argument at all."

Maybe Jackson should talk with Ben Carson, the brilliant pediatric neurosurgeon who has had a rough first year trying to manage the Department of Housing and Urban Development. He's told several interviewers lately that brain surgery was a lot easier than what he's trying to do now.

Meanwhile, acting VA chief Wilkie, a Fayetteville native and veteran of military service and several management tours at the Defense Department, is settling in at VA headquarters. The Post reported that he sent out a video to all VA staffers, urging them to communicate openly. He emphasized the VA's mission of caring for our veterans. "Being with you today is the culmination of a lifetime of watching those who have borne the battle." We hope he's able to stay out of the management warfare that did in David Shulkin, but the battle over privatization is likely to continue. And the country needs a permanent VA secretary who can take control, lead the agency and solve its problems.

Jackson News Clips

March 29 – April 12, 2018

1 - Washington Post (AP): [Trump's VA pick draws concern over thin management record](#)

(29 March, Hope Yen and Calvin Woodward, 43.9M uvm; Washington, DC)

President Donald Trump's selection of his White House doctor to run the massive Department of Veterans Affairs triggered concern Thursday among lawmakers and veterans groups about whether he has the experience to manage an agency paralyzed over Trump's push to expand private care. Ronny Jackson, a Navy rear admiral entrusted with the health of the past three presidents, is a lifelong physician whose positions on privatizing operations in the second largest federal department...

[Hyperlink to Above](#)

2 - Washington Post: [Trump's pick to head veterans department faces skepticism over his experience](#)

(29 March, Lisa Rein, Seung Min Kim, Emily Wax-Thibodeaux, and Josh Dawsey, 43.9M uvm; Washington, DC)

The White House was thrown on the defensive Thursday over President Trump's choice to lead the Department of Veterans -Affairs, forcing officials to fend off mounting skepticism that Ronny L. Jackson has the experience to run the government's second-largest agency. Trump announced by tweet late Wednesday that the White House physician would succeed ousted secretary David Shulkin, surprising veterans groups and lawmakers...

[Hyperlink to Above](#)

3 - Wall Street Journal: [Lawmakers Respond Cautiously to Little-Known VA Pick Ronny Jackson - Key senators on panel say they don't know enough about White House doctor to form an opinion about his ability to lead a vast bureaucracy](#)

(29 March, Louise Radnofsky and Peter Nicholas, 43.6M uvm; New York, NY)

Capitol Hill lawmakers reacted guardedly to President Donald Trump's nomination of the White House physician to head the Department of Veterans Affairs, with key members noting that they know little about him. Dr. Ronny Jackson, a U.S. Navy rear admiral who has served as a White House physician during the past three administrations, is slated to succeed Secretary David Shulkin, who was ousted Wednesday.

[Hyperlink to Above](#)

4 - USA Today (Video): [6 big things the new Veterans Affairs chief will have to address](#)

(29 March, Donovan Slack and Dennis Wagner, 36.8M uvm; McLean, VA)

On the front lines at the Department of Veterans Affairs — in the agency's 1,240 hospitals and clinics — it doesn't much matter these days who holds the secretary's job in Washington. David Shulkin, who was fired Wednesday, was the third VA secretary in four years. If President Trump's nominee to lead the agency, physician and Navy Rear Adm. Ronny Jackson, is confirmed, he will be the fourth.

[Hyperlink to Above](#)

5 - Politico: [Trump's VA pick blindsides staff, deepens agency disarray - 'He's got a department that's in turmoil,' a former VA secretary said. 'It's in crisis.'](#) (29 March, Lorraine Woellert, Eliana Johnson and Connor O'Brien, 23.9M uvm; Arlington, VA)

The timing of President Donald Trump's announcement to name Rear Admiral Ronny Jackson to lead Veterans Affairs was a snap decision that surprised his own chief of staff and knocked the government's second-largest agency, already bedeviled by scandal, deeper into disarray. White House chief of staff John Kelly had spoken with David Shulkin by phone Wednesday morning, reassuring the now-former VA secretary that he wouldn't be fired by tweet that afternoon.

[Hyperlink to Above](#)

6 - Task & Purpose: [What's In Store For The Next VA Chief? Let's Break It Down](#) (29 March, James Clark, 102k uvm; New York, NY)

It's been an awkwardly long time coming, but as of yesterday afternoon embattled Veterans Affairs secretary David Shulkin is out of a job. The news comes after a month and a half of uncertainty that began when a scathing inspector general report detailed "serious derelictions" in expensing a Europe trip last summer. And then there were all the accusations and counter accusations of political infighting and rumors of possible replacements — at least all that is over:

[Hyperlink to Above](#)

7 - Washington Post: [Opinions - Surprise: Trump's newest Cabinet nominee has no relevant experience](#) (29 March, Eugene Robinson, 43.9M uvm; Washington, DC)

You can't make this stuff up: President Trump has announced he will nominate a medical doctor who has no discernible management experience to run the second-largest agency in the federal government. Can presidents be sued for malpractice? The man Trump has named to become secretary of veterans affairs, Ronny L. Jackson, happens to be the president's personal doctor.

[Hyperlink to Above](#)

8 - Washington Post (The Fix): [Who is Trump's new Veterans Affairs pick, Ronny Jackson?](#) (29 March, Aaron Blake, 43.9M uvm; Washington, DC)

The seemingly never-ending parade of staff changes in the Trump administration continued apace Wednesday, with the president announcing that Veterans Affairs Secretary David Shulkin is out and that White House physician Ronny L. Jackson will replace him. Jackson's name will be familiar to political watchers across the country for one main reason: He's the physician who delivered what some felt to be a suspiciously rosy picture of Trump's health in January.

[Hyperlink to Above](#)

9 - FOX News: [Ronny Jackson picked by Trump to lead the VA: What to know about the president's physician](#) (29 March, Kaitlyn Schallhorn, 32.5M uvm; New York, NY)

President Trump gave Dr. Ronny Jackson a clean bill of health in March — to run the Department of Veterans Affairs. A Navy rear admiral, Jackson is the president's personal physician who rose to prominence after he addressed the press from the White House briefing room in January to discuss Trump's health.

[Hyperlink to Above](#)

10 - FOX News (Video): [John Brennan: Trump's nomination for VA secretary is 'terribly misguided'](#) (29 March, Nicole Darrah, 32.5M uvm; New York, NY)

Former CIA Director John Brennan once again took a shot at President Trump on Twitter Thursday, saying he believes the decision to nominate Adm. Ronny Jackson to run the Department of Veterans Affairs is "terribly misguided." "I personally know and greatly respect Ronny Jackson....as a terrific doctor and Navy officer," Brennan tweeted. "However, he has neither the experience nor the credentials to run the very large and complex VA.

[Hyperlink to Above](#)

11 - New York Times: [Op-ed - Ronny Jackson's Disturbing Lack of Independence](#) (29 March, Norman L. Eisen and Bandy X. Lee, 30M uvm; New York, NY)

In announcing Dr. Ronny Jackson, the White House physician, as his choice to be the new secretary for veterans affairs, President Trump has taken his latest misstep in what has been the worst presidential personnel process in modern history. We take no pleasure in saying so, including because one of us (Mr. Eisen) worked with Dr. Jackson in the White House, was even treated by him...

[Hyperlink to Above](#)

12 - ABC News (Video): [Veterans groups respond cautiously to VA secretary nomination](#) (29 March, Sarah Kolinovsky, 24.2M uvm; New York, NY)

Despite his active duty status as a Navy rear admiral (lower half) and his medical experience, veterans service organizations are responding cautiously to the nomination of Dr. Ronny Jackson for secretary of Veterans Affairs, with some expressing concern about his lack of managerial experience or what his views are on reforming the VA.

[Hyperlink to Above](#)

13 - The Atlantic: [The Doctor Who Suddenly Got Nine Million Patients - For a position that demands high-level policy expertise, President Trump appointed his personal physician, Ronny Jackson.](#) (29 March, James Hamblin, 23.9M uvm; Washington, DC)

Nine million veterans will soon be under the care of the emergency-physician rear admiral Ronny Jackson, pending confirmation of his appointment Wednesday to lead the U.S. Department of Veterans Affairs. This seemingly mundane appointment—a doctor and naval officer with years of experience as White House physician under both Trump and Obama...

[Hyperlink to Above](#)

14 - The Hill: [White House: Trump has 'full confidence' in presidential physician to lead VA](#) (29 March, Max Greenwood, 11.9M uvm; Washington, DC)

President Trump has "full confidence" in White House physician Ronny Jackson's ability to head the Veterans Affairs (VA) Department, a spokeswoman for the White House said Thursday, despite reported concerns from some aides. "As I said earlier, the president has full confidence in Adm. Jackson," White House deputy press secretary Lindsay Walters told reporters.

[Hyperlink to Above](#)

15 - The Hill: [GOP, vet groups react with caution to Trump VA pick](#) (29 March, Rebecca Kheel, 11.9M uvm; Washington, DC)

Senators and influential veterans groups are withholding judgment on President Trump's pick to lead the Department of Veterans Affairs (VA), a Navy doctor with no experience leading a federal bureaucracy. Both the Republican chairman and the Democratic ranking member of the Senate Veterans Affairs Committee said only that they look forward to meeting Rear Adm. Ronny Jackson. Several veterans groups expressed some concern about Jackson's qualifications...

[Hyperlink to Above](#)

16 - Military.com: [Others Considered for VA Job Before Trump Picked His Personal Doctor](#) (29 March, Richard Sisk, 9M uvm; San Francisco, CA)

Rear Adm. Ronny L. Jackson, the personal physician to President Donald Trump, was not his first choice to replace fired VA Secretary Dr. David Shulkin, the White House said Thursday. "The president did have some early individuals that he was looking at but continuously went back to Dr. Jackson to fulfill this role as VA secretary," White House deputy press secretary Lindsay Walters told reporters.

[Hyperlink to Above](#)

17 - Government Executive: [Lawmakers, Veterans Groups and Former Officials Worry VA Nominee Is Not 'Up to the Job'](#) (29 March, Eric Katz, 870k uvm; Washington, DC)

With David Shulkin now ousted from the Veterans Affairs Department, all eyes are on President Trump's nominated replacement to see where he comes down on the most pressing issue at VA: How large a role should the private sector play in providing health care to veterans? One problem for observers and stakeholders in the veteran community is Trump's pick, Dr. Ronny Jackson, has very little experience in public policy or veterans issues...

[Hyperlink to Above](#)

18 - PBS: [Who is Ronny Jackson, Trump's pick to lead the Department of Veterans Affairs?](#) (30 March, Gretchen Frazee, 22M uvm; Arlington, VA)

Rear Admiral Ronny Jackson has garnered almost universal praise for his skills as a military physician and his character. But his appointment to lead the Department of Veterans Affairs is proving divisive as critics point to his lack of experience managing a large organization.

[Hyperlink to Above](#)

19 - NPR (Morning Edition, Audio): [Trump Pick For VA Secretary May Get Additional Scrutiny](#) (30 March, 22M uvm; Washington, DC)

Noel King talks to Democratic Sen. Richard Blumenthal about President Trump's decision to fire VA Secretary David Shulkin, and the confirmation process of the president's pick to replace him.

[Hyperlink to Above](#)

20 - MSNBC (Video): [Reines: 'There's never been a no vote against a VA nominee, this might be the time to change that record'](#) (30 March, 11.8M uvm; New York, NY)

In yet another White House personnel shakeup, President Trump ousts Secretary of Veterans Affairs David Shulkin and appoints his personal doctor Ronny Jackson. Philippe Reines, former adviser to then-Secretary of State Hillary Clinton, and Shermichael Singleton, former Deputy Chief of Staff for the Department of Housing and Urban Development, discuss with Kristen Welker whether the president's new appointee is qualified for the position.

[Hyperlink to Above](#)

21 - The Hill: [Trump VA pick hesitated to take job: report](#) (30 March, Max Greenwood, 11.8M uvm; Washington, DC)

White House physician Ronny Jackson initially hesitated at the suggestion that he be nominated to lead the Department of Veterans Affairs, The Washington Post reported Thursday. Jackson was reportedly shocked when Trump tapped him for the top job at the nation's second largest government agency, the Post reported, citing senior White House officials.

[Hyperlink to Above](#)

22 - New York Daily News: [A novice in the VA OR: Dr. Ronny Jackson is a very puzzling choice to lead a Veterans Affairs turnaround](#) (31 March, 26.1M uvm; New York, NY)

The 20 million-plus veterans of the U.S. Armed Forces served this country with the eminently deserved expectation that their country would serve them. Now even as the heart of that trust, the VA health care system, recovers from deadly delays in getting patients care, and after summarily dispatching his first head of the U.S. Department of Veterans Affairs, David Shulkin, President Trump inflicts risky experimental treatment, nominating as the new chief a doctor who has never come close to the operating room of managing a large organization — never mind one with nearly 378,800 employees.

[Hyperlink to Above](#)

23 - NPR (All Things Considered, Audio): [Veteran Congressman On Trump's New VA Secretary Nominee](#) (31 March, 22M uvm; Washington, DC)

President Trump has picked Rear Adm. Ronny Jackson to be secretary of Veterans Affairs. Veteran and Rep. Mike Coffman (R-Colo.) tells NPR's Michel Martin why he supports the new leadership.

[Hyperlink to Above](#)

24 - The Washington Post (Video): [Does Trump believe in the value of expertise, or does he disdain it?](#) (31 March, Dan Balz, 43.9M uvm; Washington, DC)

The shake-up at the Department of Veterans Affairs — out with Secretary David Shulkin and potentially in with White House physician Ronny L. Jackson — is being portrayed, correctly, as President Trump surrounding himself with Cabinet officials with whom he feels personally comfortable. A broader question arises, however, over the extent to which this president prizes or disparages expertise.

[Hyperlink to Above](#)

25 - Politico Magazine: [When Our President Put His Doctor in Charge of Everything](#) (31 March, Marius Stan and Vladimir Tismaneanu, 23.9M uvm; Arlington, VA)

No one knows more about leaders' bodies than their personal physicians. Notoriously, Joseph Stalin mistrusted the Kremlin doctors, whom he suspected of trying to poison him and the other Soviet magnates. In February 1953, a month before Stalin passed away, they were arrested and horribly tortured. The ones still left alive were too terrified to treat him as he lay dying in March.

[Hyperlink to Above](#)

26 - CBS News (Face the Nation, Video): [Sen. Bernie Sanders on "Face the Nation," April 1, 2018](#) (1 April, 26M uvm; New York, NY)

President Trump announced the ouster of David Shulkin as secretary of Veterans Affairs this week, nominating longtime White House physician Adm. Ronny Jackson as his replacement. Shulkin had come under withering criticism from lawmakers on Capitol Hill over his travel expenses and a blistering inspector general's report on conditions at the VA.

[Hyperlink to Above](#)

27 - CBS News (Video): [Sen. Bernie Sanders says privatizing the VA a "very, very bad idea"](#) (1 April, Emily Tillett, 26M uvm; New York, NY)

Sen. Bernie Sanders, I-Vermont, says that he thinks it's too early to tell what President Trump's pick to take over leadership at the embattled Department of Veterans Affairs "stands for," but cautioned that privatizing the VA to be a "very, very bad idea." Former VA Secretary Shulkin became the latest member of Mr. Trump's cabinet to be terminated last week. The president announced that he was replacing Shulkin in a series of tweets, and said he would nominate Adm. Ronny Jackson, who had been serving as the president's doctor, to replace him.

[Hyperlink to Above](#)

28 - Politico: [Sanders: 'We know nothing' about Trump's VA pick](#) (1 April, Connor O'Brien, 23.9M uvm; Arlington, VA)

Sen. Bernie Sanders wouldn't commit to supporting President Donald Trump's pick to lead the Department of Veterans Affairs, Rear Adm. Ronny Jackson, on Sunday. In an interview on CBS' "Face the Nation," the Vermont independent noted that Jackson, Trump's personal physician, is a virtual unknown on veterans issues. He also expressed concerns the Trump administration is pushing to privatize the nearly \$200 billion bureaucracy...

[Hyperlink to Above](#)

29 - The Hill: [Sanders: I will work against any VA nominee backing privatization](#) (1 April, Mallory Shelbourne, 11.9M uvm; Washington, DC)

Sen. Bernie Sanders (I-Vt.) said Sunday he will work against any Veterans Affairs (VA) nominee who supports privatizing the agency. "I will do everything I can as a member of the veterans committee not to approve any nominee who is not going to strengthen the VA and who will oppose privatization," Sanders told CNN's "State of the Union."

[Hyperlink to Above](#)

30 - Miami Herald: [Trump's doc shouldn't be a slam dunk to lead Veterans Affairs](#) (1 April, Editorial Board, 8.9M uvm; Miami, FL)

The U.S. Department of Veterans Affairs has enough problems. It doesn't need one in the form of a leader who, very possibly, has no idea what he's doing. In yet another nomination made under President Trump's "You'll do — for now" philosophy of hiring the "very best people," White House physician Ronny Jackson is up for the vital job of secretary of Veterans Affairs.

[Hyperlink to Above](#)

31 - Washington Examiner: [Bernie Sanders: Ronny Jackson will bend to pressure to privatize the VA](#) (1 April, Kyle Feldscher, 4.8M uvm; Washington, DC)

Sen. Bernie Sanders, I-Vt., said he thinks Dr. Ronny Jackson will likely be tasked with privatizing the U.S. Department of Veterans Affairs due to his lack of experience manning a large organization. Sanders said on CNN's "State of the Union" Jackson, the White House physician and a rear admiral in the U.S. Navy, doesn't know much about heading a large bureaucracy.

[Hyperlink to Above](#)

32 - Newsday: [Senate should be wary of Dept. of Veterans Affairs nominee](#) (1 April, Editorial Board, 3.2M uvm; Melville, NY)

Caring for our nation's military veterans was one of Donald Trump's most consistent promises on the presidential campaign trail, and certainly one of his least controversial. Getting veterans the care they need is a nonpartisan priority. But the increased quality of care Trump promised hasn't come. Facilities on Long Island and in many other communities are falling apart. The Department of Veterans Affairs is increasingly being exposed as dangerous and dysfunctional.

[Hyperlink to Above](#)

33 - Las Vegas Sun: [Heller's dilemma: Side with Trump or veterans on VA pick](#) (1 April, Editorial Board, 1.5M uvm; Las Vegas, NV)

Assuming Donald Trump follows through in nominating Dr. Ronny Jackson to lead the Department of Veterans Affairs, Sen. Dean Heller will soon face an ugly consequence for becoming a team player for the president. For Heller, Jackson's confirmation offers a lose-lose proposition. Either he votes against Jackson and runs the risk of getting dinged by Trump before the midterm elections, or he votes for Jackson and alienates veterans groups that have raised concerned about the White House doctor's qualifications for the position.

[Hyperlink to Above](#)

34 - Times Union: [Editorial: VA pick insults veterans](#) (1 April, Editorial Board, 1.5M uvm; Albany, NY)

The health and welfare of millions of veterans rest on what feels more like a casting call. Donald Trump has long promoted himself as a champion of military veterans, but when he finally had a chance last week as president to demonstrate that they were more than political props for him, he failed miserably. In the same cavalier way in which he has appointed so many people who have turned out to be disasters in their jobs...

[Hyperlink to Above](#)

35 - Montana Standard: [For pity's sake, don't privatize Veterans Affairs](#) (1 April, Editorial Board, 202k uvm; Butte, MT)

Just when it was starting to look like Montana's veterans could expect a little more stability from the federal agency charged with providing their health care, another major shakeup at the Department of Veterans Affairs has placed the future of their care in doubt. Of course, the VA has long stood on shaky ground. However, the current push toward privatization, if successful, could completely erode the foundations of this critical agency and leave millions of veterans...

[Hyperlink to Above](#)

36 - Washington Examiner: [Ron Johnson: Trump 'deserves' a VA secretary who agrees with him on policy](#) (1 April, Naomi Lim, 4.8M uvm; Washington, DC)

Sen. Ron Johnson, R-Wi., agreed Sunday President Trump was right to fire former Veterans Affairs Secretary David Shulkin. "Well, I think the IG report's pretty troubling," Johnson told NBC, referring to VA inspector general Michael Missal's finding that Shulkin improperly used taxpayer dollars for a trip to Europe with his wife in July.

[Hyperlink to Above](#)

37 - U.S. News & World Report (AP): [Shulkin Says He Has 'Comfort' With Potential Successor at VA](#) (2 April, Hope Yen, 24M uvm; Washington, DC)

Former Veterans Affairs Secretary David Shulkin downplayed concerns about his potential successor's lack of managerial experience Monday, saying the key for improving the VA will be surrounding White House doctor Ronny Jackson with a good team "because no one person can do this alone." Shulkin and the White House have engaged in a highly public campaign surrounding his departure from the VA last week. Shulkin said he was fired.

[Hyperlink to Above](#)

38 - Military Times: [White House doctor could face the most contentious VA confirmation process ever](#) (2 April, Leo Shane III, 2.1M uvm; Springfield, VA)

Ronny Jackson's nomination to become the next Veterans Affairs secretary could become the most contentious confirmation process since the department was founded 30 years ago. But that's also a fairly low bar. Since the department was elevated to a Cabinet-level post back in 1988, no senator has ever voted against a VA secretary pick.

[Hyperlink to Above](#)

39 - The Vindicator: [Trump's choice to lead VA raises questions on intent](#) (3 April, Editorial Board, 193k uvm; Youngstown, OH)

The physician who gave President Donald J. Trump a squeaky clean bill of health could soon lead the Department of Veterans Affairs, even though he lacks the experience to manage an enormous agency that has long been steeped in controversy. Trump's nomination of Rear Admiral Ronny Jackson, the White House physician since President George W. Bush's administration, has raised eyebrows on Capitol Hill and triggered concerns among veterans service organizations.

[Hyperlink to Above](#)

40 - Washington Post: [Perspective - I've seen what a mess Veterans Affairs is. Ronny L. Jackson can't fix it. Trump's new pick to lead the cabinet is a fine doctor. That doesn't mean he can handle a massive, dysfunctional bureaucracy.](#) (2 April, Mikki Kendal, 43.9M uvm; Washington, DC)

The mission of the Department of Veterans Affairs was laid down in the wake of the Civil War, in a promise by President Abraham Lincoln to care for the men who fought, as well as their widows and orphans. The scope of that promise has broadened as women have enlisted. It is the only department that focuses exclusively on caring for veterans and their families in times of crisis spawned by injury, illness and death, a mission most Americans would agree is vital, if not sacred.

[Hyperlink to Above](#)

41 - Fierce Healthcare: [5 things to know about Ronny Jackson, Trump's pick to replace Shulkin at the VA](#) (2 April, Paige Minemyer, 141k uvm; Washington, DC)

President Donald Trump fired David Shulkin as Department of Veterans Affairs secretary last week and tapped White House physician Ronny Jackson as Shulkin's replacement. Trump praised Jackson as "highly respected" in his Twitter announcement, and White House Press Secretary Sarah Huckabee Sanders echoed the sentiment in a tweet of her own, saying that he and other cabinet nominees should be confirmed "without delay."

[Hyperlink to Above](#)

42 - Aiken Standard: [Column: Surprise: Trump's newest cabinet nominee has no relevant experience](#) (2 April, Eugene Robinson, 68k uvm; Aiken, SC)

You can't make this stuff up: President Trump has announced he will nominate a medical doctor who has no discernible management experience to run the second-largest agency in the federal government. Can presidents be sued for malpractice? The man Trump has named to become secretary of veterans affairs, Dr. Ronny Jackson, happens to be the president's personal physician.

[Hyperlink to Above](#)

43 - Truthout: [Trump's New VA Pick Appears Poised to Rubber-Stamp Privatization of Veterans Affairs](#) (3 April, Michael Corcoran, 422k uvm; Chicago, IL)

For the last year, Veterans Affairs Secretary David Shulkin insisted the VA would not be privatized on his watch. Now, thanks to a Koch-supported coup at the top of the second-largest department in government, his watch has ended -- and the battle over privatization persists. For years the Koch brothers have been hovering around the Department of Veterans Affairs and its \$186 billion budget like vultures surrounding a carcass.

[Hyperlink to Above](#)

44 - We Are The Mighty: [No one was ready for President Trump's next VA secretary](#) (3 April, Ben Brimelow, 3.6M uvm; New York, NY)

Questions have emerged about the managerial ability of White House physician Admiral Ronny L. Jackson, President Donald's Trump pick to run the Department of Veterans Affairs, the federal government's second-largest agency. If confirmed, Jackson would replace David Shulkin as the secretary of veterans affairs. Trump announced his decision to fire Shulkin on March 28, 2018.

[Hyperlink to Above](#)

45 - MedPage Today: [Jackson's Nomination to Run VA Brings Questions, Lack of management experience cited as major issue](#) (3 April, Joyce Frieden, 1.5M uvm; New York, NY)

Reaction to President Trump's nomination of White House physician Ronny Jackson, MD, as Secretary of Veterans Affairs (VA) has leaned toward the negative, with most people questioning whether Jackson has the experience needed to run the vast department. "I am deeply concerned about the nominee," (b) (6) executive director of AMVETS, a veterans service organization, said in a press release.

[Hyperlink to Above](#)

46 - KWTX (CBS-10): [Waco: Chris Kyle's family hopes new secretary will change VA culture](#) (3 April, John Carroll, 315k uvm; Waco, TX)

The brother and father of slain American Sniper Chris Kyle say they hope that Texas born and reared Navy Rear Adm. Ronny L. Jackson, whom the president has nominated as the next secretary of veterans affairs will change the culture in the VA to get veterans help more quickly. "Our veterans are not being taken care of here in America, no way, absolutely not," Kyle's father, Wayne said.

[Hyperlink to Above](#)

47 - Creators Syndicate: [Marching Orders for Trump's New VA Secretary](#) (4 April, Betsy McCaughey, 318k uvm; Hermosa Beach, CA)

Since President Trump ousted Veterans Affairs Secretary David Shulkin, the question reverberating in Washington is whether Trump's new pick, Rear Adm. Ronny Jackson, is capable of heading a department with 360,000 employees and 9 million vets under its care. Senate Democrats carp he lacks experience running "a complex organization."

[Hyperlink to Above](#)

48 - Hawaii Tribune-Herald: [Senate should be wary of Veterans Affairs nominee](#) (4 April, 135k uvm; Hilo, HI)

Caring for our nation's military veterans was one of Donald Trump's most consistent promises on the presidential campaign trail, and certainly one of his least controversial. Getting veterans the care they need is a nonpartisan priority. But the increased quality of care Trump promised hasn't come.

[Hyperlink to Above](#)

49 - WUSF (NPR-89.7, Audio): [For Veterans Groups, Questions Surround Trump's VA Nominee](#) (6 April, Carson Frame, 197k uvm; Tampa, FL)

Some veterans groups say they're uncertain about the future of care at the Department of Veterans Affairs, after President Trump ousted Secretary David Shulkin and nominated White House physician Ronny Jackson to head the agency.

[Hyperlink to Above](#)

50 - Lubbock Avalanche-Journal: [Levelland native talks about nomination as head of VA](#) (7 April, Karen Michael, 194k uvm; Lubbock, TX)

Levelland native Dr. Ronny Jackson -- the rear admiral who is President Donald Trump's nominee as secretary of the Department of Veterans Affairs -- knows he will someday be a veteran and his sons will be veterans.

[Hyperlink to Above](#)

51 - Tampa Bay Times: [Editorial: For the sake of Tampa Bay veterans, Senate should scrutinize Trump's VA pick](#) (7 April, 4.8M uvm; Saint Petersburg, FL)

President Donald Trump's decision to fire Veterans Affairs Secretary David Shulkin and to replace him with presidential physician Dr. Ronny Jackson has outsized ramifications for the Tampa Bay area, given the large number of veterans here and the expansive and unique role that two major VA health centers play on both sides of the bay. Whether Jackson is the right

person for the job, or whether this amounts to yet another glaring example of gross cronyism in the Trump White House, remains to be seen.

[Hyperlink to Above](#)

52 - Washington Post: [Ronny Jackson, Trump's pick for Veterans Affairs, may pass up \\$1 million to join the Cabinet](#) (8 April, Andrew deGrandpre, 43.9M uvm; Washington, DC)
President Trump's controversial nomination of Ronny L. Jackson to head the Department of Veterans Affairs has grown further complicated by the Navy physician's pending military promotion, which he could be forced to pass up — along with an estimated \$1 million in future retirement income — if confirmed for the Cabinet post.

[Hyperlink to Above](#)

53 - USA Today (Video): [VA pick Ronny Jackson: 'I've got what it takes' to lead the troubled agency](#) (8 April, Donovan Slack, 36.8M uvm; McLean, VA)
President Trump's pick to lead the Department of Veterans Affairs is dismissing concerns that he lacks the experience necessary to take over the massive agency, which has more than 300,000 employees and 1,200 medical facilities. Ronny Jackson, a Navy rear admiral, has been a White House physician since 2006 but has little executive management experience.

[Hyperlink to Above](#)

54 - CNN (Video): [Trump's VA pick says he's 'got what it takes' to be secretary](#) (8 April, Devan Cole, 29.8M uvm; Atlanta, GA)
Ronny Jackson, President Donald Trump's physician and pick for secretary of the Department of Veterans Affairs, said in his first interview since being nominated that he's "got what it takes" to lead the department. In a Sunday profile of Jackson in the Lubbock Avalanche-Journal, a newspaper located near Jackson's hometown of Levelland, Texas, the White House doctor said: "I've been in leadership school for 23 years now."

Some lawmakers are unsure how to proceed with President Trump's pick for Veterans Affairs secretary because he also has a pending military promotion, The Washington Post reported Sunday. Trump nominated Rear Adm. Ronny Jackson to be promoted from a one-star admiral to a two-star admiral just days before the president ousted Veterans Affairs Secretary David Shulkin. Trump named Jackson as Shulkin's replacement, pending Senate confirmation.

1 - Washington Post (AP): [Trump’s VA pick draws concern over thin management record](#) (29 March, Hope Yen and Calvin Woodward, 43.9M uvm; Washington, DC)

President Donald Trump’s selection of his White House doctor to run the massive Department of Veterans Affairs triggered concern Thursday among lawmakers and veterans groups about whether he has the experience to manage an agency paralyzed over Trump’s push to expand private care.

Ronny Jackson, a Navy rear admiral entrusted with the health of the past three presidents, is a lifelong physician whose positions on privatizing operations in the second largest federal department and addressing ballooning health care costs are unknown. First named to the top White House post by President Barack Obama, he would be new to running a big bureaucracy if given leadership over a department of 360,000 employees serving 9 million veterans.

In a statement, Trump praised Jackson as “highly trained and qualified.” But representatives of veterans aren’t sold on the choice, or on Trump’s decision a day earlier to fire VA Secretary David Shulkin.

“There is little that we know about Dr. Ronny Jackson’s vision and qualifications,” said Paul Rieckhoff, founder and CEO of Iraq and Afghanistan Veterans of America. “Our concern is whether President Trump was more interested in picking a secretary who would be politically loyal rather than someone who can work across the aisle to fix long standing problems of bureaucratic delay.”

Similar doubts were expressed by Veterans of Foreign Wars, which praised Jackson’s military background in a statement but pointed to a nominee biography devoid of “any experience working with the VA or with veterans, or managing any organization of size, much less one as multifaceted as the Department of Veterans Affairs.” AMVETS echoed such sentiments.

“We look forward to a rigorous confirmation hearing,” Rieckhoff said.

Montana Sen. Jon Tester, top Democrat on the panel that will consider the nomination, said he had yet to determine if Jackson “is up to the job.”

It’s not clear from Jackson’s military service record how much, if any, management experience he has. His military assignments did not appear to include supervision over a large department or unit. His Navy biography says he deployed to Iraq with a Marine unit and served as the emergency physician in charge of resuscitative medicine for a trauma platoon.

Jackson joined the White House medical team in 2006 and is perhaps best known for his appearance before the press corps in January, announcing the results of Trump’s first physical in a performance that showed he was quick-witted and unfailingly complimentary of Trump.

Marveling at the 71-year-old president’s good health, Jackson opined, “It’s just the way God made him.”

A White House official said Shulkin himself had recommended Jackson for an undersecretary position at the VA in the fall, and Trump ultimately decided he was more comfortable with Jackson than with other top candidates. The official was not authorized to discuss personnel matters and spoke on condition of anonymity.

If confirmed by the Senate, Jackson would face immediate crises, like a multi-billion dollar revamp of electronic medical records now in limbo that members of Congress fear will prove too costly and wasteful, and a budget shortfall in the coming weeks in its private-sector Veterans Choice program.

Trump is seeking an aggressive expansion of the Choice program to make it easier for veterans to see private doctors outside the VA system at government expense, but proposals are stalled in Congress following a failed effort last week.

“We’re going to have real choice,” Trump said in Ohio. “That’s why I made some changes, because I wasn’t happy with it.”

Jackson’s nomination comes as Trump’s new Cabinet nominees begin to pile up in the Senate. That is certain to stir weeks of confirmation battles this spring when senators, especially those running for re-election, may prefer to shift focus away from the changes at the White House.

None of the nominees, including the president’s new picks for secretary of state and CIA director, is expected to sail to easy confirmation. The GOP-led Senate is narrowly divided 51-49 and Democrats — and some Republicans — are preparing to ask tough questions. Even though Congress has an otherwise slim legislative agenda before campaign season, prolonged confirmation fights could jam up the Senate and influence the election.

Pending Jackson’s confirmation, Robert Wilkie, a former Pentagon undersecretary for personnel and readiness, is serving as the acting head of the VA.

Lawmakers said they needed to learn more about Jackson’s record.

Republican Sen. Johnny Isakson of Georgia, chairman of the Senate Veterans Affairs Committee that will review the nomination, declined to indicate his support. He stressed that he looked forward to “meeting Admiral Jackson and learning more about him.” Isakson, a

moderate, has expressed skepticism in the past toward nominees who expressed strong views in favor of privatization.

Sen. Bernie Sanders, independent of Vermont and a former chairman of the panel, cautioned that Jackson would not be approved if he supported privatizing the VA. "Our job is to strengthen the VA in order to provide high-quality care to our veterans, not dismember it," he said.

Shulkin, a physician and the lone Obama administration holdover in Trump's Cabinet, was unceremoniously fired late Wednesday by Trump in a tweet. Shulkin had enjoyed support from Trump for much of his first year in the administration but support eroded last month after a bruising ethics scandal and political infighting at VA.

Dan Caldwell, executive director of the conservative Concerned Veterans for America, said the group is keeping an "open mind" about Jackson's nomination. Some of the names that had been in circulation for the post had previous ties to the group, which supports giving veterans greater access to private doctors outside the VA system.

"We'd like to hear more about his positions to reform and fix the VA," Caldwell said. "He has a very distinguished service record and it would be unfair to outright dismiss him — you have to be very professional to reach his rank."

A native of Levelland, Texas, Jackson, 50, graduated from Texas A&M with a degree in marine biology, then from medical school at the University of Texas Medical Branch.

He headed to the Navy, then in 2005 joined a 2nd Marines regiment. Jackson was deployed to Iraq as the physician in charge of resuscitative medicine for a trauma platoon, according to the White House.

Ned Price, a National Security Council spokesman under Obama, described the doctor as "the guy you always want to be around" because he's affable and funny. But Price said it was difficult to believe the nomination was unrelated to the "glowing assessment" of Trump's health that the doctor had provided.

2 - Washington Post: [Trump's pick to head veterans department faces skepticism over his experience](#) (29 March, Lisa Rein, Seung Min Kim, Emily Wax-Thibodeaux, and Josh Dawsey, 43.9M uvm; Washington, DC)

The White House was thrown on the defensive Thursday over President Trump's choice to lead the Department of Veterans -Affairs, forcing officials to fend off mounting skepticism that Ronny L. Jackson has the experience to run the government's second-largest agency.

Trump announced by tweet late Wednesday that the White House physician would succeed ousted secretary David Shulkin, surprising veterans groups and lawmakers, who were not

notified beforehand and scrambled to learn the policy views of someone whose positions on the chronic challenges facing VA are unknown.

Jackson is a career naval officer who was an emergency trauma doctor in Iraq before spending the past 12 years as a White House physician. But his résumé lacks the type of management experience usually expected from the leader of an agency that employs 360,000 people, has a \$186 billion annual budget and is dedicated to serving the complex needs of the country's veterans.

"It's great that he served in Iraq and he's our generation. But it doesn't appear that he's had assignments that suggest he could take on the magnitude of this job, and this makes Jackson a -surprising pick," said Paul Rieckhoff, chief executive of Iraq and Afghanistan Veterans of America.

Jackson was taken aback by his nomination, said senior White House officials, who spoke on the condition of anonymity to discuss internal deliberations. After aides gauged his interest in recent days, he hesitated to take on such a big job. But the president continued to push and told his senior staff Monday that the doctor was his top choice. A senior White House official described an informal interview process, without the extensive vetting that typically accompanies a Cabinet selection.

Navy Rear Adm. Ronny L. Jackson, the lead White House doctor, said on Jan. 16 that President Trump's "overall health is excellent." (Bastien Inzaurrealde/The Washington Post)

"The President has full confidence in Dr. Jackson's abilities to give our veterans the care they've earned," spokesman Raj Shah said.

The White House planned to announce Wednesday that Shulkin would leave the administration and be replaced on an interim basis by Robert Wilkie, undersecretary for defense personnel and readiness at the Defense Department, until a nominee was found.

But Trump preempted the plan when he tweeted that he intended to nominate Jackson, administration officials said.

The active-duty rear admiral had been a behind-the-scenes figure while serving the past three administrations as a White House physician, but he moved into the spotlight in January when he delivered a glowing assessment of Trump's physical and mental health to reporters, which aides said endeared him to the president.

The White House on Thursday defended Trump's choice of Jackson, saying his hands-on experience as a doctor would serve him well as Veterans Affairs secretary.

"He knows what soldiers need on the battlefield and what they need when they come home as veterans," deputy White House press secretary Lindsay Walters told reporters aboard Air Force One en route to Cleveland, where Trump delivered a speech on his infrastructure plan. "The president has full confidence in his pick and trusts he will be able to give veterans the care they deserve."

Key congressional Republicans publicly took a cautious approach to the nomination.

“We are doing our homework on Dr. Jackson,” said Amanda Maddox, spokeswoman for Sen. Johnny Isakson (R-Ga.), chairman of the Senate Veterans’ Affairs Committee, which will hold Jackson’s nomination hearing. Trump called Isakson after announcing that he had picked the doctor to replace Shulkin, she said.

“His name was never floated around,” Maddox said, “so we are doing our due diligence.”

Trump’s decision to upend VA’s leadership comes as Senate Republicans were already worried about other potentially difficult nominations in the months leading up to midterm elections, when they want to focus their message on the recently passed tax cuts rather than deal with more upheaval in the administration.

“Any time Republicans are not selling the tax bill over the next seven months is a missed opportunity,” said GOP strategist Brian Walsh, a former spokesman for the National Republican Senatorial Committee. “I will say Senate Republicans are a little more insulated by the nature of the seats that are up. But there’s no question that these are unhelpful distractions.”

The stack of Trump nominees includes Gina Haspel, who was picked this month to be the director of the Central Intelligence Agency and is facing opposition from members of both parties because of her ties to the agency’s past use of brutal interrogation measures on terrorism suspects, which critics say amounted to torture.

Senate Republicans have told White House officials in recent days that the process of confirming CIA Director Mike Pompeo to replace Rex Tillerson as secretary of state is going to be challenging even though he is expected to be approved, according to two people briefed on the discussions. Democratic senators said privately when Pompeo was tapped to replace Tillerson that they expect far fewer Democrats to back him than the 14 who voted for him to lead the CIA.

Senior Senate Republicans have privately expressed frustration over the personnel battles that have raged since the beginning of Trump’s presidency and recently told the White House that they did not want to have to consider a series of nominees this year, according to aides and officials who have heard the complaints.

The move to dismiss Shulkin — as well as the lack of communication about Jackson — only fueled concerns on Capitol Hill that the administration was not doing enough to help Congress defend or even respond to the president’s rush of personnel changes.

Jackson’s policy views are unknown, particularly on the most pressing issue facing VA: how much access veterans should have to private doctors outside the system at government expense. Shulkin’s moderate views on the subject, which were at odds with many administration officials, helped end his tenure.

VA secretary is one of Washington’s most unforgiving jobs even for someone with extensive management experience. Shulkin, also a physician, had run large hospital systems — including VA’s — before taking the job. His predecessor, Robert McDonald, was a chief executive of Procter & Gamble. The secretary before him was a decorated retired Army general, Eric K. Shinseki, who was forced out after managers in the far-flung health system were found to have fudged waitlists for veterans’ medical appointments.

As recently as February, Jackson was a candidate to run VA's health-care arm, the Veterans Health Administration, the country's largest health-care system, with 1,200 hospitals and medical clinics. On the day of his interview, he told a selection panel that the president was unwilling to let him leave his White House job, according to two people familiar with the discussion.

The panel interviewed him informally anyway, asking him how he would drive change in such a large organization but not about his views on policy. One person who sits on the panel, and who spoke on the condition of anonymity because its proceedings are confidential, said they didn't think Jackson had the requisite skills to transition from overseeing a team of about 20 doctors, nurses and physician assistants in the White House medical office to overseeing the health administration.

"I don't remember him coming in trying to convince us he had the experience to do the job. He did not inflate his qualifications," this person said. "The tone was, 'Maybe I don't have the same kind of experience as others who came before me in the job.'"

Jackson's former colleagues in the Obama White House, who have publicly praised him in the past, said his nomination caught them off guard as they swapped text messages to ask how an extremely likable but unlikely candidate could end up running VA in the Trump administration.

"I've seen him managing a staff of a couple dozen, which he did to perfection," said Ned Price, a National Security Council spokesman under Obama who recalled that he was treated by Jackson for a toe injury in the Philippines.

"But how that would translate to managing the second-largest department in federal government I have no idea," Price said. "He has competence and integrity. I don't think he's going to fly around the world first-class or be buying thousands of dollars in furniture. But can he run VA? Anyone's guess is as good as mine."

Colleagues described the schedule of the White House physician as grueling, with continual foreign and domestic travel, always at the president's side.

Some Democrats warned that if Jackson embraced the idea of privatizing more of VA's health coverage, his nomination would be met with stiff resistance.

"I will carefully review Dr. Jackson's qualifications to determine whether he has the best interests of our Veterans at heart or whether he, like many in the Trump administration, wants to push VA down the dangerous path of privatization," Sen. Tammy Duckworth (D-Ill.), a wounded Iraq veteran, said in a statement.

At the American Legion, the country's largest veterans organization, senior officials were putting together ideas to help Jackson acquaint himself with the agency and its challenges.

"He's going to have a huge learning curve," Executive Director Verna Jones said, "but we stand ready to assist and educate him."

Robert Costa and Julie Tate contributed to this report.

3 - Wall Street Journal: [Lawmakers Respond Cautiously to Little-Known VA Pick Ronny Jackson - Key senators on panel say they don't know enough about White House doctor to form an opinion about his ability to lead a vast bureaucracy](#) (29 March, Louise Radnofsky and Peter Nicholas, 43.6M uvm; New York, NY)

Capitol Hill lawmakers reacted guardedly to President Donald Trump's nomination of the White House physician to head the Department of Veterans Affairs, with key members noting that they know little about him.

Dr. Ronny Jackson, a U.S. Navy rear admiral who has served as a White House physician during the past three administrations, is slated to succeed Secretary David Shulkin, who was ousted Wednesday. Mr. Trump indicated on Thursday that he removed Dr. Shulkin because change at the agency was coming too slowly. The secretary had also been the subject of a travel-expenses scandal.

The lead Republican and Democratic senators who will decide whether to confirm Dr. Jackson said they didn't yet know enough to form an opinion about his ability to lead a bureaucracy of 370,000 employees. The department, which is the second-biggest government agency, is also still recovering from a 2014 scandal in which employees were found to have falsified records to hide delays in patient care.

"I look forward to meeting Adm. Jackson and learning more about him," said Sen. Johnny Isakson (R., Ga.), chairman of the Committee on Veterans' Affairs, which will vote on confirmation.

Sen. Jon Tester of Montana, the top Democrat on the panel, offered a near-identical sentiment, adding that he is looking forward to "seeing if he is up to the job."

Veterans service organizations and some other lawmakers have expressed skepticism about Dr. Jackson, raising concern over the propriety of an active-duty military officer holding a political appointment, and saying his biography showed scant experience at running a bureaucracy on the scale he would inherit.

"He's more of a hands-on physician—not a lot of desk time in terms of administrative leadership," said Rep. Mike Coffman (R., Colo.), a member of the House Veterans' Affairs Committee who was among Dr. Shulkin's harshest critics.

It's unclear how Dr. Jackson would address the issue of his active military status, including whether he would seek to relinquish it before securing confirmation to the new job.

Dr. Jackson's confirmation will come as senators are debating legislation that would increase veterans' ability to seek non-government medical care. Congress is approaching an early June deadline to agree to new funds for the existing system allowing some veterans to go outside the VA for care, or to create a new policy allowing all veterans to participate.

"I made some changes, because I wasn't happy with the speed with which our veterans were taken care of," Mr. Trump said Thursday in a speech in Ohio. "We want them to have choice so that they can run to a private doctor and take care of it."

The White House informed Mr. Isakson's committee of the leadership change in a courtesy call Wednesday; a timeline for proceeding with the nomination, or preliminary introduction meetings,

wasn't discussed, a spokeswoman said. Mr. Isakson and Dr. Jackson spoke by phone Thursday afternoon, in an informal introduction, the spokeswoman said.

Past and present White House officials have praised Dr. Jackson as a steady force, deft in caring for different presidents and cabinet members. They said they found him friendly, bright and knowledgeable about medicine, including on issues specifically affecting veterans.

"If you're not calmly decisive, the job of White House physician ain't for you," said Paul Winfree, a former deputy director of Mr. Trump's Domestic Policy Council.

Dr. Jackson has been sought out for management positions before, though on a significantly smaller scale. Toward the end of the Obama administration, he was invited to interview by the Cleveland Clinic for an international posting managing a handful of people because of his affability, versatility and experience with VIPs, a person familiar with the interview said.

The federal agency Dr. Jackson would inherit is notoriously riven with competing power centers, and has now churned through three secretaries in four years.

Dr. Shulkin came directly from a health-care management background into the Obama administration when he took over the VA. He stayed on for Mr. Trump and initially received high reviews. He lost credibility recently when the VA inspector general found that, during a trip to Europe, he improperly accepted Wimbledon tennis tickets, misspent thousands of dollars of taxpayer money on his wife's airfare and improperly used a department employee as a "personal travel concierge."

Dr. Shulkin denied wrongdoing. He repaid the \$4,312 cost of his wife's airfare and then sent the U.S. Treasury a check equal to the amount of the tennis tickets.

Mr. Trump's advisers had openly explored possible successors for Dr. Shulkin in recent weeks, including having conversations with potential candidates, people familiar with the matter had said.

Still, the nomination of Dr. Jackson stunned some White House aides, who hadn't known the president was even considering his physician for the role.

It became clearer Thursday that Mr. Trump had been thinking about moving Dr. Jackson to the VA for months. Last fall, Dr. Shulkin recommended that Dr. Jackson take an undersecretary job at the department, a White House official said. At that time, Dr. Jackson and the president discussed plans for improving the VA—talks that set in motion the announcement on Thursday.

Lindsay Walters, a White House spokeswoman, on Thursday said the White House believed Dr. Jackson had "bipartisan respect."

"The president did have some early individuals that he was looking at but continuously went back to Dr. Jackson to fulfill this role as VA secretary," she added. "The president has full confidence in his pick and trusts he will be able to give veterans the care they deserve."

Some lawmakers expressed dismay over the treatment and departure of Dr. Shulkin, which could linger into the new confirmation process. "By once again choosing chaos over consistent leadership, Donald Trump is hurting veterans around the country," said Illinois Democratic Sen. Tammy Duckworth, who is a retired U.S. Army lieutenant colonel.

4 - USA Today (Video): [6 big things the new Veterans Affairs chief will have to address](#)

(29 March, Donovan Slack and Dennis Wagner, 36.8M uvm; McLean, VA)

On the front lines at the Department of Veterans Affairs — in the agency's 1,240 hospitals and clinics — it doesn't much matter these days who holds the secretary's job in Washington.

David Shulkin, who was fired Wednesday, was the third VA secretary in four years. If President Trump's nominee to lead the agency, physician and Navy Rear Adm. Ronny Jackson, is confirmed, he will be the fourth.

Each has sought to fix the department, laying out visions and priorities — Shulkin's top priority was "access," making sure veterans get appointments when they need them. His predecessor, former Procter and Gamble CEO Bob McDonald, focused on staffing, training and veteran-centered customer service.

But year after year, critical deficiencies remain and veterans are bearing the brunt of the failures. Here are some key, seemingly intractable shortfalls that continue to plague the system — and that Jackson will face if confirmed.

Veterans are still waiting

The furor over VA health care exploded in 2014 when whistle-blowers in Arizona divulged that thousands of patients were backlogged at the Phoenix veterans hospital, and some of them had died awaiting care. VA investigators soon determined that medical center administrators knew about the crisis, yet put out fraudulent wait-time data to collect bonus pay.

The problems weren't just in Phoenix. A USA TODAY investigation in 2016 found supervisors instructed employees to falsify patient wait times at VA medical facilities in at least seven states. And employees at 40 VA medical facilities in 19 states and Puerto Rico regularly "zeroed out" veteran wait times.

A few weeks after Shulkin was sworn in last year, the VA inspector general released a report finding widespread inaccuracies in scheduling records at a dozen hospitals in North Carolina and Virginia. The records vastly understated how long veterans were waiting for appointments and prevented as many as 13,000 from getting VA-funded care in the private sector — an option they were entitled to if they waited longer than 30 days. At the time, Shulkin said the findings were based on outdated rules and that he had instituted new regulations to prevent such problems in the future.

But just two weeks ago, another inspector general investigation found the problems continued.

Looking at 64 VA hospitals and clinics in a swath of states from Kentucky to Illinois, investigators found scheduling staff entered the wrong dates in the system in more than 5,000 cases. That masked how long veterans were actually waiting for specialty care and mental health appointments.

VA-18-0457-A-000909

They estimated 2,500 of those waited longer than a month, but the scheduling system falsely showed only 1,300 waited that long. Even in the cases accurately reflected in the system, they concluded, most weren't offered the chance to get care in the private sector.

"VA data continues to be a high-risk area," wrote Larry Reinkemeyer, VA assistant inspector general for audits and evaluations.

Quality of care

The VA's lowest performing hospitals remained at the bottom of the pack on the agency's own internal quality measures for two years in a row.

The VA regularly scores its medical centers based on dozens of quality factors, including death and infection rates, instances of avoidable complications and wait times. The agency uses a five-star scale with one being the worst and five being the best.

The rankings compare VA hospitals against each other but the number of one-star hospitals is not constant. Medical centers in that bracket can be elevated to two stars based on quality-of-care factors.

Among the facilities who received only one star in both 2015 and 2016 were the VA hospital in Phoenix and another in Memphis, Tenn. One Memphis employee dubbed the facility a "house of horrors" when USA TODAY obtained internal documents revealing reported threats to patient safety soared in recent years from 700 to more than 1,000.

One veteran had to have his leg amputated after a VA provider there left a piece of plastic tubing in a critical blood vessel during a procedure.

On a number of patient safety factors, the VA overall on average scores better than the private sector on many key patient-safety measures, including instances of avoidable death, respiratory failure, and infection. But there are vast disparities among VA hospitals, according to VA data collected from October 2015 to March 2017.

The death rate for surgical patients with treatable complications ranged from zero at the VA hospital in Sacramento, Calif., to more than 20% in Miami; Columbia, Mo.; and Washington, D.C. In Long Beach, Calif., it was 29%. That's more than double the private sector average of 14%, according to Medicare data.

Bureaucratic breakdowns

In Washington, the VA inspector general issued a rare emergency report last year saying that patients were in imminent danger at the hospital. The facility had dirty sterile storage areas and was regularly running out of critical supplies needed for surgeries and other procedures, including patches to seal blood vessels and tubes for kidney dialysis.

Shulkin quickly removed the hospital director there and sent teams from headquarters to try to fix the problems. But an inspector general report released this month found that VA officials at every level — local, regional and national — knew about the problems for years but didn't fix them.

Investigators found “a culture of complacency and a sense of futility pervaded offices at multiple levels.”

“In interviews, leaders frequently abrogated individual responsibility and deflected blame to others,” the investigation report says. “Despite the many warnings and ongoing indicators of serious problems, leaders failed to engage in meaningful interventions of effective remediation.”

Morale at the agency has taken a beating amid the constant drumbeat of crises. Employees ranked it as the second to worst agency to work for among large departments last year. The only department scoring lower was Homeland Security.

The inspector general singled out frontline workers at the Washington hospital, saying they went to great lengths to make do and they may be the only reason no patients were actually harmed.

“The OIG did not find evidence of adverse clinical outcomes, a condition that is largely attributable to front-line care providers who were committed to providing the best possible care by borrowing supplies, improvising, or personally ensuring patients received what they needed,” the investigation report said.

Vetting failures

The VA has had persistent difficulties recruiting and keeping enough medical care providers to meet veterans needs.

In 2015, one in six critical VA jobs — intake workers, doctors, nurses and assistants — were unfilled, a USA TODAY investigation found. Though the agency has made headway, there are still shortfalls.

In some cases, that has created an incentive to hire medical care providers with problem records that may have prevented them from getting jobs in the private sector.

A VA hospital in Oklahoma knowingly hired a psychiatrist sanctioned for sexual misconduct who went on to sleep with a VA patient, according to internal documents obtained by USA TODAY. A Louisiana VA clinic hired a psychologist with felony convictions. The VA ended up firing him after they determined he was a “direct threat to others” and the VA’s mission.

The Iowa City VA hospital knowingly hired John Henry Schneider last year, a neurosurgeon who had racked up more than a dozen malpractice claims in two states and had his license revoked in one.

After USA TODAY revealed the case in December, the VA forced him out and discovered that conflicting VA policies allowed its hospitals to illegally hire doctors with revoked licenses for 15 years. Shulkin ordered the policies rewritten but with the current process, that could take up to two years.

In a report released Monday, the inspector general found vetting failures go beyond medical providers. Investigators determined that the VA did not conduct required background checks on more than 6,000 employees and managers failed to properly document and oversee background checks.

“As a result, VA cannot reliably attest to the suitability of its largest workforce, exposing veterans and employees to individuals who have not been properly vetted,” the report said. “Unless internal controls and data are improved, VA and the public lack assurance that VHA has a workforce suitable for serving our nation’s veterans.”

Hiding shoddy care

The agency has failed for years to ensure medical care providers found to have provided poor care are reported to state licensing boards or to a national database created to prevent them from crossing state lines and endangering other patients.

In one case in Maine revealed in a USA TODAY investigation, the VA found a podiatrist had harmed 88 patients but didn’t report him to the national database and took years to report him to state boards. By the time the VA told his patients, one of them, U.S. Army veteran April Wood, had decided to have her leg amputated after two failed surgeries by the podiatrist.

The investigation found VA hospitals also signed secret settlement deals with dozens of doctors, nurses and health care workers in recent years that included promises to conceal serious mistakes — from inappropriate relationships and breakdowns in supervision to dangerous medical errors — even after forcing them out of the VA.

In response to the story last fall, Shulkin required increasing vetting of future such deals and he ordered policies on reporting to state boards and the national database rewritten. Again, five months later, the new policies still are not in place and could take months or years more.

Politics

Jackson, Trump's pick to be the new secretary, has no experience running a huge government agency, and dealing with veterans’ health care challenges will require deft politics and bureaucratic acumen.

His predecessor, Shulkin, was ousted despite being well regarded in Congress and assured of job security by Trump.

Now, a White House physician and former Navy admiral faces not just a plethora of VA maladies, but partisan politics and special interests that bitterly disagree on the cures.

The most perilous and important controversy involves decisions on privatizing veterans’ healthcare.

Powerful unions and veteran service organizations, such as the American Legion, oppose a radical change, and they are supported by most Democrats on Capitol Hill. But Republicans and key advocacy groups, such as Concerned Veterans for America, are demanding a system that would let veterans decide whether they go to the VA for care, or get private treatment subsidized by the government.

On Thursday, Trump suggested that Shulkin was dismissed because he was not aggressive enough in promoting the private-care option.

The existing Choice Program, which ate up billions of dollars and had to be re-funded, promises to be even more expensive if expanded. And those costs already have included tens of millions of dollars in improper payments to contractors.

Veteran enrollment for healthcare has skyrocketed, and Congress continues to expand benefits for those already in the system, with care for Agent Orange victims and high-cost medications for hepatitis patients. Bringing in enough funding to meet that demand also requires political aplomb.

5 - Politico: [Trump's VA pick blindsides staff, deepens agency disarray - 'He's got a department that's in turmoil,' a former VA secretary said. 'It's in crisis.'](#) (29 March, Lorraine Woellert, Eliana Johnson and Connor O'Brien, 23.9M uvm; Arlington, VA)

The timing of President Donald Trump's announcement to name Rear Admiral Ronny Jackson to lead Veterans Affairs was a snap decision that surprised his own chief of staff and knocked the government's second-largest agency, already bedeviled by scandal, deeper into disarray.

White House chief of staff John Kelly had spoken with David Shulkin by phone Wednesday morning, reassuring the now-former VA secretary that he wouldn't be fired by tweet that afternoon. Hours later, Kelly had to phone Shulkin again telling him plans had changed.

Trump declared Jackson's nomination on Twitter at 5:31 p.m. The tweet was big news — not just to the public, but to some senior aides, according to one White House official.

The chaos — by now a typical part of the president's management style — has for months upended Kelly's attempts to ensure that an unorthodox White House adheres to traditional processes. But while White House aides are left unpacking the day's events, the drama at the VA is just beginning.

Deputy Secretary Thomas Bowman, a Trump appointee who is the agency's No. 2, is widely expected to leave soon, either by choice or by force. Kelly and other aides wanted Bowman gone before Shulkin left to avoid installing the deputy at the helm, even temporarily. Bowman had pushed back on broad privatization efforts, leading Trump to berate him in an Oval Office meeting for his lack of loyalty.

Trump got around the Bowman problem by naming Robert Wilkie, an undersecretary at the Department of Defense, to the temporary job. A Capitol Hill veteran and member of Trump's transition team, Wilkie is a former senior adviser to Sen. Thom Tillis (R-N.C.), who supports expanding service members' access to private doctors.

"He's got a department that's in turmoil. It's in crisis. There's warfare there," said Anthony Principi, who led the agency under former President George W. Bush. "And you have an acting secretary who doesn't know the VA."

But if and when Bowman departs, Wilkie will be left with a shallow bench at an agency already paralyzed by political mistrust, some veterans' advocates say. The VA's health and benefit agencies — which administer tens of billions of dollars in health programs, pensions, survivor

benefits and other forms of assistance to some 9 million service members — have been without Senate-confirmed officials since the Obama administration.

Veterans Affairs is the second-largest federal agency, behind only the Department of Defense, with 377,000 employees. And it has proven unwieldy even when led by highly decorated, experienced administrators such as Eric Shinseki, a retired four-star Army general who resigned during the Obama administration amid a scandal over lengthy wait times and faulty scheduling practices for medical appointments.

Shinseki was followed by Bob McDonald, an Army veteran and former Procter & Gamble CEO. Shulkin, McDonald's successor, was the first non-veteran to lead the VA.

As recently as two weeks ago, the Trump White House was still making overtures to potential candidates for the top job, according to a person with direct knowledge of the inquiries. Trump reportedly agonized over the decision, changing his mind several times, a senior administration official said.

“Instead of going through the paces to convince the best possible person to take this job, they’re going with the person who’s still on active duty in the Navy and can’t say no to the commander in chief,” said one Obama White House aide, who spoke highly of Jackson as a doctor and individual. “You could look at it as them giving up trying to find a competent commander or manager to fix the problems.”

Shulkin had come under fire after a VA inspector general's report accused him of improperly accepting tickets to the Wimbledon tennis tournament and using his agency staff to arrange a sightseeing tour of Denmark and England. He repaid the VA for the trip. The longtime hospital administrator, who was engaged in open warfare with conservatives in the department intent on privatizing the VA, contended he was set up.

Veterans' groups remained loyal to Shulkin, whom they saw as their best line of defense of against privatization. During his campaign, Trump made promises that veterans would be allowed to seek medical treatment outside the VA's system, statements taken by some to mean a step toward handing the system to commercial companies to manage.

Jackson, while well-liked by both Republicans and Democrats, is a cipher on privatization and other policy issues. With no agency experience to speak of, veterans suspect he could be installed as a figurehead, leaving lower-level appointees to steer the agency toward privatization.

“He’s a blank slate. Nobody knows really anything about his competency or capacity for this job,” said Paul Rieckhoff, CEO of Iraq and Afghanistan Veterans of America. “We especially know that being a veteran doesn’t qualify you to run the VA any more than being a soldier qualifies you to run the DoD.”

Principi urged Jackson to move quickly on his own agenda.

“The new secretary, really, if he wants to accomplish anything, has to hit the deck running and has to bring in some very, very good people,” he said. “I hope and pray he’s a success. Because if he’s not, American veterans are going to be the losers.”

6 - Task & Purpose: [What's In Store For The Next VA Chief? Let's Break It Down](#) (29 March, James Clark, 102k uvm; New York, NY)

It's been an awkwardly long time coming, but as of yesterday afternoon embattled Veterans Affairs secretary David Shulkin is out of a job. The news comes after a month and a half of uncertainty that began when a scathing inspector general report detailed "serious derelictions" in expensing a Europe trip last summer. And then there were all the accusations and counter accusations of political infighting and rumors of possible replacements — at least all that is over:

Rear Adm. Ronny Jackson, the president's appointed White House physician, who drew national attention when he complimented President Trump on his "incredibly good genes," has been tapped to lead the Department of Veterans Affairs — pending approval by the Senate. Given that this leadership post has been described as "one of the most difficult jobs in government" — which has stymied generals, CEOs and health care executives — we thought it was time to give you a rundown of what's in store for the next officeholder, by the numbers:

More than 1,243 health care facilities. These Veterans Health Administration facilities include 170 VA Medical Centers, and 1,063 outpatient sites — making it the largest health care system in the United States.

9,000,000 veterans.. That's the number who receive medical care from VA, and many of these patients are older and suffer from multiple traumas and injuries that require specialized care: amputations, traumatic brain injuries, post-traumatic stress disorder, military sexual trauma, and as of 2013, half of all VA patients suffer from chronic pain, to name just a few. And as many as 2 million patients receive in-facility care, according to an American Legion statement.

20,000,000 veterans in the United States... we think. There could be far more veterans than we realize, since an individual's military history isn't tracked by the census bureau, which is a concern since the VA relies on headcount of its target population to get a feel for the size and scope of the services it needs to provide.

\$10,000,000,000 contract for Electronic Health Records. A long-term plan to modernize the VA's health records system could be jeopardy, with Shulkin's dismissal coming just as the VA was set to finalize the acquisition of a new electronic health record system.

2nd largest federal agency. The only one bigger is the Department of Defense.

\$186,000,000,000 budget for fiscal year 2018.

360,000 employees spread across three separate administrations within the department; the Veterans Health Administration, Veterans Benefit Administration, and the National Cemetery Administration.

23 years active duty. Jackson's Navy career began in 1995, and includes postings as an instructor, diving medical officer, diving safety officer, from Panama City, Florida Sigonella, Italy, to Norfolk, Virginia. By 2005 he deployed to Taqaddum, Iraq as part of a Surgical Shock Trauma platoon.

3 presidents. While still in Iraq in 2006, Jackson was selected as a White House physician and served as the supervising physician for the Camp David Presidential Retreat under the George W. Bush administration. Later he led the White House Medical Unit as its director and was the appointed White House physician for Presidents Barack Obama and Donald Trump.

Soon to be 7 VA secretaries in 4 years. The department has been beset by turmoil and scandal. Eric Shinseki resigned from his post as VA chief following the 2014 wait-list scandal the department. Since then, the VA has gone through three sitting secretaries, and is on its third acting secretary, with Robert Wilkie, previously the Pentagon's undersecretary of personnel and readiness, now tasked as the interim chief until Shulkin's replacement is approved by the Senate.

[Back to Top](#)

7 - Washington Post: [Opinions - Surprise: Trump's newest Cabinet nominee has no relevant experience](#) (29 March, Eugene Robinson, 43.9M uvm; Washington, DC)

You can't make this stuff up: President Trump has announced he will nominate a medical doctor who has no discernible management experience to run the second-largest agency in the federal government.

Can presidents be sued for malpractice?

The man Trump has named to become secretary of veterans affairs, Ronny L. Jackson , happens to be the president's personal doctor. More to the point, given Trump's perpetual hunger for sycophancy, is the fact that Jackson showered the president with hyperbolic Dear-Leader-style praise during a widely viewed television appearance in January.

Trump has "incredibly good genes," the White House physician said in describing a examination he had given the president. Trump's overall health is "excellent." His "cardiac assessment" put him "in the excellent range." If his diet were a bit better, "he might live to be 200 years old." In any event, "I think he will remain fit for duty for the remainder of this term and even for the remainder of another term if he's elected."

That is an unusual way to describe a 71-year-old man whose height was reported as a generous 6 feet 3 inches , and weight at an eyebrow-raising 239 pounds, which classifies him as overweight — but conveniently one pound short of obese. Jackson's are odd words characterizing a man whose cheeseburger-laden diet my doctor would describe as suicidal and whose coronary calcium scan results, according to many other physicians, indicate some degree of heart disease and a clearly elevated risk of heart attack.

I assume Jackson has been more, shall we say, plain-spoken with the president about his health than he was with the public. But am I suggesting that flattery, rather than merit, is what makes him Trump's choice to replace ousted VA Secretary David Shulkin? Absolutely, because no other explanation makes sense.

Pliability may also be playing a role. In a New York Times op-ed, Shulkin wrote that he believed he was being sacked because he opposed a push by the Trump administration "to put VA health care in the hands of the private sector."

Shulkin is a physician, but before he took over VA, he also had experience running hospitals. With no comparable administrative background, Jackson — if confirmed by the Senate — would take over a sprawling agency with about 360,000 employees, a \$186 billion budget and responsibility for providing medical care to 9 million veterans who deserve better, faster service than they now receive.

Shulkin was one of several high-ranking Trump appointees under fire for lavish spending on the taxpayers' dime. He was also a holdover from the Obama administration, and even though the job is perhaps the least partisan in the Cabinet, that prior association clashed with Trump's bratty determination to oppose everything President Barack Obama supported and support everything he opposed.

But Shulkin, by most accounts, had stabilized VA's vast system of hospitals and health clinics. What he refused to do was support the notion of privatizing veterans' health care — an idea pushed by some of the political appointees the White House had installed under him.

"I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans," Shulkin wrote in his Times op-ed. "The private sector . . . is ill-prepared to handle the number and complexity of patients that would come from closing or downsizing VA hospitals and clinics, particularly when it comes to the mental health needs of people scarred by the horrors of war."

Shulkin wrote that "in recent months" the political environment in Washington had become "toxic, chaotic, disrespectful and subversive," making it impossible for him to do his job. "It should not be this hard to serve your country," he wrote.

But it should be hard to get a job running any organization as big, complex and vital as the Department of Veterans Affairs. Perhaps Jackson has an innate genius for management that awaits only the opportunity to flower. If not, Trump will be doing a grave disservice to men and women who are owed the nation's thanks and gratitude.

I can't say I'm surprised. Trump put neurosurgeon Ben Carson in charge of the Department of Housing and Urban Development, despite Carson having zero experience in housing policy. He put Betsy DeVos in charge of the Department of Education, despite her apparent unfamiliarity with actual schools. He put politician Rick Perry in charge of the Department of Energy, which Perry wanted to eliminate until he learned what the agency does.

Perry actually said that during his confirmation hearing. One doesn't know whether to laugh or cry.

[Back to Top](#)

8 - Washington Post (The Fix): [Who is Trump's new Veterans Affairs pick, Ronny Jackson?](#) (29 March, Aaron Blake, 43.9M uvm; Washington, DC)

The seemingly never-ending parade of staff changes in the Trump administration continued apace Wednesday, with the president announcing that Veterans Affairs Secretary David Shulkin is out and that White House physician Ronny L. Jackson will replace him.

Jackson's name will be familiar to political watchers across the country for one main reason: He's the physician who delivered what some felt to be a suspiciously rosy picture of Trump's health in January. But he's an interesting pick for a whole host of other reasons.

For one, Jackson is something of a nonpartisan pick. Like Shulkin, he served in the Obama administration, where he was also President Barack Obama's White House physician. A native of Texas and a graduate of Texas A&M and University of Texas Medical Branch, he's a rear admiral in the U.S. Navy who has spent decades practicing medicine in the military. Jackson was nominated for a promotion to rear admiral (upper half) as recently as last week, which would give him his second star. According to his Navy biography, he was deployed to Iraq in the mid 2000s to head up an emergency medical unit tasked with resuscitating troops.

While there, he was chosen to join President George W. Bush's White House as a physician. In 2013, Obama promoted him to the top job in the West Wing. Trump elected to keep him on. In that role, Jackson oversees not just Trump's health, but also that of the first family and White House staff and guests. He mostly stayed behind the scenes but made headlines after treating a girl who got bit by one of the Obamas' dogs in January 2017.

Navy Rear Adm. Ronny L. Jackson, the lead White House doctor, said on Jan. 16 that President Trump's "overall health is excellent." (Bastien Inzaurrealde/The Washington Post)

Jackson reached his highest degree of notoriety in January, when he delivered a promised review of Trump's health. Trump, who at 70 was the oldest newly elected president ever, is known to eschew exercise and dine on fast food. There have also been persistent questions — especially among his critics — about his mental health. And Trump's medical reviews during the campaign were both ridiculously hyperbolic — claiming he would be the most healthy president ever — and omitted key pieces of information, including a hair-loss drug Trump takes.

Jackson's review played up a cognitive test Trump had passed that seeks out early signs of dementia and other kinds of mental deterioration. He said Trump had "incredible genes" and (seemingly) joked that if Trump's diet had been better he might live to be 200 years old. He denied Trump had heart disease even as the data suggested he might. He listed Trump's weight at 239 pounds, which left Trump exactly one pound shy of the definition of "obese" and spawned a whole host of dubious reactions. (Call it the "girther" movement.)

The whole thing earned Jackson a send-up during the cold open of "Saturday Night Live."

Despite the ridicule, members of the Obama administration vigorously defended Jackson as a patriot and an honest man.

If nothing else, Jackson's ascension seems to reinforce that the best way to get ahead in the Trump administration is to say nice things about him. Some defended Jackson's credentials, but that review will likely be a topic at his confirmation hearings.

Perhaps the main reason Jackson is a somewhat controversial pick, though, is his lack of management experience. VA has been a department beset by scandals in recent years — including before Shulkin — and has proved a logistical and bureaucratic nightmare. Jackson has headed up medical units in the White House and Iraq, but he has never dealt with anything close to the scale of what he's set to take on. It may be the toughest Cabinet job in the entire administration, in fact.

Trump, though, as he often does, has gone with a nontraditional pick who said things he liked on television.

[Back to Top](#)

9 - FOX News: [Ronny Jackson picked by Trump to lead the VA: What to know about the president's physician](#) (29 March, Kaitlyn Schallhorn, 32.5M uvm; New York, NY)

President Trump gave Dr. Ronny Jackson a clean bill of health in March – to run the Department of Veterans Affairs.

A Navy rear admiral, Jackson is the president's personal physician who rose to prominence after he addressed the press from the White House briefing room in January to discuss Trump's health. While Jackson said the president needs to lose some weight, he said the physical exam he conducted showed overall that Trump was in good physical and mental health.

Trump fired Secretary David Shulkin on March 28, and Robert Wilkie is serving as interim secretary until Jackson is confirmed.

He has a marine biology degree

From Texas, Jackson, 50, graduated from Texas A&M University in 1991 with a degree in marine biology, according to his Navy biography. He graduated from the University of Texas Medical Branch with his medical degree in 1995.

That same year, Jackson joined the Portsmouth Naval Medical Center – located just outside Chesapeake, Virginia – which kicked off his active duty military career. It was there that he finished an internship in transitional medicine.

Later, he would return to the naval center to complete his residency in emergency medicine, graduating at the top of his class in 2004.

Jackson is a veteran

Jackson was deployed to Iraq after he joined the 2nd Marines in 2005, according to his Navy biography.

He served as the emergency medicine physician in charge of resuscitative medicine for a forward deployed Surgical Shock Trauma Platoon.

He's been a White House physician since Bush

While still in Iraq, Jackson was tapped as a White House physician in 2006. He has overseen the physicians for Camp David presidential retreats, led the White House Medical Unit and directed the executive health care for the Cabinet and senior staff members, according to his biography.

It was former President Barack Obama who selected Jackson to fill the position of physician to the president.

The Associated Press contributed to this report.

[Back to Top](#)

10 - FOX News (Video): [John Brennan: Trump's nomination for VA secretary is 'terribly misguided'](#) (29 March, Nicole Darrah, 32.5M uvm; New York, NY)

Former CIA Director John Brennan once again took a shot at President Trump on Twitter Thursday, saying he believes the decision to nominate Adm. Ronny Jackson to run the Department of Veterans Affairs is "terribly misguided."

"I personally know and greatly respect Ronny Jackson....as a terrific doctor and Navy officer," Brennan tweeted. "However, he has neither the experience nor the credentials to run the very large and complex VA. This is a terribly misguided nomination that will hurt both a good man and our veterans."

Trump announced via Twitter Wednesday his intention to replace current VA Secretary David Shulkin with Jackson, a 50-year-old Navy rear admiral who has served as personal physician to the president since 2013, when he was appointed by former President Obama, after being tapped to serve as a White House doctor in 2006.

Jackson's also a veteran. He was deployed to Iraq after he joined the 2nd Marines in 2005, according to his Navy biography.

Jackson's nomination triggered some concern among lawmakers and veterans groups about his experience to manage a federal agency, but Trump praised the lifelong doctor as "highly trained and qualified."

Trump decided to oust Shulkin from his Cabinet after he served just over a year in office. An internal VA watchdog found last month that Shulkin improperly accepted Wimbledon tennis tickets and that his then-chief of staff had doctored emails to justify his wife traveling to Europe with him at taxpayer's expense.

The swipe from Brennan, now an analyst for NBC News and MSNBC, isn't the first he's made against Trump.

Just last week, he suggested that the Russians "may have something" against the president, and days prior to that in response to former FBI official Andrew McCabe's firing: "When the full extent of your venality, moral turpitude, and political corruption becomes known, you will take your rightful place as a disgraced demagogue in the dustbin of history."

Fox News' Kaitlyn Schallhorn and Elizabeth Llorente, along with The Associated Press, contributed to this report.

[Back to Top](#)

11 - New York Times: [Op-ed - Ronny Jackson's Disturbing Lack of Independence](#) (29 March, Norman L. Eisen and Bandy X. Lee, 30M uvm; New York, NY)

In announcing Dr. Ronny Jackson, the White House physician, as his choice to be the new secretary for veterans affairs, President Trump has taken his latest misstep in what has been the worst presidential personnel process in modern history.

We take no pleasure in saying so, including because one of us (Mr. Eisen) worked with Dr. Jackson in the White House, was even treated by him, and can testify that he is a very capable physician. But that good opinion of Dr. Jackson, which was widely held in the Obama administration, by no means qualifies him to run one of the largest, most complex and troubled cabinet agencies in the federal government.

Indeed, the very affability of Dr. Jackson's approach when it comes to his current presidential patient is perhaps his greatest disqualification, followed closely by his lack of relevant management experience and the apparent absence of a normal pre-nomination personnel vetting.

Dr. Jackson's January examination of President Trump, and subsequent news conference, give us great pause because they evinced a disturbing lack of independence — one of the most important qualities in a cabinet member. Dr. Jackson startled observers by not only finding the president healthy, but declaring he would remain so in the future. The doctor even looked into his crystal ball to predict good health for a second term, a pronouncement extending seven years into the future and so more fit for a fortuneteller than a scientist.

Some expert observers also felt Dr. Jackson may have understated the president's heart disease, and even fudged the president's height (his driver's license says 6 feet 2 inches; Dr. Jackson reported 6 feet 3 inches) because the lower number would have forced the doctor to admit his patient was obese. When asked why he had such glowing things to say about the president's health when Mr. Trump gorges on McDonalds, guzzles diet Coke, and seldom exercises, Dr. Jackson said: "Some people have just great genes. I told the president that if he had a healthier diet over the last 20 years, he might live to be 200 years old."

That is hardly the objectivity that America needs from its cabinet members. But Dr. Jackson's worst failing was his purported examination of the president's psychological fitness, resulting in his pronouncement that "the president is mentally very, very sharp." The examination came at a time when there was widespread public discussion about the president's mental state, driven by reporting about some of the president's startling behind-the-scenes behavior. The scrutiny was so intense that the president himself asked Dr. Jackson for testing.

But the test that Dr. Jackson administered was not fit for his conclusion. It was a short examination known as the Montreal Cognitive Assessment, which is generally used as a screen for Alzheimer's and similar symptoms. One of us (Dr. Lee) is a mental health professional who has expertise in these examinations, and would never have utilized this narrow test under these circumstances. It is the equivalent of pronouncing a patient cancer-free because she has a good complexion.

A full history should have been taken and a standardized battery of tests given, such as the Minnesota Multiphasic Personality Inventory. Among the other, more appropriate tests that should also have been considered are the Wisconsin Card Sorting Test, the California Verbal Learning Test and the Stroop Test. The MoCA examination was simply not sufficient under the circumstances to support Dr. Jackson's declaration that he had "absolutely no concerns" about the president's cognitive ability or neurological functions.

All of this matters because, if Dr. Jackson cannot be trusted to act independently when it comes to the president's mental and physical health, we cannot be confident that he will do so when it comes to the fitness of the Department of Veterans Affairs. The department has the sacred charge of repaying our soldiers for their service by providing them with health care and other support. If Dr. Jackson tells the president — and the country — what Mr. Trump wants to hear about his own health, how can we trust him to honestly and rigorously diagnose the ailments of the V.A., and to treat them appropriately?

Having a candid V.A. secretary is all the more important because the department faces profound challenges. Since 2014, it has dealt with a pattern of negligent treatment at hospitals operated by one of its agencies, the Veterans Health Administration. Outgoing Secretary David Shulkin revealed yesterday that he had fought Trump administration proposals to privatize services provided by the V.A. — a move that could undermine the quality of health care provided to our veterans. Dr. Jackson's treatment of the president does not inspire confidence that he will take on the V.A.'s problems with the brutal honesty that the job demands.

Dr. Jackson's nomination is also undermined by the fact that although he is a medical professional, he lacks the management experience that the job demands. The V.A. secretary is responsible for a department that provides health care services to over nine million individuals. While Dr. Jackson has served his country with distinction, both in Iraq and as the White House physician, managing a relatively small medical team is not preparation for leading a vast and sprawling bureaucracy. The V.A. is one of the most complex health care management jobs in the world, and ideally would be run by someone with experience operating hospital systems or health businesses or enterprises, and large ones.

The nomination fits a pattern of cronyism, with the president appointing those of dubious qualifications to patronage jobs across the administration. The president's former golf caddy is now the White House social media director. A contractor married to one of the Trump's former household staff members now has a job at the Environmental Protection Agency. And a longtime friend of the Trump family who has been involved in planning golf tournaments and Eric Trump's wedding is the head of the New York and New Jersey office of the Department of Housing and Urban Development. And now he has appointed his White House doctor to oversee the health care of millions of veterans.

Finally, in addition to concerns about independence and qualifications, it appears that Dr. Jackson had not undergone the normal vetting process for White House presidential personnel. Reportedly, the tweet-from-the-hip nomination of Dr. Jackson by the president surprised even his own advisers. That suggests that Dr. Jackson has not in fact received the careful review that is normally completed before such an announcement.

One of us worked (just down the hall from Dr. Jackson, actually) on vetting hundreds of senior administration officials. Very presentable and capable individuals — sometimes even those with existing security clearances — are sometimes disqualified by the rigorous personnel investigations that are normally undertaken for cabinet positions. Such cabinet-level vets complement but are more thorough than a typical pre-existing security clearance, and can uncover conflicts, misdeeds or other disqualifying information.

We are not suggesting that vetting will uncover anything improper, but caution is warranted, since many of Mr. Trump's nominees have had unprecedented conflicts and other issues.

Norman L. Eisen (@NormEisen) is a senior fellow at the Brookings Institution and was President Obama's ethics czar from 2009 to 2011. Bandy X.Lee is a forensic psychiatrist at the Yale School of Medicine and a project leader for the World Health Organization.

12 - ABC News (Video): [Veterans groups respond cautiously to VA secretary nomination](#)
(29 March, Sarah Kolinovsky, 24.2M uvm; New York, NY)

Despite his active duty status as a Navy rear admiral (lower half) and his medical experience, veterans service organizations are responding cautiously to the nomination of Dr. Ronny Jackson for secretary of Veterans Affairs, with some expressing concern about his lack of managerial experience or what his views are on reforming the VA.

Jackson has served as White House Physician in the past three administrations and in January gave President Donald Trump a glowing health review. Recently, Trump nominated Jackson to receive a second star, promoting him to the rank of full rear admiral. Jackson has deployed to Iraq as an emergency medicine physician in charge of resuscitative medicine for a forward-deployed Surgical Shock Trauma Platoon.

Iraq and Afghanistan Veterans of America, an organization serving the post-9/11 generation of veterans, say it looks "forward to learning more about Dr. Ronny Jackson's vision and qualifications." The statement underscores the fact that Jackson lacks significant managerial experience as he is poised to lead the government's second largest agency, which cares for more than nine million veterans and has an annual budget of nearly \$200 billion.

"Nobody really knows who is he. Is he an empty vessel? Does he have strong views on privatization, or reforming the VA?" asked IAVA CEO and Founder Paul Rieckhoff during an appearance on CNN Thursday morning. "So the confirmation hearings are going to be really really important. The Senate, House, time for you guys to step up and grill this guy and find out if he is qualified to not only run the agency but care for our veterans in a time of war."

IAVA welcomed the news that "finally puts an end to weeks of painful speculation that was negatively impacting VA and veterans nationwide," referring to media reports that President Trump had lost confidence in Secretary Shulkin. IAVA pointed out that in a recent survey, only 24% of the organization's members approved of the job Shulkin was doing.

Veterans of Foreign Wars (VFW) echoed IAVA's hesitation about Jackson's experience. "The VFW will be closely monitoring the Senate confirmation process, because what Dr. Jackson's bio does not reflect is any experience working with the VA or with veterans, or managing any organization of size, much less one as multifaceted as the Department of Veterans Affairs," VFW Director of Communications Joe Davis said in a statement.

The conservative group Concerned Veterans for America expressed more optimism about the change, saying in a statement "We are hopeful that this change will end the recent distractions at the VA and put the focus back on advancing policy that will ensure veterans get the health care and other benefits they have earned. The Trump administration has made great progress over the last year reforming and fixing the VA, however, there is still much work to be done."

The American Legion declined to comment directly on Jackson's qualifications. Instead, the group highlighted their intention to work "directly with the President through this transition and going forward, and providing him an increased level of advice and feedback on the issues important to America's veterans."

13 - The Atlantic: [The Doctor Who Suddenly Got Nine Million Patients - For a position that demands high-level policy expertise, President Trump appointed his personal physician, Ronny Jackson.](#) (29 March, James Hamblin, 23.9M uvm; Washington, DC)

Nine million veterans will soon be under the care of the emergency-physician rear admiral Ronny Jackson, pending confirmation of his appointment Wednesday to lead the U.S. Department of Veterans Affairs.

This seemingly mundane appointment—a doctor and naval officer with years of experience as White House physician under both Trump and Obama—is of great consequence. It comes at a time when the VA is in need of a politically savvy expert on health-care administration, budgeting, and resource allocation, as the system is on the brink of major changes that bear on national security. The system has proven to require a leader who can thread multiple bureaucratic needles with his or her eyes closed. Jackson does not clearly fit this bill.

The VA is the second-largest federal department, overseeing 1,243 health-care facilities including 170 hospitals, which tend to be a ghostly network of dim, mid-century structures that bear the scars of serving as constant political battlefields. They tend to have bad food and no marble and bizarre gift shops that I've seen sell knives and cured meats. Yet VA hospitals seem to underscore the waste of the glitz of five-star-hospital-style academic medical centers. The system punches above its weight in the quality and safety of care it delivers compared to most of the private health-care industry.

While it is crucial to have experienced veterans and physicians in the upper echelons of a system like this, the work is mostly about politics and economics. Jackson is not an expert in policy, and he lacks work experience in health-care administration or management. His chief credential is that he is a physician. I'm also a physician, and—ask anyone—I'm wholly unqualified to lead a hospital system, much less to lead the one most crucial to our national security.

Even as a doctor, Jackson's judgment has been dubious at times. The press conference in January where he extolled President Trump's soundness of mind suggested allegiance to the president above the public or the profession: "I've found no reason whatsoever to think that the president has any issues whatsoever with his thought process," Jackson said, after having administered a 10-minute test for dementia in which the president was asked to do basic math, identify zoo animals, and draw a clock. (A useful and good test, the results of which were, I've argued, overstated in the context of widespread physician concern over the president's soundness of mind.)

Professional bearing intact, Jackson also said that the borderline-obese (BMI 29.9), 71-year-old president—who does not exercise and eats McDonald's to excess (Filet-o-Fish, no less) and is known for angry outbursts and drinks around 144 ounces of Diet Coke per day and barely sleeps—is in "very good health, excellent health." He speculated that the president would

remain fit for service until the end of a second term and said he told Trump that “if he had a healthier diet over the last 20 years, he might live to be 200 years old.”

As David Axelrod, former adviser to President Obama and now the director of the University of Chicago Institute of Politics, responded publicly to the appointment: “Dr. Jackson is a good and honorable person, [a] fine doctor and career military, but you do get the sense that this [appointment] has as much to do with his boffo press conference on the president’s physical [exam] as anything else.”

Trump has become known for proximity-based, loyalty-based promotions made with apparent haste. Jackson may simply have been the only doctor in Trump’s field of view. With doctors Oz and Phil being televisually obligated, and Harold Bornstein all the way up in New York ... who else is there?

Though if the move was deliberate to a policy end, it was a savvy move from the perspective of those who would like to see the VA privatized. There has been a creeping movement to privatize elements of the VA system, backed by the Koch brothers, among others. At a policy level, the concept is worthy of consideration and debate. Some experts argue that certain elements being privatized could improve quality and decrease costs.

But that doesn’t seem to be what’s happening. The outgoing VA secretary David Shulkin made this clear on Thursday in an op-ed in The New York Times. He argued that some public-private cooperation had been fruitful: “We have expanded access to health care by reducing wait times, increasing productivity, and working more closely with the private sector.” But he also warned that the push toward complete privatization was not being undertaken in good faith. Shulkin writes:

It seems that these successes within the department have intensified the ambitions of people who want to put VA health care in the hands of the private sector. I believe differences in philosophy deserve robust debate, and solutions should be determined based on the merits of the arguments. The advocates within the administration for privatizing VA health services, however, reject this approach. They saw me as an obstacle to privatization who had to be removed. That is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans.

With Shulkin out of the way, the next secretary of the VA would need to approach the job with strong moral bearing and willingness to resist political expedience for the sake of improving the system. Without this force, special interests could sway the system toward privatization at a cost to taxpayers and veterans.

14 - The Hill: [White House: Trump has 'full confidence' in presidential physician to lead VA](#) (29 March, Max Greenwood, 11.9M uvm; Washington, DC)

President Trump has “full confidence” in White House physician Ronny Jackson’s ability to head the Veterans Affairs (VA) Department, a spokeswoman for the White House said Thursday, despite reported concerns from some aides.

"As I said earlier, the president has full confidence in Adm. Jackson," White House deputy press secretary Lindsay Walters told reporters.

"The president did have some early individuals that he was looking at but continuously went back to Dr. Jackson to fulfill this role as VA secretary and ultimately decided that his health care experience, his distinguished career in the medical profession, was something that would be beneficial at the VA," she continued.

"At the end of the day, as I said earlier, the status quo was not working. We need somebody who understands the health care system," she said.

Trump continued a spate of shake-ups in his Cabinet on Wednesday by dismissing VA Secretary David Shulkin and tapping Jackson, a rear admiral in the Navy and the current White House physician, for the role.

The New York Times reported Wednesday that some White House aides had privately expressed concern about the decision to nominate Jackson for the VA's top job, because of his lack of experience managing a large organization.

At the same time, some aides acknowledged that Trump's relationship with Jackson carried more weight in making the decision than the physician's prior experience, the Times reported. Jackson gave Trump his first physical in office earlier this year.

Walters told reporters Thursday that Jackson "has bipartisan respect" in Congress, and said his experience in the Navy gives him an insight into "what soldiers need on the battlefield and what they need when they come home as veterans."

She also said the decision to oust Shulkin and nominate Jackson was in no way part of an effort to privatize veterans' health care, as Shulkin had implied in an op-ed he wrote the day after his ouster.

[Back to Top](#)

15 - The Hill: [GOP, vet groups react with caution to Trump VA pick](#) (29 March, Rebecca Kheel, 11.9M uvm; Washington, DC)

Senators and influential veterans groups are withholding judgment on President Trump's pick to lead the Department of Veterans Affairs (VA), a Navy doctor with no experience leading a federal bureaucracy.

Both the Republican chairman and the Democratic ranking member of the Senate Veterans Affairs Committee said only that they look forward to meeting Rear Adm. Ronny Jackson. Several veterans groups expressed some concern about Jackson's qualifications, but did not immediately oppose him, saying that questions need to be answered during the confirmation process.

"We look forward to understanding more about the qualifications of Admiral Ronny L. Jackson, MD to helm the VA during this critical time," Carl Blake, executive director of Paralyzed Veterans of America, said in a statement. "The VA has a broad mission and the secretary must be someone who is eminently qualified to lead the nation's second largest cabinet agency."

VA-18-0457-A-000926

On Wednesday night, Trump announced on Twitter that he'd tapped Jackson to replace David Shulkin, who fell out of the president's good graces after turmoil over the direction of private health care for veterans and a scathing inspector general report accusing him of misusing taxpayer dollars on a trip to Europe.

Shulkin's firing was expected, but Jackson was not among the names circulating as possible replacements.

Statements from lawmakers and veterans groups poured in Wednesday night, heavily praising Shulkin for his service at the department.

When it came to Jackson, though, the statements were generally shorter and more neutral.

"I look forward to meeting Admiral Jackson and learning more about him," Senate Veterans Affairs Chairman Johnny Isakson (R-Ga.) said in a statement.

In a separate statement, committee ranking member Sen. Jon Tester (D-Mont.) likewise said he looks "forward to meeting Admiral Jackson soon and seeing if he is up to the job."

Jackson was first thrust into the public spotlight when he gave Trump a clean bill of health in January during a lengthy and unusual press briefing at the White House.

Jackson told reporters that a cognitive test showed "no reason whatsoever to think the president has any issues whatsoever with his thought processes." He also proclaimed Trump's "overall health is excellent," crediting the president's "good genes" despite a well-known penchant for fast food and lack of exercise.

Jackson has served as a White House physician since 2006 and was promoted by former President Obama in 2013 to become the physician to the president.

Just last week, Trump nominated Jackson for a promotion in rank from rear admiral (lower half) to rear admiral. Jackson is expected to retire from active duty if confirmed.

A Texas native who received his doctorate of medicine from the University of Texas Medical Branch, Jackson started his naval career in 1995 at the Portsmouth Naval Medical Center in Virginia, according to his Navy biography.

In 2005, Jackson deployed as part of the Surgical Shock Trauma Platoon in Taqaddum, Iraq. There, he served as the emergency physician in charge of resuscitative medicine.

His bio lists several awards, including the Defense Superior Service Medal, the Legion of Merit, the Navy/Marine Corps Commendation Medal and the Navy/Marine Corps Achievement Medal.

But it makes no mention of any work on veterans issues.

Still, the White House says Trump has "full confidence" in Jackson, adding he believes the department needs someone who understands health care.

If confirmed, Jackson would take the helm at the government's second largest bureaucracy at a time when the VA is still regaining trust after a 2014 scandal over long and falsified wait times for veterans seeking health care.

In addition to overseeing 1,700 health-care sites serving almost 9 million veterans annually, the doctor would be in charge of benefits delivery, 360,000 employees and a nearly \$200-billion budget.

Jackson would also come in during a raging debate over legislation to expand a program known as Choice that provides private health care to some veterans -- a concern seen as central to Shulkin's undoing.

At issue is how much to expand the program. Veterans groups and Democrats fear the White House wants to essentially privatize veterans health care, which they warn would not be able to address the unique challenges veterans face.

Jackson's position on the issue is unknown, though the White House said Thursday in response to accusations made by Shulkin that "there are no discussions about privatizing" the VA.

Veterans service organizations, which are congressionally chartered and hold substantial sway over veterans issues in Congress, raised questions about Jackson's qualifications.

AMVETS listed several questions for Jackson, including how someone who's never held a command is qualified to lead a massive bureaucracy and what his qualifications are to address issues outside of health care including claims, appeals, benefits and cemetery affairs.

"I am deeply concerned about the nominee," AMVETS Executive Director Joe Chenelly said in a statement. "Veterans' lives depend on this decision, and the Trump administration needs to substantiate that this active-duty Navy officer is qualified to run a \$200 billion bureaucracy, the second largest agency in the government."

Disabled American Veterans (DAV) said they look forward to "learning more about the qualifications and views" of Jackson and expressed concern about a leadership vacuum.

"At a time of critical negotiations over the future of veterans healthcare reform, VA today has no secretary, no under secretary of health or benefits, and the named acting secretary has no background in health care and no apparent experience working in or with the department," DAV Commander Delphine Metcalf-Foster said in a statement, referring to acting Secretary Robert Wilkie, who comes from the Pentagon.

"We certainly expect the next secretary to continue the path set by VA, Congress and veterans organizations in recent years to strengthen the VA healthcare system while ensuring that all enrolled veterans have timely access to quality care, whenever and wherever they need it."

Still, Vietnam Veterans of America (VVA) said Jackson will understand veterans' needs.

"We are pleased that he is a combat veteran with firsthand knowledge of the trauma of war, and as such, will understand what our veterans need," VVA National President John Rowan said in a statement.

VA secretaries typically receive strong bipartisan support in their confirmation. Shulkin was confirmed unanimously, as was his predecessor Bob McDonald. The secretary before that, Eric Shinseki, was confirmed by voice vote.

Nominees only need a simple majority to be confirmed. But Republicans only have a two-seat advantage over Democrats in the Senate, and one Republican, Sen. John McCain (Ariz.), has not voted in months as he receives cancer treatment in his home state.

Republicans on the Senate Veterans Affairs Committee appeared inclined to support Jackson.

"I look forward to working with Dr. Ronny Jackson on modernizing and reforming the VA, fixing the VA Choice Program, and implementing the major reforms that Congress has passed over the last year," Sen. Thom Tillis (R-N.C.) said in a statement.

Sen. Jerry Moran (R-Kan.), who in January accused Shulkin of "double-talk" in negotiating on Choice, said the VA secretary needs to focus on changing the department's bureaucracy.

"Rear Admiral Jackson has a career in service and I look forward to discussing his plans for the VA to make certain veterans receive access to care they deserve," Moran said in a statement.

Committee Democrats, meanwhile, promised close scrutiny of Jackson's qualifications and his position on privatization.

"I will seriously scrutinize the president's nominee, Ronny Jackson, because our nation's veterans deserve the best," Sen. Richard Blumenthal (D-Conn.) said in a statement.

Sen. Bernie Sanders (I-Vt.), who caucuses with Democrats, was more blunt.

"The Senate Committee on Veterans Affairs should not approve any nominee for secretary who supports the privatization of the VA," he said in a statement.

16 - Military.com: [Others Considered for VA Job Before Trump Picked His Personal Doctor](#) (29 March, Richard Sisk, 9M uvm; San Francisco, CA)

Rear Adm. Ronny L. Jackson, the personal physician to President Donald Trump, was not his first choice to replace fired VA Secretary Dr. David Shulkin, the White House said Thursday.

"The president did have some early individuals that he was looking at but continuously went back to Dr. Jackson to fulfill this role as VA secretary," White House deputy press secretary Lindsay Walters told reporters.

She said Trump "ultimately decided that his [Jackson's] health care experience, his distinguished career in the medical profession, was something that would be beneficial at the VA."

Walters added that Trump "has full confidence in Admiral Jackson" to fulfill the demanding job at the Department of Veterans Affairs despite his lack of experience in running large organizations.

Walters did not name the others who were considered to head the VA, but they reportedly included Toby Cosgrove, former head of the \$8 billion Cleveland Clinic health care system, and Pete Hegseth, an Army National Guard veteran of Iraq, former head of the advocacy group Concerned Veterans of America and co-host of the weekend "Fox & Friends" program.

Cosgrove, a Vietnam veteran, was among those invited in 2016 to Trump's Mar-a-Lago estate in Florida to be interviewed for the VA post before Trump settled on Shulkin, a holdover from the Obama administration.

Others who were under consideration as VA secretary included former Rep. Jeff Miller, R-Florida, who had been chairman of the House Veterans Affairs Committee; retired Army Lt. Gen. Keith Kellogg; Michael Kussman, a former VA undersecretary of health; and Leo Mackay Jr., a former VA deputy secretary who is now senior vice president at Lockheed Martin Corp., The Associated Press reported.

The surprise announcement of his nomination Wednesday afternoon, his status as a relative unknown on Capitol Hill, and the ongoing turmoil at the VA indicate Jackson will have little in the way of a honeymoon period if he is confirmed by the Senate.

Shulkin wasn't even out the door when Jackson faced a barrage of conflicting demands from the White House, Congress and the major Veterans Service Organizations (VSOs).

The immediate concern is the upcoming decision by the VA to award a contract that could run up to \$10 billion and is aimed at finally giving the agency electronic health records. There are also the perennial disagreements on what to do about benefits, wait times, suicides, PTSD, corruption, caregivers and the crumbling infrastructure at VA hospitals.

However, at the top of Jackson's to-do list is reaching a final resolution on the extension and expansion of the Veterans Choice Program, which allows vets to opt for private health care.

Proponents, including Trump, see Choice as guaranteeing that vets get the best health care available; opponents, including the VSOs, see overreliance on Choice as threatening the core mission of VA as the primary provider and payer for the care of nine million vets annually.

In leaving, Shulkin sidestepped the scandal over his travel expenses. He portrayed himself as the victim of palace intrigues hatched by White House political appointees advocating the full "privatization" of VA health care.

In an op-ed for The New York Times, Shulkin wrote that the political appointees, at the White House and within the VA, "saw me as an obstacle to privatization who had to be removed."

"That is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans," he said.

In testimony to the House Veterans Affairs Committee earlier this month, Shulkin warned that the Choice program could run out of money as early as June.

Sen. Johnny Isakson, R-Georgia, chairman of the Senate Veterans Affairs Committee, had co-sponsored a bill that would have extended Choice while keeping the decision on whether vets could go to private doctors within the VA, but the bill was not included in the \$1.3 billion omnibus spending package signed by Trump last week.

Isakson has pledged to renew his efforts on Choice when Congress returns after the Easter recess. In a statement Thursday, he also hinted at the conflicts with the White House by heaping praise on Shulkin and pointing to improvements at the VA in the past year.

Shulkin "has made a tremendous impact toward improving the lives of veterans," Isakson said. "He has been instrumental in all that we have accomplished in the last year, and I thank Dr. Shulkin for his dedicated service to our country and our veterans."

As for Jackson's nomination, Isakson said, "I look forward to meeting Admiral Jackson and learning more about him."

If confirmed by the Senate, Jackson, who has little administrative experience and none in running an organization such as the VA, could be expected to rely on the insider knowledge of the No. 2 at the agency, Deputy VA Secretary Thomas Bowman. The VA, the largest healthcare system in the United States, has 370,000 employees and a budget of nearly \$200 billion.

However, Bowman, a retired Marine colonel and military attorney, has already been targeted for removal by Jake Leinenkugel, a former brewery company executive and now a senior White House adviser on veterans issues.

In December, Leinenkugel wrote in an email to Camilo Sandoval, a political appointee at the VA, that they should lobby for the ousters of both Shulkin and Bowman. The email was first reported by The Washington Post and later obtained by Military.com.

Isakson and the VSOs came to the defense of Bowman, a long-time former staffer on the Senate Veterans Affairs Committee.

"Tom Bowman is a veteran and a patriot, a public servant and a good man," Isakson said in a statement. "If this is true, it will be a mistake, and I am deeply disappointed in the president. Veterans will suffer because of this decision if it's true."

The VSOs have partly blamed the moves against Shulkin and Bowman, and the efforts at privatization, on the work of the advocacy group Concerned Veterans for America, which is funded by the conservative Koch brothers organization.

In a statement, CVA's executive director, Dan Caldwell, said that Shulkin "made significant headway in reforming the department, but ultimately became a distraction from the important task of improving health care for our veterans."

Without mentioning Choice, Caldwell said, "Congress needs to continue work with the president to pass legislation that will give veterans more health care options and better access to care through the VA."

In a statement, Sen. John McCain, R-Arizona, chairman of the Senate Armed Services Committee, said of Choice that "much more work remains to improve the Veterans Choice Program and ensure our nation's heroes have access to the best possible services."

"Let me be very clear: none of us committed to reform wants to privatize care. We simply believe the VA must put the needs of veterans first, and ensure they receive timely, quality and uncompromised health care, whether that's in the VA or in the community," McCain said.

Sen. Jack Reed, D-Rhode Island, ranking member of the Senate Armed Services Committee, said, "I admire Dr. Jackson's service to the nation, but I don't know if he is the right person to lead the VA."

"One thing is clear -- the Trump administration seems to devolve further into turmoil by the day," Reed said. "I hope the level of dysfunction that has engulfed other parts of the administration does not impact the care that our veterans receive."

[Back to Top](#)

17 - Government Executive: [Lawmakers, Veterans Groups and Former Officials Worry VA Nominee Is Not 'Up to the Job'](#) (29 March, Eric Katz, 870k uvm; Washington, DC)

With David Shulkin now ousted from the Veterans Affairs Department, all eyes are on President Trump's nominated replacement to see where he comes down on the most pressing issue at VA: How large a role should the private sector play in providing health care to veterans?

One problem for observers and stakeholders in the veteran community is Trump's pick, Dr. Ronny Jackson, has very little experience in public policy or veterans issues. Veterans service organizations and lawmakers were effusive in their praise of Shulkin, while expressing disappointment in his firing and noting the new relationships they would have to now forge.

"I don't know if he ever set foot in a VA [facility]," Louis Celli, the national VA director at American Legion, a group that represents more than 2 million veterans, said of Jackson. By the time the secretary designate is fully able to understand all the issues facing the department, Celli said, "this administration could be over."

As VA secretary, Jackson would be responsible for managing 370,000 employees spread across 3,000 facilities. Administering veterans disability benefits, education subsidies and cemeteries number among the department's dozens of lines of business. Still, its responsibility to provide health care to veterans is by far its biggest operation—the Veterans Health Administration runs the largest hospital network in the country—and is what led Jackson, a physician, to get the job.

Trump "ultimately decided that his health care experience, his distinguished career in the medical profession was something that would be beneficial at the VA," Lindsay Walters, a White House spokeswoman, told reporters Thursday. "At the end of the day . . . the status quo was not working. We need somebody who understands the health care system."

While Jackson has served as White House physician since 2006 and the president's personal doctor since 2013, his background is atypical for VA secretaries. While Shulkin was the first to helm the department without himself being a veteran, he had served at VA as an undersecretary as head of the Veterans Health Administration. He had previously led multiple private medical centers and health systems. His predecessor was Bob McDonald, who came from the private sector but whose nomination was met with plaudits because of his experience leading the Fortune 50 company Procter & Gamble. McDonald replaced Eric Shinseki, who had previously served as chief of staff of the Army.

In a New York Times op-ed published after his firing, Shulkin warned that his political enemies from within the Trump administration pushed him out not due to the scandals surrounding him but because of ideological differences about the future of VA.

"I have been falsely accused of things by people who wanted me out of the way," Shulkin said. "But despite these politically based attacks on me and my family's character, I am proud of my record and know that I acted with the utmost integrity. Unfortunately, none of that mattered."

Shulkin added that the environment surrounding him became "so toxic, chaotic, disrespectful and subversive" that he could no longer accomplish his job. He said his opponents within the department, whom he repeatedly vowed to oust, were fighting to privatize VA health care and saw him as a barrier in achieving that goal.

"They saw me as an obstacle to privatization who had to be removed," Shulkin said. "That is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans."

Opponents of privatization, including Shulkin, nearly all veterans service organizations and key lawmakers on both sides of the aisle on Capitol Hill, could breathe at least a momentary sigh of relief when Trump announced Jackson as his nominee to be the next VA secretary. Jackson is in many ways an unknown, but is not associated with any previous push to minimize the government's role in providing veterans health care as were some of the other candidates Trump was reportedly considering.

"I am deeply concerned about the nominee," said Joe Chenelly, executive director of AMVETS, another congressionally chartered veterans service organization. "Veterans' lives depend on this decision, and the Trump administration needs to substantiate that this active-duty Navy officer is qualified to run a \$200 billion bureaucracy, the second largest agency in the government."

AMVETS added it was pleased Jackson had a medical background, but noted VA is "more than healthcare."

"What qualifications does the president's nominee have to address claims, appeals, benefits and cemetery affairs?" the group asked.

Celli noted that even McDonald, a veteran who came to the department with vast managerial experience, took a while to fully "wrap his arms around the entire mission of what VA was" and was therefore only able to make a significant impact in two or three areas of VA's operation.

President Obama was wise to recognize he needed a veteran who had also run a large company with a big budget and many employees, much like VA itself, McDonald told Government Executive.

"That intersection is very small and I think [Obama] recognized that," McDonald said. "While Adm. Ronny must be a great doctor, the question the Senate will need to address is does he have sufficient management experience."

Even Shulkin seemed to suggest the job requires a large learning curve.

"No one is naturally prepared to take on a task like this," Shulkin told NPR on Thursday. Jackson would not be met with political leadership at the department to help guide him through

the ins and outs of its medical network, as Trump has yet to nominate an undersecretary to head VHA.

"Given the state of the VA today, the most important thing is the leadership experience of a very large organization," McDonald said. Having medical experience would only be the third top priority, McDonald said, after being a veteran.

Several groups expressed concern over the fate of reforms VA had already initiated under Shulkin. The now former secretary was in the process of realigning the department's regions, or Veterans Integrated Service Networks, and the larger structure of the department. He had worked with oversight committees in Congress on a proposal to consolidate existing programs giving veterans access to private sector care on the government's dime and easing veterans access to such programs, while maintaining a tight balance with those who tend to have a knee-jerk reaction against any reform that could be construed as VA privatization. The existing Veterans Choice Program is expected to run out of funding this summer. He had won approval for his plan to shutter underutilized facilities and had already help shepherd measures to expedite firing of problematic employees and reform the disability appeals process through Congress and into law.

"I have enjoyed getting to know Secretary Shulkin, and I'm glad to call David a friend," said Rep. Phil Roe, R-Tenn., who chairs the House Veterans Affairs Committee. "I think he's done a fantastic job and I hate to see him go."

Roe pledged to work with Jackson and build "a strong relationship with him also." Roe's counterparts in the Senate made clear they would not automatically grant their approval, as will be necessary for his confirmation.

"I look forward to meeting Admiral Jackson and learning more about him," Sen. Johnny Isakson, chairman of the Senate VA committee, said after praising Shulkin for the "tremendous impact" he made during his tenure.

Sen. Jon Tester, D-Mont., was even more non-committal.

"Moving forward, the VA needs a strong leader at the top who will listen to veterans, strengthen the VA and work with Congress to implement bipartisan reform," Tester said. "I look forward to meeting Rear Adm. Jackson soon and seeing if he is up to the job."

McDonald suggested Trump's selection could mark a departure from the path on which he and Shulkin put the department, which the former secretary said he formulated after hundreds of visits around the country to listen to VA beneficiaries.

"Veterans don't want the privatization of the VA," McDonald. "I hope President Trump is listening to veterans."

The American Legion's Celli speculated that Trump's choice of Jackson was a matter of happenstance rather than qualification. His selection was not as "draconian" as he and many had feared, Celli said, but it still appeared as if Jackson got the nod because he was "someone with military experience who [Trump] just happened to know." Celli was at least pleased that Jackson's demeanor and medical abilities were "above reproach," but said he would still have to prove himself beyond that to earn the support of the veteran community.

“Great, he’s a nice guy,” Celli said. “There’s a lot of nice guys out there.”

[Back to Top](#)

18 - PBS: [Who is Ronny Jackson, Trump’s pick to lead the Department of Veterans Affairs?](#) (30 March, Gretchen Frazee, 22M uvm; Arlington, VA)

Rear Admiral Ronny Jackson has garnered almost universal praise for his skills as a military physician and his character. But his appointment to lead the Department of Veterans Affairs is proving divisive as critics point to his lack of experience managing a large organization.

On Wednesday, President Donald Trump named Jackson, the top White House physician, to replace David Shulkin, a holdover from the Obama administration, as secretary of Veterans Affairs.

The nomination immediately sparked criticism over Jackson’s limited management experience. The Department of Veterans Affairs has a \$182 billion budget and hundreds of medical facilities and offices across the country. The agency has 385,233 employees, a spokesperson for the agency said.

“I personally know and greatly respect Ronny Jackson ... as a terrific doctor and Navy officer,” former CIA Director John Brennan tweeted Thursday. “However, he has neither the experience nor the credentials to run the very large and complex VA. This is a terribly misguided nomination that will hurt both a good man and our veterans.”

Others defended Jackson, citing his decades-long career as a military physician and ability to perform in high stress situations and coordinate large operations.

“Ronny Jackson will be just damn fine in management skills,” said Dan Bongino, a former Secret Service special agent who worked with Jackson on the presidential protective division from 2006 to 2011. Bongino has since run for political office as a Republican and been a conservative commentator on numerous television programs.

Jackson has served under three presidents, which gives him bipartisan appeal. Both Democrats and Republicans say he is a superb doctor.

Trained in emergency medicine in the U.S. Navy, Jackson was appointed as a White House physician in 2006 under President George W. Bush. In 2013, President Barack Obama appointed him as physician to the president. He now serves in that same role under Trump.

Jackson is not well known outside of Washington, but he attracted national attention recently after conducting Trump’s medical exam, when he gave the president a glowing assessment at a press conference.

“The president’s overall health is excellent,” Jackson said at the time. “His cardiac performance during his physical exam was very good. He continues to enjoy the significant long-term cardiac and overall health benefits that come from a lifetime of abstinence from tobacco and alcohol.”

Jackson put the president at 6-foot-3 and 239 pounds, sparking widespread memes and photo comparisons to famous athletes online that poked fun at whether those numbers were accurate.

Yet those who have worked with Jackson say Americans should look past that episode and focus on his years of experience coordinating advance medical teams for presidential visits abroad.

As part of his job at the White House, Jackson helped create a contingency plan in case of a medical emergency so the president could receive the best treatment as quickly as possible.

The job has required coordinating with the Secret Service, foreign government leaders, and hundreds of medical staff to determine the closest medical facilities in locations where the president traveled, what their treatment specialties were, and whether they had access to things like a helicopter landing pad, for example.

“Quite literally the president’s life is in his hands,” Bongino said.

It is a high-stress environment, according to Jonathan Wackrow, another Secret Service agent who served under the Obama administration from 2009 to 2014. The president’s physician must handle the presidential family’s medical needs, the everyday stresses of the White House, political influences and constant travel.

“What Dr. Jackson has always done is put his head down and move forward,” Wackrow said. “He is going to take on this challenge like he has everything else in his career.”

Jackson graduated from Texas A&M University in 1991 with a bachelor’s degree in marine biology. He attended medical school at the University of Texas Medical Branch.

After graduating he became an instructor at the Naval Diving and Salvage Training Center in Panama City, Florida. He went on to serve as a diving medical officer for an explosive ordnance disposal unit in Sigonella, Italy, and a diving safety officer at the Naval Safety Center in Norfolk, Virginia.

He later served as an emergency medicine physician in Iraq before joining the White House.

If he is confirmed by the Senate, Jackson would be the first Veterans Affairs secretary to have served in either the Iraq or Afghanistan wars — an experience that will likely resonate with the more than 2.7 million soldiers who have been deployed to the countries since 2001.

“It means he will relate with the people who he is serving,” said Melissa Bryant, the chief policy officer for the advocacy group Iraq and Afghanistan Veterans of America. “But it doesn’t necessarily translate into managing the bureaucracy.”

Even those who support Shulkin’s resignation said Jackson will have a steep learning curve.

“The VA is a very complicated and complex medical system. There is a lot that anybody will need to learn about it,” said Dan Caldwell, the policy director for Concerned Veterans for America, an advocacy group funded by the conservative billionaire Koch brothers.

There are also questions about whether Jackson would be required to retire from the military or be granted a waiver from Congress because active members of the military are generally barred from holding civilian office.

And for all his military and experience, Johnson is still a largely unknown quantity in the larger veterans community.

At the fore of many veterans group's minds is whether Jackson might privatize more agency services. In a New York Times op-ed after he was fired by Trump, Shulkin warned that the department has "become entangled in a brutal power struggle," with political appointees seeking to "privatize veteran health care," a point he echoed in an interview Wednesday with the PBS NewsHour. Shulkin, who has been under fire for an inspector general report that suggested he misused government funds during a trip to Europe, added the chaos surrounding that debate played a role in his ouster.

When he was asked by the NewsHour's Judy Woodruff whether Jackson might push for more privatization, Shulkin said he had not discussed the issue with his successor.

"But I certainly hope he's going to continue the work that I've been doing to move the department to transform it in a better way," Shulkin said of Jackson. "I will certainly do everything I can to help Dr. Jackson succeed in that role," he added.

Shulkin is one of several top administration officials dismissed by Trump in recent weeks. The president has also recently ousted Rex Tillerson as secretary of state, and nominated CIA Director Mike Pompeo as his replacement. He also picked John Bolton, a former U.S. ambassador to the United Nations, to replace National Security Adviser H.R. McMaster. Bolton, unlike Shulkin and Pompeo, do not require Senate confirmation.

Veterans advocates said they would follow Jackson's confirmation process closely. If he does get the Senate's stamp of approval, Caldwell argued, Jackson would have one major advantage: he has the trust of President Trump, at least for now.

19 - NPR (Morning Edition, Audio): [Trump Pick For VA Secretary May Get Additional Scrutiny](#) (30 March, 22M uvm; Washington, DC)

Noel King talks to Democratic Sen. Richard Blumenthal about President Trump's decision to fire VA Secretary David Shulkin, and the confirmation process of the president's pick to replace him.

Transcript:

NOEL KING, HOST:

President Trump has nominated White House physician Ronny Jackson to replace David Shulkin as the secretary of Veterans Affairs. But Doctor Jackson will still need to be confirmed by the Senate. One man who will help decide whether Jackson gets the job is Connecticut Democrat Richard Blumenthal. He's on the Senate committee for veterans affairs (ph), and he was also a reservist in the Marines in the 1970s. Good morning, Senator.

RICHARD BLUMENTHAL: Good morning to you. Thank you for having me.

KING: We're glad to have you. Before we move on to Ronny Jackson, I want to quickly get your take on the firing of Dr. Shulkin. What's your understanding of why he was let go?

VA-18-0457-A-000937

BLUMENTHAL: I take the president at his word - that he was dissatisfied with his performance. But he contributed a lot to the VA at very difficult times. And I think that Dr. Jackson is going to face a buzz saw of skepticism and scrutiny about his management expertise and ability to face exactly the challenges that Dr. Shulkin eventually found unsurmountable (ph).

KING: We'll talk about that buzz saw in a second. But we did talk to Dr. Shulkin on MORNING EDITION yesterday, and he suggested that one issue behind his being let go may have been his views on privatization at the VA. Let me have you listen to him for a sec.

(SOUNDBITE OF ARCHIVED BROADCAST)

DAVID SHULKIN: It's essential for national security and for the country that we honor our commitment by having a strong VA. I was not against reforming VA, but I was against privatization. Do you think his use played a role in his dismissal?

BLUMENTHAL: There is no question that a segment and maybe a dominant part of the Trump administration is looking to privatize the VA health care system. Dr. Shulkin resisted it and rightly so. I have no question that his opposition to privatization played a role in his dismissal. And it will play a role in the confirmation hearings that Dr. Jackson face because he's going to have to state unequivocally and clearly that he, too, opposes privatization for his nomination to be confirmed in my view.

KING: Will you ask him during the confirmation hearing if he does?

BLUMENTHAL: I will not only ask him to state his views, I will eventually demand, respectfully, but still very directly that he commit that he will sustain and, in fact, improve the current VA health care system rather than abandoning it, in effect, to a privatized system that relies on private providers rather than the VA facilities. There is a role for private providers when the wait are too long or the length of time and distance are too large. But the VA health care facility serves, very well, many veterans needs. And it should be improved to be a first-rate, world-class system rather than gradually reduced and abandoned.

KING: Dr. Jackson is a career military doctor. He also served as a personal doctor to President Obama. But the VA is a very big bureaucracy. Do you have specific concerns about his ability to lead such a large organization?

BLUMENTHAL: You know, the VA is kind of like the Mount Everest of public management challenges. It is the second largest agency in the government. It's a sprawling bureaucracy of 360,000 people with a budget of 186 billion. And it will present a challenge. And I have very strong questions about Dr. Jackson's expertise and experience to lead that kind of very, very challenging management bureaucracy.

KING: Questions that you will get to put to him. Senator Richard Blumenthal, Democrat of Connecticut, thank you so much.

BLUMENTHAL: Thank you.

20 - MSNBC (Video): [Reines: 'There's never been a no vote against a VA nominee, this might be the time to change that record'](#) (30 March, 11.8M uvm; New York, NY)

In yet another White House personnel shakeup, President Trump ousts Secretary of Veterans Affairs David Shulkin and appoints his personal doctor Ronny Jackson. Philippe Reines, former adviser to then-Secretary of State Hillary Clinton, and Shermichael Singleton, former Deputy Chief of Staff for the Department of Housing and Urban Development, discuss with Kristen Welker whether the president's new appointee is qualified for the position. The panel also joins Ari Melber, host of MSNBC's The Beat, to weigh in on the breaking news of a federal judge denying Stormy Daniels' motion to depose Trump.

[Back to Top](#)

21 - The Hill: [Trump VA pick hesitated to take job: report](#) (30 March, Max Greenwood, 11.8M uvm; Washington, DC)

White House physician Ronny Jackson initially hesitated at the suggestion that he be nominated to lead the Department of Veterans Affairs, The Washington Post reported Thursday.

Jackson was reportedly shocked when Trump tapped him for the top job at the nation's second largest government agency, the Post reported, citing senior White House officials.

The sources said that when aides initially gauged Jackson's interest, he hesitated. But Trump continued to push for the nomination, insisting that the White House physician was his top choice.

One senior White House official described the interview process to the Post as very informal and without the extensive vetting typical for a Cabinet appointment.

The choice of Jackson has prompted concern among some White House aides, who have privately expressed unease about Jackson's lack of experience managing a large organization.

The New York Times reported Wednesday that some aides acknowledged that Trump's personal relationship with Jackson carried more weight in the decision to nominate him to the VA job than the doctor's professional experience.

Jackson performed Trump's first physical exam since taking office in January, and assured reporters of the president's good health in an hourlong press briefing shortly after that.

The White House has insisted that Trump has full confidence in Jackson's ability to lead the VA, and has pointed to his experience in the Navy as a valuable asset.

[Back to Top](#)

22 - New York Daily News: [A novice in the VA OR: Dr. Ronny Jackson is a very puzzling choice to lead a Veterans Affairs turnaround](#) (31 March, 26.1M uvm; New York, NY)

The 20 million-plus veterans of the U.S. Armed Forces served this country with the eminently deserved expectation that their country would serve them.

Now even as the heart of that trust, the VA health care system, recovers from deadly delays in getting patients care, and after summarily dispatching his first head of the U.S. Department of Veterans Affairs, David Shulkin, President Trump inflicts risky experimental treatment, nominating as the new chief a doctor who has never come close to the operating room of managing a large organization — never mind one with nearly 378,800 employees.

The distinguished career of Rear Admiral Ronny Jackson, a medical doctor, has put him everywhere from the Iraq battlefield to the deep sea, demonstrating impressive courage and resourcefulness, starting from humble roots in Texas.

In recent years he has served as the White House physician, in which capacity he pronounced Donald J. Trump to be in excellent health. His team of 58 or so medical pros treats a few thousand executive employees, including cabinet members and senior staff.

No doubt Trump is fond of Jackson, and Jackson in no position to decline the demand of his commander-in-chief. So it must fall to the Senate to make full use of its confirmation powers to press Jackson on the hows, whys and wherefores of delivering complex services across more than 1,200 facilities.

This, after the VA's inspector general laid at Shulkin's feet alarming failures that ranged from inventory mismanagement to costly accounting laxity to misapplication of anesthesia. And Shulkin was an experienced hospital administrator who once ran New York City's own Beth Israel.

If Jackson cannot prove himself poised to do any better, he should not get the job.

Congress must also stay alert to forces eager to meddle with VA's core mission and services by putting vets' health care in the hands of for-profit businesses, a possibility Shulkin warned of after his firing in an extraordinary New York Times Op-Ed.

"I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits," he wrote, "even if it undermines care for veterans."

To the extent private players can deliver better services for less money, go for it. Indeed, greater freedom to visit private physicians was a breakthrough in solving the VA's patient-care crisis.

But Shulkin's dark prognosis casts doubt that improving the VA's own services is part of the plan. A Department of Veterans Affairs that fails to put veterans first, middle and last will be unworthy of the name.

[Back to Top](#)

23 - NPR (All Things Considered, Audio): [Veteran Congressman On Trump's New VA Secretary Nominee](#) (31 March, 22M uvm; Washington, DC)

President Trump has picked Rear Adm. Ronny Jackson to be secretary of Veterans Affairs. Veteran and Rep. Mike Coffman (R-Colo.) tells NPR's Michel Martin why he supports the new leadership.

MICHEL MARTIN, HOST:

We're going to start the program today with the recent shakeup at the Department of Veterans Affairs. President Trump nominated Rear Admiral Ronny Jackson, the top White House physician, to replace Dr. David Shulkin as secretary of the Department of Veterans Affairs. It's a huge and complex job overseeing medical facilities around the country, hundreds of thousands of employees, not to mention programs that distribute hundreds of millions of dollars in benefits to veterans and beneficiaries. Jackson will need to be confirmed by the Senate before he officially steps into the job.

Needless to say, no one veteran can speak for all veterans, but we thought we'd like to hear from one of the military veterans serving in Congress, so we called Republican Congressman Mike Coffman. He represents Colorado's 6th District. He serves on the House Armed Services Committee, and he's with us now from Aurora. Congressman, thanks so much for joining us.

MIKE COFFMAN: Thanks for having me.

MARTIN: You served in both the Army and the Marine Corps. So if I may, thank you for that. So I understand that you have expressed the frustration that the incumbent of that position, whoever it is, needs to clean house. The question is, does Dr. Jackson have the kind of experience leading a large, complex organization to not just clean house but then to fix the house? Do you think he has that experience?

COFFMAN: Well, no matter how good he is, no matter what experiences he has, if he's not going clean the house, the VA will not change. It did not change under Secretary Shulkin. It did not change under Secretary McDonald. It did not change under Secretary Shinseki before then because none of them took the actions to clean house at the top. And I think that he clearly needs a strong deputy secretary who has a lot of administrative skills in terms of managing an organization that is over half the size of the United States Army.

MARTIN: Some of the veterans organizations, and frankly, some members of Congress, suspect that the real agenda here is to move faster toward privatization. Do you think that that's true?

COFFMAN: No. I know Secretary Shulkin had raised that issue. But, no, I think it's going to be the preservation of the Choice Act, which essentially states if a veteran lives a certain distance away from a VA facility or if a veteran can't get an appointment wait time within a reasonable period of time that that veteran have access to community providers that augment the capacity of the VA health care system. That program is temporary. Now we want to reauthorize it and make it permanent, make it work. It's not working very well. But that's not privatization. I think that that's just a red herring.

MARTIN: I'm wondering if you have any sense of what the Senate's posture is toward this nomination. Do you have any sense of - what are you hearing?

COFFMAN: I think he needs - in order to be confirmed, I believe he's going to have to dispel this notion of privatization. He certainly can be supportive of augmenting the Department of Veterans Affairs with community providers under the Choice program. But if he does do what Secretary Shulkin says he will do, which I don't believe he will do, he will not be confirmed.

MARTIN: Before we let you go, Congressman, it's an election year. There's a Democrat running against you, Jason Crow, who is also a veteran. A number of veterans are, you know, running this year. I wonder if you feel that that kind of interest in running for office among veterans might be part of the thing that creates a change here?

COFFMAN: Well, I think that it's good that we have veterans running and serving in Congress, either it's on the veterans committee or on the Armed Services Committee. I think there are a deficit of veterans serving on those committees that are entrusted to make very key policy decisions. And I think that that's the individual to understand those issues is another veteran.

MARTIN: That's Congressman Mike Coffman, Republican of Colorado, who represents the 6th Congressional District in Colorado. He was kind enough to join us from Aurora. Congressman, thanks so much for speaking with us today.

COFFMAN: Oh, thanks so much for having me.

[Back to Top](#)

24 - The Washington Post (Video): [Does Trump believe in the value of expertise, or does he disdain it?](#) (31 March, Dan Balz, 43.9M uvm; Washington, DC)

The shake-up at the Department of Veterans Affairs — out with Secretary David Shulkin and potentially in with White House physician Ronny L. Jackson — is being portrayed, correctly, as President Trump surrounding himself with Cabinet officials with whom he feels personally comfortable. A broader question arises, however, over the extent to which this president prizes or disparages expertise.

Defenders of the president can point to his national security team to rebut suggestions that he resists recruiting people with experience and expertise to advise him. Though he has run through more than his share of foreign policy advisers, one reality is that they have mostly brought either military, business or relevant congressional experience to their positions.

That was certainly true of his early team: Defense Secretary Jim Mattis, national security adviser H.R. McMaster, Secretary of State Rex Tillerson, CIA Director Mike Pompeo and Homeland Security Secretary John F. Kelly, who has since become White House chief of staff. McMaster and Tillerson are on their way out, however, with Pompeo nominated for State and John Bolton selected as the president's third national security adviser.

Bolton comes to the job with many critics, who see him as far too hawkish at such a dangerous time internationally. But he is no novice when it comes to the issues, nor is he a stranger to the inner workings of government and the bureaucracy. For Pompeo's replacement, Trump has picked CIA Deputy Director Gina Haspel, a career intelligence official. She could face a challenging confirmation process but nonetheless has strong support from former intelligence community officials for her capabilities and experience.

The domestic side of Trump's Cabinet is another story. Shulkin was a holdover from the Obama administration and early on was praised — even singled out — by Trump for his leadership of an agency long plagued by scandal and inefficiencies. Though he had the background to run the agency, he leaves under a cloud of his own making — the misuse of taxpayer money that drew

a rebuke from the department's inspector general. In his final weeks, he ran a divided agency bunkered in his office, as portrayed vividly by The Washington Post's Lisa Rein. Shulkin is among several Trump Cabinet officers who have faced ethical questions.

Trump concluded a change was needed and looked no farther than inside his own White House, tapping Jackson, even though the White House physician has had no experience running a big operation, let alone something as complicated and dysfunctional as VA. What counted in the decision seemed to be Jackson's compelling performance briefing reporters about the president's physical examination.

Look beyond VA.

Ben Carson was one of the world's foremost pediatric neurosurgeons before he entered politics, and he had a compelling personal story of rising from the inner city of Detroit to the highest ranks of medicine. But he had never served in government, nor did he have specific credentials to oversee the Housing and Urban Development Department. His main qualification seems to have been running against and later endorsing Trump.

Carson has made little substantive mark at HUD, though he has recently been caught up in the embarrassment of having a \$31,000 dining set ordered for his private office. Testifying before Congress, Carson declined to accept full responsibility for the purchase, saying he had left redecorating to his wife and others and "dismissed myself from the issues." Days later, he took responsibility.

At the Education Department, Secretary Betsy DeVos arrived on a mission — to build up charter schools and to push for school choice and school vouchers, while reducing the federal government's role in education — issues she championed as a Republican activist and philanthropist in Michigan. She has no experience in the classroom, nor has she overseen a local school district or served in a state government education position, the backgrounds of recent education secretaries.

That DeVos was a polarizing choice was not a surprise, given the policies she believes in and her political advocacy before coming to Washington. Her lack of preparation about the status of public education and schools was displayed most recently on national television earlier this year when she was interviewed on CBS's "60 Minutes" and repeatedly could not answer questions from correspondent Lesley Stahl.

Others in the administration — Environmental Protection Agency head Scott Pruitt the most prominent — reject the overwhelming scientific consensus about climate change.

Expertise isn't everything. Vietnam showed how even the so-called best and brightest could lead the country astray. It was then-House speaker Sam Rayburn (D-Tex.) — who after hearing then-vice president Lyndon B. Johnson rave about the brains and credentials of the Cabinet assembled by President John F. Kennedy — reportedly said, "Well, Lyndon, they may be every bit as intelligent as you say, but I'd feel a whole lot better if just one of them had run for sheriff, once."

Rayburn's instincts proved tragically correct, showing that brains alone weren't sufficient for those in positions of responsibility and that both an absence of hubris and a connection to everyday Americans were vital to the careful exercise of power. But he also understood, as one

of the strongest House speakers in history, that to be successful, he needed an intimate understanding of the institution and the people he was leading.

In today's political climate, skepticism of expertise is widespread.

During a television interview ahead of the Brexit vote, Michael Gove, a British Conservative Party official, was read a list of domestic and foreign leaders, including then-president Barack Obama, who were uniformly warning that leaving the European Union would have dire consequences for the United Kingdom.

"I think the people in this country have had enough of experts with organizations with acronyms saying that they know what is best and getting it consistently wrong," Gove famously replied.

He was proved right when the British public voted narrowly to leave the E.U., a vote that foreshadowed the even bigger earthquake months later in the 2016 U.S. presidential election, when Trump defeated Hillary Clinton, the embodiment of the country's political and cultural elite.

Trump played on those anti-expertise sentiments as a candidate, appealing to voters to reject the establishment's policies and leadership, and instead to trust themselves and especially him, a political novice. He carried that viewpoint to an extreme when, at the Republican National Convention, he declared, "I alone can fix it."

Trump's presidency continues as an extension of that pronouncement, with the nation's leader increasingly trusting in himself rather than those around him on critical decisions. Some — not all, but some — of his personnel choices underscore the related belief, that expertise or relevant experience is overrated, perhaps even a handicap. It is an experiment, to say the least, and a risky one at that.

[Back to Top](#)

25 - Politico Magazine: [When Our President Put His Doctor in Charge of Everything](#) (31 March, Marius Stan and Vladimir Tismaneanu, 23.9M uvm; Arlington, VA)

No one knows more about leaders' bodies than their personal physicians. Notoriously, Joseph Stalin mistrusted the Kremlin doctors, whom he suspected of trying to poison him and the other Soviet magnates. In February 1953, a month before Stalin passed away, they were arrested and horribly tortured. The ones still left alive were too terrified to treat him as he lay dying in March.

An avowed Stalinist, the late Romanian dictator Nicolae Ceausescu held a different vision for his medical entourage. Not only did he trust his doctors, he also made one of them—professor Theodor Burghel—the country's minister of health. Even by the standards of Romanian dictatorships, this was new. So as U.S. President Donald Trump taps the White House physician to head the Department of Veterans Affairs, a vast and sprawling bureaucracy, he might want to brush up on some recent Romanian history.

It's not that Burghel, the former rector of the respected Bucharest Institute of Medicine and Pharmacy (the country's top medical school), was not a capable person. He was, but his administrative experience was limited to a small-size bureaucracy. He was said to be an excellent urologist, a decent person and a respected professor. As a surgeon, he was highly regarded. But the Ministry of Health was a different business. What Ceausescu wanted to

emphasize with such an appointment was that human life was a state affair and that he, as the supreme leader, could sweep aside any past criteria of administrative competence. According to our sources, Dr. Burghela was quite reluctant to accept the ministerial job, but no one in the Securitate-controlled regime could say NO to Ceausescu without facing unpleasant consequences. So, Burghela said yes and served between 1972 and 1975. During this period, he reluctantly complied with Ceausescu's increasingly erratic orders and eventually, he resigned.

Another telltale case was Dr. Iulian Mincu, Ceausescu's last personal doctor, whom he entrusted with designing the notorious Rational Nourishment Program, a set of draconian policies imposed in the 1980s to justify starvation in the name of medical progress. Ersatz food (adulterated oil made from unrefined soy, fake cheese fluffed up with flour, dregs of meat like chicken claws, fake coffee called "Nechezol," and so on) proclaimed superior to natural products. In the meantime, the regime could export food for hard currency. For instance, one ration card for one person in the city of Galați, eastern Romania, from the late 1980s contained: Bread—300gr/daily; poultry—1 kilo/month; pork or beef—500gr/month, or meat cans from Czechoslovakia or the Soviet Union as replacements; other meat products (salami, sausages, usually made of soy)—800gr/month; salted cheese—500gr/each trimester; butter—100gr/month; oil—750ml/month; sugar—1 kilo/month; corn flour—1 kilo/month; flour—1 kilo/each semester; eggs—8 to 12/month; and a supplement for hard workers, meaning 300 more grams monthly for diverse products.

In spite of his dismal record—including a deliberate concealment of HIV and AIDS data in the 1980s—Dr. Mincu was resurrected after the Romanian December 1989 revolution as Minister of Health under the reign of Ceausescu's authoritarian successor, Ion Iliescu. During a research interview in 2007 conducted by one of this article's authors (Marius Stan), Mincu stood by his bizarre food ideas and denied any wrongdoing.

One of the lessons from these two Romanian stories is that expertise matters decisively. Another is that proximity to the leader (even if he or she is democratically elected, as Trump was) does not qualify one for running huge bureaucracies in need of urgent overhaul. Managing complex organizations is a skill in its own right. Putting someone unqualified in charge of a massive system such as the Romanian Ministry of Health could lead to amateurism, improvisation and, eventually, mission failure. In our case, it did—twice.

This seems to be the case right now in Washington: A person with impressive credentials in terms of running small medical units, Dr. Ronny Jackson, has suddenly been catapulted to the top of a government agency dealing with veteran affairs—thanks in no small measure, it seems, to his robust defense of Trump's personal health. Yet taking the president's blood pressure or even performing surgery, the Romanian case suggests, has nothing to do with being in charge of major institutions that affect the lives of millions. Ceausescu was certain that personal loyalty to him was the most important quality of any top official. He shared this illusion with most of the last century's dictators. Is this now a litmus test for promotion in the Trump administration? At the end of the Ceausescu regime, the Romanian health system was a complete disaster. Intrahospital infections and scarcity of medical drugs were rampant. Doctors' salaries were miserable and, in order to increase their incomes, many expected to be paid with Kent cigarettes, whiskey, and other coveted goods. As a result of the restrictive reproductive health policies enforced under the 25-year Ceausescu dictatorship, Romania ended the 1980s with the highest recorded maternal mortality of any country in Europe—159 deaths per 100,000 live births in 1989.

One can only hope America's veterans will fare better. For Ceausescu, such promotions meant an assertion of his autocratic ruling style. Like Italy's Benito Mussolini, he saw himself as the successor to Roman emperors. And, as we know, Caligula could appoint anyone to any position, even the Roman Senate. On the other hand, no one is ever better placed than a personal doctor to subvert the tyrant's glorious self-image with a few well-placed details—see Li Zhisui's devastating critique of Mao Zedong as a manipulative egomaniac who boasted about his unorthodox sexual appetites. Dare we quote William Gladstone's suddenly apt admonition? "The disease of an evil conscience is beyond the practice of all the physicians of all the countries in the world."

Marius Stan is research director of the Hannah Arendt Center at the University of Bucharest. Vladimir Tismaneanu is professor of politics at the University of Maryland, College Park. They have a co-authored book coming out from Cambridge University Press in May 2018, Romania Confronts its Communist Past. Democracy, Memory, and Moral Justice.

[Back to Top](#)

26 - CBS News (Face the Nation, Video): [Sen. Bernie Sanders on "Face the Nation," April 1, 2018](#) (1 April, 26M uvm; New York, NY)

President Trump announced the ouster of David Shulkin as secretary of Veterans Affairs this week, nominating longtime White House physician Adm. Ronny Jackson as his replacement. Shulkin had come under withering criticism from lawmakers on Capitol Hill over his travel expenses and a blistering inspector general's report on conditions at the VA.

Sen. Bernie Sanders, an independent from Vermont, is the ranking member of the Senate Budget Committee and former chairman of the Senate Committee on Veterans Affairs. He joined us to discuss the reforming the VA, Jackson's nomination and more.

The following is a transcript of the interview with Sanders that aired Sunday, April 1, 2018, on "Face the Nation."

MARGARET BRENNAN: We turn now to Vermont independent Senator Bernie Sanders who sits on the Senate Veterans Affairs Committee. He joins us from Burlington in his home state this morning. Senator the VA is the largest health care system in this country. Will you support Dr. Ronnie Jackson as the nominee?

SEN. BERNIE SANDERS: Well we know nothing about what Dr. Jackson stands for and what his vision is for the VA. But Margaret this is what I will tell you. What concerns me very much is that right now in Washington we have a family called the Koch brothers, third wealthiest family in America a family that is prepared with a few of their other billionaire friends to spend four hundred million dollars on the coming elections. They are now the most powerful political force in America, stronger than the Democratic National Committee or the Republican National Committee. Their view has been we have got to privatize, privatize and privatize. And what Dr. Shulkin, who Trump just fired this week has told us is that the reason for his firing is that he resisted privatization of the Veterans Administration. Now I work very closely with the major veterans organizations, the American Legion, VFW, DAV Vietnam vets all of the veterans organizations. And what they say is they want to strengthen the VA not dismember it, not privatize it. So we will see what Dr. Jackson has to say.

BRENNAN: Well the White House says at this time they have no intent to privatize the VA. Do you know what the Trump administration policy is?

SANDERS: Yeah of course I do. They have been putting more and more money into the private sector with VA money. I do not believe them on that issue. I think they are listening to the Koch brothers and I think that that is a very, very bad idea. If you listen to veterans all across this country as I do they will tell you sure there are problems with the VA but by and large once they get into the system they are proud of the quality that the - quality care that the VA provides in fact the American Legion has just come out with a publication which vigorously opposes privatization. So I do believe that the Trump administration no matter what they are now saying I think they are working on behalf of the Koch brothers, look these are the guys, Koch brothers who want to privatize everything. You have a Trump administration that in their budget, the Trump budget proposed 500 billion dollar cuts in Medicare. Trillion dollar cuts in Medicaid. You have a Secretary of Education who doesn't believe in public education a head of the EPA.

BRENNAN: Sir on the issue of the VA you did last year vote for a bill that allowed at least more leeway for veterans and their doctors -

SANDERS: Right.

BRENNAN: - to decide whether they wanted to opt in for private care. So it sounds like you are open to some private sector option here.

SANDERS: Well there has always been private sector option if you live in a rural community you don't want 75, 80 year old veterans to travel two hours to get a physical examination. If there is a VA facility in the country that is not treating veterans in a timely manner of course you want to allow veterans to go to the private sector. That is the case now that has always been the case. But what the Koch brothers want and what I feared the Trump administration wants is to rip that wide open and to take many. We got a 200 billion dollar veterans budget.

BRENNAN: Yeah.

SANDERS: There are special corporate interests that want a big chunk of that money. We must not allow that to happen.

BRENNAN: Senator we have to take a quick break and we'll talk to you on the other side of it. We'll be right back.

SANDERS: Thank you.

(COMMERCIAL BREAK)

BRENNAN: Welcome back to "Face the Nation." I'm Margaret Brennan. We're back now with Vermont independent Senator Bernie Sanders who is going to be asking some tough questions of that next nominee to be the VA secretary, Senator. The VA says the average wait time at some facilities can be as long as 100 days. President says he's not happy with the speed of reform there. What is the source of this problem?

SANDERS: Well look the VA is the largest integrated health care system in the country. And as I said previously if you asked the veterans organizations they by and large think the VA is providing good quality care. You know Margaret there is a lot of attention paid to the VA

because it's a government agency. But I've got news for you. People all over this country when they want to get to a doctor or they need hospital care they don't get in the very next day. So I am sure that there are some VA facilities where the waiting time is too long. That has got to be addressed. There are other VA facilities for example I know here in Vermont that if you are dealing with a psychiatric crisis, an emotional crisis you get in that day that's pretty good. So the VA does a lot of good things. It has problems. We have got to improve the VA. But I think we've got to listen to the veterans of this country and not privatize it.

BRENNAN: Senator you also sit on the Environment Committee and you've been a harsh critic of EPA Administrator Scott Pruitt. He's facing a number of questions about ethics and these new reports that he rented a residence here in Washington partly owned by the wife of a top energy lobbyist whose firm did business with the EPA. Do you think your committee should hold hearings on this?

SANDERS: I do. But I think the issue goes well beyond that problem. The issue goes to the fact that the vast majority of people in this country understand that climate change is real. It is already doing devastating problems throughout our nation and throughout the world and yet we have a president and a head of the EPA who do not even recognize the reality of climate change let alone the need to transform our energy system away from fossil fuel to energy efficiency and sustainable energy. So you got a guy who's head of the EPA now who is nothing more than a front man for the fossil fuel industry and that is a very serious problem and the Congress has got to stand up and oppose that line of policy.

BRENNAN: I imagine you oppose the lowering of emission standards that the administration is expected to announce this week.

SANDERS: Well, of course. I mean what we have got to do is understand that we have over the last number of years made success against air pollution and against water pollution. We have made some success in transforming our energy system and the idea to go back and listen to the short term needs of the coal industry or the oil industry makes no sense to me at all. Look, here is the truth. What the scientific community is telling us is that climate change is one of the great environmental crises facing this planet and if we don't get a handle on that we're going to be leaving this planet - a planet to our kids, that is not healthy or habitable. We've got to address that. The Trump administration is moving in exactly the wrong direction.

BRENNAN: Sir you have been critical of the Israeli government's decision to use lethal force against Palestinian demonstrators killing 15 wounding over 700. The Trump administration has stopped short of calling on Israel for restraint. Should they explicitly do so.

SANDERS: Yes they should look, Gaza as I think everybody knows is a humanitarian disaster. The unemployment rate there is beyond comprehension. And there is just enormous unrest. What the function of the United States government should be right now is to sit down with the Israelis sit down with the Palestinians and figure out how, we can rebuild Gaza and also to tell the Israelis that when you've got tens and tens of thousands of people protesting, they cannot overreact and the idea of 15 or so people being killed and hundreds being wounded is - is to me unacceptable.

BRENNAN: We should note the Palestinian Authority already did boycott a meeting at the White House recently to talk about rebuilding Gaza. Senator thank you so much for your time.

We'll be right back with our political panel.

27 - CBS News (Video): [Sen. Bernie Sanders says privatizing the VA a "very, very bad idea"](#) (1 April, Emily Tillett, 26M uvm; New York, NY)

Sen. Bernie Sanders, I-Vermont, says that he thinks it's too early to tell what President Trump's pick to take over leadership at the embattled Department of Veterans Affairs "stands for," but cautioned that privatizing the VA to be a "very, very bad idea."

Former VA Secretary Shulkin became the latest member of Mr. Trump's cabinet to be terminated last week. The president announced that he was replacing Shulkin in a series of tweets, and said he would nominate Adm. Ronny Jackson, who had been serving as the president's doctor, to replace him.

"I work very closely with the major veterans organizations, the American Legion, VFW, DAV, Vietnam vets, all of the veterans organizations. And what they say is they want to strengthen the VA, not dismember it, not privatize it. So we will see what Dr. Jackson has to say," said Sanders.

Transcript: Sen. Bernie Sanders on "Face the Nation," April 1, 2018

Shulkin came under fire for a series of blunders including reported insurgencies inside his own department and improper use of travel expenses. The former secretary said he was ousted over internal and administration disputes over privatizing the VA.

"Privatization leading to the dismantling of the department's extensive health care system is a terrible idea. The department's understanding of service-related health problems, its groundbreaking research and its special ability to work with military veterans cannot be easily replicated in the private sector," Shulkin wrote in an op-ed for the New York Times last week.

Sanders agreed, saying that while the VA has problems that need to be addressed, "We've got to listen to the veterans of this country and not privatize it."

"If you listen to veterans all across this country as I do they will tell you sure there are problems with the VA but by and large once they get into the system they are proud of the quality care that the VA provides."

He added, "There is a lot of attention paid to the VA because it's a government agency. But I've got news for you. People all over this country, when they want to get to a doctor or they need hospital care, they don't get in the very next day. So I am sure that there are some VA facilities where the waiting time is too long. That has got to be addressed. There are other VA facilities -- for example, I know here in Vermont that if you are dealing with a psychiatric crisis, an emotional crisis you, get in that day. That's pretty good."

28 - Politico: [Sanders: 'We know nothing' about Trump's VA pick](#) (1 April, Connor O'Brien, 23.9M uvm; Arlington, VA)

Sen. Bernie Sanders wouldn't commit to supporting President Donald Trump's pick to lead the Department of Veterans Affairs, Rear Adm. Ronny Jackson, on Sunday.

In an interview on CBS' "Face the Nation," the Vermont independent noted that Jackson, Trump's personal physician, is a virtual unknown on veterans issues. He also expressed concerns the Trump administration is pushing to privatize the nearly \$200 billion bureaucracy, citing the conservative agenda of the influential donors Charles and David Koch.

"We know nothing about what Dr. Jackson stands for and what his vision is for the VA," Sanders said.

Trump replaced VA Secretary David Shulkin last week after months of criticism over reports he misused government travel. Shulkin has since said he was forced out for pushing back against efforts to privatize veterans services.

Jackson's nomination came as a surprise. And the pick has raised questions about his qualifications to manage the myriad health services and benefits provided by VA and whether the administration is indeed pressing to privatize more veterans services.

"I do believe that the Trump administration, no matter what they are now saying, I think they are working on behalf of the Koch brothers," Sanders said, adding they "want to privatize everything."

"They have been putting more and more money into the private sector with VA money. I do not believe them on that issue," he added. "I think they are listening to the Koch brothers and I think that that is a very, very bad idea."

While he helped negotiate additional funding for veterans to access private medical care, Sanders, a former Senate Veterans' Affairs chairman, has said beefing up VA's budget and health services should be the priority.

"The VA does a lot of good things. It has problems. We have got to improve the VA," Sanders said. "But I think we've got to listen to the veterans of this country and not privatize it."

[Back to Top](#)

29 - The Hill: [Sanders: I will work against any VA nominee backing privatization](#) (1 April, Mallory Shelbourne, 11.9M uvm; Washington, DC)

Sen. Bernie Sanders (I-Vt.) said Sunday he will work against any Veterans Affairs (VA) nominee who supports privatizing the agency.

"I will do everything I can as a member of the veterans committee not to approve any nominee who is not going to strengthen the VA and who will oppose privatization," Sanders told CNN's "State of the Union."

The comments from Sanders come after Trump announced Rear Adm. Ronny Jackson, who currently serves as the presidential physician, would replace David Shulkin as the Secretary of Veterans Affairs.

Shulkin penned an op-ed in The New York Times opposing the privatization of the agency after his exit and saying there are officials within the administration pushing for it.

Sanders, a member of the Senate Veterans' Affairs Committee, said veterans' organizations argue the agency should be strengthened rather than privatized. He also blamed billionaire brothers Charles and David Koch, arguing their influence over the Trump administration is what's pushing privatization.

"So what you're looking at under the leadership of the Koch brothers, is a massive effort to privatize agencies of the United States government and give them over to private corporations," said Sanders. "That is what the removal of Shulkin is all about."

The Koch brothers did not contribute to Trump's presidential campaign, breaking with years of donations to Republican candidates.

30 - Miami Herald: [Trump's doc shouldn't be a slam dunk to lead Veterans Affairs](#) (1 April, Editorial Board, 8.9M uvm; Miami, FL)

The U.S. Department of Veterans Affairs has enough problems. It doesn't need one in the form of a leader who, very possibly, has no idea what he's doing.

In yet another nomination made under President Trump's "You'll do — for now" philosophy of hiring the "very best people," White House physician Ronny Jackson is up for the vital job of secretary of Veterans Affairs.

If confirmed by the Senate, Jackson will replace David Shulkin, a rare and respected Obama administration holdover who sullied his tenure by not only misusing taxpayers' funds to take a swell trip to London and Copenhagen. His wife's expenses were also paid for by the government. A bit of business, indeed, was done — meetings and such — but then there was the shopping, the castle tours and tickets to the Wimbledon tennis finals, free of charge, in violation of rules that ban gifts to government employees.

Shulkin defended the trip, blamed the media — in this case the Washington Post, which broke the story — and worst of all, lied about it. In addition, he enlisted colleagues to assist in the coverup. According to a VA inspector general's report, Vivieca Wright Simpson, Shulkin's chief of staff, rejiggered documents to make it seem as if Shulkin had received an award in Copenhagen. He didn't. In fact, no such award existed.

Simpson, ahem, has retired. Last week, Shulkin was out, rightly.

In Miami alone, the Veterans Administration's medical facilities do not always measure up, failing the people who have put their lives on the line for this country through military service, but putting those lives in danger again when they need that care back home. In February, an

investigation confirmed discrepancies in HIV test results when some veterans were also tested by an outside lab.

Last fall, an inspection found the public cafeteria in Miami's VA healthcare system egregiously unsanitary — pest droppings, unrefrigerated foods and the like. Though hospitalized vets were not served meals from this cafeteria, the point is that no one should be exposed to the dangers of unclean conditions. And that's just in one region. The VA is the second-largest department in the federal government, with almost 400,000 employees and more than 1,200 health-care facilities.

President Trump nominated Jackson to replace Shulkin. Jackson's credentials as a medical doctor are solid. His ability to run this consistently challenged system? Not so much in evidence. In fact, there is little in his professional background that shows he has what it takes to ensure the VA can truly serve its clients. This is one more nomination that should not be rubber-stamped.

The Senate, if it truly cares for the nation's veterans, will ask Jackson the tough, uncomfortable questions and say No if he's deemed deficient.

[Back to Top](#)

31 - Washington Examiner: [Bernie Sanders: Ronny Jackson will bend to pressure to privatize the VA](#) (1 April, Kyle Feldscher, 4.8M uvm; Washington, DC)

Sen. Bernie Sanders, I-Vt., said he thinks Dr. Ronny Jackson will likely be tasked with privatizing the U.S. Department of Veterans Affairs due to his lack of experience manning a large organization.

Sanders said on CNN's "State of the Union" Jackson, the White House physician and a rear admiral in the U.S. Navy, doesn't know much about heading a large bureaucracy. If he's the one Trump picked to replace David Shulkin, ousted on Wednesday, Sanders said, then he must be in favor of privatization.

"He has no experience in this area but I would strongly suspect that if you get rid of Shulkin, who opposed privatization, and you put in Dr. Jackson, that is what his mission will be," Sanders said.

Sanders, an independent who caucuses with the Democrats, said one only needs to look at the past decisions of the Trump administration to know what the end result will be.

Sanders said the Koch brothers, powerful Republican donors, are going to push for privatization and the administration will likely accede.

"What the Koch brothers believe is not just that we have to privatize the Veterans administration, they want to privatize Medicare, and the Trump administration had a \$500 billion cut in Medicare," he said. "They want to privatize Medicaid. They had a trillion-dollar cut in Medicaid. They're beginning to go after Social Security."

"We have a secretary of education who does not believe in public education. A secretary of the environment, EPA, who does not believe in environmental protection. So, what you're looking at

under the leadership of the Koch brothers is a massive effort to privatize agency of the U.S. government and give them over to private corporations.”

[Back to Top](#)

32 - Newsday: [Senate should be wary of Dept. of Veterans Affairs nominee](#) (1 April, Editorial Board, 3.2M uvm; Melville, NY)

Caring for our nation’s military veterans was one of Donald Trump’s most consistent promises on the presidential campaign trail, and certainly one of his least controversial. Getting veterans the care they need is a nonpartisan priority.

But the increased quality of care Trump promised hasn’t come.

Facilities on Long Island and in many other communities are falling apart. The Department of Veterans Affairs is increasingly being exposed as dangerous and dysfunctional. Last week, as was expected, Trump fired the secretary of veterans affairs, David Shulkin, who could never rise above his ethical violations and his shoddy leadership. His designated replacement is Navy Rear Adm. Ronny Jackson, the White House physician for the past three administrations who garnered praise from Trump for performing well during a news conference about the results of the president’s physical exam.

While Jackson is highly regarded as a physician, his resume does not include a shred of evidence that he can lead the government’s second-largest bureaucracy (it has a \$186 billion budget) and probably its most dysfunctional. This might be the toughest management job in Washington.

Before the Senate confirms Jackson, it must elicit his views on further privatization of medical care, which other Trump appointees are recklessly pushing as a way to dismantle the agency instead of providing improved service. And unless the Senate can ensure that Jackson can overcome his lack of management experience and create a solid plan for building a leadership team that can improve care, it should reject his nomination.

Here on Long Island, the problems are increasingly daunting, and care for our veterans is suffering. Last month, we learned that the Northport VA Medical Center was again forced to stop performing surgeries when a faulty air conditioner forced the hospital to close all five of its operating rooms. The shutdown went on for about a week, and 18 surgeries had to be rescheduled while the \$58,000 repair was performed.

That’s only the latest breakdown at the Northport facility, where surgeries were halted for four months in 2016 when another air-conditioning system failure sent metal fragments flying into the air, threatening to contaminate patients with open wounds. Another cooling system problem a year earlier led to pipe ruptures and a \$12 million repair. And in January, Northport had to close its 42-bed veterans homeless shelter after the heat failed.

A recent report estimated the cost of Northport’s repair and renovation to be \$273 million. Long Island’s 130,000 veterans rely heavily on the facility, which has traditionally maintained a top reputation. Its quality cannot be allowed to decline.

If Jackson is confirmed, Trump, who has a warm personal relationship with his nominee, must make sure their communications remain constant. Jackson will need the president's full support to get the VA running properly and all of its facilities up to par, including Northport.

We owe these veterans. There can be no reneging. — The editorial board

[Back to Top](#)

33 - Las Vegas Sun: [Heller's dilemma: Side with Trump or veterans on VA pick](#) (1 April, Editorial Board, 1.5M uvm; Las Vegas, NV)

Assuming Donald Trump follows through in nominating Dr. Ronny Jackson to lead the Department of Veterans Affairs, Sen. Dean Heller will soon face an ugly consequence for becoming a team player for the president.

For Heller, Jackson's confirmation offers a lose-lose proposition. Either he votes against Jackson and runs the risk of getting dinged by Trump before the midterm elections, or he votes for Jackson and alienates veterans groups that have raised concerns about the White House doctor's qualifications for the position.

Granted, Jackson deserves a fair confirmation hearing, and maybe during his testimony he'll be able to convince Americans that he's the perfect person for the job.

But that's an enormous maybe, given Jackson's razor-thin resume for the job.

The biggest organization Jackson has overseen numbers in the several dozens. The VA employs 360,000 people, has a \$186 billion budget and is the second-largest entity in the federal government, ranking only behind the Pentagon.

This is an organization that was once led by the former CEO of Procter & Gamble, a former member of the U.S. House and a former high-ranking official with the Disabled Veterans of America, among others.

Jackson's qualifications appear to be that he served in the Navy and is apparently a fine doctor. Trump reportedly also likes how Jackson looks and thought he did a nice job in handling the January news conference in which he reported the results of Trump's physical examination.

But where Trump saw greatness, others saw a toady whose glowing remarks about Trump seemed like they could have been copied from Kim Jong Un's physician.

Jackson described a man who is noticeably overweight, disdains vigorous exercise and regularly gorges on fast food as being in "excellent" health, and went as far as to say that if Trump had eaten more healthily during the last several years he might "live to be 200." He predicted that Trump would be fine throughout this term and even through a second term. "It's just the way God made him," Jackson said.

This may sound like satire, but for veterans groups it's no joke. It's potentially a life-and-death matter, as advocates have raised concerns that the Trump administration is angling toward privatizing the VA's health services. Privatization, they believe, would erode the quality of care and lead to higher costs.

The outgoing VA secretary, David Shulkin, fueled advocates' concerns in saying the Trump administration saw him as "an obstacle to privatization who had to be removed." The White House responded by saying Shulkin's ouster was not an indication that the administration was moving toward privatization.

But considering that conservatives like the Koch brothers are pushing for the change, veterans advocates are justifiably uneasy.

For Heller, the nomination process comes at an inopportune time politically. Although Trump cleared a path for Heller to the general election by encouraging Danny Tarkanian to seek a House seat instead of opposing Heller, Heller will be heavily targeted by Democrats in the general election and can scarcely risk alienating Trump's base.

Heller has already faced Trump's wrath. After he initially voted not to repeal the Affordable Care Act, Trump "joked" that Heller would come around if he wanted to "remain a senator." Heller did so, and he has been subjugating himself to Trump ever since.

If the Jackson nomination plays out as expected and the doctor proves to be as bad as a nominee as he looks on paper, Nevada's veterans will be watching him closely to see who he cares more about — the nation's 21 million veterans or Trump.

[Back to Top](#)

34 - **Times Union:** [Editorial: VA pick insults veterans](#) (1 April, Editorial Board, 1.5M uvm; Albany, NY)

THE ISSUE:

The president picks his White House doctor to run the second largest federal agency.

THE STAKES:

The health and welfare of millions of veterans rest on what feels more like a casting call.

Donald Trump has long promoted himself as a champion of military veterans, but when he finally had a chance last week as president to demonstrate that they were more than political props for him, he failed miserably.

In the same cavalier way in which he has appointed so many people who have turned out to be disasters in their jobs, Mr. Trump named his White House physician as secretary of veterans affairs. He thus thrust a man with no experience running a big bureaucracy to the helm of the second-largest federal agency. If the Senate goes along with this, Dr. Ronny L. Jackson, a Navy rear admiral, would go from monitoring the president's health to overseeing a department of more than 366,000 employees.

By all accounts, Dr. Jackson is a nice guy. But this is as absurd as taking a pleasant cashier off the register to be CEO of McDonalds, or plucking a friendly delivery boy off his route to run FedEx.

Dr. Jackson's main qualification to head a department bigger than any branch of the military or the Department of Homeland Security seems to be his talking up of the president's health in January, when he credited Mr. Trump with what he assumed must be "incredibly good genes." Mr. Trump could hardly have been more bombastic himself.

All this might be delightfully surprising in a reality TV show sort of way were the stakes not so high. The VA's mission is not one to take lightly. It's responsible for the health care of more than 9 million veterans served by its 145 hospitals, 300 vet centers, and more than 1,200 outpatient sites. It also handles disability and education benefits, home loans, life insurance, pensions and vocational rehabilitation for millions of vets. Choosing a leader for it should not be treated like a casting call.

Dr. Jackson would succeed David J. Shulkin, who was trying to reform a department in need of modernization and marred by scandal over long waiting lists. Dr. Shulkin, however, had a scandal of his own stemming from his overseas travel, giving Mr. Trump a ready excuse to fire him.

There are concerns that this is part of a conservative small-government quest to end the VA as veterans have known it and privatize its work. A lack of competence at the top would no doubt bolster the case for a radical overhaul. That, however, is not something that should be done in haste or on ideological whim any more than the pick for the secretary of veterans affairs should be the last person to check the president's vitals.

Mr. Trump, who never served in the military thanks to five deferments, may see this all as part of the chaos on which he seems to thrive, and which has left his administration with more high-level turnover in 14 months than some presidents have had in entire terms. But the veterans he claims to cherish don't need what passes for excitement in Mr. Trump's life. They've had quite enough, thank you. That's the message the Senate should send back to Mr. Trump if he doesn't rethink this ridiculous appointment.

[Back to Top](#)

35 - Montana Standard: [For pity's sake, don't privatize Veterans Affairs](#) (1 April, Editorial Board, 202k uvm; Butte, MT)

Just when it was starting to look like Montana's veterans could expect a little more stability from the federal agency charged with providing their health care, another major shakeup at the Department of Veterans Affairs has placed the future of their care in doubt.

Of course, the VA has long stood on shaky ground. However, the current push toward privatization, if successful, could completely erode the foundations of this critical agency and leave millions of veterans — and tens of thousands of Montanans — without the support they earned in service to our country.

The VA's experiment with privatization through the Veterans Choice Program provides a good example of the potential risk. The program was created in 2014 in response to audits that found many veterans faced long waiting periods before they could see a physician. Some even died while they were waiting for an appointment, and some VA employees fudged the data to make it appear they had met the official 14-day target.

Congress passed the Veterans Choice bill to fix the problem by creating a new program that would allow veterans who live more than 40 miles away from the nearest VA clinic to see health care providers in their own community. Obviously, this held a lot of appeal for veterans in rural states like Montana. But U.S. Sen. Jon Tester, D-Montana, a ranking member of the Senate Veterans' Affairs Committee, favors scrapping the program and replacing it with a different system.

The bill provided roughly \$2 billion to hire more physicians and nurses, build more facilities and expand services for underserved populations, such as women and those seeking mental health care. Unfortunately, from its inception, Veterans Choice has relied on third-party administrators to manage the program, and their track record has shown a lot of room for improvement. One of the health insurance companies awarded a major contract, Health Net, was severely chastised just last month in a letter from Tester and Sen. Mike Crapo, R-Idaho.

"Our home state providers deserve better than the miserable customer service provided to them by Health Net, who appears to be devoting even less attention to the Choice Program as its expiration nears," wrote the two senators, who also noted providers' complaints that the company has not paid them on time, and when they attempt to collect their payments, Health Net either puts them on hold or ignores them altogether.

In March 2016, Health Net was acquired by an even larger company, the publicly traded Centene Corporation, for a reported \$6.8 billion. Any hopes that the acquisition would lead to improved services were soon dashed when, last year, a whistleblower alerted authorities to Health Net's complete failure to schedule appointments for some veterans in New Hampshire, some of whom had to wait for longer than six months to schedule an appointment despite the fact that they suffered from life-threatening conditions.

That scandal, among others, helped prompt President Donald Trump to sign an executive order providing better protections for whistleblowers within the agency and establishing a more streamlined system of accountability.

Montana is still working through its own whistleblower scandal. A dentist with the Montana Veterans Affairs Health Care System in Billings, Kelly Hale, reported that veterans faced long wait times due to problems with the clinic's management. The report was confirmed through an internal investigation that found problems dating back to mid-2016. After the investigation, the head of dental services, Robert Bourne, resigned but was rehired on a fee basis so he could continue providing dental services.

The Montana VA then put Hale through a misconduct review and tried to terminate his employment. That action is on hold while the Merit System Protection Board weighs whether it was taken in retaliation for Hale's whistleblowing. Meanwhile, Hale remains a paid staff member but is not allowed to see patients, meaning that for many months in 2017, patients were referred to the nearest VA dental clinic — in Sheridan, Wyoming. This past February, the VA finally hired another dentist, but Hale's case is still pending.

Also in February, the Montana VA issued a press release explaining how it is working to overcome an ongoing shortage of primary care providers. In Montana, the system is required to have about 37 full-time-equivalent positions, but only about 34.5 were filled at last count. Further, providers accounting for 5.5 of those positions have announced they are either leaving or reducing their hours.

The VA responded by explaining that it has already scheduled 8.5 to be filled by the end of May, which would bring it above the 37-position threshold. It is actively recruiting to fill vacant positions in Billings and Helena, and will rely on temporary relief from other providers to meet any other needs throughout its network of 15 facilities in Montana.

Last month, the Montana VA learned it will at last be able to move forward with expansion plans at several of these clinics, including the expansion and upgrade of facilities in Missoula and construction of new sites in Butte, Helena and Fort Harrison.

The exact construction costs are not yet known, but it's likely to cost many millions of dollars. The investment is worth every penny — so long as every one of those pennies goes to providing the best possible care to veterans. Money spent on anything else is money wasted.

In fact, recognition of this value — that private profit off the backs of our veterans is wrong — may have been why former Veterans Affairs Secretary David Shulkin was fired last week. President Trump has already announced that he would like to replace Shulkin with White House physician Ronny L. Jackson.

Shulkin said he suspects he was targeted by supporters of privatization. It likely also had something to do with allegations of ethics violations. An internal investigation found that Shulkin accepted tickets to Wimbledon, and that he not only brought his wife with him on a trip to Europe at taxpayer expense, he directed his chief of staff to go back and change emails in an attempt to justify it. Shulkin denies these accusations.

Nevertheless, his apparent abuse of public dollars for private benefit was soundly criticized, even by his most loyal supporters. It's a lesson that ought to resound throughout the agency.

The VA is still struggling to overcome major problems. Whoever eventually replaces Shulkin must have the depth of experience and expertise to tackle these problems, and the wisdom to avoid creating new ones — and that includes the misguided push to privatize the VA.

[Back to Top](#)

36 - Washington Examiner: [Ron Johnson: Trump 'deserves' a VA secretary who agrees with him on policy](#) (1 April, Naomi Lim, 4.8M uvm; Washington, DC)

Sen. Ron Johnson, R-Wi., agreed Sunday President Trump was right to fire former Veterans Affairs Secretary David Shulkin.

"Well, I think the IG report's pretty troubling," Johnson told NBC, referring to VA inspector general Michael Missal's finding that Shulkin improperly used taxpayer dollars for a trip to Europe with his wife in July.

"Presidents do deserve and have advisers that actually agree with them on policies. And apparently, there were some policy disputes," Johnson continued in reference to alleged disagreements between Trump and Shulkin over the direction of the VA, particularly regarding whether aspects of the department be privatized.

But Johnson added he would not have dismissed Shulkin via social media.

"The president does need to understand the effect it has on attracting other people," he said.

Trump announced Shulkin's departure on Twitter Wednesday, adding that Navy Rear Adm. Ronny Jackson, who has served as White House physician for former Presidents George W. Bush, Barack Obama, as well as Trump, would be nominated to replace Shulkin.

[Back to Top](#)

37 - U.S. News & World Report (AP): [Shulkin Says He Has 'Comfort' With Potential Successor at VA](#) (2 April, Hope Yen, 24M uvm; Washington, DC)

Former Veterans Affairs Secretary David Shulkin downplayed concerns about his potential successor's lack of managerial experience Monday, saying the key for improving the VA will be surrounding White House doctor Ronny Jackson with a good team "because no one person can do this alone."

Shulkin and the White House have engaged in a highly public campaign surrounding his departure from the VA last week. Shulkin said he was fired. The White House said he resigned.

On Monday, Shulkin told CNN there was no reason he would resign. He said he had been given a heads-up on his ouster by Chief of Staff John Kelly moments before President Donald Trump tweeted it.

Shulkin said he supports the person President Donald Trump selected to replace him.

"I have comfort because I know Dr. Jackson," Shulkin said. "Dr. Jackson is a very honorable man who wants to do the right thing."

Shulkin's comments represented a different tone from the fractious back-and-forth Sunday when the White House hit back at Shulkin for claiming that he was fired from his job and that he was only informed about it shortly before President Donald Trump tweeted about his replacement.

The Trump administration says he left his job willingly amid a bruising ethics scandal and mounting rebellion within the agency.

On Sunday, chagrined by Shulkin's public statements blaming his ouster on unfair "political forces" in the Trump administration, the White House circulated a "talking points" memo to some veterans groups in a bid to discredit him.

The three-page memo, obtained by The Associated Press, points out seven "lies" that it said Shulkin had spread. They include statements in which he minimizes a VA watchdog report in February that concluded he violated ethics rules by accepting free Wimbledon tennis tickets. The VA inspector general has previously found Shulkin made misleading statements about the trip to investigators and the news media.

In television interviews earlier Sunday, Shulkin said he had not submitted a resignation letter, or planned to, and was only told of Trump's decision to replace him shortly before the Twitter announcement. He said he had spoken to Trump by phone earlier that day about VA improvements, with no mention of his job status, and was scheduled to meet with the president the next morning.

"I came to run the Department of Veterans Affairs because I'm committed to veterans," Shulkin said. "And I would not resign because I'm committed to making sure this job was seen through to the very end."

Last week, Trump named Defense Department official Robert Wilkie to the acting position, bypassing Shulkin's deputy secretary, Tom Bowman. Bowman has come under criticism for being too moderate to push Trump's agenda.

Under federal law, a president has wide authority to temporarily fill a federal agency job if someone "dies, resigns, or is otherwise unable to perform the functions and duties of the office." There is no mention of a president having that authority if the person is fired. Still, it's unclear if courts would seek to draw a legal distinction between a firing and a forced resignation, if that is indeed what happened to Shulkin.

The day after announcing he was replacing Shulkin, Trump told a rally in Richfield, Ohio, that he had been dissatisfied with efforts to improve the VA. Shulkin had enjoyed Trump's support for much of his first year in the administration, but that eroded in February after mounting ethics questions and political infighting at the VA.

Wilkie, now listed on the VA website as acting secretary, took over Shulkin's duties last week.

The back and forth over the circumstances behind Shulkin's departure — and what it could mean for Wilkie's status — comes as the nomination of Jackson is drawing concern among lawmakers and veterans groups. They worry the Navy rear admiral and lifelong physician lacks the experience to manage an enormous agency paralyzed over Trump's push to expand private care.

Trump's new Cabinet nominees also are beginning to pile up in the Senate, likely leading to weeks of confirmation battles and other delays in the run-up to congressional midterm elections in November. That could mean an extended reign for an acting VA secretary.

Shulkin's dismissal comes amid a broader shakeup of top Trump administration officials and accusations of excessive spending by Cabinet officials. Also currently under fire are Environmental Protection Agency Administrator Scott Pruitt, Interior Secretary Ryan Zinke and Housing and Urban Development Secretary Ben Carson.

Shulkin had agreed to reimburse the government more than \$4,000 after the VA's internal watchdog concluded last month that he had improperly accepted Wimbledon tennis tickets and that his then-chief of staff had doctored emails to justify his wife traveling to Europe with him at taxpayer expense. Shulkin also blamed internal drama at the agency on a half-dozen or so rebellious political appointees, insisting he had White House backing to fire them.

Associated Press writer Darlene Superville contributed from Palm Beach, Florida.

[Back to Top](#)

38 - Military Times: [White House doctor could face the most contentious VA confirmation process ever](#) (2 April, Leo Shane III, 2.1M uvm; Springfield, VA)

Ronny Jackson's nomination to become the next Veterans Affairs secretary could become the most contentious confirmation process since the department was founded 30 years ago.

But that's also a fairly low bar.

Since the department was elevated to a Cabinet-level post back in 1988, no senator has ever voted against a VA secretary pick. All of the confirmations have been unanimous or near-unanimous votes (with a handful of lawmakers absent), or procedural votes where no opposition was formally recorded.

That includes former VA Secretary David Shulkin, confirmed by a 100-0 vote in February 2017. His total support from the Senate was frequently touted by President Donald Trump in public appearances, including one just a few weeks before Shulkin was fired by the president over social media on March 28.

In fact, no nominee for a confirmable department post over the last 30 years — totaling more than 150 individuals — has ever received a vote of opposition from the Senate, underscoring the non-partisan nature of VA work.

Rear Adm. Ronny Jackson, the White House physician, is a relative unknown in the veterans community.

By: Leo Shane III

That means even a single vote against Jackson's confirmation could send a message of irreversible political division on the once seemingly untouchable approach to the department issues.

Jackson, who retired from the Navy last week as a rear admiral with 23 years of service, was a surprise nominee for the post. He's an Iraq War veteran who served under three presidents as the top White House medical officer, and is best known for giving Trump a clear bill of health in January.

But little is known about his familiarity with the department, which boasts a budget this fiscal year of more than \$186 billion and a staff of more than 370,000 employees. Senate Democrats have openly questioned the pick, and hinted he may not receive the same support as past nominees.

"I admire Dr. Jackson's service to the nation, but I don't know if he is the right person to lead the VA," Sen. Jack Reed, D-R.I., and ranking member on the Senate Armed Services Committee, said in a statement last week. "The VA is a large and intricate agency that requires steadfast leadership and an understanding of how to run a complex organization."

Sen. Tammy Duckworth, D-Ill., is a combat-wounded Iraq War veteran and a frequent critic of the Trump administration. Like Reed, she promised to "carefully review Dr. Jackson's qualifications to determine whether he has the best interests of our veterans at heart."

But she also accused Trump of wanting “to push VA down the dangerous path of privatization” and warned that “the next VA secretary must be able to protect the department from becoming consumed by partisan politics.”

Former Senate Veterans’ Affairs Committee Chairman Bernie Sanders, I-Vt., similarly said the Senate “should not approve any nominee for secretary who supports the privatization of the VA,” a charge which he has also leveled at Trump. The current top Democrat on the committee, Montana Sen. Jon Tester, said simply that he is “looking forward to meeting Admiral Jackson soon and seeing if he is up to the job.”

Few Republicans in the chamber have offered strong praise for Jackson thus far, though none have offered serious public concerns, either.

No timetable has been set for the confirmation hearings. Senate officials still have not received the formal nominating paperwork from the White House, which will start the background check and confirmation process.

That work typically takes between one and two months. Senate leaders have said they hope to move quickly on the work to ensure a vote on Jackson’s nomination before the summer.

Confirmation votes by the Senate on VA secretary nominees

David Shulkin, 100-0 (Feb. 13, 2017)
Bob McDonald, 97-0 (July 29, 2014)
Eric Shinseki, voice vote (Jan. 20, 2009)
James Peake, voice vote (Dec. 14, 2007)
John Nicholson, voice vote (April 11, 2003)
Anthony Principi, 100-0 (Jan. 23, 2001)
Togo West Jr., voice vote (April 28, 1998)
Jesse Brown, unanimous consent (Jan. 23, 1993)
Edward Derwinski, 94-0 (March 2, 1989)

39 - The Vindicator: [Trump’s choice to lead VA raises questions on intent](#) (3 April, Editorial Board, 193k uvm; Youngstown, OH)

The physician who gave President Donald J. Trump a squeaky clean bill of health could soon lead the Department of Veterans Affairs, even though he lacks the experience to manage an enormous agency that has long been steeped in controversy.

Trump’s nomination of Rear Admiral Ronny Jackson, the White House physician since President George W. Bush’s administration, has raised eyebrows on Capitol Hill and triggered concerns among veterans service organizations.

There is nothing in Dr. Jackson’s background to suggest he could lead a government agency with a \$200 billion budget and a staff of 370,000 spread across 3,000 facilities.

While providing health care to veterans is the main focus of the VA – the Veterans Health Administration operates the largest hospital network in the U.S. – there are other important services veterans depend on.

Disability benefits, education subsidies and cemeteries are just a few of the numerous programs available to the men and women who served this country.

The VA is second only to the Department of Homeland Security in terms of its budget and its importance.

That is why Trump's nomination of Dr. Jackson is so troubling. It seems that he is being rewarded for saying the president is in "excellent health" and "fit for duty."

Jackson claimed Trump had "incredible genes" that kept him healthy despite his well-documented affinity for fast food and abhorrence of exercise.

"It's called genetics. I don't know," the doctor said at one point. "Some people have just great genes. I told the president that if he had a healthier diet over the last 20 years, he might live to be 200 years old. I just don't know."

He added, "It's just the way God made him."

It is no secret that the billionaire real- estate developer from New York City expects to be showered with high praise from those around him and does not like to be second-guessed.

Secretary fired

Indeed, his nomination of Jackson to be secretary of the Department of Veteran Affairs came in the wake of his firing of David Shulkin, who was cool to the idea of privatizing some of the health-care services.

Shulkin, who is not a veteran but had served at VA as head of the Veterans Health Administration, was popular with veterans service organizations and lawmakers.

In an opinion piece published in the New York Times after his firing, Shulkin sought to set the record straight by saying he had been fired and had not resigned, as the White House claimed.

"I have been falsely accused of things by people who wanted me out of the way," the former secretary of the VA wrote. "But despite these politically based attacks on me and my family's character, I am proud of my record and know that I acted with utmost integrity. Unfortunately, none of that mattered."

As for the campaign by some Trump insiders to privatize the delivery of health care, Shulkin wrote:

"They saw me as an obstacle to privatization who had to be removed. This is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans."

That goes to the heart of the matter and must be the focus of confirmation hearings in Congress.

The website Government Executive Management quoted Joe Chenelly, executive director of AMVETS, as saying, "I am deeply concerned about the nominee. Veterans' lives depend on this decision, and the Trump administration needs to substantiate that this active-duty Navy officer is qualified to run a \$200 billion bureaucracy, the second largest agency in government."

AMVETS also has this question that members of Congress should pursue when they meet with Jackson:

"What qualifications does the president's nominee have to address claims, appeals, benefits and cemetery affairs?"

Throughout the 2016 presidential campaign and since he took office in January 2017, Trump has claimed to be the greatest advocate for the military and veterans this country has ever had.

Yet, the Republican president did not hesitate to get rid of an individual who enjoyed wide support among veterans. Indeed, Shulkin's popularity stems from the fact that he has put in place programs and initiatives that address past problems with the delivery of services, especially health care.

Given the conflicting reports regarding the VA secretary's departure, we believe President Trump should tell the American people if he wants health-care services to be privatized.

40 - Washington Post: [Perspective - I've seen what a mess Veterans Affairs is. Ronny L. Jackson can't fix it. Trump's new pick to lead the cabinet is a fine doctor. That doesn't mean he can handle a massive, dysfunctional bureaucracy.](#) (2 April, Mikki Kendal, 43.9M uvm; Washington, DC)

The mission of the Department of Veterans Affairs was laid down in the wake of the Civil War, in a promise by President Abraham Lincoln to care for the men who fought, as well as their widows and orphans. The scope of that promise has broadened as women have enlisted. It is the only department that focuses exclusively on caring for veterans and their families in times of crisis spawned by injury, illness and death, a mission most Americans would agree is vital, if not sacred.

Yet every administration going back decades has failed to appoint a leader capable of guiding the agency to fulfill its mission. Ronny L. Jackson, President Trump's pick to lead the department after Secretary David Shulkin was fired, will continue that legacy. And veterans will continue to pay for it.

Whether the problem was covering up shoddy health care or questionable hiring practices, there is no question that Shulkin was ill-equipped for the position. His predecessor, Bob McDonald, did not adequately address staffing problems and wait times that were present before and during his tenure, and still remain. During the quality-of-care scandal at Walter Reed Army Medical Center, President George W. Bush appointed three men to the role of Veterans Affairs secretary. Since the position was created in 1989, 16 leaders have been appointed or stepped in as acting secretary, and the department continues to fail veterans.

I'm a veteran and former employee of the department. Although I enjoyed some aspects of my work as a veterans services representative, I'm the first to admit that VA is deeply dysfunctional. The reasons are well documented and myriad: chronic understaffing, limited investment in infrastructure, an ever-changing array of guidelines for who is eligible for benefits, and what those benefits consist of from year to year. It's a complicated system prone to backlogs that can run more than two years deep — in part because of the administrative issues that arise when management and funding don't match need.

Jackson is an experienced physician and a rear admiral with an awareness of the medical concerns of military members and their families. He's certainly qualified to work for a VA facility, and quite possibly qualified to run a medical department, with the support of a good staff.

What he lacks experience in is responding to the concerns of veterans. Hospitals don't run on doctors alone. Doctors don't direct cleaning schedules, seek donors, or do dozens of other things that make their work possible.

Veterans Affairs isn't just hospitals treating injuries. It's compensation and pensions, it's mental health care, rehab, and programs to house homeless veterans. It is a massive department with a staff of almost 378,000 people, a small city of workers that serves about 22 million veterans and their families. In raw numbers, that means every staff member has 58 veterans relying on them to do their jobs. In actual numbers, it means that every veterans services representative can have a caseload in the hundreds. It's a hard job, made worse when the people making decisions about policy have no idea what the population being served needs, or how to provide it. And it's just one aspect of the multistep process required to help veterans build a new life.

Cases are often far more complicated than they appear. A veteran who is chronically unemployed can't simply be referred to a job program. A VSR needs to examine the reasons for unemployment. That might mean compensation for depression or for post-traumatic stress disorder, drawing on VA benefits. On the medical side, that means a referral to therapy, possibly a program for substance abuse if the veteran is self-medicating. If the unemployment has led to homelessness, housing assistance is needed through the HUD VASH, which brings in yet another side of the department. And this would be just one case handled by one representative.

Is it possible to learn? Absolutely. To be a good VSR, you need two months of classes, at eight hours a day. Then you need at least six months of supervised on-the-job training. It is a lot of paperwork and memorization and asking questions about conditions you may have never imagined were possible for one person to face. It's complex work on the best day with all the training and experience. Jackson has no training in so much as building a file. He lacks experience in managing a large staff, directing any federal department, or even directing troops at this scale. He doesn't understand the work or the people who do it, and that's not how effective leadership models are built in any industry.

Jackson's only apparent qualification, besides a medical degree, is being able to stand in front of a lectern and respond to reporters. He has that in common with Ben Carson, another doctor who was appointed to a Cabinet position and who has not generated anything but scandals and subpar policy decisions. In the parade of failed appointees under this administration, Jackson is almost the least objectionable, if you ignore the effect his inexperience will have on a system that is not adequately serve a vulnerable population.

I was a good soldier. I'm a successful writer. But I wasn't especially good at being a VSR, and ultimately I recognized that my talents could be put to better use elsewhere. One can only hope

that after Jackson gets past feeling flattered by the attention, he'll set aside his ego long enough to recognize that he isn't qualified to lead this department at this time. Veterans deserve better.

41 - Fierce Healthcare: [5 things to know about Ronny Jackson, Trump's pick to replace Shulkin at the VA](#) (2 April, Paige Minemyer, 141k uvm; Washington, DC)

President Donald Trump fired David Shulkin as Department of Veterans Affairs secretary last week and tapped White House physician Ronny Jackson as Shulkin's replacement.

Trump praised Jackson as "highly respected" in his Twitter announcement, and White House Press Secretary Sarah Huckabee Sanders echoed the sentiment in a tweet of her own, saying that he and other cabinet nominees should be confirmed "without delay."

However, veterans' groups expressed concern about Jackson's lack of experience in managing government agencies, let alone one the size of the VA. A former VA official told Politico that his "first reaction" to the announcement was "OMG."

"[Jackson] has no experience," the official told the publication. "The VA is the hardest department to manage because it is so political."

Jackson's experience—or lack thereof—will certainly be a point of contention in his confirmation hearings. Here are a few more facts to know about Trump's pick to head the VA:

1. He has served in three presidential administrations.

Jackson first joined the White House medical staff in 2006 during the Bush administration, according to his Navy biography, and has directed the Executive Health Care for the President's Cabinet and Senior Staff. He was named Physician to the President by President Barack Obama in 2008, a role he continued under Trump.

Jackson has also served as physician supervisor for the Camp David presidential retreat.

2. Jackson is still an active duty soldier.

Jackson was serving in Iraq as an emergency physician and specializing in resuscitating troops when he was notified that he would be joining the White House Medical Unit. He began active duty naval service in 1995, according to his biography.

The White House announced on March 23 that it had nominated Jackson for a promotion to rear admiral (upper half), which would make him a two-star admiral, CNN reported.

3. He caught Trump's eye after announcing the results of the president's physical in January.

The president was impressed with Jackson's performance at a January press conference where he revealed the results of Trump's annual physical, CBS News reported. A source told CBS that Trump is also personally fond of Jackson.

At the press conference, Jackson answered reporters' questions about Trump's health for more than an hour, saying that if the president had maintained a healthier diet over the past 20 years, "he might live to be 200 years old."

4. His stance on key VA issues is an unknown.

Where Jackson stands on crucial issues at the agency he could soon command is not publicly known, according to Politico. This extends to privatizing the department's health system. Shulkin said that his opposition to VA privatization is the main reason he was pushed out.

Jackson does have Trump's ear, though. Richard Tubb, M.D., the longest-tenured White House physician and Jackson's mentor, told CBS that White House doctors have been "figuratively Velcro-ed" to Trump since he won the election.

"On Jan. 20, 2017, Dr. Jackson became that Velcro," Tubb said.

5. Shulkin has praised his potential replacement

Following his ouster, Shulkin didn't mince words about what it was like at the VA, writing in a New York Times op-ed last week that "the environment in Washington has turned so toxic, chaotic, disrespectful and subversive" that he struggled to accomplish his goals at the agency.

However, he told ABC News that Jackson, despite his lack of experience, should be able to build a team around him that will allow him to succeed at the VA if he's confirmed. Shulkin told CNN that Jackson is a friend, and that he "will do everything that I can" to help him in the transition.

[Back to Top](#)

42 - Aiken Standard: [Column: Surprise: Trump's newest cabinet nominee has no relevant experience](#) (2 April, Eugene Robinson, 68k uvm; Aiken, SC)

You can't make this stuff up: President Trump has announced he will nominate a medical doctor who has no discernible management experience to run the second-largest agency in the federal government.

Can presidents be sued for malpractice?

The man Trump has named to become secretary of veterans affairs, Dr. Ronny Jackson, happens to be the president's personal physician. More to the point, given Trump's perpetual hunger for sycophancy, is the fact that Jackson showered the president with hyperbolic Dear-Leader-style praise during a widely viewed television appearance in January.

Trump has "incredibly good genes," Jackson said in describing the physical examination he had given the president. Trump's overall health is "excellent." His "cardiac assessment" put him "in the excellent range." If his diet had been a bit better, "he might live to be 200 years old." In any event, "I think he will remain fit for duty for the remainder of this term and even for the remainder of another term if he's elected."

That is an unusual way to describe a 71-year-old man whose height was reported as a generous 6 feet 3 inches and weight at an eyebrow-raising 239 pounds, which classifies him as overweight – but conveniently just one pound short of obese. Jackson's are odd words for a man whose cheeseburger-laden diet my doctor would describe as suicidal and whose coronary calcium scan results, according to many other physicians, indicate some degree of heart disease and a clearly elevated risk of heart attack.

I assume Jackson has been more, shall we say, plain-spoken with the president about his health than he was with the public. But am I suggesting that flattery, rather than merit, is what makes him Trump's choice to replace ousted VA Secretary David Shulkin? Absolutely, because no other explanation makes sense.

Pliability may also be playing a role. In a New York Times op-ed, Shulkin wrote that he believed he was being sacked because he opposed a push by the Trump administration "to put VA health care in the hands of the private sector."

Shulkin is also a physician, but before he took over at the VA he had experience running hospitals. With no comparable administrative background, Jackson – if confirmed by the Senate – would take over a sprawling agency with 360,000 employees, a \$186 billion budget and responsibility for providing medical care to 9 million veterans who deserve better, faster service than they now receive.

Shulkin was one of several high-ranking Trump appointees under fire for lavish spending on the taxpayers' dime. He was also a holdover from the Obama administration, and even though the job is perhaps the least partisan in the cabinet, that prior association clashed with Trump's bratty determination to oppose everything Obama supported and support everything he opposed.

But Shulkin, by most accounts, had stabilized the VA's vast system of hospitals and health clinics. What he refused to do was support the notion of privatizing veterans' health care – an idea pushed by some of the political appointees the White House had installed under him.

"I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans," Shulkin wrote in his op-ed. "The private sector ... is ill-prepared to handle the number and complexity of patients that would come from closing or downsizing VA hospitals and clinics, particularly when it comes to the mental health needs of people scarred by the horrors of war."

Shulkin wrote that "in recent months" the political environment in Washington has become "toxic, chaotic, disrespectful and subversive," making it impossible for him to do his job. "It should not be this hard to serve your country," he wrote.

But it should be hard to get a job running any organization as big, complex and vital as the Department of Veterans Affairs. Perhaps Jackson has an innate genius for management that awaits only the opportunity to flower. If not, Trump will be doing a grave disservice to men and women who are owed the nation's thanks and gratitude.

I can't say I'm surprised. Trump put neurosurgeon Ben Carson in charge of the Department of Housing and Urban Development, despite Carson having zero experience in housing policy. He put Betsy DeVos in charge of the Department of Education, despite her apparent unfamiliarity with actual schools. He put politician Rick Perry in charge of the Department of Energy, which Perry wanted to eliminate until he learned what the agency does.

Perry actually said that at his confirmation hearing. One doesn't know whether to laugh or cry.

[Back to Top](#)

43 - Truthout: [Trump's New VA Pick Appears Poised to Rubber-Stamp Privatization of Veterans Affairs](#) (3 April, Michael Corcoran, 422k uvm; Chicago, IL)

For the last year, Veterans Affairs Secretary David Shulkin insisted the VA would not be privatized on his watch. Now, thanks to a Koch-supported coup at the top of the second-largest department in government, his watch has ended -- and the battle over privatization persists.

For years the Koch brothers have been hovering around the Department of Veterans Affairs and its \$186 billion budget like vultures surrounding a carcass. The billionaires have been pushing a radical legislative agenda, using the front group Concerned Veterans for America. Their goal is to dismantle the Veterans Health Administration (VHA) -- the only system of socialized medicine in the United States -- to the benefit of for-profit providers.

So, one can only imagine the glee felt in the Kochs' offices on Thursday when the president finally sent Shulkin packing. The VA Chief had retained the support of most Veterans Service Organizations (VSOs), which generally are opposed to privatization of the VHA, but it was not enough to save his job. This is a strong indicator of the Kochs' influence over the Trump administration on veterans' issues.

Experts and advocates now fear that Ronny Jackson, the White House doctor and Trump's pick to replace Shulkin, will rubber-stamp the Koch agenda. "I think [Jackson] will be a puppet that will put the VHA and the VA on a starvation diet," said Suzanne Gordon, a journalist and author who covers the VA, in an interview with Democracy Now.

Among the legislation the Kochs are pushing is the Veterans Community Care and Access Act (S.2184, which was introduced by Sens. John McCain and Jerry Moran), the Veteran Empowerment Act (HR.4457, introduced by Rep. Doug Lamborn), which seek to privatize much of the VHA, and the Vet Protection Act (HR.1461), which would weaken the rights of VA employees.

Passing this legislative agenda would radically remake the VA in the Kochs' image. Can anyone stop it from happening?

Privatization of VA Enters Mainstream Debate

Shulkin's firing brought one silver lining for those seeking to preserve the VHA. The drama surrounding the firing -- and the curveball appointment of Trump's physician to replace him -- has elevated the issue of the privatization of the VHA into the national debate.

Shulkin did not go quietly after his dismissal. He penned an op-ed in The New York Times and appeared on shows like "Meet the Press" to pointedly explain why he was removed.

"They saw me as an obstacle to privatization who had to be removed," Shulkin wrote in the Times. "That is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans.

"His ringing defense of the VA in the New York Times is very important for people to read. I'm sad that [he] didn't articulate that kind of defense earlier," Gordon said. "But the fact that he's [speaking out on privatization] now is really to be commended."

Shulkin's language was not very different from that of Sen. Bernie Sanders, who said at a news conference in Vermont, "The firing of Shulkin has everything to do with the administration's desire to privatize the VA, and I think that that is a disastrous idea."

This has led to a rare public discussion of VA privatization -- and the role of the Koch brothers in advancing the cause -- in the dominant media. Jackson's confirmation hearings could provide more chances to educate the public about the Koch's war on the VHA. Democratic opponents will have a chance to step up and confront Jackson on these privatization efforts in public.

The fact that Trump chose his own White House doctor to replace Shulkin only adds to the media's interest in the pick. It seems likely that the process of replacing Shulkin will take place with a much wider audience than it would have if Trump had made a less controversial decision.

"We know nothing about what Dr. Jackson stands for and what his vision is for the VA," Sanders said of Jackson on CBS's Face the Nation.

Koch-Approved Legislation: Exploitation of Choice

This mysterious physician, however, may well end up running the largest health care system in the United States.

So, what do the Kochs have planned for the new VA chief? They do not make you search hard for these answers. In Concerned Veterans for America's statement responding to Shulkin's firing, they celebrate that the "distractions" are over and quickly pivot to their legislative agenda.

"Concerned Veterans for America's grassroots leaders flew in from around the country earlier this month and held nearly 100 meetings with legislative leaders to discuss the group's policy agenda," the statement reads.

It then lists its legislative agenda. The top two bills it is pushing would, to varying degrees, fundamentally alter the VHA through privatization: the Veterans Community Care and Access Act (S.2184) and the Veterans Empowerment Act (HR.4457), which is sponsored by Rep. Doug Lamborn, a Republican from Colorado.

These two pieces of legislation must be considered in the context of the 2014 VA Scandal, when VA employees were accused of falsifying records about long wait times. After the wait-time scandal, a bipartisan agreement called Veteran Choice Act of 2014, allowed veterans who do not live near a VA clinic, or are subject to long wait times, to seek care at a private provider.

There was no real opposition to this plan, which created the Veteran Choice Program, and it was supposed to be an emergency measure. "This particular program was authorized as a temporary fix in the midst of a crisis," said Allison Jaslow, executive director of Iraq and Afghanistan Veterans of America, in an interview with The Atlantic. "We always viewed it as an experiment."

This experiment, however, has turned into the primary means by which the GOP is trying to privatize the VA. The program was set to expire this year, but Trump extended it in April and

December 2017. Now GOP legislation, supported by the Koch brothers, would, as Nikki Wentling of the Stars and Stripes reported, "overhaul the controversial Choice program and create a network of community medical providers that veterans could use at taxpayers' expense."

The more radical of the Kochs' two bills is Lamborn's legislation, which was introduced in November. The Veterans' Empowerment Act, as Wentling describes, "mirrors a proposal from the conservative group, Concerned Veterans for America, which is part of the Koch brothers' political network, to create a government-chartered organization to operate a new veterans health insurance system."

The bill drew immediate resistance from opponents of privatization, such as the Veterans of Foreign Wars (VFW). "We hope that it has absolutely no chance of becoming law," said Carlos Fuentes, legislative director for the VFW, in response to Lamborn's bill.

The Kochs, who, according to The Wall Street Journal, are spending millions to influence this debate, praised the bill. In an op-ed for The Hill, Dan Caldwell, executive director of Concerned Veterans for America, said the bill would "truly expand veterans' health care choice in an effective and sustainable way."

The Veterans Community Care and Access Act (S.2184, which is sometimes called McCain-Moran) is similar to the Lamborn bill but not quite as militant. Unlike with the Lamborn act, under McCain-Moran the VA is maintained "as a gatekeeper to private-sector treatment," Wentling reports, whereas the VA can be bypassed entirely under the Veterans Empowerment Act.

"The bill would require the VA to use objective data on healthcare demand to set standards for access and quality, and to identify and bridge gaps in veterans' care -- whether in VA or community facilities," according to a press release from Moran about the bill.

"It is as if they want the VA staff to serve as billers for the private sector," Gordon told Truthout.

The McCain-Moran legislation goes well beyond the accommodations made for rural veterans as envisioned by the Choice program. Some estimate that "McCain-style privatization" could triple the cost of veterans' care to almost \$450 billion a year.

Both the Lamborn and McCain-Moran bills also overlook the possibility that the private sector is not ready for the specific health needs of veterans, according to a Rand Report published in March, which studied New York State providers. The report found that private providers knew "little about the military or veterans" and are "not routinely screening for conditions common among veterans," among other critiques.

"These bills have lots of nice words, about empowerment, or choice, but what those bills do is hurt veterans," said William Attig, executive director of the Union Veterans Council, AFL-CIO, in an interview with Truthout. "There is a lot of money for some to make by farming out services to the private sector, but what the VHA needs is to be fully funded, not privatized."

The Kochs' attack on the VA is also an attack on federal employees and public-sector unions. Their legislative agenda includes the Vet Protection Act (HR.1461), which makes it easier to fire employees and tries to weaken public sector unions.

Concerned Veterans for America says the bill would involve monitoring "the amount of time VA employees can devote to union activities during work hours and ensure clinicians are doing the work the VA hired them to do -- care for patients."

The law is an attack on the collective bargaining rights of federal employees at the VA, according to the National Federation of Federal Employees.

"This legislation does not help veterans or taxpayers. Rather, it serves only to weaken federal employee unions," the union said in response to the proposal.

The Fight Ahead

These big legislative efforts are ongoing, as are other acts of "stealth privatization," such as hiring freezes, and plans laid out in the Trump VA budget, which undermine the VA without an act of Congress. These practices are likely to continue.

From a wider-angle lens, the goal of the Koch brothers is not just to pass these bills to dismantle the VHA, but to undermine the very idea of government-run health care.

However, while the Kochs have enormous resources invested in their effort to dismantle the VA, there is organized resistance from most Veterans Service Organizations, as well as from progressives like Bernie Sanders, who seek to defend government-run health care on principle.

With the Koch brothers' role in trying to privatize the VHA now a matter of national debate, the best way to maximize opposition to their agenda is to make sure the US public knows who is most hurt by it: veterans.

44 - We Are The Mighty: [No one was ready for President Trump's next VA secretary](#) (3 April, Ben Brimelow, 3.6M uvm; New York, NY)

Questions have emerged about the managerial ability of White House physician Admiral Ronny L. Jackson, President Donald's Trump pick to run the Department of Veterans Affairs, the federal government's second-largest agency.

If confirmed, Jackson would replace David Shulkin as the secretary of veterans affairs. Trump announced his decision to fire Shulkin on March 28, 2018.

Though Jackson has an impressive resume as a career naval officer who served as an emergency trauma doctor in Iraq, as well as a White House physician for the 12 years, he seems to lack any management experience.

Considering the VA has 360,000 employees and a \$186 billion annual budget, that has some people worried.

"It's great that he served in Iraq and he's our generation. But it doesn't appear that he's had assignments that suggest he could take on the magnitude of this job, and this makes Jackson a -surprising pick," Paul Reckhorn, the chief executive of Iraq and Afghanistan Veterans of America, told the Washington Post.

Shulkin had managed several hospitals before, including some that were part of the VA, and almost all of his predecessors were either high ranking managers in the private sector, or military leaders.

Senior White House officials told the Washington Post that Jackson "was taken aback by his nomination," and was reportedly hesitant to take the position. One official described an "informal interview" process, without the traditional Cabinet-level vetting.

The White House had reportedly planned to announce that Shulkin would leave on March 28, 2018, with an interim director to run the department until a permanent head could be found. Trump apparently changed that plan when he tweeted that Jackson was his pick to lead the VA.

Virtually nothing at all is known about Jackson's views on the issues that currently face the VA, like Trump's views on privatization of elements of the VA.

"We are doing our homework on Dr. Jackson," Amanda Maddox, a spokeswoman for the chairman of the Senate Veterans' Affairs Committee, Sen. Johnny Isakson, told the Washington Post.

"His name was never floated around," Maddox said, "so we are doing our due diligence."

It is unclear if Democrats will support Jackson's nomination. Senator Tammy Duckworth of Illinois, an Iraq veteran who lost both of her legs when the helicopter she was co-piloting was shot down, released a statement saying that she would "carefully review" his qualifications.

"The next VA Secretary must be able to protect the department from becoming consumed by partisan politics," Duckworth said.

"I hope Dr. Jackson is someone who is willing and able to do that by continuing the important tradition of VA Secretaries working in a bipartisan manner."

[Back to Top](#)

45 - MedPage Today: [Jackson's Nomination to Run VA Brings Questions, Lack of management experience cited as major issue](#) (3 April, Joyce Frieden, 1.5M uvm; New York, NY)

Reaction to President Trump's nomination of White House physician Ronny Jackson, MD, as Secretary of Veterans Affairs (VA) has leaned toward the negative, with most people questioning whether Jackson has the experience needed to run the vast department.

"I am deeply concerned about the nominee," Joe Chenelly, executive director of AMVETS, a veterans service organization, said in a press release. "Veterans' lives depend on this decision, and the Trump administration needs to substantiate that this active-duty Navy officer is qualified to run a \$200-billion bureaucracy, the second largest agency in the government."

Chenelly posed several questions that he said needed to be answered about Jackson, including:

"Is it appropriate for an active-duty military officer to run a federal agency?"

"With an official bio that does not seem to contain any indication that he's held a command, is the president's nominee fully prepared to lead such a massive bureaucracy?"

"While we are pleased this nominee has a medical background, the VA is much more than healthcare. What qualifications does the president's nominee have to address claims, appeals, benefits, and cemetery affairs?"

Michael Carome, MD, director of Public Citizen's Health Research Group, was even more blunt. "Dr. Jackson appears to lack the type of management experience that the VA secretary position demands," he wrote in an email to MedPage Today. "There are undoubtedly dozens of other individuals who would be more qualified, but many are likely unwilling to serve under President Trump."

But not everyone agreed. "The questions ... raised about his [lack of] experience in managing a large bureaucracy [are] relevant, but there is a lot of precedence about having the deputy secretary being the main management person," said Gail Wilensky, PhD, senior fellow at Project HOPE, in Bethesda, Md. "The bigger question is, do you know what you know and know what you don't know?"

If Jackson doesn't have management experience, "he needs to understand the importance of working as a team with regard to the skill sets he doesn't have, and if he understands that, most potential problems are relatively easily resolved."

Mike Haynie, PhD, director of the Institute for Veterans and Military Families at Syracuse University, said that while Jackson's background will become clearer during the nomination process, the change in leadership also raises other issues.

"The conversation should be much greater than just about Dr. Jackson," he said in an email. "What is missing is the larger issue of the other key vacancies across the agency – to include the Undersecretary for Health and Undersecretary for Benefits. These are key leadership roles, and the absence of leaders in these roles will further complicate Dr. Jackson's transition."

Jackson, a rear admiral in the Navy, has served as White House physician since 2006, according to his official bio. He has served as an instructor at a naval diving and salvage training center as well as an emergency physician in Iraq before being selected for the White House post. He has served as director of the White House medical unit but there is no other reference in his biography of having run a larger organization.

President Trump announced on Twitter on March 28th that he would be nominating Jackson to replace Shulkin, although there is some dispute over whether Shulkin was fired or he resigned. Shulkin maintains he was fired while the White House says he resigned. The Trump administration and Shulkin were at odds over whether the VA should become more privatized.

Privatization would hurt the agency, said Eugene Gu, MD, a surgery resident at the VA medical center in Nashville, Tenn., who has been speaking out on the issue. "Privatizing means veterans are shipped off to a small private hospital in whatever community they're in," he said in a phone interview. "They're not going to get the same level of integrated care ... What they should be focusing on is giving veterans the best care that they deserve, which means investing more money into [this] single-payer nationally integrated health system."

Right now, privatization is being used as a crutch to avoid fixing problems within VA facilities, he continued. For example, Gu said that at the hospital he works at, broken sterilization equipment is not being fixed because, under the current Choice program allowing veterans to go outside the VA for care, staff can just send surgery patients elsewhere.

"How can you have a hospital without completely working sterilizing system? That should be a scandal," said Gu. Although it's true that the hospital can send surgery patients elsewhere, "that delays their care. If we didn't have [the] Choice [program] they would have been working around the clock to fix the sterilizer and we would have clean tools to operate on patients ... Relying on [Choice] is a disservice to veterans."

Haynie urged going slow on expanding privatization. "A wholesale dismantling of the VA healthcare system is not in the best interest of veterans, or American medical education," he said. "The administration has made it clear they want to see more choice for veterans when it comes to their healthcare, but it is important to expand choice in a way that preserves the core integrity of the VA healthcare system."

Although Jackson would be new to the VA, no one should assume he will be a pushover for those who want to increase privatization, Wilensky said. "Most of the flag officer-level people I've met in the military are not so easy to manipulate.... He has spent his adult life in the military, where they rely on government-funded healthcare."

[Back to Top](#)

46 - KWTX (CBS-10): [Waco: Chris Kyle's family hopes new secretary will change VA culture](#) (3 April, John Carroll, 315k uvm; Waco, TX)

The brother and father of slain American Sniper Chris Kyle say they hope that Texas born and reared Navy Rear Adm. Ronny L. Jackson, whom the president has nominated as the next secretary of veterans affairs will change the culture in the VA to get veterans help more quickly.

"Our veterans are not being taken care of here in America, no way, absolutely not," Kyle's father, Wayne said.

"We're hopeful that somebody has been placed there that understands our veterans and understands what they are going through," he said.

Kyle's sons Chris and Jeff both served overseas in foreign wars.

Chris, known as the American Sniper, was shot and killed at a gun range five years ago in Erath County while attempting to help a troubled vet.

President Donald Trump has been moving to privatize some healthcare for veterans, saying he wants them to get the help they need.

"We need to address it immediately. Get them the care that they need and get the problem resolved," the elder Kyle says.

"I hate to say this, but to me the VA has up until now been like a revolving drug dispensary. These young men and women have become addicted to prescription drugs and they become like zombies."

Jackson is a Texas native, a 1991 graduate of Texas A&M University and a 1995 graduate of the University of Texas Medical Branch.

On the subject of school safety, both Kyle and his son Jeff believe veterans could be one answer to making campuses safer for students.

Jeff Kyle says schools should hire two to three Veterans per campus to guard the students.

"Making sure that their mental health is checked out, there's plenty of guys, men and women, both out there that are well trained and ready to standby and you know do what is necessary to protect these kids."

His father Wayne agrees.

"I just feel like we could make better use of our veterans if there are unemployed then put them to work."

[Back to Top](#)

47 - Creators Syndicate: [Marching Orders for Trump's New VA Secretary](#) (4 April, Betsy McCaughey, 318k uvm; Hermosa Beach, CA)

Since President Trump ousted Veterans Affairs Secretary David Shulkin, the question reverberating in Washington is whether Trump's new pick, Rear Adm. Ronny Jackson, is capable of heading a department with 360,000 employees and 9 million vets under its care. Senate Democrats carp he lacks experience running "a complex organization."

Experience is overrated. President Obama's VA Secretary, Robert McDonald, failed miserably, despite having run Procter & Gamble. Vets died on phony wait lists on McDonald's watch.

Jackson's last combat role was with a surgical shock trauma unit in Iraq. Sounds like good preparation for battling the killer VA bureaucracy.

Jackson also shares Trump's vision of putting vets in the driver's seat about their own medical care. Here's what Jackson can learn from his predecessors' failures.

Lesson 1: Make vets the priority, not protecting the VA bureaucracy. Shulkin refused to do that.

Trump has pledged to fix the Veterans Choice Program so vets can see private doctors when they decide it's necessary. VCP was created in 2014 after revelations that sick vets were dying on wait lists at VA hospitals. VCP is supposed to allow vets to get private care if they live far from a VA facility or have waited too long. But VCP's red tape makes seeing an outside doctor almost impossible. That's deliberate. Senator Bernie Sanders, who co-authored VCP legislation, relies on union campaign contributions and will do just about anything to protect union jobs at the VA. Keeping vets trapped at the VA with no alternatives is a job protection racket.

Shulkin was part of that racket, too. He misled Trump and Congress with double talk about reforming VCP "in a way that will work for veterans and work for VA." But protecting VA bureaucracy shouldn't be a consideration, when vets' lives are at stake.

Shulkin showed his true colors when Congress passed last month's big spending package. Trump and congressional Republicans had pushed hard to include VA reforms helping vets see outside doctors.

But the key person to sell this to Congress was Shulkin, and he equivocated, allowing Democrats to block its passage. It was a setback for Trump and vets. No wonder Shulkin was canned days later — not because of flimsy travel expense abuse allegations.

Lesson 2: Cut wait times in half at the VA.

Shulkin claimed success in reducing waits, but that's questionable. VA bureaucrats are still fudging the numbers, according to the inspector general.

Here's a remedy. A whopping 47 percent of VA health care users are 65 or older. They need angioplasty and bypass surgery like other seniors. They use the VA to avoid Medicare's out-of-pocket expenses, because their median annual income is only \$24,000. Picking up their co-pays would cost very little and encourage them to use Medicare instead of the VA Bingo, and it would cut VA wait times by nearly half, making room for younger vets to get combat-related care only the VA can provide.

Lesson 3: Don't count on VA bureaucrats to fess up when things go wrong. Jackson should use unannounced audits to uncover dangerous conditions at medical facilities, instead of trusting officials to report them up the chain of command.

An inspector general report last month exposed "a breakdown of core services" at medical centers under Shulkin's command. At the Washington, D.C., facility, under Shulkin's nose, patients were needlessly overexposed to anesthesia due to inventory mismanagement. After patients were put under, surgeons sometimes discovered they were out of equipment and had to race across the street to borrow it from another hospital or reschedule the procedure. Shulkin claims he could "not recall" ever being notified of such problems. He expected to be notified?

Pundits are predicting a confirmation battle. The smart money should be on Jackson. He's combat tested. Disregard the partisan drivel about his lack of experience running a big organization. It's coming from the same people who had no problem making a community organizer the president.

Betsy McCaughey is a senior fellow at the London Center for Policy Research and a former lieutenant governor of New York State.

48 - Hawaii Tribune-Herald: [Senate should be wary of Veterans Affairs nominee](#) (4 April, 135k uvm; Hilo, HI)

Caring for our nation's military veterans was one of Donald Trump's most consistent promises on the presidential campaign trail, and certainly one of his least controversial. Getting veterans the care they need is a nonpartisan priority.

But the increased quality of care Trump promised hasn't come.

Facilities on Long Island and in many other communities are falling apart. The Department of Veterans Affairs is increasingly being exposed as dangerous and dysfunctional. Last week, as was expected, Trump fired the secretary of veterans affairs, David Shulkin, who could never rise above his ethical violations and his shoddy leadership. His designated replacement is Navy Rear Adm. Ronny Jackson, the White House physician for the past three administrations who garnered praise from Trump for performing well during a news conference about the results of the president's physical exam.

While Jackson is highly regarded as a physician, his resume does not include a shred of evidence that he can lead the government's second-largest bureaucracy (it has a \$186 billion budget) and probably its most dysfunctional. This might be the toughest management job in Washington.

Before the Senate confirms Jackson, it must elicit his views on further privatization of medical care, which other Trump appointees are recklessly pushing as a way to dismantle the agency instead of providing improved service. And unless the Senate can ensure that Jackson can overcome his lack of management experience and create a solid plan for building a leadership team that can improve care, it should reject his nomination.

On Long Island, the problems are increasingly daunting, and care for veterans is suffering. Last month, it was learned that the Northport VA Medical Center again was forced to stop performing surgeries when a faulty air conditioner forced the hospital to close all five of its operating rooms. The shutdown went on for about a week, and 18 surgeries had to be rescheduled while the \$58,000 repair was performed.

That's only the latest breakdown at the Northport facility, where surgeries were halted for four months in 2016 when another air-conditioning system failure sent metal fragments flying into the air, threatening to contaminate patients with open wounds. Another cooling system problem a year earlier led to pipe ruptures and a \$12 million repair. And in January, Northport had to close its 42-bed veterans homeless shelter after the heat failed.

A recent report estimated the cost of Northport's repair and renovation to be \$273 million. Long Island's 130,000 veterans rely heavily on the facility, which has traditionally maintained a top reputation. Its quality cannot be allowed to decline.

If Jackson is confirmed, Trump, who has a warm personal relationship with his nominee, must make sure their communications remain constant. Jackson will need the president's full support to get the VA running properly and all of its facilities up to par.

We owe these veterans. There can be no reneging.

[Back to Top](#)

49 - WUSF (NPR-89.7, Audio): [For Veterans Groups, Questions Surround Trump's VA Nominee](#) (6 April, Carson Frame, 197k uvm; Tampa, FL)

VA-18-0457-A-000978

Some veterans groups say they're uncertain about the future of care at the Department of Veterans Affairs, after President Trump ousted Secretary David Shulkin and nominated White House physician Ronny Jackson to head the agency.

Navy Rear Admiral Ronny Jackson has served as a White House physician during the last three presidential administrations, starting with George W. Bush.

It's typically a low-profile position, but Jackson had a rare moment in the media spotlight in January, when he appeared in the White House briefing room to release the results of President Trump's annual physical.

"All clinical data indicates that the President is currently very healthy, and that he will remain so for the duration of his presidency," Jackson declared. "I told the President that if he'd had a healthier diet over the last 20 years that he might live to be 200 years old."

Some observers speculate that Jackson's glowing report on President Trump's health played a role in the President's decision to nominate him as Secretary the Department of Veterans Affairs. President Trump ousted Secretary David Shulkin after a turbulent 14 months in the position.

"I think that Donald Trump was enamored by having Ronny Jackson go out and say something like that before the press corps," said Will Fischer at the left-leaning political action committee VoteVets. "And it was that moment that I think Ronny Jackson probably became Donald Trump's new VA secretary."

A native Texan, Jackson joined the active duty Navy in 1995 after finishing medical school at the University of Texas Medical Branch in Galveston. He went on to graduate from the Navy's Undersea Medical Officer program, and specialized in resuscitating troops during the Iraq war in 2005 and 2006.

But Fischer suspects that his nomination may be part of a larger push to privatize the VA.

"There is a coordinated effort being led by Donald Trump and others to destroy and privatize our VA healthcare system," Fischer said.

Other veterans groups are taking more of a "wait and see" attitude and asking a lot of questions.

"We were surprised," said American Legion Executive Director Verna Jones. "He seemed to have just come out of nowhere."

The VA is one of the largest healthcare systems in the world, with a budget of almost 200 billion dollars and around 350 thousand employees. Jones says Jackson will have a lot on his plate, and that the American Legion will try to support him.

"There are 20 million veterans in the United States and nine million are enrolled in the VA," Jones said. "So the new secretary's going to have to come in and manage all of that."

He also would take over the agency at a tumultuous time. President Trump ousted Shulkin after about 13 months on the job. Shulkin called the Washington environment "toxic, chaotic, disrespectful and subversive."

Richard Delgado of the San Antonio Coalition for Veterans and Families said Jackson's military experience is appealing in such an environment and could help him get a handle on the VA.

"With him being an admiral, that also shows his leadership style and the type of person that he is," Delgado said. "You don't make admiral just willy nilly."

Outside San Antonio's Audie Murphy Memorial VA hospital, Army veteran Melissa Cervantes was caught off guard by news that the VA would be getting a different leader

"I felt like Shulkin had more experience," Cervantes said. "I don't know anything about this one coming in."

Cervantes said she worries the change will affect quality of care for her and her husband, who's also a veteran.

"Everyone has different plans, agendas," Cervantes said. "You never know what the new person coming in is going to do, whether they care about veterans or not."

A White House official told CNN that Jackson will resign his commission and retire from active duty if he's confirmed as VA Secretary. In the interim, Robert Wilkie, the Undersecretary of Defense for Personnel and Readiness, will be the acting VA secretary.

This story was produced by the American Homefront Project, a public media collaboration that reports on American military life and veterans. Funding comes from the Corporation for Public Broadcasting and the Bob Woodruff Foundation.

[Back to Top](#)

50 - Lubbock Avalanche-Journal: [Levelland native talks about nomination as head of VA](#)
(7 April, Karen Michael, 194k uvm; Lubbock, TX)

Levelland native Dr. Ronny Jackson -- the rear admiral who is President Donald Trump's nominee as secretary of the Department of Veterans Affairs -- knows he will someday be a veteran and his sons will be veterans.

"I'm going to be a vet one day soon. If I do get confirmed, I won't stay on active duty, I'll be a vet right away," Jackson said Thursday in a phone interview with the Avalanche-Journal, the first interview he did after being nominated.

Jackson, currently the physician to the president, noted that it's in his best interest and his children's best interest to do what is right for veterans. He is also a United States Navy rear admiral.

"I've been overseas, and I've been deployed in combat zones with Marines and soldiers and airmen and sailors, and I've seen first-hand what they go through, the injuries and the things they come home with. I've seen how that happens, and how devastating it is to them and their families. I just want to make sure that we do our part as a country and we let them know that we appreciate that and we take care of them," Jackson said.

Veterans are like anyone else -- they don't see themselves as entitled or eligible for anything that normal people don't expect, the VA nominee said. Veterans just want good quality care and they want to know that they have access to care.

"We owe the vets the absolute best care that's available out there," Jackson said.

The naval officer was appointed as a White House physician under President George W. Bush, whom he calls "Bush 43" to distinguish him from his father, President George H.W. Bush, whom Jackson calls "Bush 41". He served as First Lady Laura Bush's personal physician, and also spent a lot of time at the Bush ranch in Texas with the family.

"I was the first lady's assigned physician. I traveled everywhere she went," Jackson said. "She and I got along really well, as did President Bush and I, because we were all from Texas. Obviously I grew up just due north from where they grew up."

He continued as a White House physician under President Barack Obama, when several of the physicians who had seniority at the time left for a variety of reasons.

"I kind of got catapulted toward the top of the docs who were currently there, as far as seniority goes," Jackson said, noting that he was the deputy director of the White House medical unit for about a year before becoming director. Then Obama appointed him as his personal physician.

As a personal physician to the president, Jackson does not wait in his office for the president to have a medical problem.

"I take care of basically the entire White House compound. I oversee all of the care here," Jackson said, adding that over 18 acres, that's about 7,000 people.

"We do urgent care here, anybody who is injured or they are sick, they come see us. We do a lot of travel medicine, because, of course, we have a lot of travelers here, so immunizations and travel preparation, we do all of that," Jackson said. "And we do, basically, a lot of primary care as well, and I take care of and end up being a primary-care provider for most of the senior folks in the White House who work in the East Wing and the West Wing, the president's senior staff and cabinet members."

When Obama left in 2017, Jackson said he was ready to retire because he had 20-plus years in the military and a new administration was coming into the White House.

"Typically, anyone who's in an appointed spot in one administration, they won't carry on to the next administration, especially when it changes from one party to the other," he said.

"I made a lot of good relationships in the Bush 43 administration, and some of the people that were working on the Trump transition had been a part of the Bush 43 administration, and they knew me," Jackson said. "They talked to President Trump about it, and I talked about it with him, and he just immediately appointed me as his physician as well."

Some national critics have acknowledged that Jackson is a great doctor while also questioning his experience in management, particularly of a large agency like the VA.

"I've been in leadership school for 23 years now. ... And I've been able to rise to the level of an admiral, a flag officer in the Navy. I didn't just stumble into that. So I've gotten a lot of leadership

background, I've got a lot of leadership experience as a Navy officer, and I've got a lot of day-to-day leadership experience," he said. "You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life and death decisions.

"I think I've got what it takes, and you know, I don't buy into that argument at all."

Despite his assertion that he didn't stumble into the VA nomination, Jackson said much of his life has been serendipitous.

When he started college, he never dreamed of going to medical school or becoming a doctor.

After taking classes at South Plains College and going on to Texas A&M in Galveston to pursue a degree in marine biology, Jackson found himself with a problem common to college students: he needed money. He applied for a job at the University of Texas medical school in Galveston as an autopsy assistant and found it interesting.

"It sounds a little bit gross, but you know, it was pretty educational. They would teach me a lot of stuff about different disease processes as we were doing an autopsy. That's what got me interested in medical school," Jackson said.

His mother, Norma, also told the A-J in a Jan. 26 story that her son had never wanted to be a doctor.

"He was fixing to graduate, and he called me and his daddy, and told us he had decided he wanted to be a doctor. And we thought, 'What in the world?' But anyway, he made a doctor, and we're glad for that," Norma Jackson said.

He didn't have any plans of joining the military, either, but didn't have money for medical school. Once he was admitted, he called a Navy recruiter who had told him to call back once he was admitted to a medical school, and he learned about a program in which he could be a Navy diver and a doctor.

"I really liked diving, so I signed on," he said.

He never dreamed of becoming a White House physician, but he was nominated by his specialty leader, who is responsible for all emergency medicine doctors in the Navy.

"I didn't even know the job existed," Jackson said. "I just got an email out of nowhere saying that I'd been nominated for a job at the White House. Luckily, it was on an old email account that I wasn't checking very often, but I saw it before the deadline, but only shortly before the deadline, maybe just four or five days."

He scrambled to get an application package in.

"I kind of cut a lot of corners," Jackson said.

But a few months later, he got an email out of the blue, and this one said he was one of three physicians selected for an interview. Unfortunately, it was 2005 and he was stationed in Iraq.

“Once again, I thought that was it -- this is where the road stops because I wasn’t going to be able to be back in D.C. for an interview, because I was once again in the middle of the desert,” Jackson said. But his supervisor wanted him to succeed.

That supervisor was Lt. Gen. John E. Wissler, who had been a military aide to Bush 41. Wissler summoned him to his office and told him to pack his bags for a flight on a transport plane full of broken helicopters back to the United States.

After a crazy few days in Washington D.C. , had to get a new suit because he’d lost 40 pounds in Iraq, and interviewed for three days at the White House. He got the job that launched him on an unthinkable trajectory to possibly get a seat on the president’s cabinet.

“I really haven’t planned my life out real meticulously. I’ve just kind of tried to enjoy what I’m doing and do a good job, and one think has led to another,” Jackson said.

Looking back at growing up in Levelland, Jackson said: It was an experience that I appreciate now more as I’ve gotten older and I’ve lived all over the world. Levelland and that part of West Texas is just a special place with people that are like nowhere else in the world,” Jackson said. “It instilled a lot of small town values with me that I’ve carried with me throughout my career. So you know, I can’t say enough good things about West Texas. I’m proud to be a West Texan.”

Jackson said he misses the people of Levelland, but not the sand storms and weather extremes. He remembers Levelland as a place that had only two restaurants: The Spot and The Chat ‘n’ Chew. He preferred The Spot, he said.

“It’s grown a little bit,” he said.

Those West Texas values probably led him into the Navy.

“My parents, they didn’t really have the money to fork over and help me pay for med school,” Jackson said. “My mom and dad kind of instilled in me, and I think a lot of other people when I was growing up in Levelland were the same way, they didn’t like to spend money they didn’t have.”

51 - Tampa Bay Times: [Editorial: For the sake of Tampa Bay veterans, Senate should scrutinize Trump’s VA pick](#) (7 April, 4.8M uvm; Saint Petersburg, FL)

President Donald Trump’s decision to fire Veterans Affairs Secretary David Shulkin and to replace him with presidential physician Dr. Ronny Jackson has outsized ramifications for the Tampa Bay area, given the large number of veterans here and the expansive and unique role that two major VA health centers play on both sides of the bay. Whether Jackson is the right person for the job, or whether this amounts to yet another glaring example of gross cronyism in the Trump White House, remains to be seen. But the Senate needs to use the confirmation process to explore not only Jackson’s management ability but his vision for a health system that despite all its faults delivers critical care for millions of Americans.

Shulkin was an Obama-era holdover and his firing was no surprise, coming after a critical report in February by the VA inspector general’s office that faulted him for improperly accepting

Wimbledon tickets during an official trip to Europe last summer. Shulkin needs to answer for his conduct, but his bigger offense may have been to slow-walk the administration's efforts to privatize VA health care services. While Shulkin agreed to explore limited privatization in some service areas and markets, he also recognized that the VA delivered a unique level of care to a specialized patient base. He was widely lauded in his tenure for improving accountability in the VA's entrenched bureaucracy and for moving to modernize the VA's delivery of care.

Jackson has won admirers for his service under two presidents prior to Trump as White House physician and for his distinguished career in emergency medicine. His service with a trauma unit in Iraq certainly makes him familiar with and sensitive to the VA's patient profile and the vital role the agency plays in caring for wounded warriors. But what appears to have propelled him to a Cabinet nominee was Jackson's televised appearance this year strongly hailing Trump's physical condition. Having the president's confidence is invaluable. But it should reflect core competence in a nominee, not merely fealty to any single president.

Jackson's lack of management experience is an obvious concern for anyone hoping to lead the nation's largest integrated health care system. With more than 1,700 hospitals and other health care facilities, and nearly 40,000 providers, the VA is the second-largest federal department, and there is nothing automatic about delivering quality, responsive services to 20 million veterans. The VA has rebounded from the recent scandals of secret waiting lists, but its bureaucratic culture still protects many incompetent leaders and outdated practices that harm its quality of care. And that in turn has colored the VA's public narrative. For all its faults, the VA has been recognized in recent years for outperforming non-VA facilities in outpatient services. And in the most recent survey of customer satisfaction, released in February, VA patients rated their experience higher than did those who were treated in private hospitals.

The next secretary needs to recognize the unique role the VA plays in treating complex cases that involve the intersection of blunt physical trauma and post-traumatic stress. The next leader needs to recognize the challenge of meeting the evolving patient profile, as older veterans require more care and as younger ones cope with regaining physical and emotional skills necessary to get back into civilian life.

The agency also needs to plan for the special needs that veteran-heavy states like Florida — which ranks third in the nation's veteran population, with 1.6 million — are facing. With 200,000 veterans in Pinellas and Hillsborough counties alone, the VA needs to continue investing in a modern health care delivery system. The Senate should press Jackson on how he would fulfill this mission and examine his commitment to put the interests of veterans ahead of any political agenda by this administration.

52 - Washington Post: [Ronny Jackson, Trump's pick for Veterans Affairs, may pass up \\$1 million to join the Cabinet](#) (8 April, Andrew deGrandpre, 43.9M uvm; Washington, DC)

President Trump's controversial nomination of Ronny L. Jackson to head the Department of Veterans Affairs has grown further complicated by the Navy physician's pending military promotion, which he could be forced to pass up — along with an estimated \$1 million in future retirement income — if confirmed for the Cabinet post.

Jackson, a one-star admiral and the president's White House doctor, was nominated by Trump for promotion to be a two-star admiral in the days leading up to VA Secretary David Shulkin's

departure late last month. The White House has said Jackson intends to remain on active duty until the Senate confirms him to become VA secretary, at which point he would retire from the service. A Navy spokesman said there's been no change in the admiral's duty status.

The dual nominations and a lack of clarity from the White House have left lawmakers flummoxed about how to proceed, said a Senate aide who spoke on the condition of anonymity to offer a candid assessment of Jackson's unusual circumstances. The situation is symptomatic of broader frustration on Capitol Hill, particularly among Senate Republicans, with the administration's contentious personnel moves. They have complained that the time and effort required to consider multiple Cabinet nominations — the top jobs at VA, the State Department and CIA all are pending — is an unwanted distraction during a challenging midterm election cycle.

"This whole situation is very much out of the norm," the Senate aide said. "There's some question here whether [Jackson's] flag officer nomination will move forward given his VA nomination. It's all TBD, because he can't serve in both positions concurrently, so it wouldn't make sense for the Senate to move the nominations concurrently."

The timing most likely is coincidental, as the military evaluates those eligible for promotion months before their nominations are sent to Congress.

[VA's acting secretary takes over: 'I don't think he has any idea what he's gotten himself into']

The White House did not respond to questions seeking clarity on whether it intends to deconflict Jackson's two nominations, if the admiral has discussed his pending promotion with Trump or if it's the president's goal for Jackson to be promoted before he joins the Cabinet.

The dilemma adds another dimension to Trump's surprising announcement that he had chosen Jackson, whose flattering assessment of the president's health was met with skepticism earlier this year, to lead the government's second-largest agency — and arguably its most challenged. His nomination stunned lawmakers, advocacy groups and former White House colleagues dubious of his qualifications or suspicious of Trump's desire to expand a program that enables veterans to seek medical care outside the VA network.

In an interview published over the weekend by the *Avalanche-Journal* in Lubbock, Tex., Jackson, a Texas native, pushed back against his critics and suggested that his military experience has prepared him for the challenges he would face leading such a sprawling and complex bureaucracy.

"I've been in leadership school for 23 years now," he told the newspaper, "... and I've been able to rise to the level of an admiral, a flag officer in the Navy. I didn't just stumble into that. So I've gotten a lot of leadership background, I've got a lot of leadership experience as a Navy officer, and I've got a lot of day-to-day leadership experience. You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life-and-death decisions.

"I think I've got what it takes, and you know, I don't buy into that argument at all."

Jackson is well liked inside the White House, where he's worked for the past 12 years, and he is respected by those who know him and have been in his care. Trump is said to have marveled at Jackson's January appearance in the White House briefing room, where he praised the

president's physical wellness and cognitive acuity. Before settling in Washington, Jackson was deployed to Iraq, where he led an emergency trauma unit responsible for treating troops grievously wounded during one of the war's most violent stretches.

He was surprised, however, by the president's offer to run VA, White House officials have said, and initially questioned whether, as a career Navy officer with limited managerial experience, he's an optimal candidate to lead an agency of more than 360,000 employees.

By all accounts, "he's an extremely sharp officer and a terrific doc," said Barry McCaffrey, a retired Army general who served as President Bill Clinton's drug czar. "If he retired from the military with two stars and went back to civilian life, he would have career prospects for sure. But after 12 years in the White House . . . the only qualification he has [to run VA] is the confidence of the president.

"I think it's 50-50 he is confirmed. And if he's confirmed, I have great empathy. Why would he succeed? The answer is: Because the president put him there."

Jackson's political views and his positions on key policy questions have not surfaced publicly, though he told the *Avalanche-Journal* that military veterans "want to know that they have access" to medical care.

"We owe the vets the absolute best care that's available out there," he said. It's unclear whether Jackson was weighing in specifically on the administration's drive to outsource more medical services. There is deepening concern among those who oppose that effort that the admiral won't stand up to those closest to Trump who have proposed the most aggressive measures. As such, it is believed Jackson will face a difficult confirmation.

Separately, a move to VA could entail financial sacrifice. As a Cabinet secretary, Jackson would earn a salary of \$210,000, though a pay freeze has the rate locked at \$200,000 through the end of this year. That's up significantly from the \$150,000 he earns as a one-star admiral and the \$170,000 he would make as a two-star, according to current Defense Department pay tables. But as a senior officer living in Washington, he also rates thousands of dollars annually in housing allowance plus other special incentive pay the military makes available to medical professionals.

In the long term, a higher rank would qualify Jackson for a more generous pension, which is determined in part by a service member's final pay grade and years of service. Assuming Jackson lives to age 90, the difference before taxes is \$6.4 million versus \$5.3 million, according to estimates based on the Defense Department's retirement pay calculator.

Specialists with First Command Financial Services, which offers financial planning and advice for the military community, independently verified these results at The Washington Post's request but cautioned that other variables could influence Jackson's decision-making in forgoing the promotion in favor of joining Trump's Cabinet.

For instance, he would probably boost his future marketability and earning power in the private sector if he can demonstrate success while running VA. Chief executives of major medical networks can command sizable salaries, and Jackson, 50, though of age to retire from the military, is at the outset of his prime earning years.

There's also the satisfaction that comes from working in service to the nation -and for those who've sacrificed on its behalf, said Arnold Punaro, a retired Marine general who also spent many years on the staff of the Senate Armed Services Committee, overseeing, among other matters, the promotion confirmation process.

"It's been my experience," Punaro said, "that senior military officers — like Admiral Jackson — aren't motivated by money. They're motivated by service. They're motivated by mission."

Senate leaders have not set a date for Jackson's confirmation hearing or a vote on his nomination for promotion.

This article was updated to include Jackson's comments to the Lubbock Avalanche-Journal.

53 - USA Today (Video): [VA pick Ronny Jackson: 'I've got what it takes' to lead the troubled agency](#) (8 April, Donovan Slack, 36.8M uvm; McLean, VA)

President Trump's pick to lead the Department of Veterans Affairs is dismissing concerns that he lacks the experience necessary to take over the massive agency, which has more than 300,000 employees and 1,200 medical facilities.

Ronny Jackson, a Navy rear admiral, has been a White House physician since 2006 but has little executive management experience.

"You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life and death decisions," he told the Lubbock Avalanche-Journal in his first interview since Trump announced his intent to nominate Jackson March 28. "I think I've got what it takes, and you know, I don't buy into that argument at all."

"Dr. Ronny," as colleagues call him, rose to national prominence in January when he conducted a White House press conference after giving the president a check up and mental acuity exam and proclaimed Trump's "overall health is excellent." But little has been publicly reported beyond his official bio on the Pentagon website.

For that reason, some lawmakers and veterans' groups have said they are withholding judgment on his nomination to be VA secretary.

"Dr. Jackson's bio does not reflect any experience working with the VA or with veterans, or managing any organization of size, much less one as multifaceted as the Department of Veterans Affairs, so the VFW will be closely monitoring his Senate confirmation process," the Veterans of Foreign Wars said in a statement.

Trump announced his intent to nominate Jackson in a tweet March 28. At the same time he fired David Shulkin from the secretary's post, saying he wasn't happy with the pace of improvements to the VA and wanted veterans to have more options for private care.

Shulkin wrote in an op-ed at the time that he believed he was removed because he refused to privatize the agency. He told USA TODAY that he believes Jackson can do the job if he builds the right team around himself.

Jackson, in his interview with the Lubbock Avalanche-Journal, did not outline his views on giving veterans more options to get VA-sponsored health care in the private sector. But he said, "We owe the vets the absolute best care that's available out there."

"I've been overseas, and I've been deployed in combat zones with Marines and soldiers and airmen and sailors, and I've seen first-hand what they go through, the injuries and the things they come home with," Jackson said.

"I've seen how that happens, and how devastating it is to them and their families. I just want to make sure that we do our part as a country and we let them know that we appreciate that and we take care of them."

The VA has been buffeted by scandal since 2014, when news reports revealed veterans had died waiting for appointments in Phoenix while schedulers kept secret wait lists masking how long they were waiting.

Since then, USA TODAY has reported on poor quality of care, misdiagnoses, supply shortages and failures in hiring and firing medical providers, among other problems that still plague the VA.

If confirmed, Jackson will be the fourth VA secretary in four years.

[Back to Top](#)

54 - CNN (Video): [Trump's VA pick says he's 'got what it takes' to be secretary](#) (8 April, Devan Cole, 29.8M uvm; Atlanta, GA)

Ronny Jackson, President Donald Trump's physician and pick for secretary of the Department of Veterans Affairs, said in his first interview since being nominated that he's "got what it takes" to lead the department.

In a Sunday profile of Jackson in the Lubbock Avalanche-Journal, a newspaper located near Jackson's hometown of Levelland, Texas, the White House doctor said: "I've been in leadership school for 23 years now. ... And I've been able to rise to the level of an admiral, a flag officer in the Navy. I didn't just stumble into that. So I've gotten a lot of leadership background."

"You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life and death decisions," Jackson told the paper.

Jackson, whom Trump picked to be the VA's next secretary last month, first worked in the White House under President George W. Bush, where he was assigned to care for first lady Laura Bush. After Bush left office, then-President Barack Obama appointed Jackson as his own physician, and he maintained the role under Trump.

Jackson, a rear admiral, told the paper that former Bush employees who were on the Trump transition team helped him keep his job under Trump.

"Some of the people that were working on the Trump transition had been a part of the Bush 43 administration, and they knew me," Jackson told the paper. "They talked to President Trump about it, and I talked about it with him, and he just immediately appointed me as his physician as well."

If confirmed, Jackson said he "won't stay on active duty, I'll be a vet right away." His predecessor, who was dismissed by Trump last month, was not a veteran, which was widely noted after he was nominated in 2017.

According to the paper, Jackson noted in his interview that it's in "his best interest and his children's best interest to do what is right for veterans."

"We owe the vets the absolute best care that's available out there," Jackson said.

CNN's Kevin Liptak contributed to this report.

[Back to Top](#)

55 - The Hill: [Trump VA nominee: 'I think I've got what it takes'](#) (8 April Mallory Shelbourne, 11.9M uvm; Washington, DC)

President Trump's nominee to take over the Department of Veterans Affairs (VA) said in a new interview that he has "what it takes" to lead the agency.

"You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life and death decisions," Rear Adm. Ronny Jackson, who currently serves as the White House physician, told the Lubbock Avalanche-Journal.

"I think I've got what it takes, and you know, I don't buy into that argument at all."

Trump announced Jackson as his choice to serve as the new VA secretary late last month in a tweet, in which he also announced the departure of embattled Secretary David Shulkin.

"I am pleased to announce that I intend to nominate highly respected Admiral Ronny L. Jackson, MD, as the new Secretary of Veterans Affairs," Trump wrote on Twitter on March 28.

"In the interim, Hon. Robert Wilkie of [the Department of Defense] will serve as Acting Secretary. I am thankful for Dr. David Shulkin's service to our country and to our GREAT VETERANS!"

Shulkin later claimed he did not resign from the position, though the White House maintains he stepped down from his post.

Senators have said they look forward to hearing from Jackson as he goes through the confirmation process.

Jackson told the Texas newspaper that veterans deserve "the absolute best care that's available out there."

"I just want to make sure that we do our part as a country and we let them know that we appreciate that and we take care of them," he told the Journal.

[Back to Top](#)

56 - The Hill: [Senate braces for showdown over Trump's nominees](#) (8 April, Jordain Carney, 11.9M uvm; Washington, DC)

The Senate is barreling toward a showdown over President Trump's latest Cabinet shuffle, with three critical departments looking for new leaders and more that could follow.

Republicans are preparing for a weeks-long battle as they try to confirm CIA Director Mike Pompeo to be secretary of State and CIA deputy director Gina Haspel to succeed him.

Haspel's nomination in particular is controversial, and the GOP has little margin for error given Sen. Rand Paul's (R-Ky.) opposition to both of Trump's picks.

"I mean that's going to take a lot of floor time," Sen. John Thune (R-S.D.), the No. 3 Senate Republican, told The Hill. "Who knows how long and how much the Democrats are going to want to weigh in with some of those. But it will for sure be time consuming. That's not going away."

Senators also will need to consider Ronny Jackson, the top White House physician, to replace David Shulkin as Department of Veterans Affairs secretary.

GOP senators have largely remained mum over Jackson's nomination, which has come under scrutiny given the physician's lack of experience in running a large bureaucratic organization.

"I've never met him, don't know him. And what I do know does suggest that he needs to demonstrate that he has the qualifications, the capabilities despite the lack of experience," Sen. Jerry Moran (R-Kansas), a member of the Senate Veterans Affairs Committee, told NPR.

Nominations need just a simple majority to clear the Senate. But with a fragile 51-seat grip on the chamber, Republicans have no room for error.

Democrats haven't signaled if they will unanimously vote against the three nominees.

The White House, GOP leadership and outside groups are expected to pressure red and purple state Democrats up for reelection to vote for Trump's picks, and there's reason to think some Democrats could see reason to vote for one or more of the nominees.

Haspel is seen as facing a more challenging confirmation battle than Pompeo, as several key Republican senators remain on the fence.

Sen. John McCain (R-Ariz.), who has been absent from Washington for months as he battles brain cancer, wants Haspel to detail her views and involvement on Bush-era "enhanced interrogation techniques," which are now widely viewed as torture, saying the issue is critical to the Senate's consideration of her nomination.

Director of National Intelligence Dan Coats would not commit to fully declassifying all information on Haspel's involvement in the techniques but said "every effort will be made to fully explain exactly what her role was and what wasn't."

Outside groups and advocates are already gearing up for an intense fight.

Dozens of former Pompeo staffers released a letter on Friday urging support for his nomination. The letter said that Pompeo had "never shied away from speaking the truth" and that his "leadership at State will empower American diplomacy, strengthen America's influence and make the world a better place."

Progressive and human rights groups want the Senate to reject Haspel's nomination over her role in interrogations at a so-called black site prison and the destruction of videotapes documenting the waterboarding sessions of an al Qaeda suspect there.

Several Democratic senators—including Sen. Ron Wyden (D-Ore.), a member of the Senate Intelligence Committee—have already come out against her.

The Senate Intelligence Committee hasn't yet scheduled a hearing date for Haspel.

Pompeo is scheduled to testify before the Senate Foreign Relations Committee on Thursday. Aides to several Democratic senators on the panel noted their bosses are also expected to meet privately with him.

The fight comes as Republicans and Democrats bicker over the length of time it has taken to consider Trump nominees.

Under the rules, senators can force up to 30 hours of post-cloture debate time, eating up days of Senate floor time. It has taken Trump's nominees an average of 84 days to be confirmed, according to a tracker from The Washington Post and the Partnership for Public Service.

Changing the rules to speed up votes for Trump's nominees has been under discussion among Senate Republicans for roughly a year.

GOP Sen. James Lankford's (Okla.) proposal would cut down debate time from 30 hours to eight hours for most nominations once they've overcome an initial hurdle that shows they have the simple majority to pass. Most Cabinet-level nominations would not qualify for the shorter debate time under Lankford's proposal.

A GOP aide told The Hill that the proposal could see movement in the Rules Committee in May. Sen. Roy Blunt (R-Mo.), the next chairman of the committee, predicted the proposal will get a vote, adding that "Republicans have every right to be offended by the way the rules have been abused."

Republicans are putting the fight over Trump's nominees at the center of their messaging heading into the 2018 election.

"Even if we were to lose the House and be stymied legislatively, we could still approve appointments, which is a huge part of what we do," Majority Leader Mitch McConnell (R-Ky.) told the Kentucky Today editorial board.

It's unlikely that the current slate of confirmation fights will be the final Cabinet shakeup senators face amid speculation that several officials—including EPA Administrator Scott Pruitt, Attorney General Jeff Sessions and Housing and Urban Development Secretary Ben Carson—could be next on the chopping block.

[Back to Top](#)

57 - Washington Examiner: [VA pick Ronny Jackson: 'I've got what it takes'](#) (8 April, Kelly Cohen, 4.8M uvm; Washington, DC)

The man picked by President Trump to take over as head of the Department of Veterans Affairs says he's "got what it takes" to lead the troubled agency.

"I think I've got what it takes, and you know, I don't buy into that argument [that I lack experience] at all," Ronny Jackson said in a profile of him published in the Lubbock Avalanche-Journal on Sunday.

The Texas native was appointed to be the doctor to the president by former President Barack Obama in 2013, and retained by President Trump. Last month, Trump announced he planned to replace David Shulkin with Jackson as the VA secretary.

"I've been in leadership school for 23 years now. ... And I've been able to rise to the level of an admiral, a flag officer in the Navy. I didn't just stumble into that. So I've gotten a lot of leadership background, I've got a lot of leadership experience as a Navy officer, and I've got a lot of day-to-day leadership experience," Jackson told the newspaper.

He added: "You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life and death decisions."

Jackson, a Navy rear admiral, first worked in the White House under former President George W. Bush. He told the paper that former Bush employees who were on Trump's presidential transition team helped him remain in his role in the Trump administration.

"Some of the people that were working on the Trump transition had been a part of the Bush 43 administration, and they knew me," Jackson explained. "They talked to President Trump about it, and I talked about it with him, and he just immediately appointed me as his physician as well."

Jackson also said he "won't stay on active duty" and will "be a vet right away."

"I've been overseas, and I've been deployed in combat zones with Marines and soldiers and airmen and sailors, and I've seen first-hand what they go through, the injuries and the things they come home with. I've seen how that happens, and how devastating it is to them and their families. I just want to make sure that we do our part as a country and we let them know that we appreciate that and we take care of them," he said.

[Back to Top](#)

58 - The Hill: [Senate uncertain how to proceed on dual Trump nominations for White House physician: report](#) (8 April, Brett Samuels, 11.9M uvm; Washington, DC)

VA-18-0457-A-000992

Some lawmakers are unsure how to proceed with President Trump's pick for Veterans Affairs secretary because he also has a pending military promotion, The Washington Post reported Sunday.

Trump nominated Rear Adm. Ronny Jackson to be promoted from a one-star admiral to a two-star admiral just days before the president ousted Veterans Affairs Secretary David Shulkin. Trump named Jackson as Shulkin's replacement, pending Senate confirmation.

However, the timing of the two nominations has created confusion on how to proceed, The Washington Post reported. To lead the VA, Jackson may be forced to give up his military promotion and roughly \$1 million in future pension earnings.

The White House has said Jackson will remain on active duty until he is confirmed to run the VA. However, the White House did not respond to inquiries from the Post about whether it will address Jackson's conflicting nominations.

Jackson, who has served as the presidential physician since 2013, has drawn criticism from outside groups and some lawmakers who worry he does not have the managerial experience to run an operation as large as the VA.

The White House brushed aside those concerns, saying Trump has "full confidence" in Jackson to replace Shulkin.

Shulkin was fired amid intense scrutiny after an inspector general report found he spent most of his time during a trip to Europe last summer sightseeing rather than conducting official business and improperly accepted tickets to a Wimbledon tennis match as a gift.

Following his ouster, Shulkin defended his tenure, speculated he was pushed out because he opposed privatization and railed against the "toxic" atmosphere in Washington.

[Back to Top](#)

59 - Military Times: [VA secretary nominee brushes off criticism over inexperience](#) (9 April, Leo Shane III, 2.1M uvm; Springfield, VA)

President Donald Trump's pick to take over the Department of Veterans Affairs downplayed his management inexperience in his first public interview since his nomination, saying his time in the military has honed his leadership skills.

Dr. Ronny Jackson, who has served as White House physician since 2006, told the Lubbock Avalanche-Journal of Texas, his hometown newspaper, that he has heard the criticism concerning his ability to take over the nearly \$200 billion department with 385,000-plus employees.

But he remains undeterred.

"I've been in leadership school for 23 years now ... and I've been able to rise to the level of an admiral, a flag officer in the Navy," he said. "I didn't just stumble into that. So I've gotten a lot of

leadership background, I've got a lot of leadership experience as a Navy officer, and I've got a lot of day-to-day leadership experience

"You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life and death decisions."

Jackson was a surprise pick as the next VA secretary, following the dismissal of David Shulkin from the role last month.

He is an Iraq war veteran who deployed as an emergency medicine physician with the Surgical Shock Trauma Platoon in Taqaddum, Iraq, in 2005. He served as the White House doctor for Trump and also former presidents George W. Bush and Barack Obama, directing health care for not only the commander in chief but their senior staff and Cabinet officials.

Jackson told the *Avalanche-Journal* he had planned to retire from the military after Obama's presidency ended, but Trump convinced him to stay on staff. Now, he's poised to make the move from leading a small medical staff at the White House to a Cabinet secretary post.

He acknowledged it's a promotion he never expected.

"I really haven't planned my life out real meticulously," he told the paper. "I've just kind of tried to enjoy what I'm doing and do a good job, and one thing has led to another."

Jackson still has not retired from the military, but White House officials said he intends to do so as his confirmation process progresses. Active duty military officers cannot serve in Cabinet roles.

Although not a veteran yet himself, Jackson said he is familiar with the needs of his fellow service members and is focused on delivering "the absolute best care" to them.

"I've been overseas, and I've been deployed in combat zones with Marines and soldiers and airmen and sailors, and I've seen first-hand what they go through, the injuries and the things they come home with," he said.

"I've seen how that happens, and how devastating it is to them and their families. I just want to make sure that we do our part as a country, and we let them know that we appreciate that and we take care of them."

No timetable has been set for Jackson's confirmation hearings.

[Back to Top](#)

60 - ConnectingVets: [IAVA hopes VA Secretary nominee is the right choice](#) (9 April, Eric Dehm, 24k uvm; New York, NY)

The maelstrom continues to swirl atop the Department of Veterans Affairs. Shulkin is out, Wilkie is the acting secretary and Rear Admiral Ronny Jackson came out of left field as President Trump's nominee to permanently fill the position.

It's been a wild few weeks in regards to veteran issues on Capitol Hill, and Iraq and Afghanistan Veterans of America (IAVA) has been closely watching as it has all unfolded. Chief Policy

Officer Melissa Bryant says the organization has concerns over recent events, but maintains hope that it will all work out in the best interests of veterans.

During an appearance on the Morning Briefing, Bryant said the upcoming hearings on Admiral Jackson's nomination should shed quite a bit of light on the nominee's qualifications, and his vision for the future of the VA. At this point, Bryant believes it unfair to reach any conclusion on Jackson as there's simply not enough information available on him and until his thoughts on important matters like privatization are known, IAVA will maintain a "wait and see" approach to the presidential physician's nomination.

Bryant's full interview, focusing on the VA and other issues like the omnibus spending bill and IAVA's "Big 6" legislative items is available below.

[Back to Top](#)

61 - **ConnectingVets:** [VA pick Ronny Jackson says he's up for the job](#) (9 April, Matt Saintsing, 24k uvm; New York, NY)

President Donald Trump's pick to lead VA wants veterans to know he's up to the task and is dismissing fears he's not qualified to lead the second largest government agency, one with more than 300,000 employees.

Randy Jackson certainly has the medical chops as a Navy doctor, but veterans groups were largely caught off guard when Trump tweeted his intent to nominate him as Secretary of Veterans Affairs. In his first media appearance since Trump nominated him, Jackson says he's more than just a Naval officer.

"You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life and death decisions," Jackson told the Lubbock Avalanche-Journal.

"I think I've got what it takes, and you know, I don't buy into that argument at all."

Trump announced his intent to nominate Jackson March 28 in a tweet, citing his displeasure with the slow pace of improvements under David Shulkin's tenure.

Shulkin penned an op-ed the day after he was fired taking to task what he calls the administration's attempt to privatize the agency. However, Shulkin told USA TODAY that he believes Jackson can do the job, but he has to build the right team around himself.

In his interview with the Avalanche-Journal, Jackson didn't outline any policy or his views on how best to give veterans care. He did say, however, that "we owe the vets the absolute best care that's available out there."

"I've been overseas, and I've been deployed in combat zones with Marines and soldiers and airmen and sailors, and I've seen first-hand what they go through, the injuries and the things they come home with," said Jackson.

The VA has been beleaguered by scandals since 2014, when it was revealed veterans had died while waiting for appointments at a VA clinic in Phoenix, Ariz.

VA-18-0457-A-000995

If confirmed, Jackson will be the fourth Secretary of Veterans Affairs in four years.

[Back to Top](#)

62 - Becker's Hospital Review: [How a military promotion could complicate Dr. Ronny Jackson's VA nomination](#) (9 April, Leo Vartorella, 441k uvm; Glencoe, IL)

President Donald Trump's nomination of White House physician Ronny Jackson, MD, to lead the Department of Veterans Affairs has been complicated by his simultaneous promotion to two-star admiral, according to The Washington Post.

President Trump nominated Dr. Jackson for the promotion in late March, but he cannot stay on active duty and also direct the VA. A Senate aide told The Washington Post that lawmakers are confused on how to proceed with the dual nomination tasks. Dr. Jackson will retire from active duty upon assuming the role of VA secretary, but he stands to gain nearly \$1 million in pension benefits if the Senate confirms his promotion before retiring.

"This whole situation is very much out of the norm," the unnamed Senate aide told The Washington Post. "There's some question here whether [Dr. Jackson's] flag officer nomination will move forward given his VA nomination. It's all [to be determined], because he can't serve in both positions concurrently, so it wouldn't make sense for the Senate to move the nominations concurrently."

Dr. Jackson's nomination has faced criticism over his lack of formal management experience, but he believes his military career has adequately prepared him for the job's responsibilities.

"I've been in leadership school for 23 years now," Dr. Jackson told the Lubbock Avalanche-Journal, ". . . and I've been able to rise to the level of an admiral, a flag officer in the Navy. I didn't just stumble into that. So I've gotten a lot of leadership background, I've got a lot of leadership experience as a Navy officer, and I've got a lot of day-to-day leadership experience. You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life-and-death decisions."

63 - Task & Purpose: [Trump's VA Pick Faces A Dilemma Most Troops Would Love To Have](#) (9 April, Adam Weinstein, 102k uvm; New York, NY)

I'm about to suggest something that would've been unthinkable to me as an E-3: Put yourself in the admiral's shoes.

You're 23 years into a terrific career as a naval physician. For 12 of that, you've been the president's doctor, administering checkups to three very different POTUSes — high-stakes business, sure, but you've been doing it longer than most service members do anything.

You've got a star on your shoulder, and you've just been selected to collect a second one... along with a nice bump to \$14,268.30 in base monthly pay — which would also add a welcome

boost to your already-rich retirement pension, whenever you feel like actually retiring. You're a spry 50, so no need to worry about that just now.

But then a president asks you to do a daunting job you have no hard experience for: joining his Cabinet to run the Department of Veterans Affairs, the nation's second-largest publicly funded institution. You'll face a tough Senate confirmation. If confirmed, you'll enter a snake's nest of competing interests and ponderous bureaucracies, where your standing with the POTUS who hired you is in doubt from day to day.

Also, you'll have to forgo that second star and retire from the only organization that's employed you since med school. Like, now.

Such is the dilemma that Rear Adm. (lower half) Ronny Jackson, U.S. Navy, faces this week, as he prepares for Senate hearings about his nomination to run VA.

Jackson, a highly respected physician, first garnered headlines when he declared after President Donald Trump's first physical that the portly POTUS "might live to be 200 years old... He has incredibly good genes, and it's just the way God made him." Whatever else may have transpired between Jackson and Trump since then, the boss evidently has the impression that Jackson's got the right stuff to run 1,250 hospitals and clinics serving 9 million veterans across the U.S.

We should have such problems, you say: Take the extra star and the \$171,000 admiral's salary, or get out with an annual retirement of more than \$50,000 to take a prestigious six-figure job working directly for the president of the United States?

Of course, there's a lot more to it than money. Here are three reasons Jackson isn't living the dream, so much as facing a nightmare:

His choice isn't really a choice.

You're an active duty military officer, and the president asked you point blank to do a thing that is neither illegal nor immoral. Could you really say no? Perhaps, but most officers wouldn't, even if they hated the proposal. And though he's all in, it's not at all clear where Jackson really stands on his job offer; White House sources tell the Washington Post that the admiral "initially questioned whether, as a career Navy officer with limited managerial experience, he's an optimal candidate to lead an agency of more than 360,000 employees."

He's being set up for failure.

Lately, Jackson's been expressing enthusiasm about the job Trump offered him. "I've been able to rise to the level of an admiral, a flag officer in the Navy. I didn't just stumble into that," he told a hometown paper when asked what qualified him to run VA. "I think I've got what it takes." That's undoubtedly true! But far more politically savvy hospital administrators and CEO types — like David Shulkin and Robert McDonald — have been smashed by the daily grind of nervous veterans' groups, rattled civil servants, and strident political lobbyists who cloy the VA secretary on a daily basis. The uniform provided Jackson a modicum of safety: Tell your truth and take your orders. (Not that it did Lt. Gen. H.R. McMaster any good.) Now you're a civilian, and you going to have to bring bad news the president's way — with a lot more at stake than another star.

He's probably not gonna make it that far.

Nominating a sitting flag officer to run VA is largely unprecedented — Gen. Omar Bradley did it after World War II, until pro-privatization vets' groups pushed him out in 1946 — and nominating a flag officer with a promotion pending before the Senate has caused a bunch of procedural problems that the Trump administration doesn't seem to care about, leaving “lawmakers flummoxed about how to proceed,” one Senate aide suggested to the Washington Post. “There's some question here whether [Jackson's] flag officer nomination will move forward given his VA nomination. It's all TBD, because he can't serve in both positions concurrently, so it wouldn't make sense for the Senate to move the nominations concurrently.” Senators are already expected to squeeze Jackson hard, on television, on his qualifications and preparations for a Cabinet post. The pending promotion just gives them another reason to question whether the VA post is the best use of Jackson's talents — and whether the White House that tapped him has its crap together.

In the end, this grunt's dream — which prestigious six-figure gig to take? — is a career officer's nightmare: Jackson could avoid an iffy nomination and a thankless job while collecting a \$25,000-a-year promotion... but that would require him to say “No, sir” to a president. So far, Jackson's doing what you'd expect a career officer to do: trying to polish this turd. For his sake and the sake of vets all over America, here's hoping that shit will keep a shine for a while.

[Back to Top](#)

64 - Washington Post: [Senate Republicans express concerns about Trump's choice to lead Veterans Affairs](#) (11 April, Seung Min Kim, 43.9M uvm; Washington, DC)

Ronny L. Jackson, President Trump's choice to lead the Department of Veterans Affairs, is facing mounting skepticism from Senate Republicans over whether he has the management experience to lead the nation's second-largest bureaucracy.

The comments from several GOP senators, particularly those with influence on veterans' issues, signal Jackson will have to work overtime to convince not just Democrats but Trump's own party that he is qualified to oversee the beleaguered agency. That challenge comes at a time when Senate Republicans are already juggling other controversial nominations that will consume much of the political oxygen on Capitol Hill.

Jackson has served three administrations under both parties as the White House physician yet has little management experience on his résumé as he gears up to take over a sprawling agency of 360,000 workers and deal with the vexing challenges of providing health care and benefits to military veterans. Republicans say they know little to nothing about Jackson and are quickly studying up as they prepare for one-on-one meetings with the nominee.

“Certainly, I do have concerns about his experience, as far as managing people,” said Sen. John Boozman (R-Ark.), who sits on the Senate Committee on Veterans' Affairs, which will vet Jackson's nomination. “There is some concern about whether he's been in a position to lead an organization like that.”

Sen. Jerry Moran (R-Kan.), another committee member, also expressed worries about Jackson.

White House physician Ronny L. Jackson is facing questions about whether he has the right experience to lead the Department of Veterans Affairs. (Jabin Botsford/The Washington Post)

“The VA is a difficult place to manage, regardless of what your background experience is. I want to know more about how he believes that he’s capable of fulfilling those responsibilities, and I have a wide array of questions in regard to his experience and background,” Moran said. “I need to be convinced that he can make a difference at a department in which the culture and the upper echelons of its leadership need to have somebody who can take charge.”

At best, Jackson is getting a tepid reaction from Senate Republicans, many of whom had praised his ousted predecessor, David Shulkin, even if they occasionally clashed with him over policy. Democrats were also vocal supporters of Shulkin, the sole Cabinet holdover from the Obama administration and who was the rare Trump-appointed official who sailed through the Senate with no objections.

A White House spokesman did not return a request for comment Tuesday on the Senate Republicans’ concerns surrounding Jackson’s qualifications. But the White House has defended Jackson’s credentials in the past, and the physician himself laid out his leadership background in an interview with a local newspaper in Texas published over the weekend.

“I’ve been in leadership school for 23 years now. . . . And I’ve been able to rise to the level of an admiral, a flag officer in the Navy. I didn’t just stumble into that,” he told the Lubbock Avalanche-Journal.

He added: “I think I’ve got what it takes, and you know, I don’t buy into that argument at all.”

Democrats are also questioning whether Jackson can handle oversight of the massive bureaucracy, which is second only to the Pentagon in size. And they’re making it clear that Jackson’s nomination will be intertwined with the broader fight about whether veterans should have more access to private doctors at taxpayers’ expense.

Shulkin had worked with senators on a bipartisan compromise that would largely keep VA in control if veterans can obtain private health care, while removing some restrictions. But the White House has pushed for a more aggressive turn toward privatization, which has alarmed Democrats and some veterans’ groups who worry about outsourcing so much of veterans’ care.

Sen. Patty Murray (D-Wash.) said she wants to hear from Jackson that he is “unequivocally opposed to privatization.”

“This is also a concern across the board, from all sides and from the veterans organizations that want to see a VA that was promised to them,” Murray said. “We don’t want to send the millions of veterans out into a system where the doctors meeting them may not be qualified.”

Compounding the challenges for the Trump administration is that Jackson is just one of a handful of Cabinet vacancies that the Senate is suddenly facing after a recent wave of dismissals and resignations.

Republicans are scrambling to quickly install Mike Pompeo as secretary of state. His nomination to be CIA director was supported by 15 members of the Senate Democratic Caucus last year, but he will face a much more sharply partisan confirmation battle to become the nation’s chief diplomat. Gina Haspel’s nomination to succeed Pompeo at the CIA will be a greater challenge for the administration, with both Democrats and Republicans raising questions about her involvement in the agency’s “enhanced interrogation” program, which critics say is tantamount to torture.

Both nominees are already facing opposition from Sen. Rand Paul (R-Ky.). Pompeo's confirmation hearing is scheduled for Thursday. Haspel's paperwork has yet to be submitted to the Senate and a hearing is not on the books. Jackson's hearing has yet to be scheduled.

Senators are also carefully watching the controversies surrounding Scott Pruitt, the embattled administrator of the Environmental Protection Agency, which would be another challenging vacancy to fill in an election year.

Republican lawmakers are much more eager to focus on touting their legislative accomplishments, such as the recently passed tax law, rather than grueling confirmation battles that will only ignite partisan tensions in the Senate.

"The confirmations, they're important," Moran said. "But it is very difficult for us to deal with other issues, any things that are pending, that are important to the country when we're consumed with confirmations, and confirmations that are ones that we had confirmed within the last year or so. And so it reduces the time in which we have to pursue other important issues for the country."

"It would be good to have consistency [among the Cabinet secretaries] to develop the relationships on Capitol Hill," said Sen. Mike Rounds (R-S.D.). "I think today, that is lacking with this administration."

Senate Republicans and the White House have hammered Democrats, most recently this week, for stalling key administration nominees. But by adding more Cabinet-level picks to the Senate's to-do list, the administration is only further delaying consideration of those lower-level picks.

The White House keeps a list of nominees that ranks each of them by priority, according to one GOP official familiar with the tally. Once Cabinet-level nominations are moved to the top, it moves other picks down, potentially for months, the official said.

Sen. Jon Tester (Mont.), the top Democrat on the veterans' committee, said he urged Jackson to submit his paperwork to the Senate soon so a review of his qualifications can begin.

"I think both the management experience as well as his view on where he wants to take VA is really going to be important," Tester said. "I'm very concerned about VA right now."

When asked if he believes Jackson is qualified to run the agency, Sen. Johnny Isakson (R-Ga.), who chairs the veterans' committee, said, "I don't know enough to know anything."

"I'm a blank slate," said Isakson, who has spoken on the phone with Jackson. Senate Majority Leader Mitch McConnell (R-Ky.) has yet to comment on Jackson's nomination.

Sen. Thom Tillis (R-N.C.), a member of the veterans' committee, also said he has yet to make a judgment on whether Jackson is qualified. Sen. Dan Sullivan (R-Alaska), a fellow committee member, said he wants to question Jackson about "his experience, or lack thereof, on the management side."

"That's the most difficult, frustrating bureaucracy in Washington," Sullivan said. "I think most people would absolutely agree with that."

[Back to Top](#)

65 - The Hill: [VA privatization fight could erupt in confirmation hearing](#) (11 April, Nathaniel Weixel, 11.9M uvm; Washington, DC)

Long-simmering tensions about privatizing the Department of Veterans Affairs (VA) could erupt into a confirmation battle over President Trump's pick to lead the department.

Trump's decision to oust former VA Secretary David Shulkin late last month and replace him with White House physician Ronny Jackson stoked speculation that the White House wants to allow veterans more access to private-sector health-care providers.

In an op-ed published in The New York Times just hours after he was removed, Shulkin blamed his ouster on forces within the administration that he said are pushing hard for privatization "The advocates within the administration for privatizing VA health services ... saw me as an obstacle to privatization who had to be removed," Shulkin wrote.

Dismantling the department's health-care system "is a terrible idea," Shulkin wrote, adding that the private sector "is ill-prepared to handle the number and complexity of patients that would come from closing or downsizing VA hospitals and clinics."

Groups like the Koch brothers-backed Concerned Veterans for America (CVA) are pushing to loosen current restrictions on veterans receiving private-sector care.

Democrats and veterans' advocates are concerned that the White House is taking those calls for privatizing the VA system seriously, but the VA denied last week that there is any push to privatize its health system.

"There is no effort underway to privatize VA, and to suggest otherwise is completely false and a red herring designed to distract and avoid honest debate on the real issues surrounding veterans' health care," the agency said in a statement.

Democrats and veterans' advocacy groups have been wary of Republican efforts to privatize the VA since before Trump took office.

In a 2016 campaign rally in Virginia Beach, Trump called the VA corrupt and inefficient.

"Veterans should be guaranteed the right to choose their doctor and clinics, whether at a VA facility or at a private medical center," Trump said. "We must extend this right to all veterans."

Senate Democrats and veterans groups have not yet drawn any hard lines against Jackson, partly because they said they don't know what his positions are.

Verna Jones, the executive director of the American Legion, said she would have to sit down and speak with Jackson before passing judgment on his nomination.

"It seems like people are putting the cart before the horse. Jackson hasn't had a confirmation and none of us know his views," Jones said. "To be clear, the Legion opposes privatization. How all this ties into Jackson — we owe it to him to wait and see."

Jackson is an active-duty Navy admiral who has worked as the White House physician for three presidents. Lawmakers have expressed skepticism over whether Jackson, who doesn't have experience working with the VA or managing a health-care organization, has the qualifications to run the agency.

Senate Democrats on the Veterans' Affairs Committee said they also don't know where Jackson stands on privatization. Still, they don't trust the administration's motives and are gearing up for a fight.

Sen. Jon Tester (D-Mont.), the ranking Democrat on the committee, told The Hill he has only had a brief phone call with Jackson since Trump nominated him for the position.

"There are two areas of concern ... one is privatization and the other is management. So that's what we're going to focus on," Tester said.

"Our job is to strengthen the VA in order to provide high-quality care to our veterans, not dismember it," Sen. Bernie Sanders (I-Vt.) said in a statement. "The Senate Committee on Veterans Affairs should not approve any nominee for secretary who supports the privatization of the VA."

Sen. Richard Blumenthal (D-Conn.) told The Hill privatization is a "serious concern" that he hopes to address with Jackson.

A spokeswoman for the VA committee said a hearing would be scheduled as soon as Jackson submits his paperwork and finishes a background check.

Jackson's nomination could also spotlight legislation that is intended to make it easier for veterans to get care outside the VA system without completely privatizing the system.

The legislation from Tester and Senate Veterans' Affairs Committee Chairman Johnny Isakson (R-Ga.) has backing from major veterans groups such as the American Legion and Veterans of Foreign Wars.

The bill would overhaul VA Choice, a temporary program that allows veterans to seek care outside the VA network — but only in cases where they have to wait more than 30 days for an appointment or drive more than 40 miles to a facility.

It would eliminate the waiting period and distance requirements and allow veterans to seek community care outside the VA if veterans and their providers agree it's the best method of treatment.

But the Koch-backed CVA has lobbied hard against it, because they think it doesn't loosen regulations enough.

Opposition has also come from the left. House Democrats blocked the bill from being included in the omnibus funding bill that passed last month because they think it moves the VA too far toward privatization.

A Senate VA committee aide said Isakson has spoken to Majority Leader Mitch McConnell (R-Ky.), and hopes to bring the bill to the floor for a stand-alone vote in the next few weeks.

[Back to Top](#)

66 - American Thinker: [VA privatization debate could derail new secretary's confirmation](#)
(11 April, Rick Moran, 4.8M uvm; El Cerrito, CA)

When Donald Trump fired his secretary of Veterans Affairs, David Shulkin, and named his personal physician, Rear Admiral Ronny Jackson, to replace him, red flags went up on Capitol Hill and among some veterans groups who oppose privatizing the V.A.

Indeed, in a parting shot to his detractors within the administration, Shulkin wrote an op-ed in the New York Times warning against forces inside the White House that want to privatize the entire agency.

The Hill:

In an op-ed published in the New York Times just hours after he was removed, Shulkin blamed his ouster on forces within the administration that he said are pushing hard for privatization[.]

"The advocates within the administration for privatizing V.A. health services ... saw me as an obstacle to privatization who had to be removed," Shulkin wrote.

Dismantling the department's health care system "is a terrible idea," Shulkin wrote, adding that the private sector "is ill-prepared to handle the number and complexity of patients that would come from closing or downsizing V.A. hospitals and clinics."

Groups like the Koch brothers-backed Concerned Veterans for America (CVA) are pushing to loosen current restrictions on veterans receiving private sector care.

Very few veterans groups want to eliminate the V.A. or downsize it. But it's a convenient red herring for liberal groups and Democrats in Congress to bash Trump:

"There is no effort underway to privatize VA, and to suggest otherwise is completely false and a red herring designed to distract and avoid honest debate on the real issues surrounding veterans' health care," the agency said in a statement.

Democrats and veterans' advocacy groups have been wary of Republican efforts to privatize the VA since before Trump took office.

In a 2016 campaign rally in Virginia Beach, Trump called the VA corrupt and inefficient.

"Veterans should be guaranteed the right to choose their doctor and clinics, whether at a VA facility or at a private medical center," Trump said. "We must extend this right to all veterans."

Senate Democrats and veterans groups have not yet drawn any hard lines in the sand [sic – a line in the sand...? –DJB] against Jackson, partly because they said they don't know what his positions are.

Verna Jones, the executive director of the American Legion, said she would have to sit down and speak with Jackson before passing judgment on his nomination.

"It seems like people are putting the cart before the horse. Jackson hasn't had a confirmation and none of us know his views," Jones said. "To be clear, the Legion opposes privatization. How all this ties into Jackson – we owe it to him to wait and see."

That's a rare sentiment in these partisan times. But Democrats will also look to diminish Jackson by claiming he is unqualified to lead such a large agency:

Jackson is an active-duty Navy admiral who has worked as the White House physician for three presidents. Lawmakers have expressed skepticism over whether Jackson, who doesn't have experience working with the VA or managing a health care organization, has the qualifications to run the agency.

Senate Democrats on the Veterans' Affairs Committee said they also don't know where Jackson stands on privatization. Still, they don't trust the administration's motives and are gearing up for a fight.

AT contributor Ed Timperlake, a former V.A. assistant secretary, weighed in on Jackson's qualifications:

The selection of Admiral Jackson is being attacked on the issue of his lack of significant command qualifications. In fact, Jackson's immediate experience will ultimately prove to be a boon for the VA. Navy doctors are trained professionals for big-deal thinking. I would never typecast a Navy doctor with the rank of Admiral as someone who doesn't understand how to take command of an organization the size of the VA.

As for privatization of the V.A., it's not going to happen. Every major veterans group is opposed to privatizing the agency, and most Republicans oppose it, too. But the scandals in recent years involving unacceptable wait times for veterans who need care have begun the process of much needed reforms that include some care being supplied in certain circumstances by the private health care industry. As Mr. Timperlake points out, there may be issues with timely payments by the government to private providers, which he recommends an agency-wide audit to discover. But with so many returning veterans from Iraq, Afghanistan, and other combat zones who have serious health issues, it seems that an expansion of choices for veterans is logical and necessary.

How this impacts Jackson's confirmation isn't clear, except that Democrats will seek any opportunity to damage the president, and the Jackson nomination is setting up to give them exactly what they want.

[Back to Top](#)

67 - Herald-Tribune (Creators Syndicate): [McCaughey: Marching orders for Trump's new VA secretary](#) (11 April, Betsy McCaughey, 871k uvm; Sarasota, FL)

Since President Donald Trump ousted Veterans Affairs Secretary David Shulkin, the question reverberating in Washington is whether Trump's new pick, Rear Adm. Ronny Jackson, is capable of heading a department with 360,000 employees and 9 million vets under its care.

Senate Democrats carp he lacks experience running “a complex organization.”

Experience is overrated. President Barack Obama’s VA Secretary, Robert McDonald, failed miserably, despite having run Procter & Gamble. Vets died on phony wait lists on McDonald’s watch.

Jackson’s last combat role was with a surgical shock trauma unit in Iraq. Sounds like good preparation for battling the killer VA bureaucracy.

Jackson also shares Trump’s vision of putting vets in the driver’s seat about their own medical care. Here’s what Jackson can learn from his predecessors’ failures.

Lesson 1: Make vets the priority, not protecting the VA bureaucracy. Shulkin refused to do that. Trump has pledged to fix the Veterans Choice Program so vets can see private doctors when they decide it’s necessary. VCP was created in 2014 after revelations that sick vets were dying on wait lists at VA hospitals. VCP is supposed to allow vets to get private care if they live far from a VA facility or have waited too long. But VCP’s red tape makes seeing an outside doctor almost impossible. That’s deliberate. Sen. Bernie Sanders, who co-authored VCP legislation, relies on union campaign contributions and will do just about anything to protect union jobs at the VA. Keeping vets trapped at the VA with no alternatives is a job-protection racket.

Shulkin was part of that racket, too. He misled Trump and Congress with double talk about reforming VCP “in a way that will work for veterans and work for VA.” But protecting VA bureaucracy shouldn’t be a consideration, when vets’ lives are at stake.

Shulkin showed his true colors when Congress passed last month’s big spending package. Trump and congressional Republicans had pushed hard to include VA reforms helping vets see outside doctors.

But the key person to sell this to Congress was Shulkin, and he equivocated, allowing Democrats to block its passage. It was a setback for Trump and vets. No wonder Shulkin was canned days later -- not because of flimsy travel expense abuse allegations.

Lesson 2: Cut wait times in half at the VA.

Shulkin claimed success in reducing waits, but that’s questionable. VA bureaucrats are still fudging the numbers, according to the inspector general.

Here’s a remedy. A whopping 47 percent of VA health care users are 65 or older. They need angioplasty and bypass surgery like other seniors. They use the VA to avoid Medicare’s out-of-pocket expenses, because their median annual income is only \$24,000. Picking up their co-pays would cost very little and encourage them to use Medicare instead of the VA Bingo, and it would cut VA wait times by nearly half, making room for younger vets to get combat-related care only the VA can provide.

Lesson 3: Don’t count on VA bureaucrats to fess up when things go wrong. Jackson should use unannounced audits to uncover dangerous conditions at medical facilities, instead of trusting officials to report them up the chain of command.

An inspector general report last month exposed “a breakdown of core services” at medical centers under Shulkin’s command. At the Washington, D.C., facility, under Shulkin’s nose,

patients were needlessly overexposed to anesthesia due to inventory mismanagement. After patients were put under, surgeons sometimes discovered they were out of equipment and had to race across the street to borrow it from another hospital or reschedule the procedure. Shulkin claims he could “not recall” ever being notified of such problems. He expected to be notified?

Pundits are predicting a confirmation battle. The smart money should be on Jackson. He’s combat-tested. Disregard the partisan drivel about his lack of experience running a big organization. It’s coming from the same people who had no problem making a community organizer the president.

[Back to Top](#)

68 - Fayetteville Observer: [Our View: Does VA nominee have the right stuff?](#) (11 April, Editorial Board, 439k uvm; Fayetteville, NC)

We hope Robert Wilkie enjoys the challenge of running the Department of Veterans Affairs, because he may have the job for a bit longer than his “acting secretary” title might indicate. Storm clouds are already gathering for President Trump’s nominee for the permanent position, Navy Rear Adm. Ronny Jackson.

Storm clouds, and rough seas, may be appropriate for the man whose unconventional route to the nomination was primarily hitting it off with the commander in chief while serving as his personal physician.

His path to becoming a flag officer certainly involved command responsibilities at times, and he’s by all descriptions an excellent physician, dedicated to medicine, and he clearly sees the need for providing great care for the nation’s veterans.

But we don’t see anything that prepares him to run the federal government’s second-largest bureaucracy, supervising more than 360,000 workers spread across the country in an unwieldy bureaucracy, providing health care and benefits to veterans.

Members of the Senate Committee on Veterans Affairs, which will hold hearings on his nomination, are keptical. That includes the committee’s Republican members. One of them, Sen. Jerry Moran of Kansas, told The Washington Post that, “The VA is a difficult place to manage, regardless of what your background experience is. I want to know more about how he believes that he’s capable of fulfilling those responsibilities and I have a wide array of questions in regard to his experience and background.” Moran added that, “I need to be convinced that he can make a difference at a department in which the culture and the upper echelons of its leadership need to have somebody who can take charge.”

That was the undoing of former VA Secretary David Shulkin, a physician with a resume that included running big hospital systems. Shulkin was the sole cabinet holdover from the Obama administration and as recently as last summer, the president said he was the last member of his cabinet who’d hear the Trump trademark, “You’re fired.” Six months later, that’s exactly what Shulkin heard after he was caught in the nasty crossfire of VA bureaucrats trying to thwart him, and of others determined to privatize many VA services. Shulkin stood with most national veterans groups in opposing privatization. But other high-ranking VA leaders succeeded in undermining him and it was clear that he was losing control of the organization.

Asked about his lack of large-scale management experience in a GateH Gouse Media interview, Jackson said, "I've been in leadership school for 23 years now. ... And I've been able to rise to the level of admiral, a flag officer in the Navy." Jackson added that, "You know, I'm not just an officer in the Navy; I'm an emergency medicine physician in the military. I've been confronted on a day-to-day basis with life-and-death decisions. I think I've got what it takes, and you know, I don't buy into that argument at all."

Maybe Jackson should talk with Ben Carson, the brilliant pediatric neurosurgeon who has had a rough first year trying to manage the Department of Housing and Urban Development. He's told several interviewers lately that brain surgery was a lot easier than what he's trying to do now.

Meanwhile, acting VA chief Wilkie, a Fayetteville native and veteran of military service and several management tours at the Defense Department, is settling in at VA headquarters. The Post reported that he sent out a video to all VA staffers, urging them to communicate openly. He emphasized the VA's mission of caring for our veterans. "Being with you today is the culmination of a lifetime of watching those who have borne the battle." We hope he's able to stay out of the management warfare that did in David Shulkin, but the battle over privatization is likely to continue. And the country needs a permanent VA secretary who can take control, lead the agency and solve its problems.

Peter is going to work on the list of VA employees in attendance so make more room for VSO's, but for the external list, lets start by adding:

(b) (6) CVA
(b) (6) Independence Fund
(b) (6), (b) (7)(C) White House Office of Public Liaison
(b) (6), (b) (7)(C) White House Domestic Policy Council

I'll let you know when we are final.

Thanks!

Rear Adm. Ronny Jackson News Clips

30 March 2018

1. Washington Post (AP): [Trump's VA pick draws concern over thin management record](#)

(29 March, Hope Yen and Calvin Woodward, 43.9M uvm; Washington, DC)

President Donald Trump's selection of his White House doctor to run the massive Department of Veterans Affairs triggered concern Thursday among lawmakers and veterans groups about whether he has the experience to manage an agency paralyzed over Trump's push to expand private care. Ronny Jackson, a Navy rear admiral entrusted with the health of the past three presidents, is a lifelong physician whose positions on privatizing operations in the second largest federal department...

(29 March, Louise Radnofsky and Peter Nicholas, 43.6M uvm; New York, NY)

Capitol Hill lawmakers reacted guardedly to President Donald Trump's nomination of the White House physician to head the Department of Veterans Affairs, with key members noting that they know little about him. Dr. Ronny Jackson, a U.S. Navy rear admiral who has served as a White House physician during the past three administrations, is slated to succeed Secretary David Shulkin, who was ousted Wednesday.

4. USA Today (Video): [6 big things the new Veterans Affairs chief will have to address](#)

(29 March, Donovan Slack and Dennis Wagner, 36.8M uvm; McLean, VA)

On the front lines at the Department of Veterans Affairs — in the agency's 1,240 hospitals and clinics — it doesn't much matter these days who holds the secretary's job in Washington. David Shulkin, who was fired Wednesday, was the third VA secretary in four years. If President Trump's nominee to lead the agency, physician and Navy Rear Adm. Ronny Jackson, is confirmed, he will be the fourth.

5. New York Times: [Veterans Affairs Shake-Up Stirs New Fears of Privatized Care](#)

(29 March, Nicholas Fandos, 30M uvm; New York, NY)

President Trump's dismissal of David J. Shulkin, the secretary of veterans affairs — and the nomination of a man with no known policy views to take his place — has brought renewed focus to an increasingly contentious debate over whether to give veterans the option of using the

VA-18-0457-A-001015

benefits they earned through military service to see private doctors rather than going to government hospitals and clinics.

6. Politico: [Trump's VA pick blindsides staff, deepens agency disarray - 'He's got a department that's in turmoil,' a former VA secretary said. 'It's in crisis.'](#) (29 March, Lorraine Woellert, Eliana Johnson and Connor O'Brien, 23.9M uvm; Arlington, VA)

The timing of President Donald Trump's announcement to name Rear Admiral Ronny Jackson to lead Veterans Affairs was a snap decision that surprised his own chief of staff and knocked the government's second-largest agency, already bedeviled by scandal, deeper into disarray. White House chief of staff John Kelly had spoken with David Shulkin by phone Wednesday morning, reassuring the now-former VA secretary that he wouldn't be fired by tweet that afternoon.

8. Daily KOS: [Trump replaces experienced hospital administrator with personal doc in fight to privatize the VA](#) (29 March, Mark Sumner, 19.1M uvm; Oakland, CA)

The replacement of Secretary of Veterans Affairs David Shulkin has two narratives in the media—that Shulkin “embarrassed” Donald Trump with a trip to Europe that included days of sightseeing, and that Shulkin “clashed” with other officials at the VA.

[Hyperlink to Above](#)

9. Task & Purpose: [What's In Store For The Next VA Chief? Let's Break It Down](#) (29 March, James Clark, 102k uvm; New York, NY)

It's been an awkwardly long time coming, but as of yesterday afternoon embattled Veterans Affairs secretary David Shulkin is out of a job. The news comes after a month and a half of uncertainty that began when a scathing inspector general report detailed “serious derelictions” in expensing a Europe trip last summer. And then there were all the accusations and counter accusations of political infighting and rumors of possible replacements — at least all that is over:

[Hyperlink to Above](#)

10. Washington Post: [Opinions - Surprise: Trump's newest Cabinet nominee has no relevant experience](#) (29 March, Eugene Robinson, 43.9M uvm; Washington, DC)

You can't make this stuff up: President Trump has announced he will nominate a medical doctor who has no discernible management experience to run the second-largest agency in the federal government. Can presidents be sued for malpractice? The man Trump has named to become secretary of veterans affairs, Ronny L. Jackson, happens to be the president's personal doctor.

[Hyperlink to Above](#)

11. Washington Post (The Fix): [Who is Trump's new Veterans Affairs pick, Ronny Jackson?](#) (29 March, Aaron Blake, 43.9M uvm; Washington, DC)

The seemingly never-ending parade of staff changes in the Trump administration continued apace Wednesday, with the president announcing that Veterans Affairs Secretary David Shulkin is out and that White House physician Ronny L. Jackson will replace him. Jackson's name will be familiar to political watchers across the country for one main reason: He's the physician who delivered what some felt to be a suspiciously rosy picture of Trump's health in January.

Full Text:

1. Washington Post (AP): [Trump's VA pick draws concern over thin management record](#) (29 March, Hope Yen and Calvin Woodward, 43.9M uvm; Washington, DC)

President Donald Trump's selection of his White House doctor to run the massive Department of Veterans Affairs triggered concern Thursday among lawmakers and veterans groups about whether he has the experience to manage an agency paralyzed over Trump's push to expand private care.

Ronny Jackson, a Navy rear admiral entrusted with the health of the past three presidents, is a lifelong physician whose positions on privatizing operations in the second largest federal department and addressing ballooning health care costs are unknown. First named to the top White House post by President Barack Obama, he would be new to running a big bureaucracy if given leadership over a department of 360,000 employees serving 9 million veterans.

In a statement, Trump praised Jackson as "highly trained and qualified." But representatives of veterans aren't sold on the choice, or on Trump's decision a day earlier to fire VA Secretary David Shulkin.

"There is little that we know about Dr. Ronny Jackson's vision and qualifications," said Paul Rieckhoff, founder and CEO of Iraq and Afghanistan Veterans of America. "Our concern is whether President Trump was more interested in picking a secretary who would be politically

loyal rather than someone who can work across the aisle to fix long standing problems of bureaucratic delay.”

Similar doubts were expressed by Veterans of Foreign Wars, which praised Jackson’s military background in a statement but pointed to a nominee biography devoid of “any experience working with the VA or with veterans, or managing any organization of size, much less one as multifaceted as the Department of Veterans Affairs.” AMVETS echoed such sentiments.

“We look forward to a rigorous confirmation hearing,” Rieckhoff said.

Montana Sen. Jon Tester, top Democrat on the panel that will consider the nomination, said he had yet to determine if Jackson “is up to the job.”

It’s not clear from Jackson’s military service record how much, if any, management experience he has. His military assignments did not appear to include supervision over a large department or unit. His Navy biography says he deployed to Iraq with a Marine unit and served as the emergency physician in charge of resuscitative medicine for a trauma platoon.

Jackson joined the White House medical team in 2006 and is perhaps best known for his appearance before the press corps in January, announcing the results of Trump’s first physical in a performance that showed he was quick-witted and unfailingly complimentary of Trump.

Marveling at the 71-year-old president’s good health, Jackson opined, “It’s just the way God made him.”

A White House official said Shulkin himself had recommended Jackson for an undersecretary position at the VA in the fall, and Trump ultimately decided he was more comfortable with Jackson than with other top candidates. The official was not authorized to discuss personnel matters and spoke on condition of anonymity.

If confirmed by the Senate, Jackson would face immediate crises, like a multi-billion dollar revamp of electronic medical records now in limbo that members of Congress fear will prove too costly and wasteful, and a budget shortfall in the coming weeks in its private-sector Veterans Choice program.

Trump is seeking an aggressive expansion of the Choice program to make it easier for veterans to see private doctors outside the VA system at government expense, but proposals are stalled in Congress following a failed effort last week.

“We’re going to have real choice,” Trump said in Ohio. “That’s why I made some changes, because I wasn’t happy with it.”

Jackson’s nomination comes as Trump’s new Cabinet nominees begin to pile up in the Senate. That is certain to stir weeks of confirmation battles this spring when senators, especially those running for re-election, may prefer to shift focus away from the changes at the White House.

None of the nominees, including the president’s new picks for secretary of state and CIA director, is expected to sail to easy confirmation. The GOP-led Senate is narrowly divided 51-49 and Democrats — and some Republicans — are preparing to ask tough questions. Even though Congress has an otherwise slim legislative agenda before campaign season, prolonged confirmation fights could jam up the Senate and influence the election.

Pending Jackson's confirmation, Robert Wilkie, a former Pentagon undersecretary for personnel and readiness, is serving as the acting head of the VA.

Lawmakers said they needed to learn more about Jackson's record.

Republican Sen. Johnny Isakson of Georgia, chairman of the Senate Veterans Affairs Committee that will review the nomination, declined to indicate his support. He stressed that he looked forward to "meeting Admiral Jackson and learning more about him." Isakson, a moderate, has expressed skepticism in the past toward nominees who expressed strong views in favor of privatization.

Sen. Bernie Sanders, independent of Vermont and a former chairman of the panel, cautioned that Jackson would not be approved if he supported privatizing the VA. "Our job is to strengthen the VA in order to provide high-quality care to our veterans, not dismember it," he said.

Shulkin, a physician and the lone Obama administration holdover in Trump's Cabinet, was unceremoniously fired late Wednesday by Trump in a tweet. Shulkin had enjoyed support from Trump for much of his first year in the administration but support eroded last month after a bruising ethics scandal and political infighting at VA.

Dan Caldwell, executive director of the conservative Concerned Veterans for America, said the group is keeping an "open mind" about Jackson's nomination. Some of the names that had been in circulation for the post had previous ties to the group, which supports giving veterans greater access to private doctors outside the VA system.

"We'd like to hear more about his positions to reform and fix the VA," Caldwell said. "He has a very distinguished service record and it would be unfair to outright dismiss him — you have to be very professional to reach his rank."

A native of Levelland, Texas, Jackson, 50, graduated from Texas A&M with a degree in marine biology, then from medical school at the University of Texas Medical Branch.

He headed to the Navy, then in 2005 joined a 2nd Marines regiment. Jackson was deployed to Iraq as the physician in charge of resuscitative medicine for a trauma platoon, according to the White House.

Ned Price, a National Security Council spokesman under Obama, described the doctor as "the guy you always want to be around" because he's affable and funny. But Price said it was difficult to believe the nomination was unrelated to the "glowing assessment" of Trump's health that the doctor had provided.

Associated Press writers Jill Colvin, Lisa Mascaro, Lolita Baldor, Zeke Miller, Jonathan Lemire, Catherine Lucey and Darlene Superville contributed to this report.

[Back to Top](#)

2. Washington Post: [Trump's pick to head veterans department faces skepticism over his experience](#) (29 March, Lisa Rein, Seung Min Kim, Emily Wax-Thibodeaux, and Josh Dawsey, 43.9M uvm; Washington, DC)

The White House was thrown on the defensive Thursday over President Trump's choice to lead the Department of Veterans -Affairs, forcing officials to fend off mounting skepticism that Ronny L. Jackson has the experience to run the government's second-largest agency.

Trump announced by tweet late Wednesday that the White House physician would succeed ousted secretary David Shulkin, surprising veterans groups and lawmakers, who were not notified beforehand and scrambled to learn the policy views of someone whose positions on the chronic challenges facing VA are unknown.

Jackson is a career naval officer who was an emergency trauma doctor in Iraq before spending the past 12 years as a White House physician. But his résumé lacks the type of management experience usually expected from the leader of an agency that employs 360,000 people, has a \$186 billion annual budget and is dedicated to serving the complex needs of the country's veterans.

"It's great that he served in Iraq and he's our generation. But it doesn't appear that he's had assignments that suggest he could take on the magnitude of this job, and this makes Jackson a -surprising pick," said Paul Rieckhoff, chief executive of Iraq and Afghanistan Veterans of America.

Jackson was taken aback by his nomination, said senior White House officials, who spoke on the condition of anonymity to discuss internal deliberations. After aides gauged his interest in recent days, he hesitated to take on such a big job. But the president continued to push and told his senior staff Monday that the doctor was his top choice. A senior White House official described an informal interview process, without the extensive vetting that typically accompanies a Cabinet selection.

Navy Rear Adm. Ronny L. Jackson, the lead White House doctor, said on Jan. 16 that President Trump's "overall health is excellent." (Bastien Inzaurrealde/The Washington Post)

"The President has full confidence in Dr. Jackson's abilities to give our veterans the care they've earned," spokesman Raj Shah said.

The White House planned to announce Wednesday that Shulkin would leave the administration and be replaced on an interim basis by Robert Wilkie, undersecretary for defense personnel and readiness at the Defense Department, until a nominee was found.

But Trump preempted the plan when he tweeted that he intended to nominate Jackson, administration officials said.

The active-duty rear admiral had been a behind-the-scenes figure while serving the past three administrations as a White House physician, but he moved into the spotlight in January when he delivered a glowing assessment of Trump's physical and mental health to reporters, which aides said endeared him to the president.

The White House on Thursday defended Trump's choice of Jackson, saying his hands-on experience as a doctor would serve him well as Veterans Affairs secretary.

“He knows what soldiers need on the battlefield and what they need when they come home as veterans,” deputy White House press secretary Lindsay Walters told reporters aboard Air Force One en route to Cleveland, where Trump delivered a speech on his infrastructure plan. “The president has full confidence in his pick and trusts he will be able to give veterans the care they deserve.”

Key congressional Republicans publicly took a cautious approach to the nomination.

“We are doing our homework on Dr. Jackson,” said Amanda Maddox, spokeswoman for Sen. Johnny Isakson (R-Ga.), chairman of the Senate Veterans’ Affairs Committee, which will hold Jackson’s nomination hearing. Trump called Isakson after announcing that he had picked the doctor to replace Shulkin, she said.

“His name was never floated around,” Maddox said, “so we are doing our due diligence.”

Trump’s decision to upend VA’s leadership comes as Senate Republicans were already worried about other potentially difficult nominations in the months leading up to midterm elections, when they want to focus their message on the recently passed tax cuts rather than deal with more upheaval in the administration.

“Any time Republicans are not selling the tax bill over the next seven months is a missed opportunity,” said GOP strategist Brian Walsh, a former spokesman for the National Republican Senatorial Committee. “I will say Senate Republicans are a little more insulated by the nature of the seats that are up. But there’s no question that these are unhelpful distractions.”

The stack of Trump nominees includes Gina Haspel, who was picked this month to be the director of the Central Intelligence Agency and is facing opposition from members of both parties because of her ties to the agency’s past use of brutal interrogation measures on terrorism suspects, which critics say amounted to torture.

Senate Republicans have told White House officials in recent days that the process of confirming CIA Director Mike Pompeo to replace Rex Tillerson as secretary of state is going to be challenging even though he is expected to be approved, according to two people briefed on the discussions. Democratic senators said privately when Pompeo was tapped to replace Tillerson that they expect far fewer Democrats to back him than the 14 who voted for him to lead the CIA.

Senior Senate Republicans have privately expressed frustration over the personnel battles that have raged since the beginning of Trump’s presidency and recently told the White House that they did not want to have to consider a series of nominees this year, according to aides and officials who have heard the complaints.

The move to dismiss Shulkin — as well as the lack of communication about Jackson — only fueled concerns on Capitol Hill that the administration was not doing enough to help Congress defend or even respond to the president’s rush of personnel changes.

Jackson’s policy views are unknown, particularly on the most pressing issue facing VA: how much access veterans should have to private doctors outside the system at government expense. Shulkin’s moderate views on the subject, which were at odds with many administration officials, helped end his tenure.

VA secretary is one of Washington's most unforgiving jobs even for someone with extensive management experience. Shulkin, also a physician, had run large hospital systems — including VA's — before taking the job. His predecessor, Robert McDonald, was a chief executive of Procter & Gamble. The secretary before him was a decorated retired Army general, Eric K. Shinseki, who was forced out after managers in the far-flung health system were found to have fudged waitlists for veterans' medical appointments.

As recently as February, Jackson was a candidate to run VA's health-care arm, the Veterans Health Administration, the country's largest health-care system, with 1,200 hospitals and medical clinics. On the day of his interview, he told a selection panel that the president was unwilling to let him leave his White House job, according to two people familiar with the discussion.

The panel interviewed him informally anyway, asking him how he would drive change in such a large organization but not about his views on policy. One person who sits on the panel, and who spoke on the condition of anonymity because its proceedings are confidential, said they didn't think Jackson had the requisite skills to transition from overseeing a team of about 20 doctors, nurses and physician assistants in the White House medical office to overseeing the health administration.

"I don't remember him coming in trying to convince us he had the experience to do the job. He did not inflate his qualifications," this person said. "The tone was, 'Maybe I don't have the same kind of experience as others who came before me in the job.'"

Jackson's former colleagues in the Obama White House, who have publicly praised him in the past, said his nomination caught them off guard as they swapped text messages to ask how an extremely likable but unlikely candidate could end up running VA in the Trump administration.

"I've seen him managing a staff of a couple dozen, which he did to perfection," said Ned Price, a National Security Council spokesman under Obama who recalled that he was treated by Jackson for a toe injury in the Philippines.

"But how that would translate to managing the second-largest department in federal government I have no idea," Price said. "He has competence and integrity. I don't think he's going to fly around the world first-class or be buying thousands of dollars in furniture. But can he run VA? Anyone's guess is as good as mine."

Colleagues described the schedule of the White House physician as grueling, with continual foreign and domestic travel, always at the president's side.

Some Democrats warned that if Jackson embraced the idea of privatizing more of VA's health coverage, his nomination would be met with stiff resistance.

"I will carefully review Dr. Jackson's qualifications to determine whether he has the best interests of our Veterans at heart or whether he, like many in the Trump administration, wants to push VA down the dangerous path of privatization," Sen. Tammy Duckworth (D-Ill.), a wounded Iraq veteran, said in a statement.

At the American Legion, the country's largest veterans organization, senior officials were putting together ideas to help Jackson acquaint himself with the agency and its challenges.

“He’s going to have a huge learning curve,” Executive Director Verna Jones said, “but we stand ready to assist and educate him.”

Robert Costa and Julie Tate contributed to this report.

3. Wall Street Journal: [Lawmakers Respond Cautiously to Little-Known VA Pick Ronny Jackson - Key senators on panel say they don’t know enough about White House doctor to form an opinion about his ability to lead a vast bureaucracy](#) (29 March, Louise Radnofsky and Peter Nicholas, 43.6M uvm; New York, NY)

Capitol Hill lawmakers reacted guardedly to President Donald Trump’s nomination of the White House physician to head the Department of Veterans Affairs, with key members noting that they know little about him.

Dr. Ronny Jackson, a U.S. Navy rear admiral who has served as a White House physician during the past three administrations, is slated to succeed Secretary David Shulkin, who was ousted Wednesday. Mr. Trump indicated on Thursday that he removed Dr. Shulkin because change at the agency was coming too slowly. The secretary had also been the subject of a travel-expenses scandal.

The lead Republican and Democratic senators who will decide whether to confirm Dr. Jackson said they didn’t yet know enough to form an opinion about his ability to lead a bureaucracy of 370,000 employees. The department, which is the second-biggest government agency, is also still recovering from a 2014 scandal in which employees were found to have falsified records to hide delays in patient care.

“I look forward to meeting Adm. Jackson and learning more about him,” said Sen. Johnny Isakson (R., Ga.), chairman of the Committee on Veterans’ Affairs, which will vote on confirmation.

Sen. Jon Tester of Montana, the top Democrat on the panel, offered a near-identical sentiment, adding that he is looking forward to “seeing if he is up to the job.”

Veterans service organizations and some other lawmakers have expressed skepticism about Dr. Jackson, raising concern over the propriety of an active-duty military officer holding a political appointment, and saying his biography showed scant experience at running a bureaucracy on the scale he would inherit.

“He’s more of a hands-on physician—not a lot of desk time in terms of administrative leadership,” said Rep. Mike Coffman (R., Colo.), a member of the House Veterans’ Affairs Committee who was among Dr. Shulkin’s harshest critics.

It’s unclear how Dr. Jackson would address the issue of his active military status, including whether he would seek to relinquish it before securing confirmation to the new job.

Dr. Jackson’s confirmation will come as senators are debating legislation that would increase veterans’ ability to seek non-government medical care. Congress is approaching an early June

deadline to agree to new funds for the existing system allowing some veterans to go outside the VA for care, or to create a new policy allowing all veterans to participate.

“I made some changes, because I wasn’t happy with the speed with which our veterans were taken care of,” Mr. Trump said Thursday in a speech in Ohio. “We want them to have choice so that they can run to a private doctor and take care of it.”

The White House informed Mr. Isakson’s committee of the leadership change in a courtesy call Wednesday; a timeline for proceeding with the nomination, or preliminary introduction meetings, wasn’t discussed, a spokeswoman said. Mr. Isakson and Dr. Jackson spoke by phone Thursday afternoon, in an informal introduction, the spokeswoman said.

Past and present White House officials have praised Dr. Jackson as a steady force, deft in caring for different presidents and cabinet members. They said they found him friendly, bright and knowledgeable about medicine, including on issues specifically affecting veterans.

“If you’re not calmly decisive, the job of White House physician ain’t for you,” said Paul Winfree, a former deputy director of Mr. Trump’s Domestic Policy Council.

Dr. Jackson has been sought out for management positions before, though on a significantly smaller scale. Toward the end of the Obama administration, he was invited to interview by the Cleveland Clinic for an international posting managing a handful of people because of his affability, versatility and experience with VIPs, a person familiar with the interview said.

The federal agency Dr. Jackson would inherit is notoriously riven with competing power centers, and has now churned through three secretaries in four years.

Dr. Shulkin came directly from a health-care management background into the Obama administration when he took over the VA. He stayed on for Mr. Trump and initially received high reviews. He lost credibility recently when the VA inspector general found that, during a trip to Europe, he improperly accepted Wimbledon tennis tickets, misspent thousands of dollars of taxpayer money on his wife’s airfare and improperly used a department employee as a “personal travel concierge.”

Dr. Shulkin denied wrongdoing. He repaid the \$4,312 cost of his wife’s airfare and then sent the U.S. Treasury a check equal to the amount of the tennis tickets.

Mr. Trump’s advisers had openly explored possible successors for Dr. Shulkin in recent weeks, including having conversations with potential candidates, people familiar with the matter had said.

Still, the nomination of Dr. Jackson stunned some White House aides, who hadn’t known the president was even considering his physician for the role.

It became clearer Thursday that Mr. Trump had been thinking about moving Dr. Jackson to the VA for months. Last fall, Dr. Shulkin recommended that Dr. Jackson take an undersecretary job at the department, a White House official said. At that time, Dr. Jackson and the president discussed plans for improving the VA—talks that set in motion the announcement on Thursday.

Lindsay Walters, a White House spokeswoman, on Thursday said the White House believed Dr. Jackson had “bipartisan respect.”

“The president did have some early individuals that he was looking at but continuously went back to Dr. Jackson to fulfill this role as VA secretary,” she added. “The president has full confidence in his pick and trusts he will be able to give veterans the care they deserve.”

Some lawmakers expressed dismay over the treatment and departure of Dr. Shulkin, which could linger into the new confirmation process. “By once again choosing chaos over consistent leadership, Donald Trump is hurting veterans around the country,” said Illinois Democratic Sen. Tammy Duckworth, who is a retired U.S. Army lieutenant colonel.

4. USA Today (Video): [6 big things the new Veterans Affairs chief will have to address](#) (29 March, Donovan Slack and Dennis Wagner, 36.8M uvm; McLean, VA)

On the front lines at the Department of Veterans Affairs — in the agency’s 1,240 hospitals and clinics — it doesn’t much matter these days who holds the secretary’s job in Washington.

David Shulkin, who was fired Wednesday, was the third VA secretary in four years. If President Trump’s nominee to lead the agency, physician and Navy Rear Adm. Ronny Jackson, is confirmed, he will be the fourth.

Each has sought to fix the department, laying out visions and priorities — Shulkin’s top priority was “access,” making sure veterans get appointments when they need them. His predecessor, former Procter and Gamble CEO Bob McDonald, focused on staffing, training and veteran-centered customer service.

But year after year, critical deficiencies remain and veterans are bearing the brunt of the failures. Here are some key, seemingly intractable shortfalls that continue to plague the system — and that Jackson will face if confirmed.

Veterans are still waiting

The furor over VA health care exploded in 2014 when whistle-blowers in Arizona divulged that thousands of patients were backlogged at the Phoenix veterans hospital, and some of them had died awaiting care. VA investigators soon determined that medical center administrators knew about the crisis, yet put out fraudulent wait-time data to collect bonus pay.

The problems weren’t just in Phoenix. A USA TODAY investigation in 2016 found supervisors instructed employees to falsify patient wait times at VA medical facilities in at least seven states. And employees at 40 VA medical facilities in 19 states and Puerto Rico regularly “zeroed out” veteran wait times.

A few weeks after Shulkin was sworn in last year, the VA inspector general released a report finding widespread inaccuracies in scheduling records at a dozen hospitals in North Carolina and Virginia. The records vastly understated how long veterans were waiting for appointments and prevented as many as 13,000 from getting VA-funded care in the private sector — an option they were entitled to if they waited longer than 30 days. At the time, Shulkin said the findings

were based on outdated rules and that he had instituted new regulations to prevent such problems in the future.

But just two weeks ago, another inspector general investigation found the problems continued.

Looking at 64 VA hospitals and clinics in a swath of states from Kentucky to Illinois, investigators found scheduling staff entered the wrong dates in the system in more than 5,000 cases. That masked how long veterans were actually waiting for specialty care and mental health appointments.

They estimated 2,500 of those waited longer than a month, but the scheduling system falsely showed only 1,300 waited that long. Even in the cases accurately reflected in the system, they concluded, most weren't offered the chance to get care in the private sector.

"VA data continues to be a high-risk area," wrote Larry Reinkemeyer, VA assistant inspector general for audits and evaluations.

Quality of care

The VA's lowest performing hospitals remained at the bottom of the pack on the agency's own internal quality measures for two years in a row.

The VA regularly scores its medical centers based on dozens of quality factors, including death and infection rates, instances of avoidable complications and wait times. The agency uses a five-star scale with one being the worst and five being the best.

The rankings compare VA hospitals against each other but the number of one-star hospitals is not constant. Medical centers in that bracket can be elevated to two stars based on quality-of-care factors.

Among the facilities who received only one star in both 2015 and 2016 were the VA hospital in Phoenix and another in Memphis, Tenn. One Memphis employee dubbed the facility a "house of horrors" when USA TODAY obtained internal documents revealing reported threats to patient safety soared in recent years from 700 to more than 1,000.

One veteran had to have his leg amputated after a VA provider there left a piece of plastic tubing in a critical blood vessel during a procedure.

On a number of patient safety factors, the VA overall on average scores better than the private sector on many key patient-safety measures, including instances of avoidable death, respiratory failure, and infection. But there are vast disparities among VA hospitals, according to VA data collected from October 2015 to March 2017.

The death rate for surgical patients with treatable complications ranged from zero at the VA hospital in Sacramento, Calif., to more than 20% in Miami; Columbia, Mo.; and Washington, D.C. In Long Beach, Calif., it was 29%. That's more than double the private sector average of 14%, according to Medicare data.

Bureaucratic breakdowns

In Washington, the VA inspector general issued a rare emergency report last year saying that patients were in imminent danger at the hospital. The facility had dirty sterile storage areas and was regularly running out of critical supplies needed for surgeries and other procedures, including patches to seal blood vessels and tubes for kidney dialysis.

Shulkin quickly removed the hospital director there and sent teams from headquarters to try to fix the problems. But an inspector general report released this month found that VA officials at every level — local, regional and national — knew about the problems for years but didn't fix them.

Investigators found “a culture of complacency and a sense of futility pervaded offices at multiple levels.”

“In interviews, leaders frequently abrogated individual responsibility and deflected blame to others,” the investigation report says. “Despite the many warnings and ongoing indicators of serious problems, leaders failed to engage in meaningful interventions of effective remediation.”

Morale at the agency has taken a beating amid the constant drumbeat of crises. Employees ranked it as the second to worst agency to work for among large departments last year. The only department scoring lower was Homeland Security.

The inspector general singled out frontline workers at the Washington hospital, saying they went to great lengths to make do and they may be the only reason no patients were actually harmed.

“The OIG did not find evidence of adverse clinical outcomes, a condition that is largely attributable to front-line care providers who were committed to providing the best possible care by borrowing supplies, improvising, or personally ensuring patients received what they needed,” the investigation report said.

Vetting failures

The VA has had persistent difficulties recruiting and keeping enough medical care providers to meet veterans needs.

In 2015, one in six critical VA jobs — intake workers, doctors, nurses and assistants — were unfilled, a USA TODAY investigation found. Though the agency has made headway, there are still shortfalls.

In some cases, that has created an incentive to hire medical care providers with problem records that may have prevented them from getting jobs in the private sector.

A VA hospital in Oklahoma knowingly hired a psychiatrist sanctioned for sexual misconduct who went on to sleep with a VA patient, according to internal documents obtained by USA TODAY. A Louisiana VA clinic hired a psychologist with felony convictions. The VA ended up firing him after they determined he was a “direct threat to others” and the VA’s mission.

The Iowa City VA hospital knowingly hired John Henry Schneider last year, a neurosurgeon who had racked up more than a dozen malpractice claims in two states and had his license revoked in one.

After USA TODAY revealed the case in December, the VA forced him out and discovered that conflicting VA policies allowed its hospitals to illegally hire doctors with revoked licenses for 15 years. Shulkin ordered the policies rewritten but with the current process, that could take up to two years.

In a report released Monday, the inspector general found vetting failures go beyond medical providers. Investigators determined that the VA did not conduct required background checks on more than 6,000 employees and managers failed to properly document and oversee background checks.

“As a result, VA cannot reliably attest to the suitability of its largest workforce, exposing veterans and employees to individuals who have not been properly vetted,” the report said. “Unless internal controls and data are improved, VA and the public lack assurance that VHA has a workforce suitable for serving our nation’s veterans.”

Hiding shoddy care

The agency has failed for years to ensure medical care providers found to have provided poor care are reported to state licensing boards or to a national database created to prevent them from crossing state lines and endangering other patients.

In one case in Maine revealed in a USA TODAY investigation, the VA found a podiatrist had harmed 88 patients but didn’t report him to the national database and took years to report him to state boards. By the time the VA told his patients, one of them, U.S. Army veteran April Wood, had decided to have her leg amputated after two failed surgeries by the podiatrist.

The investigation found VA hospitals also signed secret settlement deals with dozens of doctors, nurses and health care workers in recent years that included promises to conceal serious mistakes — from inappropriate relationships and breakdowns in supervision to dangerous medical errors — even after forcing them out of the VA.

In response to the story last fall, Shulkin required increasing vetting of future such deals and he ordered policies on reporting to state boards and the national database rewritten. Again, five months later, the new policies still are not in place and could take months or years more.

Politics

Jackson, Trump's pick to be the new secretary, has no experience running a huge government agency, and dealing with veterans’ health care challenges will require deft politics and bureaucratic acumen.

His predecessor, Shulkin, was ousted despite being well regarded in Congress and assured of job security by Trump.

Now, a White House physician and former Navy admiral faces not just a plethora of VA maladies, but partisan politics and special interests that bitterly disagree on the cures.

The most perilous and important controversy involves decisions on privatizing veterans’ healthcare.

Powerful unions and veteran service organizations, such as the American Legion, oppose a radical change, and they are supported by most Democrats on Capitol Hill. But Republicans and key advocacy groups, such as Concerned Veterans for America, are demanding a system that would let veterans decide whether they go to the VA for care, or get private treatment subsidized by the government.

On Thursday, Trump suggested that Shulkin was dismissed because he was not aggressive enough in promoting the private-care option.

The existing Choice Program, which ate up billions of dollars and had to be re-funded, promises to be even more expensive if expanded. And those costs already have included tens of millions of dollars in improper payments to contractors.

Veteran enrollment for healthcare has skyrocketed, and Congress continues to expand benefits for those already in the system, with care for Agent Orange victims and high-cost medications for hepatitis patients. Bringing in enough funding to meet that demand also requires political aplomb.

5. New York Times: [Veterans Affairs Shake-Up Stirs New Fears of Privatized Care](#) (29 March, Nicholas Fandos, 30M uvm; New York, NY)

President Trump's dismissal of David J. Shulkin, the secretary of veterans affairs — and the nomination of a man with no known policy views to take his place — has brought renewed focus to an increasingly contentious debate over whether to give veterans the option of using the benefits they earned through military service to see private doctors rather than going to government hospitals and clinics.

The issue, which has pitted almost every major veterans group against Concerned Veterans for America, an advocacy group funded by the billionaire conservative brothers Charles G. and David H. Koch, and its allies, has been at the center of months of intrigue at the sprawling Department of Veterans Affairs, which is charged with caring for the United States' 20 million veterans.

But Mr. Shulkin's departure and the abrupt elevation of Dr. Ronny L. Jackson, the White House physician, to the department's top job on Wednesday have raised new fears among Democrats and groups like the Veterans of Foreign Wars and the American Legion. They worry that the Trump administration will push for a major change in veterans' health care that they have bitterly opposed.

The groups say the end result would be disastrous, effectively bleeding to death a network of 1,700 hospitals and clinics that has taken decades to build.

Dr. Shulkin, who was dismissed Wednesday evening by presidential tweet, argued in an op-ed article in The New York Times and in a subsequent interview on Thursday that such radical restructuring of veterans' health care would not work.

He said that a middle path that he had tried to pursue — investing in the department's own health care system while offering veterans more, though not unfettered, access to private

doctors — had been rejected by Trump administration officials interested in rewarding private individuals and companies with a windfall in government money.

“They saw me as an obstacle to privatization who had to be removed,” he wrote in one of the most forceful statements offered yet by a fired Trump administration official.

Senior White House officials offered a different rationale for his firing that was based more on a damaging report about Dr. Shulkin’s use of government funds on a trip to Europe released last month than on a dispute over policy.

Lindsey Walters, a deputy White House press secretary, told reporters aboard Air Force One on Thursday that the nomination of Dr. Jackson should not be interpreted as a signal that Mr. Trump wants to privatize veterans’ health care.

But Mr. Trump seemed to renew those concerns just a short time later, promising in a speech in Ohio that he was going to ensure that veterans “have choice,” harkening back to a campaign promise to enact something like the Koch-backed plan.

The speculation on Thursday about a possible policy shift was mostly fed by the lack of information about Dr. Jackson, whose only prominent public statements have been about Mr. Trump’s health.

Veterans advocates are especially concerned that Dr. Jackson, a rear admiral in the Navy who has no real management or political experience in a large bureaucracy, will be pushed around or, worse, simply co-opted by officials in the administration set on drastically expanding private care.

“We don’t know what his agenda is. We don’t know what his views are,” said Verna L. Jones, the executive director of the American Legion. “No one has had an opportunity to talk to him.”

“Of course we are nervous,” she added.

Leaders of the older, congressionally chartered veterans groups like the Legion are not categorically opposed to easing restrictions on private care, particularly in cases where veterans are facing long wait times and subpar facilities. About 30 percent of veterans’ appointments are currently made with private health providers for those reasons.

But the groups prefer tweaking programs already in place while at the same time addressing the problems that made private care necessary.

John Hoellwarth, the communications director for Amvets, said he thought the first response of most veterans groups to Dr. Jackson was to search for him online.

Dr. Shulkin said that he had been friendly with Dr. Jackson for several years — both men also served in the Obama administration — and encouraged him to go through the interview process to lead the department’s health system this year. Still, he said that he thought concerns about Dr. Jackson’s résumé were justified.

“There is no question about it, but I can’t imagine any job that prepares you for this type of job,” Dr. Shulkin said.

By most accounts, Dr. Shulkin's rapid fall began as he increasingly butted heads with other Trump administration official over how to approach the expansion of private care. The officials — who included the department's press secretary and assistant secretary for communications — came to consider Dr. Shulkin as an obstacle and repeatedly tried to have him removed.

Many of those officials, several of whom have ties to the Concerned Veterans group, are still in the administration and are likely to have increased sway in the department. But the ultimate decision about the structure of the department's health care most likely resides on Capitol Hill, where lawmakers have been struggling for almost a year with the issue.

"I think that there was a miscalculation that if you could get rid of the secretary who is a moderate that things will fall in place, and I just don't think that is going to happen," Dr. Shulkin said.

Dan Caldwell, the executive director of Concerned Veterans for America, strenuously disputed Dr. Shulkin's analysis and said the secretary was using privatization as a "straw man" to distract from his own ethical lapses.

"The president has said he supports full V.A. choice," Mr. Caldwell said. "The president would not have selected Admiral Jackson if he did not believe he supports his full agenda."

Mr. Caldwell was referring to a damning report released in February by the department's inspector general that found "serious derelictions" related to a trip Dr. Shulkin took last year to Britain and Denmark. It concluded that he had spent much of the trip, which cost more than \$122,000, sightseeing and that he had improperly accepted Wimbledon tickets as a gift.

Dr. Shulkin has continued to deny any wrongdoing, and on Thursday blamed his political opponents in the department for the investigation itself.

"This is 100 percent about the politics and this is the way that people fight their battles in Washington rather than having intellectually honest discussions," he said.

The White House did not view it that way. Senior officials came to believe that Dr. Shulkin had misled them in the run-up to the report's release. His public declarations of innocence only further aggravated top officials, who felt he had too openly aired internal politics with news outlets and had repeatedly opened the White House to criticism.

The exact circumstances surrounding Dr. Shulkin's firing, and exactly how much the White House chief of staff, John F. Kelly, was aware of it, remained unclear.

One person with direct knowledge of the events said Dr. Shulkin had called Mr. Kelly around 10:30 a.m. Wednesday, asking if he were about to be fired. Mr. Kelly told that him he did not know, and that he would get back to him.

A White House official would not discuss the details of what took place, beyond saying that Mr. Kelly had called Dr. Shulkin to accept his resignation, and that the secretary gave it.

Dr. Shulkin declined to discuss the episode in detail, but said he did speak on the phone with Mr. Trump on Wednesday about the progress of various policy initiatives at the department and implied that his job status did not come up.

A few hours later, he was at home on the phone with his wife when she broke the news: the president had fired him in a tweet.

[Back to Top](#)

6. Politico: [Trump's VA pick blindsides staff, deepens agency disarray - 'He's got a department that's in turmoil,' a former VA secretary said. 'It's in crisis.'](#) (29 March, Lorraine Woellert, Eliana Johnson and Connor O'Brien, 23.9M uvm; Arlington, VA)

The timing of President Donald Trump's announcement to name Rear Admiral Ronny Jackson to lead Veterans Affairs was a snap decision that surprised his own chief of staff and knocked the government's second-largest agency, already bedeviled by scandal, deeper into disarray.

White House chief of staff John Kelly had spoken with David Shulkin by phone Wednesday morning, reassuring the now-former VA secretary that he wouldn't be fired by tweet that afternoon. Hours later, Kelly had to phone Shulkin again telling him plans had changed.

Trump declared Jackson's nomination on Twitter at 5:31 p.m. The tweet was big news — not just to the public, but to some senior aides, according to one White House official.

The chaos — by now a typical part of the president's management style — has for months upended Kelly's attempts to ensure that an unorthodox White House adheres to traditional processes. But while White House aides are left unpacking the day's events, the drama at the VA is just beginning.

Deputy Secretary Thomas Bowman, a Trump appointee who is the agency's No. 2, is widely expected to leave soon, either by choice or by force. Kelly and other aides wanted Bowman gone before Shulkin left to avoid installing the deputy at the helm, even temporarily. Bowman had pushed back on broad privatization efforts, leading Trump to berate him in an Oval Office meeting for his lack of loyalty.

Trump got around the Bowman problem by naming Robert Wilkie, an undersecretary at the Department of Defense, to the temporary job. A Capitol Hill veteran and member of Trump's transition team, Wilkie is a former senior adviser to Sen. Thom Tillis (R-N.C.), who supports expanding service members' access to private doctors.

"He's got a department that's in turmoil. It's in crisis. There's warfare there," said Anthony Principi, who led the agency under former President George W. Bush. "And you have an acting secretary who doesn't know the VA."

But if and when Bowman departs, Wilkie will be left with a shallow bench at an agency already paralyzed by political mistrust, some veterans' advocates say. The VA's health and benefit agencies — which administer tens of billions of dollars in health programs, pensions, survivor benefits and other forms of assistance to some 9 million service members — have been without Senate-confirmed officials since the Obama administration.

Veterans Affairs is the second-largest federal agency, behind only the Department of Defense, with 377,000 employees. And it has proven unwieldy even when led by highly decorated, experienced administrators such as Eric Shinseki, a retired four-star Army general who resigned during the Obama administration amid a scandal over lengthy wait times and faulty scheduling practices for medical appointments.

Shinseki was followed by Bob McDonald, an Army veteran and former Procter & Gamble CEO. Shulkin, McDonald's successor, was the first non-veteran to lead the VA.

As recently as two weeks ago, the Trump White House was still making overtures to potential candidates for the top job, according to a person with direct knowledge of the inquiries. Trump reportedly agonized over the decision, changing his mind several times, a senior administration official said.

"Instead of going through the paces to convince the best possible person to take this job, they're going with the person who's still on active duty in the Navy and can't say no to the commander in chief," said one Obama White House aide, who spoke highly of Jackson as a doctor and individual. "You could look at it as them giving up trying to find a competent commander or manager to fix the problems."

Shulkin had come under fire after a VA inspector general's report accused him of improperly accepting tickets to the Wimbledon tennis tournament and using his agency staff to arrange a sightseeing tour of Denmark and England. He repaid the VA for the trip. The longtime hospital administrator, who was engaged in open warfare with conservatives in the department intent on privatizing the VA, contended he was set up.

Veterans' groups remained loyal to Shulkin, whom they saw as their best line of defense of against privatization. During his campaign, Trump made promises that veterans would be allowed to seek medical treatment outside the VA's system, statements taken by some to mean a step toward handing the system to commercial companies to manage.

Jackson, while well-liked by both Republicans and Democrats, is a cipher on privatization and other policy issues. With no agency experience to speak of, veterans suspect he could be installed as a figurehead, leaving lower-level appointees to steer the agency toward privatization.

"He's a blank slate. Nobody knows really anything about his competency or capacity for this job," said Paul Rieckhoff, CEO of Iraq and Afghanistan Veterans of America. "We especially know that being a veteran doesn't qualify you to run the VA any more than being a soldier qualifies you to run the DoD."

Principi urged Jackson to move quickly on his own agenda.

"The new secretary, really, if he wants to accomplish anything, has to hit the deck running and has to bring in some very, very good people," he said. "I hope and pray he's a success. Because if he's not, American veterans are going to be the losers."

[Back to Top](#)

7. NPR (All Things Considered, Audio): [Departure Of VA Secretary Shulkin Doesn't End Debate Of Privatization](#) (29 March, 22M uvm; Washington, DC)

The departure of Veterans Affairs Secretary David Shulkin does not end the debate over how far the agency should privatize. Neither the president nor his nominee have given their views on the subject.

[Back to Top](#)

8. Daily KOS: [Trump replaces experienced hospital administrator with personal doc in fight to privatize the VA](#) (29 March, Mark Sumner, 19.1M uvm; Oakland, CA)

The replacement of Secretary of Veterans Affairs David Shulkin has two narratives in the media—that Shulkin “embarrassed” Donald Trump with a trip to Europe that included days of sightseeing, and that Shulkin “clashed” with other officials at the VA.

Despite the amount of play the first item has received in the press, and despite some completely justified criticisms of Shulkin’s efforts both slip his wife’s travel costs onto the VA’s dime and indulgence in gifts he should never have accepted, the idea that the he was pushed out over travel costs is clearly ludicrous. Scott Pruitt has engaged in far more lavish—and ridiculous—travel policies, hauling along a vast entourage on trips to Italy and Morocco, and the only thing his actions have earned from Trump is a suggestion that Pruitt may get a promotion to some other department ripe for wrecking. Besides, Trump isn’t capable of embarrassment.

And when the press reports that Shulkin butted heads with officials, what they really mean is that Shulkin was blocking appointees from Trump who were pushing to privatize the VA. Fast. The conflict was simple: Shulkin, the only hold-over in Trump’s cabinet from the Obama administration, was trying to maintain the VA as a viable system of health care for veterans. The Trump appointees that filled all the other VA slots, were actively working to to do to the VA what Pruitt has done to the EPA—destroy it. This morning, hours after his firing, Shulkin makes the case for preserving in the VA in the New York Times.

During my tenure at the department, we have accomplished a tremendous amount. We passed critical legislation that improved the appeals process for veterans seeking disability benefits, enacted a new G.I. Bill and helped ensure that we hire the right people to work at the department. ... We are now processing more disability claims and appeals than ever before and, for the first time, allowing veterans to see the status of their appeals by simply logging on to their accounts. ...

It seems that these successes within the department have intensified the ambitions of people who want to put V.A. health care in the hands of the private sector.

To replace Shulkin, an experienced hospital administer who previously oversaw Beth Israel Medical Center and was a pioneer in patient centered care, Trump has selected ... his personal physician. The one who says Trump is 6’3” and not obese.

The experience that the new head of the Department of Veterans Affairs has in running healthcare organizations appears to be limited to the running of himself. He finished medical school in 2004, and served a year in Iraq as an an emergency physician. From there he was appointed a White House physician in 2006, and has been there ever since.

A biography released by the White House shows Jackson is credentialed and experienced in medicine but has no background in management. He nonetheless will be charged with

delivering on one of Trump's signature campaign promises: to fix the federal government's second-largest bureaucracy.

His biggest achievement in the White House seems to be his pioneering work in patient-centered flattery.

"Some people have just great genes," Jackson said. "I told the president that if he had a healthier diet over the last 20 years, he might live to be 200 years old . . . He has incredibly good genes, and it's just the way God made him."

So when Trump begins a series of tweets against the Twenty-Second Amendment and planning his 2040 campaign, Jackson will be the person to blame.

But the biggest concern isn't that Jackson has no management experience. It's that he doesn't plan to manage at all. Instead, he's being put in place as a figurehead whose real purpose is to just stay out of the way of the forces that ultimately ran over Shulkin.

Until the past few months, veteran issues were dealt with in a largely bipartisan way. (My 100-0 Senate confirmation was perhaps the best evidence that the V.A. has been the exception to Washington's political polarization). Unfortunately, the department has become entangled in a brutal power struggle, with some political appointees choosing to promote their agendas instead of what's best for veterans. These individuals, who seek to privatize veteran health care as an alternative to government-run V.A. care, unfortunately fail to engage in realistic plans regarding who will care for the more than 9 million veterans who rely on the department for life-sustaining care.

But at least there will be someone there with the experience to flatter them wildly.

"He's very sharp, and he's very articulate when he speaks to me, and I've never known him to repeat himself around me," Jackson said. "I've found no reason whatsoever to think the president has any issues whatsoever with his thought process."

9. Task & Purpose: [What's In Store For The Next VA Chief? Let's Break It Down](#) (29 March, James Clark, 102k uvm; New York, NY)

It's been an awkwardly long time coming, but as of yesterday afternoon embattled Veterans Affairs secretary David Shulkin is out of a job. The news comes after a month and a half of uncertainty that began when a scathing inspector general report detailed "serious derelictions" in expensing a Europe trip last summer. And then there were all the accusations and counter accusations of political infighting and rumors of possible replacements — at least all that is over:

Rear Adm. Ronny Jackson, the president's appointed White House physician, who drew national attention when he complimented President Trump on his "incredibly good genes," has been tapped to lead the Department of Veterans Affairs — pending approval by the Senate. Given that this leadership post has been described as "one of the most difficult jobs in government" — which has stymied generals, CEOs and health care executives — we thought it was time to give you a rundown of what's in store for the next officeholder, by the numbers:

More than 1,243 health care facilities. These Veterans Health Administration facilities include 170 VA Medical Centers, and 1,063 outpatient sites — making it the largest health care system in the United States.

9,000,000 veterans.. That's the number who receive medical care from VA, and many of these patients are older and suffer from multiple traumas and injuries that require specialized care: amputations, traumatic brain injuries, post-traumatic stress disorder, military sexual trauma, and as of 2013, half of all VA patients suffer from chronic pain, to name just a few. And as many as 2 million patients receive in-facility care, according to an American Legion statement.

20,000,000 veterans in the United States... we think. There could be far more veterans than we realize, since an individual's military history isn't tracked by the census bureau, which is a concern since the VA relies on headcount of its target population to get a feel for the size and scope of the services it needs to provide.

\$10,000,000,000 contract for Electronic Health Records. A long-term plan to modernize the VA's health records system could be jeopardy, with Shulkin's dismissal coming just as the VA was set to finalize the acquisition of a new electronic health record system.

2nd largest federal agency. The only one bigger is the Department of Defense.

\$186,000,000,000 budget for fiscal year 2018.

360,000 employees spread across three separate administrations within the department; the Veterans Health Administration, Veterans Benefit Administration, and the National Cemetery Administration.

23 years active duty. Jackson's Navy career began in 1995, and includes postings as an instructor, diving medical officer, diving safety officer, from Panama City, Florida Sigonella, Italy, to Norfolk, Virginia. By 2005 he deployed to Taqaddum, Iraq as part of a Surgical Shock Trauma platoon.

3 presidents. While still in Iraq in 2006, Jackson was selected as a White House physician and served as the supervising physician for the Camp David Presidential Retreat under the George W. Bush administration. Later he led the White House Medical Unit as its director and was the appointed White House physician for Presidents Barack Obama and Donald Trump.

Soon to be 7 VA secretaries in 4 years. The department has been beset by turmoil and scandal. Eric Shinseki resigned from his post as VA chief following the 2014 wait-list scandal the department. Since then, the VA has gone through three sitting secretaries, and is on its third acting secretary, with Robert Wilkie, previously the Pentagon's undersecretary of personnel and readiness, now tasked as the interim chief until Shulkin's replacement is approved by the Senate.

[Back to Top](#)

10. Washington Post: [Opinions - Surprise: Trump's newest Cabinet nominee has no relevant experience](#) (29 March, Eugene Robinson, 43.9M uvm; Washington, DC)

You can't make this stuff up: President Trump has announced he will nominate a medical doctor who has no discernible management experience to run the second-largest agency in the federal government.

Can presidents be sued for malpractice?

The man Trump has named to become secretary of veterans affairs, Ronny L. Jackson , happens to be the president's personal doctor. More to the point, given Trump's perpetual hunger for sycophancy, is the fact that Jackson showered the president with hyperbolic Dear-Leader-style praise during a widely viewed television appearance in January.

Trump has "incredibly good genes," the White House physician said in describing a examination he had given the president. Trump's overall health is "excellent." His "cardiac assessment" put him "in the excellent range." If his diet were a bit better, "he might live to be 200 years old." In any event, "I think he will remain fit for duty for the remainder of this term and even for the remainder of another term if he's elected."

That is an unusual way to describe a 71-year-old man whose height was reported as a generous 6 feet 3 inches , and weight at an eyebrow-raising 239 pounds, which classifies him as overweight — but conveniently one pound short of obese. Jackson's are odd words characterizing a man whose cheeseburger-laden diet my doctor would describe as suicidal and whose coronary calcium scan results, according to many other physicians, indicate some degree of heart disease and a clearly elevated risk of heart attack.

I assume Jackson has been more, shall we say, plain-spoken with the president about his health than he was with the public. But am I suggesting that flattery, rather than merit, is what makes him Trump's choice to replace ousted VA Secretary David Shulkin? Absolutely, because no other explanation makes sense.

Pliability may also be playing a role. In a New York Times op-ed, Shulkin wrote that he believed he was being sacked because he opposed a push by the Trump administration "to put VA health care in the hands of the private sector."

Shulkin is a physician, but before he took over VA, he also had experience running hospitals. With no comparable administrative background, Jackson — if confirmed by the Senate — would take over a sprawling agency with about 360,000 employees, a \$186 billion budget and responsibility for providing medical care to 9 million veterans who deserve better, faster service than they now receive.

Shulkin was one of several high-ranking Trump appointees under fire for lavish spending on the taxpayers' dime. He was also a holdover from the Obama administration, and even though the job is perhaps the least partisan in the Cabinet , that prior association clashed with Trump's bratty determination to oppose everything President Barack Obama supported and support everything he opposed.

But Shulkin, by most accounts, had stabilized VA's vast system of hospitals and health clinics. What he refused to do was support the notion of privatizing veterans' health care — an idea pushed by some of the political appointees the White House had installed under him.

"I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans," Shulkin wrote in his Times op-

ed. "The private sector . . . is ill-prepared to handle the number and complexity of patients that would come from closing or downsizing VA hospitals and clinics, particularly when it comes to the mental health needs of people scarred by the horrors of war."

Shulkin wrote that "in recent months" the political environment in Washington had become "toxic, chaotic, disrespectful and subversive," making it impossible for him to do his job. "It should not be this hard to serve your country," he wrote.

But it should be hard to get a job running any organization as big, complex and vital as the Department of Veterans Affairs. Perhaps Jackson has an innate genius for management that awaits only the opportunity to flower. If not, Trump will be doing a grave disservice to men and women who are owed the nation's thanks and gratitude.

I can't say I'm surprised. Trump put neurosurgeon Ben Carson in charge of the Department of Housing and Urban Development, despite Carson having zero experience in housing policy. He put Betsy DeVos in charge of the Department of Education, despite her apparent unfamiliarity with actual schools. He put politician Rick Perry in charge of the Department of Energy, which Perry wanted to eliminate until he learned what the agency does.

Perry actually said that during his confirmation hearing. One doesn't know whether to laugh or cry.

[Back to Top](#)

11. Washington Post (The Fix): [Who is Trump's new Veterans Affairs pick, Ronny Jackson?](#) (29 March, Aaron Blake, 43.9M uvm; Washington, DC)

The seemingly never-ending parade of staff changes in the Trump administration continued apace Wednesday, with the president announcing that Veterans Affairs Secretary David Shulkin is out and that White House physician Ronny L. Jackson will replace him.

Jackson's name will be familiar to political watchers across the country for one main reason: He's the physician who delivered what some felt to be a suspiciously rosy picture of Trump's health in January. But he's an interesting pick for a whole host of other reasons.

For one, Jackson is something of a nonpartisan pick. Like Shulkin, he served in the Obama administration, where he was also President Barack Obama's White House physician. A native of Texas and a graduate of Texas A&M and University of Texas Medical Branch, he's a rear admiral in the U.S. Navy who has spent decades practicing medicine in the military. Jackson was nominated for a promotion to rear admiral (upper half) as recently as last week, which would give him his second star. According to his Navy biography, he was deployed to Iraq in the mid 2000s to head up an emergency medical unit tasked with resuscitating troops.

While there, he was chosen to join President George W. Bush's White House as a physician. In 2013, Obama promoted him to the top job in the West Wing. Trump elected to keep him on. In that role, Jackson oversees not just Trump's health, but also that of the first family and White House staff and guests. He mostly stayed behind the scenes but made headlines after treating a girl who got bit by one of the Obamas' dogs in January 2017.

Navy Rear Adm. Ronny L. Jackson, the lead White House doctor, said on Jan. 16 that President Trump's "overall health is excellent." (Bastien Inzaurrealde/The Washington Post)

Jackson reached his highest degree of notoriety in January, when he delivered a promised review of Trump's health. Trump, who at 70 was the oldest newly elected president ever, is known to eschew exercise and dine on fast food. There have also been persistent questions — especially among his critics — about his mental health. And Trump's medical reviews during the campaign were both ridiculously hyperbolic — claiming he would be the most healthy president ever — and omitted key pieces of information, including a hair-loss drug Trump takes.

Jackson's review played up a cognitive test Trump had passed that seeks out early signs of dementia and other kinds of mental deterioration. He said Trump had "incredible genes" and (seemingly) joked that if Trump's diet had been better he might live to be 200 years old. He denied Trump had heart disease even as the data suggested he might. He listed Trump's weight at 239 pounds, which left Trump exactly one pound shy of the definition of "obese" and spawned a whole host of dubious reactions. (Call it the "girther" movement.)

The whole thing earned Jackson a send-up during the cold open of "Saturday Night Live."

Despite the ridicule, members of the Obama administration vigorously defended Jackson as a patriot and an honest man.

If nothing else, Jackson's ascension seems to reinforce that the best way to get ahead in the Trump administration is to say nice things about him. Some defended Jackson's credentials, but that review will likely be a topic at his confirmation hearings.

Perhaps the main reason Jackson is a somewhat controversial pick, though, is his lack of management experience. VA has been a department beset by scandals in recent years — including before Shulkin — and has proved a logistical and bureaucratic nightmare. Jackson has headed up medical units in the White House and Iraq, but he has never dealt with anything close to the scale of what he's set to take on. It may be the toughest Cabinet job in the entire administration, in fact.

Trump, though, as he often does, has gone with a nontraditional pick who said things he liked on television.

[Back to Top](#)

12. FOX News: [Ronny Jackson picked by Trump to lead the VA: What to know about the president's physician](#) (29 March, Kaitlyn Schallhorn, 32.5M uvm; New York, NY)

President Trump gave Dr. Ronny Jackson a clean bill of health in March — to run the Department of Veterans Affairs.

A Navy rear admiral, Jackson is the president's personal physician who rose to prominence after he addressed the press from the White House briefing room in January to discuss Trump's health. While Jackson said the president needs to lose some weight, he said the physical exam he conducted showed overall that Trump was in good physical and mental health.

Trump fired Secretary David Shulkin on March 28, and Robert Wilkie is serving as interim secretary until Jackson is confirmed.

He has a marine biology degree

From Texas, Jackson, 50, graduated from Texas A&M University in 1991 with a degree in marine biology, according to his Navy biography. He graduated from the University of Texas Medical Branch with his medical degree in 1995.

That same year, Jackson joined the Portsmouth Naval Medical Center – located just outside Chesapeake, Virginia – which kicked off his active duty military career. It was there that he finished an internship in transitional medicine.

Later, he would return to the naval center to complete his residency in emergency medicine, graduating at the top of his class in 2004.

Jackson is a veteran

Jackson was deployed to Iraq after he joined the 2nd Marines in 2005, according to his Navy biography.

He served as the emergency medicine physician in charge of resuscitative medicine for a forward deployed Surgical Shock Trauma Platoon.

He's been a White House physician since Bush

While still in Iraq, Jackson was tapped as a White House physician in 2006. He has overseen the physicians for Camp David presidential retreats, led the White House Medical Unit and directed the executive health care for the Cabinet and senior staff members, according to his biography.

It was former President Barack Obama who selected Jackson to fill the position of physician to the president.

The Associated Press contributed to this report.

13. FOX News (Video): [John Brennan: Trump's nomination for VA secretary is 'terribly misguided'](#) (29 March, Nicole Darrah, 32.5M uvm; New York, NY)

Former CIA Director John Brennan once again took a shot at President Trump on Twitter Thursday, saying he believes the decision to nominate Adm. Ronny Jackson to run the Department of Veterans Affairs is "terribly misguided."

"I personally know and greatly respect Ronny Jackson....as a terrific doctor and Navy officer," Brennan tweeted. "However, he has neither the experience nor the credentials to run the very large and complex VA. This is a terribly misguided nomination that will hurt both a good man and our veterans."

Trump announced via Twitter Wednesday his intention to replace current VA Secretary David Shulkin with Jackson, a 50-year-old Navy rear admiral who has served as personal physician to the president since 2013, when he was appointed by former President Obama, after being tapped to serve as a White House doctor in 2006.

Jackson's also a veteran. He was deployed to Iraq after he joined the 2nd Marines in 2005, according to his Navy biography.

Jackson's nomination triggered some concern among lawmakers and veterans groups about his experience to manage a federal agency, but Trump praised the lifelong doctor as "highly trained and qualified."

Trump decided to oust Shulkin from his Cabinet after he served just over a year in office. An internal VA watchdog found last month that Shulkin improperly accepted Wimbledon tennis tickets and that his then-chief of staff had doctored emails to justify his wife traveling to Europe with him at taxpayer's expense.

The swipe from Brennan, now an analyst for NBC News and MSNBC, isn't the first he's made against Trump.

Just last week, he suggested that the Russians "may have something" against the president, and days prior to that in response to former FBI official Andrew McCabe's firing: "When the full extent of your venality, moral turpitude, and political corruption becomes known, you will take your rightful place as a disgraced demagogue in the dustbin of history."

Fox News' Kaitlyn Schallhorn and Elizabeth Llorente, along with The Associated Press, contributed to this report.

[Back to Top](#)

14. New York Times: [Op-ed - Ronny Jackson's Disturbing Lack of Independence](#) (29 March, Norman L. Eisen and Bandy X. Lee, 30M uvm; New York, NY)

In announcing Dr. Ronny Jackson, the White House physician, as his choice to be the new secretary for veterans affairs, President Trump has taken his latest misstep in what has been the worst presidential personnel process in modern history.

We take no pleasure in saying so, including because one of us (Mr. Eisen) worked with Dr. Jackson in the White House, was even treated by him, and can testify that he is a very capable physician. But that good opinion of Dr. Jackson, which was widely held in the Obama administration, by no means qualifies him to run one of the largest, most complex and troubled cabinet agencies in the federal government.

Indeed, the very affability of Dr. Jackson's approach when it comes to his current presidential patient is perhaps his greatest disqualification, followed closely by his lack of relevant management experience and the apparent absence of a normal pre-nomination personnel vetting.

Dr. Jackson's January examination of President Trump, and subsequent news conference, give us great pause because they evinced a disturbing lack of independence — one of the most

important qualities in a cabinet member. Dr. Jackson startled observers by not only finding the president healthy, but declaring he would remain so in the future. The doctor even looked into his crystal ball to predict good health for a second term, a pronouncement extending seven years into the future and so more fit for a fortuneteller than a scientist.

Some expert observers also felt Dr. Jackson may have understated the president's heart disease, and even fudged the president's height (his driver's license says 6 feet 2 inches; Dr. Jackson reported 6 feet 3 inches) because the lower number would have forced the doctor to admit his patient was obese. When asked why he had such glowing things to say about the president's health when Mr. Trump gorges on McDonalds, guzzles diet Coke, and seldom exercises, Dr. Jackson said: "Some people have just great genes. I told the president that if he had a healthier diet over the last 20 years, he might live to be 200 years old."

That is hardly the objectivity that America needs from its cabinet members. But Dr. Jackson's worst failing was his purported examination of the president's psychological fitness, resulting in his pronouncement that "the president is mentally very, very sharp." The examination came at a time when there was widespread public discussion about the president's mental state, driven by reporting about some of the president's startling behind-the-scenes behavior. The scrutiny was so intense that the president himself asked Dr. Jackson for testing.

But the test that Dr. Jackson administered was not fit for his conclusion. It was a short examination known as the Montreal Cognitive Assessment, which is generally used as a screen for Alzheimer's and similar symptoms. One of us (Dr. Lee) is a mental health professional who has expertise in these examinations, and would never have utilized this narrow test under these circumstances. It is the equivalent of pronouncing a patient cancer-free because she has a good complexion.

A full history should have been taken and a standardized battery of tests given, such as the Minnesota Multiphasic Personality Inventory. Among the other, more appropriate tests that should also have been considered are the Wisconsin Card Sorting Test, the California Verbal Learning Test and the Stroop Test. The MoCA examination was simply not sufficient under the circumstances to support Dr. Jackson's declaration that he had "absolutely no concerns" about the president's cognitive ability or neurological functions.

All of this matters because, if Dr. Jackson cannot be trusted to act independently when it comes to the president's mental and physical health, we cannot be confident that he will do so when it comes to the fitness of the Department of Veterans Affairs. The department has the sacred charge of repaying our soldiers for their service by providing them with health care and other support. If Dr. Jackson tells the president — and the country — what Mr. Trump wants to hear about his own health, how can we trust him to honestly and rigorously diagnose the ailments of the V.A., and to treat them appropriately?

Having a candid V.A. secretary is all the more important because the department faces profound challenges. Since 2014, it has dealt with a pattern of negligent treatment at hospitals operated by one of its agencies, the Veterans Health Administration. Outgoing Secretary David Shulkin revealed yesterday that he had fought Trump administration proposals to privatize services provided by the V.A. — a move that could undermine the quality of health care provided to our veterans. Dr. Jackson's treatment of the president does not inspire confidence that he will take on the V.A.'s problems with the brutal honesty that the job demands.

Dr. Jackson's nomination is also undermined by the fact that although he is a medical professional, he lacks the management experience that the job demands. The V.A. secretary is responsible for a department that provides health care services to over nine million individuals. While Dr. Jackson has served his country with distinction, both in Iraq and as the White House physician, managing a relatively small medical team is not preparation for leading a vast and sprawling bureaucracy. The V.A. is one of the most complex health care management jobs in the world, and ideally would be run by someone with experience operating hospital systems or health businesses or enterprises, and large ones.

The nomination fits a pattern of cronyism, with the president appointing those of dubious qualifications to patronage jobs across the administration. The president's former golf caddy is now the White House social media director. A contractor married to one of the Trump's former household staff members now has a job at the Environmental Protection Agency. And a longtime friend of the Trump family who has been involved in planning golf tournaments and Eric Trump's wedding is the head of the New York and New Jersey office of the Department of Housing and Urban Development. And now he has appointed his White House doctor to oversee the health care of millions of veterans.

Finally, in addition to concerns about independence and qualifications, it appears that Dr. Jackson had not undergone the normal vetting process for White House presidential personnel. Reportedly, the tweet-from-the-hip nomination of Dr. Jackson by the president surprised even his own advisers. That suggests that Dr. Jackson has not in fact received the careful review that is normally completed before such an announcement.

One of us worked (just down the hall from Dr. Jackson, actually) on vetting hundreds of senior administration officials. Very presentable and capable individuals — sometimes even those with existing security clearances — are sometimes disqualified by the rigorous personnel investigations that are normally undertaken for cabinet positions. Such cabinet-level vets complement but are more thorough than a typical pre-existing security clearance, and can uncover conflicts, misdeeds or other disqualifying information.

We are not suggesting that vetting will uncover anything improper, but caution is warranted, since many of Mr. Trump's nominees have had unprecedented conflicts and other issues.

Norman L. Eisen (@NormEisen) is a senior fellow at the Brookings Institution and was President Obama's ethics czar from 2009 to 2011. Bandy X.Lee is a forensic psychiatrist at the Yale School of Medicine and a project leader for the World Health Organization.

[Back to Top](#)

15. ABC News (Video): [Veterans groups respond cautiously to VA secretary nomination](#) (29 March, Sarah Kolinovsky, 24.2M uvm; New York, NY)

Despite his active duty status as a Navy rear admiral (lower half) and his medical experience, veterans service organizations are responding cautiously to the nomination of Dr. Ronny Jackson for secretary of Veterans Affairs, with some expressing concern about his lack of managerial experience or what his views are on reforming the VA.

Jackson has served as White House Physician in the past three administrations and in January gave President Donald Trump a glowing health review. Recently, Trump nominated Jackson to

receive a second star, promoting him to the rank of full rear admiral. Jackson has deployed to Iraq as an emergency medicine physician in charge of resuscitative medicine for a forward-deployed Surgical Shock Trauma Platoon.

Iraq and Afghanistan Veterans of America, an organization serving the post-9/11 generation of veterans, say it looks "forward to learning more about Dr. Ronny Jackson's vision and qualifications." The statement underscores the fact that Jackson lacks significant managerial experience as he is poised to lead the government's second largest agency, which cares for more than nine million veterans and has an annual budget of nearly \$200 billion.

"Nobody really knows who is he. Is he an empty vessel? Does he have strong views on privatization, or reforming the VA?" asked IAVA CEO and Founder Paul Rieckhoff during an appearance on CNN Thursday morning. "So the confirmation hearings are going to be really really important. The Senate, House, time for you guys to step up and grill this guy and find out if he is qualified to not only run the agency but care for our veterans in a time of war."

IAVA welcomed the news that "finally puts an end to weeks of painful speculation that was negatively impacting VA and veterans nationwide," referring to media reports that President Trump had lost confidence in Secretary Shulkin. IAVA pointed out that in a recent survey, only 24% of the organization's members approved of the job Shulkin was doing.

Veterans of Foreign Wars (VFW) echoed IAVA's hesitation about Jackson's experience. "The VFW will be closely monitoring the Senate confirmation process, because what Dr. Jackson's bio does not reflect is any experience working with the VA or with veterans, or managing any organization of size, much less one as multifaceted as the Department of Veterans Affairs," VFW Director of Communications Joe Davis said in a statement.

The conservative group Concerned Veterans for America expressed more optimism about the change, saying in a statement "We are hopeful that this change will end the recent distractions at the VA and put the focus back on advancing policy that will ensure veterans get the health care and other benefits they have earned. The Trump administration has made great progress over the last year reforming and fixing the VA, however, there is still much work to be done."

The American Legion declined to comment directly on Jackson's qualifications. Instead, the group highlighted their intention to work "directly with the President through this transition and going forward, and providing him an increased level of advice and feedback on the issues important to America's veterans."

16. The Atlantic: [The Doctor Who Suddenly Got Nine Million Patients - For a position that demands high-level policy expertise, President Trump appointed his personal physician, Ronny Jackson.](#) (29 March, James Hamblin, 23.9M uvm; Washington, DC)

Nine million veterans will soon be under the care of the emergency-physician rear admiral Ronny Jackson, pending confirmation of his appointment Wednesday to lead the U.S. Department of Veterans Affairs.

This seemingly mundane appointment—a doctor and naval officer with years of experience as White House physician under both Trump and Obama—is of great consequence. It comes at a

time when the VA is in need of a politically savvy expert on health-care administration, budgeting, and resource allocation, as the system is on the brink of major changes that bear on national security. The system has proven to require a leader who can thread multiple bureaucratic needles with his or her eyes closed. Jackson does not clearly fit this bill.

The VA is the second-largest federal department, overseeing 1,243 health-care facilities including 170 hospitals, which tend to be a ghostly network of dim, mid-century structures that bear the scars of serving as constant political battlefields. They tend to have bad food and no marble and bizarre gift shops that I've seen sell knives and cured meats. Yet VA hospitals seem to underscore the waste of the glitz of five-star-hospital-style academic medical centers. The system punches above its weight in the quality and safety of care it delivers compared to most of the private health-care industry.

While it is crucial to have experienced veterans and physicians in the upper echelons of a system like this, the work is mostly about politics and economics. Jackson is not an expert in policy, and he lacks work experience in health-care administration or management. His chief credential is that he is a physician. I'm also a physician, and—ask anyone—I'm wholly unqualified to lead a hospital system, much less to lead the one most crucial to our national security.

Even as a doctor, Jackson's judgment has been dubious at times. The press conference in January where he extolled President Trump's soundness of mind suggested allegiance to the president above the public or the profession: "I've found no reason whatsoever to think that the president has any issues whatsoever with his thought process," Jackson said, after having administered a 10-minute test for dementia in which the president was asked to do basic math, identify zoo animals, and draw a clock. (A useful and good test, the results of which were, I've argued, overstated in the context of widespread physician concern over the president's soundness of mind.)

Professional bearing intact, Jackson also said that the borderline-obese (BMI 29.9), 71-year-old president—who does not exercise and eats McDonald's to excess (Filet-o-Fish, no less) and is known for angry outbursts and drinks around 144 ounces of Diet Coke per day and barely sleeps—is in "very good health, excellent health." He speculated that the president would remain fit for service until the end of a second term and said he told Trump that "if he had a healthier diet over the last 20 years, he might live to be 200 years old."

As David Axelrod, former adviser to President Obama and now the director of the University of Chicago Institute of Politics, responded publicly to the appointment: "Dr. Jackson is a good and honorable person, [a] fine doctor and career military, but you do get the sense that this [appointment] has as much to do with his boffo press conference on the president's physical [exam] as anything else."

Trump has become known for proximity-based, loyalty-based promotions made with apparent haste. Jackson may simply have been the only doctor in Trump's field of view. With doctors Oz and Phil being televisually obligated, and Harold Bornstein all the way up in New York ... who else is there?

Though if the move was deliberate to a policy end, it was a savvy move from the perspective of those who would like to see the VA privatized. There has been a creeping movement to privatize elements of the VA system, backed by the Koch brothers, among others. At a policy

level, the concept is worthy of consideration and debate. Some experts argue that certain elements being privatized could improve quality and decrease costs.

But that doesn't seem to be what's happening. The outgoing VA secretary David Shulkin made this clear on Thursday in an op-ed in The New York Times. He argued that some public-private cooperation had been fruitful: "We have expanded access to health care by reducing wait times, increasing productivity, and working more closely with the private sector." But he also warned that the push toward complete privatization was not being undertaken in good faith. Shulkin writes:

It seems that these successes within the department have intensified the ambitions of people who want to put VA health care in the hands of the private sector. I believe differences in philosophy deserve robust debate, and solutions should be determined based on the merits of the arguments. The advocates within the administration for privatizing VA health services, however, reject this approach. They saw me as an obstacle to privatization who had to be removed. That is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans.

With Shulkin out of the way, the next secretary of the VA would need to approach the job with strong moral bearing and willingness to resist political expedience for the sake of improving the system. Without this force, special interests could sway the system toward privatization at a cost to taxpayers and veterans.

18. NPR (All Things Considered, Audio): [How Veteran Groups Are Reacting To The Departure Of VA Secretary Shulkin](#) (29 March, 22M uvm; Washington, DC)

Garry Augustine, executive director of Disabled American Veterans, speaks with NPR's Audie Cornish about how veteran groups are responding to the the news of VA Secretary David Shulkin's firing.

[Back to Top](#)

19. The Hill: [White House: Trump has 'full confidence' in presidential physician to lead VA](#) (29 March, Max Greenwood, 11.9M uvm; Washington, DC)

President Trump has "full confidence" in White House physician Ronny Jackson's ability to head the Veterans Affairs (VA) Department, a spokeswoman for the White House said Thursday, despite reported concerns from some aides.

"As I said earlier, the president has full confidence in Adm. Jackson," White House deputy press secretary Lindsay Walters told reporters.

"The president did have some early individuals that he was looking at but continuously went back to Dr. Jackson to fulfill this role as VA secretary and ultimately decided that his health care experience, his distinguished career in the medical profession, was something that would be beneficial at the VA," she continued.

"At the end of the day, as I said earlier, the status quo was not working. We need somebody who understands the health care system," she said.

Trump continued a spate of shake-ups in his Cabinet on Wednesday by dismissing VA Secretary David Shulkin and tapping Jackson, a rear admiral in the Navy and the current White House physician, for the role.

The New York Times reported Wednesday that some White House aides had privately expressed concern about the decision to nominate Jackson for the VA's top job, because of his lack of experience managing a large organization.

At the same time, some aides acknowledged that Trump's relationship with Jackson carried more weight in making the decision than the physician's prior experience, the Times reported. Jackson gave Trump his first physical in office earlier this year.

Walters told reporters Thursday that Jackson "has bipartisan respect" in Congress, and said his experience in the Navy gives him an insight into "what soldiers need on the battlefield and what they need when they come home as veterans."

She also said the decision to oust Shulkin and nominate Jackson was in no way part of an effort to privatize veterans' health care, as Shulkin had implied in an op-ed he wrote the day after his ouster.

20. The Hill: [GOP, vet groups react with caution to Trump VA pick](#) (29 March, Rebecca Kheel, 11.9M uvm; Washington, DC)

Senators and influential veterans groups are withholding judgment on President Trump's pick to lead the Department of Veterans Affairs (VA), a Navy doctor with no experience leading a federal bureaucracy.

Both the Republican chairman and the Democratic ranking member of the Senate Veterans Affairs Committee said only that they look forward to meeting Rear Adm. Ronny Jackson. Several veterans groups expressed some concern about Jackson's qualifications, but did not immediately oppose him, saying that questions need to be answered during the confirmation process.

"We look forward to understanding more about the qualifications of Admiral Ronny L. Jackson, MD to helm the VA during this critical time," Carl Blake, executive director of Paralyzed Veterans of America, said in a statement. "The VA has a broad mission and the secretary must be someone who is eminently qualified to lead the nation's second largest cabinet agency."

On Wednesday night, Trump announced on Twitter that he'd tapped Jackson to replace David Shulkin, who fell out of the president's good graces after turmoil over the direction of private health care for veterans and a scathing inspector general report accusing him of misusing taxpayer dollars on a trip to Europe.

Shulkin's firing was expected, but Jackson was not among the names circulating as possible replacements.

Statements from lawmakers and veterans groups poured in Wednesday night, heavily praising Shulkin for his service at the department.

When it came to Jackson, though, the statements were generally shorter and more neutral.

"I look forward to meeting Admiral Jackson and learning more about him," Senate Veterans Affairs Chairman Johnny Isakson (R-Ga.) said in a statement.

In a separate statement, committee ranking member Sen. Jon Tester (D-Mont.) likewise said he looks "forward to meeting Admiral Jackson soon and seeing if he is up to the job."

Jackson was first thrust into the public spotlight when he gave Trump a clean bill of health in January during a lengthy and unusual press briefing at the White House.

Jackson told reporters that a cognitive test showed "no reason whatsoever to think the president has any issues whatsoever with his thought processes." He also proclaimed Trump's "overall health is excellent," crediting the president's "good genes" despite a well-known penchant for fast food and lack of exercise.

Jackson has served as a White House physician since 2006 and was promoted by former President Obama in 2013 to become the physician to the president.

Just last week, Trump nominated Jackson for a promotion in rank from rear admiral (lower half) to rear admiral. Jackson is expected to retire from active duty if confirmed.

A Texas native who received his doctorate of medicine from the University of Texas Medical Branch, Jackson started his naval career in 1995 at the Portsmouth Naval Medical Center in Virginia, according to his Navy biography.

In 2005, Jackson deployed as part of the Surgical Shock Trauma Platoon in Taqaddum, Iraq. There, he served as the emergency physician in charge of resuscitative medicine.

His bio lists several awards, including the Defense Superior Service Medal, the Legion of Merit, the Navy/Marine Corps Commendation Medal and the Navy/Marine Corps Achievement Medal.

But it makes no mention of any work on veterans issues.

Still, the White House says Trump has “full confidence” in Jackson, adding he believes the department needs someone who understands health care.

If confirmed, Jackson would take the helm at the government’s second largest bureaucracy at a time when the VA is still regaining trust after a 2014 scandal over long and falsified wait times for veterans seeking health care.

In addition to overseeing 1,700 health-care sites serving almost 9 million veterans annually, the doctor would be in charge of benefits delivery, 360,000 employees and a nearly \$200-billion budget.

Jackson would also come in during a raging debate over legislation to expand a program known as Choice that provides private health care to some veterans -- a concern seen as central to Shulkin’s undoing.

At issue is how much to expand the program. Veterans groups and Democrats fear the White House wants to essentially privatize veterans health care, which they warn would not be able to address the unique challenges veterans face.

Jackson’s position on the issue is unknown, though the White House said Thursday in response to accusations made by Shulkin that “there are no discussions about privatizing” the VA.

Veterans service organizations, which are congressionally chartered and hold substantial sway over veterans issues in Congress, raised questions about Jackson’s qualifications.

AMVETS listed several questions for Jackson, including how someone who’s never held a command is qualified to lead a massive bureaucracy and what his qualifications are to address issues outside of health care including claims, appeals, benefits and cemetery affairs.

“I am deeply concerned about the nominee,” AMVETS Executive Director Joe Chenelly said in a statement. “Veterans’ lives depend on this decision, and the Trump administration needs to substantiate that this active-duty Navy officer is qualified to run a \$200 billion bureaucracy, the second largest agency in the government.”

Disabled American Veterans (DAV) said they look forward to “learning more about the qualifications and views” of Jackson and expressed concern about a leadership vacuum.

“At a time of critical negotiations over the future of veterans healthcare reform, VA today has no secretary, no under secretary of health or benefits, and the named acting secretary has no background in health care and no apparent experience working in or with the department,” DAV Commander Delphine Metcalf-Foster said in a statement, referring to acting Secretary Robert Wilkie, who comes from the Pentagon.

“We certainly expect the next secretary to continue the path set by VA, Congress and veterans organizations in recent years to strengthen the VA healthcare system while ensuring that all enrolled veterans have timely access to quality care, whenever and wherever they need it.”

Still, Vietnam Veterans of America (VVA) said Jackson will understand veterans’ needs.

"We are pleased that he is a combat veteran with firsthand knowledge of the trauma of war, and as such, will understand what our veterans need," VVA National President John Rowan said in a statement.

VA secretaries typically receive strong bipartisan support in their confirmation. Shulkin was confirmed unanimously, as was his predecessor Bob McDonald. The secretary before that, Eric Shinseki, was confirmed by voice vote.

Nominees only need a simple majority to be confirmed. But Republicans only have a two-seat advantage over Democrats in the Senate, and one Republican, Sen. John McCain (Ariz.), has not voted in months as he receives cancer treatment in his home state.

Republicans on the Senate Veterans Affairs Committee appeared inclined to support Jackson.

"I look forward to working with Dr. Ronny Jackson on modernizing and reforming the VA, fixing the VA Choice Program, and implementing the major reforms that Congress has passed over the last year," Sen. Thom Tillis (R-N.C.) said in a statement.

Sen. Jerry Moran (R-Kan.), who in January accused Shulkin of "double-talk" in negotiating on Choice, said the VA secretary needs to focus on changing the department's bureaucracy.

"Rear Admiral Jackson has a career in service and I look forward to discussing his plans for the VA to make certain veterans receive access to care they deserve," Moran said in a statement.

Committee Democrats, meanwhile, promised close scrutiny of Jackson's qualifications and his position on privatization.

"I will seriously scrutinize the president's nominee, Ronny Jackson, because our nation's veterans deserve the best," Sen. Richard Blumenthal (D-Conn.) said in a statement.

Sen. Bernie Sanders (I-Vt.), who caucuses with Democrats, was more blunt.

"The Senate Committee on Veterans Affairs should not approve any nominee for secretary who supports the privatization of the VA," he said in a statement.

[Back to Top](#)

21. Military.com: [Others Considered for VA Job Before Trump Picked His Personal Doctor](#) (29 March, Richard Sisk, 9M uvm; San Francisco, CA)

Rear Adm. Ronny L. Jackson, the personal physician to President Donald Trump, was not his first choice to replace fired VA Secretary Dr. David Shulkin, the White House said Thursday.

"The president did have some early individuals that he was looking at but continuously went back to Dr. Jackson to fulfill this role as VA secretary," White House deputy press secretary Lindsay Walters told reporters.

She said Trump "ultimately decided that his [Jackson's] health care experience, his distinguished career in the medical profession, was something that would be beneficial at the VA."

Walters added that Trump "has full confidence in Admiral Jackson" to fulfill the demanding job at the Department of Veterans Affairs despite his lack of experience in running large organizations.

Walters did not name the others who were considered to head the VA, but they reportedly included Toby Cosgrove, former head of the \$8 billion Cleveland Clinic health care system, and Pete Hegseth, an Army National Guard veteran of Iraq, former head of the advocacy group Concerned Veterans of America and co-host of the weekend "Fox & Friends" program.

Cosgrove, a Vietnam veteran, was among those invited in 2016 to Trump's Mar-a-Lago estate in Florida to be interviewed for the VA post before Trump settled on Shulkin, a holdover from the Obama administration.

Others who were under consideration as VA secretary included former Rep. Jeff Miller, R-Florida, who had been chairman of the House Veterans Affairs Committee; retired Army Lt. Gen. Keith Kellogg; Michael Kussman, a former VA undersecretary of health; and Leo Mackay Jr., a former VA deputy secretary who is now senior vice president at Lockheed Martin Corp., The Associated Press reported.

The surprise announcement of his nomination Wednesday afternoon, his status as a relative unknown on Capitol Hill, and the ongoing turmoil at the VA indicate Jackson will have little in the way of a honeymoon period if he is confirmed by the Senate.

Shulkin wasn't even out the door when Jackson faced a barrage of conflicting demands from the White House, Congress and the major Veterans Service Organizations (VSOs).

The immediate concern is the upcoming decision by the VA to award a contract that could run up to \$10 billion and is aimed at finally giving the agency electronic health records. There are also the perennial disagreements on what to do about benefits, wait times, suicides, PTSD, corruption, caregivers and the crumbling infrastructure at VA hospitals.

However, at the top of Jackson's to-do list is reaching a final resolution on the extension and expansion of the Veterans Choice Program, which allows vets to opt for private health care.

Proponents, including Trump, see Choice as guaranteeing that vets get the best health care available; opponents, including the VSOs, see overreliance on Choice as threatening the core mission of VA as the primary provider and payer for the care of nine million vets annually.

In leaving, Shulkin sidestepped the scandal over his travel expenses. He portrayed himself as the victim of palace intrigues hatched by White House political appointees advocating the full "privatization" of VA health care.

In an op-ed for The New York Times, Shulkin wrote that the political appointees, at the White House and within the VA, "saw me as an obstacle to privatization who had to be removed."

"That is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans," he said.

In testimony to the House Veterans Affairs Committee earlier this month, Shulkin warned that the Choice program could run out of money as early as June.

Sen. Johnny Isakson, R-Georgia, chairman of the Senate Veterans Affairs Committee, had co-sponsored a bill that would have extended Choice while keeping the decision on whether vets could go to private doctors within the VA, but the bill was not included in the \$1.3 billion omnibus spending package signed by Trump last week.

Isakson has pledged to renew his efforts on Choice when Congress returns after the Easter recess. In a statement Thursday, he also hinted at the conflicts with the White House by heaping praise on Shulkin and pointing to improvements at the VA in the past year.

Shulkin "has made a tremendous impact toward improving the lives of veterans," Isakson said. "He has been instrumental in all that we have accomplished in the last year, and I thank Dr. Shulkin for his dedicated service to our country and our veterans."

As for Jackson's nomination, Isakson said, "I look forward to meeting Admiral Jackson and learning more about him."

If confirmed by the Senate, Jackson, who has little administrative experience and none in running an organization such as the VA, could be expected to rely on the insider knowledge of the No. 2 at the agency, Deputy VA Secretary Thomas Bowman. The VA, the largest healthcare system in the United States, has 370,000 employees and a budget of nearly \$200 billion.

However, Bowman, a retired Marine colonel and military attorney, has already been targeted for removal by Jake Leinenkugel, a former brewery company executive and now a senior White House adviser on veterans issues.

In December, Leinenkugel wrote in an email to Camilo Sandoval, a political appointee at the VA, that they should lobby for the ousters of both Shulkin and Bowman. The email was first reported by The Washington Post and later obtained by Military.com.

Isakson and the VSOs came to the defense of Bowman, a long-time former staffer on the Senate Veterans Affairs Committee.

"Tom Bowman is a veteran and a patriot, a public servant and a good man," Isakson said in a statement. "If this is true, it will be a mistake, and I am deeply disappointed in the president. Veterans will suffer because of this decision if it's true."

The VSOs have partly blamed the moves against Shulkin and Bowman, and the efforts at privatization, on the work of the advocacy group Concerned Veterans for America, which is funded by the conservative Koch brothers organization.

In a statement, CVA's executive director, Dan Caldwell, said that Shulkin "made significant headway in reforming the department, but ultimately became a distraction from the important task of improving health care for our veterans."

Without mentioning Choice, Caldwell said, "Congress needs to continue work with the president to pass legislation that will give veterans more health care options and better access to care through the VA."

In a statement, Sen. John McCain, R-Arizona, chairman of the Senate Armed Services Committee, said of Choice that "much more work remains to improve the Veterans Choice Program and ensure our nation's heroes have access to the best possible services."

"Let me be very clear: none of us committed to reform wants to privatize care. We simply believe the VA must put the needs of veterans first, and ensure they receive timely, quality and uncompromised health care, whether that's in the VA or in the community," McCain said.

Sen. Jack Reed, D-Rhode Island, ranking member of the Senate Armed Services Committee, said, "I admire Dr. Jackson's service to the nation, but I don't know if he is the right person to lead the VA.

"One thing is clear -- the Trump administration seems to devolve further into turmoil by the day," Reed said. "I hope the level of dysfunction that has engulfed other parts of the administration does not impact the care that our veterans receive."

[Back to Top](#)

22. Government Executive: [Lawmakers, Veterans Groups and Former Officials Worry VA Nominee Is Not 'Up to the Job'](#) (29 March, Eric Katz, 870k uvm; Washington, DC)

With David Shulkin now ousted from the Veterans Affairs Department, all eyes are on President Trump's nominated replacement to see where he comes down on the most pressing issue at VA: How large a role should the private sector play in providing health care to veterans?

One problem for observers and stakeholders in the veteran community is Trump's pick, Dr. Ronny Jackson, has very little experience in public policy or veterans issues. Veterans service organizations and lawmakers were effusive in their praise of Shulkin, while expressing disappointment in his firing and noting the new relationships they would have to now forge.

"I don't know if he ever set foot in a VA [facility]," Louis Celli, the national VA director at American Legion, a group that represents more than 2 million veterans, said of Jackson. By the time the secretary designate is fully able to understand all the issues facing the department, Celli said, "this administration could be over."

As VA secretary, Jackson would be responsible for managing 370,000 employees spread across 3,000 facilities. Administering veterans disability benefits, education subsidies and cemeteries number among the department's dozens of lines of business. Still, its responsibility to provide health care to veterans is by far its biggest operation—the Veterans Health Administration runs the largest hospital network in the country—and is what led Jackson, a physician, to get the job.

Trump "ultimately decided that his health care experience, his distinguished career in the medical profession was something that would be beneficial at the VA," Lindsay Walters, a White House spokeswoman, told reporters Thursday. "At the end of the day . . . the status quo was not working. We need somebody who understands the health care system."

While Jackson has served as White House physician since 2006 and the president's personal doctor since 2013, his background is atypical for VA secretaries. While Shulkin was the first to helm the department without himself being a veteran, he had served at VA as an undersecretary as head of the Veterans Health Administration. He had previously led multiple private medical centers and health systems. His predecessor was Bob McDonald, who came from the private sector but whose nomination was met with plaudits because of his experience leading the

Fortune 50 company Proctor & Gamble. McDonald replaced Eric Shinseki, who had previously served as chief of staff of the Army.

In a New York Times op-ed published after his firing, Shulkin warned that his political enemies from within the Trump administration pushed him out not due to the scandals surrounding him but because of ideological differences about the future of VA.

"I have been falsely accused of things by people who wanted me out of the way," Shulkin said. "But despite these politically based attacks on me and my family's character, I am proud of my record and know that I acted with the utmost integrity. Unfortunately, none of that mattered."

Shulkin added that the environment surrounding him became "so toxic, chaotic, disrespectful and subversive" that he could no longer accomplish his job. He said his opponents within the department, whom he repeatedly vowed to oust, were fighting to privatize VA health care and saw him as a barrier in achieving that goal.

"They saw me as an obstacle to privatization who had to be removed," Shulkin said. "That is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans."

Opponents of privatization, including Shulkin, nearly all veterans service organizations and key lawmakers on both sides of the aisle on Capitol Hill, could breathe at least a momentary sigh of relief when Trump announced Jackson as his nominee to be the next VA secretary. Jackson is in many ways an unknown, but is not associated with any previous push to minimize the government's role in providing veterans health care as were some of the other candidates Trump was reportedly considering.

"I am deeply concerned about the nominee," said Joe Chenelly, executive director of AMVETS, another congressionally chartered veterans service organization. "Veterans' lives depend on this decision, and the Trump administration needs to substantiate that this active-duty Navy officer is qualified to run a \$200 billion bureaucracy, the second largest agency in the government."

AMVETS added it was pleased Jackson had a medical background, but noted VA is "more than healthcare."

"What qualifications does the president's nominee have to address claims, appeals, benefits and cemetery affairs?" the group asked.

Celli noted that even McDonald, a veteran who came to the department with vast managerial experience, took a while to fully "wrap his arms around the entire mission of what VA was" and was therefore only able to make a significant impact in two or three areas of VA's operation.

President Obama was wise to recognize he needed a veteran who had also run a large company with a big budget and many employees, much like VA itself, McDonald told Government Executive.

"That intersection is very small and I think [Obama] recognized that," McDonald said. "While Adm. Ronny must be a great doctor, the question the Senate will need to address is does he have sufficient management experience."

Even Shulkin seemed to suggest the job requires a large learning curve.

"No one is naturally prepared to take on a task like this," Shulkin told NPR on Thursday. Jackson would not be met with political leadership at the department to help guide him through the ins and outs of its medical network, as Trump has yet to nominate an undersecretary to head VHA.

"Given the state of the VA today, the most important thing is the leadership experience of a very large organization," McDonald said. Having medical experience would only be the third top priority, McDonald said, after being a veteran.

Several groups expressed concern over the fate of reforms VA had already initiated under Shulkin. The now former secretary was in the process of realigning the department's regions, or Veterans Integrated Service Networks, and the larger structure of the department. He had worked with oversight committees in Congress on a proposal to consolidate existing programs giving veterans access to private sector care on the government's dime and easing veterans access to such programs, while maintaining a tight balance with those who tend to have a knee-jerk reaction against any reform that could be construed as VA privatization. The existing Veterans Choice Program is expected to run out of funding this summer. He had won approval for his plan to shutter underutilized facilities and had already help shepherd measures to expedite firing of problematic employees and reform the disability appeals process through Congress and into law.

"I have enjoyed getting to know Secretary Shulkin, and I'm glad to call David a friend," said Rep. Phil Roe, R-Tenn., who chairs the House Veterans Affairs Committee. "I think he's done a fantastic job and I hate to see him go."

Roe pledged to work with Jackson and build "a strong relationship with him also." Roe's counterparts in the Senate made clear they would not automatically grant their approval, as will be necessary for his confirmation.

"I look forward to meeting Admiral Jackson and learning more about him," Sen. Johnny Isakson, chairman of the Senate VA committee, said after praising Shulkin for the "tremendous impact" he made during his tenure.

Sen. Jon Tester, D-Mont., was even more non-committal.

"Moving forward, the VA needs a strong leader at the top who will listen to veterans, strengthen the VA and work with Congress to implement bipartisan reform," Tester said. "I look forward to meeting Rear Adm. Jackson soon and seeing if he is up to the job."

McDonald suggested Trump's selection could mark a departure from the path on which he and Shulkin put the department, which the former secretary said he formulated after hundreds of visits around the country to listen to VA beneficiaries.

"Veterans don't want the privatization of the VA," McDonald. "I hope President Trump is listening to veterans."

The American Legion's Celli speculated that Trump's choice of Jackson was a matter of happenstance rather than qualification. His selection was not as "draconian" as he and many had feared, Celli said, but it still appeared as if Jackson got the nod because he was "someone with military experience who [Trump] just happened to know." Celli was at least pleased that

Jackson's demeanor and medical abilities were "above reproach," but said he would still have to prove himself beyond that to earn the support of the veteran community.

"Great, he's a nice guy," Celli said. "There's a lot of nice guys out there."

Rear Adm. Ronny Jackson News Clips

30 March 2018

1. Washington Post (AP): [Trump's VA pick draws concern over thin management record](#)

(29 March, Hope Yen and Calvin Woodward, 43.9M uvm; Washington, DC)

President Donald Trump's selection of his White House doctor to run the massive Department of Veterans Affairs triggered concern Thursday among lawmakers and veterans groups about whether he has the experience to manage an agency paralyzed over Trump's push to expand private care. Ronny Jackson, a Navy rear admiral entrusted with the health of the past three presidents, is a lifelong physician whose positions on privatizing operations in the second largest federal department...

2. Washington Post: [Trump's pick to head veterans department faces skepticism over his experience](#)

(29 March, Lisa Rein, Seung Min Kim, Emily Wax-Thibodeaux, and Josh Dawsey, 43.9M uvm; Washington, DC)

The White House was thrown on the defensive Thursday over President Trump's choice to lead the Department of Veterans Affairs, forcing officials to fend off mounting skepticism that Ronny L. Jackson has the experience to run the government's second-largest agency. Trump announced by tweet late Wednesday that the White House physician would succeed ousted secretary David Shulkin, surprising veterans groups and lawmakers...

3. Wall Street Journal: [Lawmakers Respond Cautiously to Little-Known VA Pick Ronny Jackson - Key senators on panel say they don't know enough about White House doctor to form an opinion about his ability to lead a vast bureaucracy](#)

(29 March, Louise Radnofsky and Peter Nicholas, 43.6M uvm; New York, NY)

Capitol Hill lawmakers reacted guardedly to President Donald Trump's nomination of the White House physician to head the Department of Veterans Affairs, with key members noting that they know little about him. Dr. Ronny Jackson, a U.S. Navy rear admiral who has served as a White House physician during the past three administrations, is slated to succeed Secretary David Shulkin, who was ousted Wednesday.

[Hyperlink to Above](#)

4. USA Today (Video): [6 big things the new Veterans Affairs chief will have to address](#)

(29 March, Donovan Slack and Dennis Wagner, 36.8M uvm; McLean, VA)

On the front lines at the Department of Veterans Affairs — in the agency's 1,240 hospitals and clinics — it doesn't much matter these days who holds the secretary's job in Washington. David Shulkin, who was fired Wednesday, was the third VA secretary in four years. If President Trump's nominee to lead the agency, physician and Navy Rear Adm. Ronny Jackson, is confirmed, he will be the fourth.

[Hyperlink to Above](#)

5. New York Times: [Veterans Affairs Shake-Up Stirs New Fears of Privatized Care](#)

(29 March, Nicholas Fandos, 30M uvm; New York, NY)

President Trump's dismissal of David J. Shulkin, the secretary of veterans affairs — and the nomination of a man with no known policy views to take his place — has brought renewed focus to an increasingly contentious debate over whether to give veterans the option of using the

VA-18-0457-A-001061

benefits they earned through military service to see private doctors rather than going to government hospitals and clinics.

[Hyperlink to Above](#)

6. Politico: [Trump's VA pick blindsides staff, deepens agency disarray - 'He's got a department that's in turmoil,' a former VA secretary said. 'It's in crisis.'](#) (29 March, Lorraine Woellert, Eliana Johnson and Connor O'Brien, 23.9M uvm; Arlington, VA)

The timing of President Donald Trump's announcement to name Rear Admiral Ronny Jackson to lead Veterans Affairs was a snap decision that surprised his own chief of staff and knocked the government's second-largest agency, already bedeviled by scandal, deeper into disarray. White House chief of staff John Kelly had spoken with David Shulkin by phone Wednesday morning, reassuring the now-former VA secretary that he wouldn't be fired by tweet that afternoon.

[Hyperlink to Above](#)

7. NPR (All Things Considered, Audio): [Departure Of VA Secretary Shulkin Doesn't End Debate Of Privatization](#) (29 March, 22M uvm; Washington, DC)

The departure of Veterans Affairs Secretary David Shulkin does not end the debate over how far the agency should privatize. Neither the president nor his nominee have given their views on the subject.

[Hyperlink to Above](#)

8. Daily KOS: [Trump replaces experienced hospital administrator with personal doc in fight to privatize the VA](#) (29 March, Mark Sumner, 19.1M uvm; Oakland, CA)

The replacement of Secretary of Veterans Affairs David Shulkin has two narratives in the media—that Shulkin “embarrassed” Donald Trump with a trip to Europe that included days of sightseeing, and that Shulkin “clashed” with other officials at the VA.

[Hyperlink to Above](#)

9. Task & Purpose: [What's In Store For The Next VA Chief? Let's Break It Down](#) (29 March, James Clark, 102k uvm; New York, NY)

It's been an awkwardly long time coming, but as of yesterday afternoon embattled Veterans Affairs secretary David Shulkin is out of a job. The news comes after a month and a half of uncertainty that began when a scathing inspector general report detailed “serious derelictions” in expensing a Europe trip last summer. And then there were all the accusations and counter accusations of political infighting and rumors of possible replacements — at least all that is over:

[Hyperlink to Above](#)

10. Washington Post: [Opinions - Surprise: Trump's newest Cabinet nominee has no relevant experience](#) (29 March, Eugene Robinson, 43.9M uvm; Washington, DC)

You can't make this stuff up: President Trump has announced he will nominate a medical doctor who has no discernible management experience to run the second-largest agency in the federal government. Can presidents be sued for malpractice? The man Trump has named to become secretary of veterans affairs, Ronny L. Jackson, happens to be the president's personal doctor.

[Hyperlink to Above](#)

11. Washington Post (The Fix): [Who is Trump's new Veterans Affairs pick, Ronny Jackson?](#) (29 March, Aaron Blake, 43.9M uvm; Washington, DC)

The seemingly never-ending parade of staff changes in the Trump administration continued apace Wednesday, with the president announcing that Veterans Affairs Secretary David Shulkin is out and that White House physician Ronny L. Jackson will replace him. Jackson's name will be familiar to political watchers across the country for one main reason: He's the physician who delivered what some felt to be a suspiciously rosy picture of Trump's health in January.

[Hyperlink to Above](#)

12. FOX News: [Ronny Jackson picked by Trump to lead the VA: What to know about the president's physician](#) (29 March, Kaitlyn Schallhorn, 32.5M uvm; New York, NY)

President Trump gave Dr. Ronny Jackson a clean bill of health in March – to run the Department of Veterans Affairs. A Navy rear admiral, Jackson is the president's personal physician who rose to prominence after he addressed the press from the White House briefing room in January to discuss Trump's health.

Former CIA Director John Brennan once again took a shot at President Trump on Twitter Thursday, saying he believes the decision to nominate Adm. Ronny Jackson to run the Department of Veterans Affairs is "terribly misguided." "I personally know and greatly respect Ronny Jackson....as a terrific doctor and Navy officer," Brennan tweeted. "However, he has neither the experience nor the credentials to run the very large and complex VA.

1. Washington Post (AP): [Trump's VA pick draws concern over thin management record](#) (29 March, Hope Yen and Calvin Woodward, 43.9M uvm; Washington, DC)

President Donald Trump's selection of his White House doctor to run the massive Department of Veterans Affairs triggered concern Thursday among lawmakers and veterans groups about whether he has the experience to manage an agency paralyzed over Trump's push to expand private care.

Ronny Jackson, a Navy rear admiral entrusted with the health of the past three presidents, is a lifelong physician whose positions on privatizing operations in the second largest federal department and addressing ballooning health care costs are unknown. First named to the top White House post by President Barack Obama, he would be new to running a big bureaucracy if given leadership over a department of 360,000 employees serving 9 million veterans.

In a statement, Trump praised Jackson as "highly trained and qualified." But representatives of veterans aren't sold on the choice, or on Trump's decision a day earlier to fire VA Secretary David Shulkin.

"There is little that we know about Dr. Ronny Jackson's vision and qualifications," said Paul Rieckhoff, founder and CEO of Iraq and Afghanistan Veterans of America. "Our concern is whether President Trump was more interested in picking a secretary who would be politically

loyal rather than someone who can work across the aisle to fix long standing problems of bureaucratic delay.”

Similar doubts were expressed by Veterans of Foreign Wars, which praised Jackson’s military background in a statement but pointed to a nominee biography devoid of “any experience working with the VA or with veterans, or managing any organization of size, much less one as multifaceted as the Department of Veterans Affairs.” AMVETS echoed such sentiments.

“We look forward to a rigorous confirmation hearing,” Rieckhoff said.

Montana Sen. Jon Tester, top Democrat on the panel that will consider the nomination, said he had yet to determine if Jackson “is up to the job.”

It’s not clear from Jackson’s military service record how much, if any, management experience he has. His military assignments did not appear to include supervision over a large department or unit. His Navy biography says he deployed to Iraq with a Marine unit and served as the emergency physician in charge of resuscitative medicine for a trauma platoon.

Jackson joined the White House medical team in 2006 and is perhaps best known for his appearance before the press corps in January, announcing the results of Trump’s first physical in a performance that showed he was quick-witted and unfailingly complimentary of Trump.

Marveling at the 71-year-old president’s good health, Jackson opined, “It’s just the way God made him.”

A White House official said Shulkin himself had recommended Jackson for an undersecretary position at the VA in the fall, and Trump ultimately decided he was more comfortable with Jackson than with other top candidates. The official was not authorized to discuss personnel matters and spoke on condition of anonymity.

If confirmed by the Senate, Jackson would face immediate crises, like a multi-billion dollar revamp of electronic medical records now in limbo that members of Congress fear will prove too costly and wasteful, and a budget shortfall in the coming weeks in its private-sector Veterans Choice program.

Trump is seeking an aggressive expansion of the Choice program to make it easier for veterans to see private doctors outside the VA system at government expense, but proposals are stalled in Congress following a failed effort last week.

“We’re going to have real choice,” Trump said in Ohio. “That’s why I made some changes, because I wasn’t happy with it.”

Jackson’s nomination comes as Trump’s new Cabinet nominees begin to pile up in the Senate. That is certain to stir weeks of confirmation battles this spring when senators, especially those running for re-election, may prefer to shift focus away from the changes at the White House.

None of the nominees, including the president’s new picks for secretary of state and CIA director, is expected to sail to easy confirmation. The GOP-led Senate is narrowly divided 51-49 and Democrats — and some Republicans — are preparing to ask tough questions. Even though Congress has an otherwise slim legislative agenda before campaign season, prolonged confirmation fights could jam up the Senate and influence the election.

Pending Jackson's confirmation, Robert Wilkie, a former Pentagon undersecretary for personnel and readiness, is serving as the acting head of the VA.

Lawmakers said they needed to learn more about Jackson's record.

Republican Sen. Johnny Isakson of Georgia, chairman of the Senate Veterans Affairs Committee that will review the nomination, declined to indicate his support. He stressed that he looked forward to "meeting Admiral Jackson and learning more about him." Isakson, a moderate, has expressed skepticism in the past toward nominees who expressed strong views in favor of privatization.

Sen. Bernie Sanders, independent of Vermont and a former chairman of the panel, cautioned that Jackson would not be approved if he supported privatizing the VA. "Our job is to strengthen the VA in order to provide high-quality care to our veterans, not dismember it," he said.

Shulkin, a physician and the lone Obama administration holdover in Trump's Cabinet, was unceremoniously fired late Wednesday by Trump in a tweet. Shulkin had enjoyed support from Trump for much of his first year in the administration but support eroded last month after a bruising ethics scandal and political infighting at VA.

Dan Caldwell, executive director of the conservative Concerned Veterans for America, said the group is keeping an "open mind" about Jackson's nomination. Some of the names that had been in circulation for the post had previous ties to the group, which supports giving veterans greater access to private doctors outside the VA system.

"We'd like to hear more about his positions to reform and fix the VA," Caldwell said. "He has a very distinguished service record and it would be unfair to outright dismiss him — you have to be very professional to reach his rank."

A native of Levelland, Texas, Jackson, 50, graduated from Texas A&M with a degree in marine biology, then from medical school at the University of Texas Medical Branch.

He headed to the Navy, then in 2005 joined a 2nd Marines regiment. Jackson was deployed to Iraq as the physician in charge of resuscitative medicine for a trauma platoon, according to the White House.

Ned Price, a National Security Council spokesman under Obama, described the doctor as "the guy you always want to be around" because he's affable and funny. But Price said it was difficult to believe the nomination was unrelated to the "glowing assessment" of Trump's health that the doctor had provided.

2. Washington Post: [Trump's pick to head veterans department faces skepticism over his experience](#) (29 March, Lisa Rein, Seung Min Kim, Emily Wax-Thibodeaux, and Josh Dawsey, 43.9M uvm; Washington, DC)

The White House was thrown on the defensive Thursday over President Trump's choice to lead the Department of Veterans -Affairs, forcing officials to fend off mounting skepticism that Ronny L. Jackson has the experience to run the government's second-largest agency.

Trump announced by tweet late Wednesday that the White House physician would succeed ousted secretary David Shulkin, surprising veterans groups and lawmakers, who were not notified beforehand and scrambled to learn the policy views of someone whose positions on the chronic challenges facing VA are unknown.

Jackson is a career naval officer who was an emergency trauma doctor in Iraq before spending the past 12 years as a White House physician. But his résumé lacks the type of management experience usually expected from the leader of an agency that employs 360,000 people, has a \$186 billion annual budget and is dedicated to serving the complex needs of the country's veterans.

"It's great that he served in Iraq and he's our generation. But it doesn't appear that he's had assignments that suggest he could take on the magnitude of this job, and this makes Jackson a -surprising pick," said Paul Rieckhoff, chief executive of Iraq and Afghanistan Veterans of America.

Jackson was taken aback by his nomination, said senior White House officials, who spoke on the condition of anonymity to discuss internal deliberations. After aides gauged his interest in recent days, he hesitated to take on such a big job. But the president continued to push and told his senior staff Monday that the doctor was his top choice. A senior White House official described an informal interview process, without the extensive vetting that typically accompanies a Cabinet selection.

Navy Rear Adm. Ronny L. Jackson, the lead White House doctor, said on Jan. 16 that President Trump's "overall health is excellent." (Bastien Inzaurrealde/The Washington Post)

"The President has full confidence in Dr. Jackson's abilities to give our veterans the care they've earned," spokesman Raj Shah said.

The White House planned to announce Wednesday that Shulkin would leave the administration and be replaced on an interim basis by Robert Wilkie, undersecretary for defense personnel and readiness at the Defense Department, until a nominee was found.

But Trump preempted the plan when he tweeted that he intended to nominate Jackson, administration officials said.

The active-duty rear admiral had been a behind-the-scenes figure while serving the past three administrations as a White House physician, but he moved into the spotlight in January when he delivered a glowing assessment of Trump's physical and mental health to reporters, which aides said endeared him to the president.

The White House on Thursday defended Trump's choice of Jackson, saying his hands-on experience as a doctor would serve him well as Veterans Affairs secretary.

“He knows what soldiers need on the battlefield and what they need when they come home as veterans,” deputy White House press secretary Lindsay Walters told reporters aboard Air Force One en route to Cleveland, where Trump delivered a speech on his infrastructure plan. “The president has full confidence in his pick and trusts he will be able to give veterans the care they deserve.”

Key congressional Republicans publicly took a cautious approach to the nomination.

“We are doing our homework on Dr. Jackson,” said Amanda Maddox, spokeswoman for Sen. Johnny Isakson (R-Ga.), chairman of the Senate Veterans’ Affairs Committee, which will hold Jackson’s nomination hearing. Trump called Isakson after announcing that he had picked the doctor to replace Shulkin, she said.

“His name was never floated around,” Maddox said, “so we are doing our due diligence.”

Trump’s decision to upend VA’s leadership comes as Senate Republicans were already worried about other potentially difficult nominations in the months leading up to midterm elections, when they want to focus their message on the recently passed tax cuts rather than deal with more upheaval in the administration.

“Any time Republicans are not selling the tax bill over the next seven months is a missed opportunity,” said GOP strategist Brian Walsh, a former spokesman for the National Republican Senatorial Committee. “I will say Senate Republicans are a little more insulated by the nature of the seats that are up. But there’s no question that these are unhelpful distractions.”

The stack of Trump nominees includes Gina Haspel, who was picked this month to be the director of the Central Intelligence Agency and is facing opposition from members of both parties because of her ties to the agency’s past use of brutal interrogation measures on terrorism suspects, which critics say amounted to torture.

Senate Republicans have told White House officials in recent days that the process of confirming CIA Director Mike Pompeo to replace Rex Tillerson as secretary of state is going to be challenging even though he is expected to be approved, according to two people briefed on the discussions. Democratic senators said privately when Pompeo was tapped to replace Tillerson that they expect far fewer Democrats to back him than the 14 who voted for him to lead the CIA.

Senior Senate Republicans have privately expressed frustration over the personnel battles that have raged since the beginning of Trump’s presidency and recently told the White House that they did not want to have to consider a series of nominees this year, according to aides and officials who have heard the complaints.

The move to dismiss Shulkin — as well as the lack of communication about Jackson — only fueled concerns on Capitol Hill that the administration was not doing enough to help Congress defend or even respond to the president’s rush of personnel changes.

Jackson’s policy views are unknown, particularly on the most pressing issue facing VA: how much access veterans should have to private doctors outside the system at government expense. Shulkin’s moderate views on the subject, which were at odds with many administration officials, helped end his tenure.

VA secretary is one of Washington's most unforgiving jobs even for someone with extensive management experience. Shulkin, also a physician, had run large hospital systems — including VA's — before taking the job. His predecessor, Robert McDonald, was a chief executive of Procter & Gamble. The secretary before him was a decorated retired Army general, Eric K. Shinseki, who was forced out after managers in the far-flung health system were found to have fudged waitlists for veterans' medical appointments.

As recently as February, Jackson was a candidate to run VA's health-care arm, the Veterans Health Administration, the country's largest health-care system, with 1,200 hospitals and medical clinics. On the day of his interview, he told a selection panel that the president was unwilling to let him leave his White House job, according to two people familiar with the discussion.

The panel interviewed him informally anyway, asking him how he would drive change in such a large organization but not about his views on policy. One person who sits on the panel, and who spoke on the condition of anonymity because its proceedings are confidential, said they didn't think Jackson had the requisite skills to transition from overseeing a team of about 20 doctors, nurses and physician assistants in the White House medical office to overseeing the health administration.

"I don't remember him coming in trying to convince us he had the experience to do the job. He did not inflate his qualifications," this person said. "The tone was, 'Maybe I don't have the same kind of experience as others who came before me in the job.'"

Jackson's former colleagues in the Obama White House, who have publicly praised him in the past, said his nomination caught them off guard as they swapped text messages to ask how an extremely likable but unlikely candidate could end up running VA in the Trump administration.

"I've seen him managing a staff of a couple dozen, which he did to perfection," said Ned Price, a National Security Council spokesman under Obama who recalled that he was treated by Jackson for a toe injury in the Philippines.

"But how that would translate to managing the second-largest department in federal government I have no idea," Price said. "He has competence and integrity. I don't think he's going to fly around the world first-class or be buying thousands of dollars in furniture. But can he run VA? Anyone's guess is as good as mine."

Colleagues described the schedule of the White House physician as grueling, with continual foreign and domestic travel, always at the president's side.

Some Democrats warned that if Jackson embraced the idea of privatizing more of VA's health coverage, his nomination would be met with stiff resistance.

"I will carefully review Dr. Jackson's qualifications to determine whether he has the best interests of our Veterans at heart or whether he, like many in the Trump administration, wants to push VA down the dangerous path of privatization," Sen. Tammy Duckworth (D-Ill.), a wounded Iraq veteran, said in a statement.

At the American Legion, the country's largest veterans organization, senior officials were putting together ideas to help Jackson acquaint himself with the agency and its challenges.

“He’s going to have a huge learning curve,” Executive Director Verna Jones said, “but we stand ready to assist and educate him.”

Robert Costa and Julie Tate contributed to this report.

3. Wall Street Journal: [Lawmakers Respond Cautiously to Little-Known VA Pick Ronny Jackson - Key senators on panel say they don’t know enough about White House doctor to form an opinion about his ability to lead a vast bureaucracy](#) (29 March, Louise Radnofsky and Peter Nicholas, 43.6M uvm; New York, NY)

Capitol Hill lawmakers reacted guardedly to President Donald Trump’s nomination of the White House physician to head the Department of Veterans Affairs, with key members noting that they know little about him.

Dr. Ronny Jackson, a U.S. Navy rear admiral who has served as a White House physician during the past three administrations, is slated to succeed Secretary David Shulkin, who was ousted Wednesday. Mr. Trump indicated on Thursday that he removed Dr. Shulkin because change at the agency was coming too slowly. The secretary had also been the subject of a travel-expenses scandal.

The lead Republican and Democratic senators who will decide whether to confirm Dr. Jackson said they didn’t yet know enough to form an opinion about his ability to lead a bureaucracy of 370,000 employees. The department, which is the second-biggest government agency, is also still recovering from a 2014 scandal in which employees were found to have falsified records to hide delays in patient care.

“I look forward to meeting Adm. Jackson and learning more about him,” said Sen. Johnny Isakson (R., Ga.), chairman of the Committee on Veterans’ Affairs, which will vote on confirmation.

Sen. Jon Tester of Montana, the top Democrat on the panel, offered a near-identical sentiment, adding that he is looking forward to “seeing if he is up to the job.”

Veterans service organizations and some other lawmakers have expressed skepticism about Dr. Jackson, raising concern over the propriety of an active-duty military officer holding a political appointment, and saying his biography showed scant experience at running a bureaucracy on the scale he would inherit.

“He’s more of a hands-on physician—not a lot of desk time in terms of administrative leadership,” said Rep. Mike Coffman (R., Colo.), a member of the House Veterans’ Affairs Committee who was among Dr. Shulkin’s harshest critics.

It’s unclear how Dr. Jackson would address the issue of his active military status, including whether he would seek to relinquish it before securing confirmation to the new job.

Dr. Jackson’s confirmation will come as senators are debating legislation that would increase veterans’ ability to seek non-government medical care. Congress is approaching an early June

deadline to agree to new funds for the existing system allowing some veterans to go outside the VA for care, or to create a new policy allowing all veterans to participate.

“I made some changes, because I wasn’t happy with the speed with which our veterans were taken care of,” Mr. Trump said Thursday in a speech in Ohio. “We want them to have choice so that they can run to a private doctor and take care of it.”

The White House informed Mr. Isakson’s committee of the leadership change in a courtesy call Wednesday; a timeline for proceeding with the nomination, or preliminary introduction meetings, wasn’t discussed, a spokeswoman said. Mr. Isakson and Dr. Jackson spoke by phone Thursday afternoon, in an informal introduction, the spokeswoman said.

Past and present White House officials have praised Dr. Jackson as a steady force, deft in caring for different presidents and cabinet members. They said they found him friendly, bright and knowledgeable about medicine, including on issues specifically affecting veterans.

“If you’re not calmly decisive, the job of White House physician ain’t for you,” said Paul Winfree, a former deputy director of Mr. Trump’s Domestic Policy Council.

Dr. Jackson has been sought out for management positions before, though on a significantly smaller scale. Toward the end of the Obama administration, he was invited to interview by the Cleveland Clinic for an international posting managing a handful of people because of his affability, versatility and experience with VIPs, a person familiar with the interview said.

The federal agency Dr. Jackson would inherit is notoriously riven with competing power centers, and has now churned through three secretaries in four years.

Dr. Shulkin came directly from a health-care management background into the Obama administration when he took over the VA. He stayed on for Mr. Trump and initially received high reviews. He lost credibility recently when the VA inspector general found that, during a trip to Europe, he improperly accepted Wimbledon tennis tickets, misspent thousands of dollars of taxpayer money on his wife’s airfare and improperly used a department employee as a “personal travel concierge.”

Dr. Shulkin denied wrongdoing. He repaid the \$4,312 cost of his wife’s airfare and then sent the U.S. Treasury a check equal to the amount of the tennis tickets.

Mr. Trump’s advisers had openly explored possible successors for Dr. Shulkin in recent weeks, including having conversations with potential candidates, people familiar with the matter had said.

Still, the nomination of Dr. Jackson stunned some White House aides, who hadn’t known the president was even considering his physician for the role.

It became clearer Thursday that Mr. Trump had been thinking about moving Dr. Jackson to the VA for months. Last fall, Dr. Shulkin recommended that Dr. Jackson take an undersecretary job at the department, a White House official said. At that time, Dr. Jackson and the president discussed plans for improving the VA—talks that set in motion the announcement on Thursday.

Lindsay Walters, a White House spokeswoman, on Thursday said the White House believed Dr. Jackson had “bipartisan respect.”

“The president did have some early individuals that he was looking at but continuously went back to Dr. Jackson to fulfill this role as VA secretary,” she added. “The president has full confidence in his pick and trusts he will be able to give veterans the care they deserve.”

Some lawmakers expressed dismay over the treatment and departure of Dr. Shulkin, which could linger into the new confirmation process. “By once again choosing chaos over consistent leadership, Donald Trump is hurting veterans around the country,” said Illinois Democratic Sen. Tammy Duckworth, who is a retired U.S. Army lieutenant colonel.

4. USA Today (Video): [6 big things the new Veterans Affairs chief will have to address](#) (29 March, Donovan Slack and Dennis Wagner, 36.8M uvm; McLean, VA)

On the front lines at the Department of Veterans Affairs — in the agency’s 1,240 hospitals and clinics — it doesn’t much matter these days who holds the secretary’s job in Washington.

David Shulkin, who was fired Wednesday, was the third VA secretary in four years. If President Trump’s nominee to lead the agency, physician and Navy Rear Adm. Ronny Jackson, is confirmed, he will be the fourth.

Each has sought to fix the department, laying out visions and priorities — Shulkin’s top priority was “access,” making sure veterans get appointments when they need them. His predecessor, former Procter and Gamble CEO Bob McDonald, focused on staffing, training and veteran-centered customer service.

But year after year, critical deficiencies remain and veterans are bearing the brunt of the failures. Here are some key, seemingly intractable shortfalls that continue to plague the system — and that Jackson will face if confirmed.

Veterans are still waiting

The furor over VA health care exploded in 2014 when whistle-blowers in Arizona divulged that thousands of patients were backlogged at the Phoenix veterans hospital, and some of them had died awaiting care. VA investigators soon determined that medical center administrators knew about the crisis, yet put out fraudulent wait-time data to collect bonus pay.

The problems weren’t just in Phoenix. A USA TODAY investigation in 2016 found supervisors instructed employees to falsify patient wait times at VA medical facilities in at least seven states. And employees at 40 VA medical facilities in 19 states and Puerto Rico regularly “zeroed out” veteran wait times.

A few weeks after Shulkin was sworn in last year, the VA inspector general released a report finding widespread inaccuracies in scheduling records at a dozen hospitals in North Carolina and Virginia. The records vastly understated how long veterans were waiting for appointments and prevented as many as 13,000 from getting VA-funded care in the private sector — an option they were entitled to if they waited longer than 30 days. At the time, Shulkin said the findings

were based on outdated rules and that he had instituted new regulations to prevent such problems in the future.

But just two weeks ago, another inspector general investigation found the problems continued.

Looking at 64 VA hospitals and clinics in a swath of states from Kentucky to Illinois, investigators found scheduling staff entered the wrong dates in the system in more than 5,000 cases. That masked how long veterans were actually waiting for specialty care and mental health appointments.

They estimated 2,500 of those waited longer than a month, but the scheduling system falsely showed only 1,300 waited that long. Even in the cases accurately reflected in the system, they concluded, most weren't offered the chance to get care in the private sector.

"VA data continues to be a high-risk area," wrote Larry Reinkemeyer, VA assistant inspector general for audits and evaluations.

Quality of care

The VA's lowest performing hospitals remained at the bottom of the pack on the agency's own internal quality measures for two years in a row.

The VA regularly scores its medical centers based on dozens of quality factors, including death and infection rates, instances of avoidable complications and wait times. The agency uses a five-star scale with one being the worst and five being the best.

The rankings compare VA hospitals against each other but the number of one-star hospitals is not constant. Medical centers in that bracket can be elevated to two stars based on quality-of-care factors.

Among the facilities who received only one star in both 2015 and 2016 were the VA hospital in Phoenix and another in Memphis, Tenn. One Memphis employee dubbed the facility a "house of horrors" when USA TODAY obtained internal documents revealing reported threats to patient safety soared in recent years from 700 to more than 1,000.

One veteran had to have his leg amputated after a VA provider there left a piece of plastic tubing in a critical blood vessel during a procedure.

On a number of patient safety factors, the VA overall on average scores better than the private sector on many key patient-safety measures, including instances of avoidable death, respiratory failure, and infection. But there are vast disparities among VA hospitals, according to VA data collected from October 2015 to March 2017.

The death rate for surgical patients with treatable complications ranged from zero at the VA hospital in Sacramento, Calif., to more than 20% in Miami; Columbia, Mo.; and Washington, D.C. In Long Beach, Calif., it was 29%. That's more than double the private sector average of 14%, according to Medicare data.

Bureaucratic breakdowns

In Washington, the VA inspector general issued a rare emergency report last year saying that patients were in imminent danger at the hospital. The facility had dirty sterile storage areas and was regularly running out of critical supplies needed for surgeries and other procedures, including patches to seal blood vessels and tubes for kidney dialysis.

Shulkin quickly removed the hospital director there and sent teams from headquarters to try to fix the problems. But an inspector general report released this month found that VA officials at every level — local, regional and national — knew about the problems for years but didn't fix them.

Investigators found “a culture of complacency and a sense of futility pervaded offices at multiple levels.”

“In interviews, leaders frequently abrogated individual responsibility and deflected blame to others,” the investigation report says. “Despite the many warnings and ongoing indicators of serious problems, leaders failed to engage in meaningful interventions of effective remediation.”

Morale at the agency has taken a beating amid the constant drumbeat of crises. Employees ranked it as the second to worst agency to work for among large departments last year. The only department scoring lower was Homeland Security.

The inspector general singled out frontline workers at the Washington hospital, saying they went to great lengths to make do and they may be the only reason no patients were actually harmed.

“The OIG did not find evidence of adverse clinical outcomes, a condition that is largely attributable to front-line care providers who were committed to providing the best possible care by borrowing supplies, improvising, or personally ensuring patients received what they needed,” the investigation report said.

Vetting failures

The VA has had persistent difficulties recruiting and keeping enough medical care providers to meet veterans needs.

In 2015, one in six critical VA jobs — intake workers, doctors, nurses and assistants — were unfilled, a USA TODAY investigation found. Though the agency has made headway, there are still shortfalls.

In some cases, that has created an incentive to hire medical care providers with problem records that may have prevented them from getting jobs in the private sector.

A VA hospital in Oklahoma knowingly hired a psychiatrist sanctioned for sexual misconduct who went on to sleep with a VA patient, according to internal documents obtained by USA TODAY. A Louisiana VA clinic hired a psychologist with felony convictions. The VA ended up firing him after they determined he was a “direct threat to others” and the VA’s mission.

The Iowa City VA hospital knowingly hired John Henry Schneider last year, a neurosurgeon who had racked up more than a dozen malpractice claims in two states and had his license revoked in one.

After USA TODAY revealed the case in December, the VA forced him out and discovered that conflicting VA policies allowed its hospitals to illegally hire doctors with revoked licenses for 15 years. Shulkin ordered the policies rewritten but with the current process, that could take up to two years.

In a report released Monday, the inspector general found vetting failures go beyond medical providers. Investigators determined that the VA did not conduct required background checks on more than 6,000 employees and managers failed to properly document and oversee background checks.

“As a result, VA cannot reliably attest to the suitability of its largest workforce, exposing veterans and employees to individuals who have not been properly vetted,” the report said. “Unless internal controls and data are improved, VA and the public lack assurance that VHA has a workforce suitable for serving our nation’s veterans.”

Hiding shoddy care

The agency has failed for years to ensure medical care providers found to have provided poor care are reported to state licensing boards or to a national database created to prevent them from crossing state lines and endangering other patients.

In one case in Maine revealed in a USA TODAY investigation, the VA found a podiatrist had harmed 88 patients but didn’t report him to the national database and took years to report him to state boards. By the time the VA told his patients, one of them, U.S. Army veteran April Wood, had decided to have her leg amputated after two failed surgeries by the podiatrist.

The investigation found VA hospitals also signed secret settlement deals with dozens of doctors, nurses and health care workers in recent years that included promises to conceal serious mistakes — from inappropriate relationships and breakdowns in supervision to dangerous medical errors — even after forcing them out of the VA.

In response to the story last fall, Shulkin required increasing vetting of future such deals and he ordered policies on reporting to state boards and the national database rewritten. Again, five months later, the new policies still are not in place and could take months or years more.

Politics

Jackson, Trump's pick to be the new secretary, has no experience running a huge government agency, and dealing with veterans’ health care challenges will require deft politics and bureaucratic acumen.

His predecessor, Shulkin, was ousted despite being well regarded in Congress and assured of job security by Trump.

Now, a White House physician and former Navy admiral faces not just a plethora of VA maladies, but partisan politics and special interests that bitterly disagree on the cures.

The most perilous and important controversy involves decisions on privatizing veterans’ healthcare.

Powerful unions and veteran service organizations, such as the American Legion, oppose a radical change, and they are supported by most Democrats on Capitol Hill. But Republicans and key advocacy groups, such as Concerned Veterans for America, are demanding a system that would let veterans decide whether they go to the VA for care, or get private treatment subsidized by the government.

On Thursday, Trump suggested that Shulkin was dismissed because he was not aggressive enough in promoting the private-care option.

The existing Choice Program, which ate up billions of dollars and had to be re-funded, promises to be even more expensive if expanded. And those costs already have included tens of millions of dollars in improper payments to contractors.

Veteran enrollment for healthcare has skyrocketed, and Congress continues to expand benefits for those already in the system, with care for Agent Orange victims and high-cost medications for hepatitis patients. Bringing in enough funding to meet that demand also requires political aplomb.

5. New York Times: [Veterans Affairs Shake-Up Stirs New Fears of Privatized Care](#) (29 March, Nicholas Fandos, 30M uvm; New York, NY)

President Trump's dismissal of David J. Shulkin, the secretary of veterans affairs — and the nomination of a man with no known policy views to take his place — has brought renewed focus to an increasingly contentious debate over whether to give veterans the option of using the benefits they earned through military service to see private doctors rather than going to government hospitals and clinics.

The issue, which has pitted almost every major veterans group against Concerned Veterans for America, an advocacy group funded by the billionaire conservative brothers Charles G. and David H. Koch, and its allies, has been at the center of months of intrigue at the sprawling Department of Veterans Affairs, which is charged with caring for the United States' 20 million veterans.

But Mr. Shulkin's departure and the abrupt elevation of Dr. Ronny L. Jackson, the White House physician, to the department's top job on Wednesday have raised new fears among Democrats and groups like the Veterans of Foreign Wars and the American Legion. They worry that the Trump administration will push for a major change in veterans' health care that they have bitterly opposed.

The groups say the end result would be disastrous, effectively bleeding to death a network of 1,700 hospitals and clinics that has taken decades to build.

Dr. Shulkin, who was dismissed Wednesday evening by presidential tweet, argued in an op-ed article in The New York Times and in a subsequent interview on Thursday that such radical restructuring of veterans' health care would not work.

He said that a middle path that he had tried to pursue — investing in the department's own health care system while offering veterans more, though not unfettered, access to private

doctors — had been rejected by Trump administration officials interested in rewarding private individuals and companies with a windfall in government money.

“They saw me as an obstacle to privatization who had to be removed,” he wrote in one of the most forceful statements offered yet by a fired Trump administration official.

Senior White House officials offered a different rationale for his firing that was based more on a damaging report about Dr. Shulkin’s use of government funds on a trip to Europe released last month than on a dispute over policy.

Lindsey Walters, a deputy White House press secretary, told reporters aboard Air Force One on Thursday that the nomination of Dr. Jackson should not be interpreted as a signal that Mr. Trump wants to privatize veterans’ health care.

But Mr. Trump seemed to renew those concerns just a short time later, promising in a speech in Ohio that he was going to ensure that veterans “have choice,” harkening back to a campaign promise to enact something like the Koch-backed plan.

The speculation on Thursday about a possible policy shift was mostly fed by the lack of information about Dr. Jackson, whose only prominent public statements have been about Mr. Trump’s health.

Veterans advocates are especially concerned that Dr. Jackson, a rear admiral in the Navy who has no real management or political experience in a large bureaucracy, will be pushed around or, worse, simply co-opted by officials in the administration set on drastically expanding private care.

“We don’t know what his agenda is. We don’t know what his views are,” said Verna L. Jones, the executive director of the American Legion. “No one has had an opportunity to talk to him.”

“Of course we are nervous,” she added.

Leaders of the older, congressionally chartered veterans groups like the Legion are not categorically opposed to easing restrictions on private care, particularly in cases where veterans are facing long wait times and subpar facilities. About 30 percent of veterans’ appointments are currently made with private health providers for those reasons.

But the groups prefer tweaking programs already in place while at the same time addressing the problems that made private care necessary.

John Hoellwarth, the communications director for Amvets, said he thought the first response of most veterans groups to Dr. Jackson was to search for him online.

Dr. Shulkin said that he had been friendly with Dr. Jackson for several years — both men also served in the Obama administration — and encouraged him to go through the interview process to lead the department’s health system this year. Still, he said that he thought concerns about Dr. Jackson’s résumé were justified.

“There is no question about it, but I can’t imagine any job that prepares you for this type of job,” Dr. Shulkin said.

By most accounts, Dr. Shulkin's rapid fall began as he increasingly butted heads with other Trump administration official over how to approach the expansion of private care. The officials — who included the department's press secretary and assistant secretary for communications — came to consider Dr. Shulkin as an obstacle and repeatedly tried to have him removed.

Many of those officials, several of whom have ties to the Concerned Veterans group, are still in the administration and are likely to have increased sway in the department. But the ultimate decision about the structure of the department's health care most likely resides on Capitol Hill, where lawmakers have been struggling for almost a year with the issue.

"I think that there was a miscalculation that if you could get rid of the secretary who is a moderate that things will fall in place, and I just don't think that is going to happen," Dr. Shulkin said.

Dan Caldwell, the executive director of Concerned Veterans for America, strenuously disputed Dr. Shulkin's analysis and said the secretary was using privatization as a "straw man" to distract from his own ethical lapses.

"The president has said he supports full V.A. choice," Mr. Caldwell said. "The president would not have selected Admiral Jackson if he did not believe he supports his full agenda."

Mr. Caldwell was referring to a damning report released in February by the department's inspector general that found "serious derelictions" related to a trip Dr. Shulkin took last year to Britain and Denmark. It concluded that he had spent much of the trip, which cost more than \$122,000, sightseeing and that he had improperly accepted Wimbledon tickets as a gift.

Dr. Shulkin has continued to deny any wrongdoing, and on Thursday blamed his political opponents in the department for the investigation itself.

"This is 100 percent about the politics and this is the way that people fight their battles in Washington rather than having intellectually honest discussions," he said.

The White House did not view it that way. Senior officials came to believe that Dr. Shulkin had misled them in the run-up to the report's release. His public declarations of innocence only further aggravated top officials, who felt he had too openly aired internal politics with news outlets and had repeatedly opened the White House to criticism.

The exact circumstances surrounding Dr. Shulkin's firing, and exactly how much the White House chief of staff, John F. Kelly, was aware of it, remained unclear.

One person with direct knowledge of the events said Dr. Shulkin had called Mr. Kelly around 10:30 a.m. Wednesday, asking if he were about to be fired. Mr. Kelly told that him he did not know, and that he would get back to him.

A White House official would not discuss the details of what took place, beyond saying that Mr. Kelly had called Dr. Shulkin to accept his resignation, and that the secretary gave it.

Dr. Shulkin declined to discuss the episode in detail, but said he did speak on the phone with Mr. Trump on Wednesday about the progress of various policy initiatives at the department and implied that his job status did not come up.

A few hours later, he was at home on the phone with his wife when she broke the news: the president had fired him in a tweet.

6. Politico: [Trump's VA pick blindsides staff, deepens agency disarray - 'He's got a department that's in turmoil,' a former VA secretary said. 'It's in crisis.'](#) (29 March, Lorraine Woellert, Eliana Johnson and Connor O'Brien, 23.9M uvm; Arlington, VA)

The timing of President Donald Trump's announcement to name Rear Admiral Ronny Jackson to lead Veterans Affairs was a snap decision that surprised his own chief of staff and knocked the government's second-largest agency, already bedeviled by scandal, deeper into disarray.

White House chief of staff John Kelly had spoken with David Shulkin by phone Wednesday morning, reassuring the now-former VA secretary that he wouldn't be fired by tweet that afternoon. Hours later, Kelly had to phone Shulkin again telling him plans had changed.

Trump declared Jackson's nomination on Twitter at 5:31 p.m. The tweet was big news — not just to the public, but to some senior aides, according to one White House official.

The chaos — by now a typical part of the president's management style — has for months upended Kelly's attempts to ensure that an unorthodox White House adheres to traditional processes. But while White House aides are left unpacking the day's events, the drama at the VA is just beginning.

Deputy Secretary Thomas Bowman, a Trump appointee who is the agency's No. 2, is widely expected to leave soon, either by choice or by force. Kelly and other aides wanted Bowman gone before Shulkin left to avoid installing the deputy at the helm, even temporarily. Bowman had pushed back on broad privatization efforts, leading Trump to berate him in an Oval Office meeting for his lack of loyalty.

Trump got around the Bowman problem by naming Robert Wilkie, an undersecretary at the Department of Defense, to the temporary job. A Capitol Hill veteran and member of Trump's transition team, Wilkie is a former senior adviser to Sen. Thom Tillis (R-N.C.), who supports expanding service members' access to private doctors.

"He's got a department that's in turmoil. It's in crisis. There's warfare there," said Anthony Principi, who led the agency under former President George W. Bush. "And you have an acting secretary who doesn't know the VA."

But if and when Bowman departs, Wilkie will be left with a shallow bench at an agency already paralyzed by political mistrust, some veterans' advocates say. The VA's health and benefit agencies — which administer tens of billions of dollars in health programs, pensions, survivor benefits and other forms of assistance to some 9 million service members — have been without Senate-confirmed officials since the Obama administration.

Veterans Affairs is the second-largest federal agency, behind only the Department of Defense, with 377,000 employees. And it has proven unwieldy even when led by highly decorated, experienced administrators such as Eric Shinseki, a retired four-star Army general who resigned during the Obama administration amid a scandal over lengthy wait times and faulty scheduling practices for medical appointments.

Shinseki was followed by Bob McDonald, an Army veteran and former Procter & Gamble CEO. Shulkin, McDonald's successor, was the first non-veteran to lead the VA.

As recently as two weeks ago, the Trump White House was still making overtures to potential candidates for the top job, according to a person with direct knowledge of the inquiries. Trump reportedly agonized over the decision, changing his mind several times, a senior administration official said.

"Instead of going through the paces to convince the best possible person to take this job, they're going with the person who's still on active duty in the Navy and can't say no to the commander in chief," said one Obama White House aide, who spoke highly of Jackson as a doctor and individual. "You could look at it as them giving up trying to find a competent commander or manager to fix the problems."

Shulkin had come under fire after a VA inspector general's report accused him of improperly accepting tickets to the Wimbledon tennis tournament and using his agency staff to arrange a sightseeing tour of Denmark and England. He repaid the VA for the trip. The longtime hospital administrator, who was engaged in open warfare with conservatives in the department intent on privatizing the VA, contended he was set up.

Veterans' groups remained loyal to Shulkin, whom they saw as their best line of defense of against privatization. During his campaign, Trump made promises that veterans would be allowed to seek medical treatment outside the VA's system, statements taken by some to mean a step toward handing the system to commercial companies to manage.

Jackson, while well-liked by both Republicans and Democrats, is a cipher on privatization and other policy issues. With no agency experience to speak of, veterans suspect he could be installed as a figurehead, leaving lower-level appointees to steer the agency toward privatization.

"He's a blank slate. Nobody knows really anything about his competency or capacity for this job," said Paul Rieckhoff, CEO of Iraq and Afghanistan Veterans of America. "We especially know that being a veteran doesn't qualify you to run the VA any more than being a soldier qualifies you to run the DoD."

Principi urged Jackson to move quickly on his own agenda.

"The new secretary, really, if he wants to accomplish anything, has to hit the deck running and has to bring in some very, very good people," he said. "I hope and pray he's a success. Because if he's not, American veterans are going to be the losers."

7. NPR (All Things Considered, Audio): [Departure Of VA Secretary Shulkin Doesn't End Debate Of Privatization](#) (29 March, 22M uvm; Washington, DC)

The departure of Veterans Affairs Secretary David Shulkin does not end the debate over how far the agency should privatize. Neither the president nor his nominee have given their views on the subject.

[Back to Top](#)

8. Daily KOS: [Trump replaces experienced hospital administrator with personal doc in fight to privatize the VA](#) (29 March, Mark Sumner, 19.1M uvm; Oakland, CA)

The replacement of Secretary of Veterans Affairs David Shulkin has two narratives in the media—that Shulkin “embarrassed” Donald Trump with a trip to Europe that included days of sightseeing, and that Shulkin “clashed” with other officials at the VA.

Despite the amount of play the first item has received in the press, and despite some completely justified criticisms of Shulkin’s efforts both slip his wife’s travel costs onto the VA’s dime and indulgence in gifts he should never have accepted, the idea that the he was pushed out over travel costs is clearly ludicrous. Scott Pruitt has engaged in far more lavish—and ridiculous—travel policies, hauling along a vast entourage on trips to Italy and Morocco, and the only thing his actions have earned from Trump is a suggestion that Pruitt may get a promotion to some other department ripe for wrecking. Besides, Trump isn’t capable of embarrassment.

And when the press reports that Shulkin butted heads with officials, what they really mean is that Shulkin was blocking appointees from Trump who were pushing to privatize the VA. Fast. The conflict was simple: Shulkin, the only hold-over in Trump’s cabinet from the Obama administration, was trying to maintain the VA as a viable system of health care for veterans. The Trump appointees that filled all the other VA slots, were actively working to to do to the VA what Pruitt has done to the EPA—destroy it. This morning, hours after his firing, Shulkin makes the case for preserving in the VA in the New York Times.

During my tenure at the department, we have accomplished a tremendous amount. We passed critical legislation that improved the appeals process for veterans seeking disability benefits, enacted a new G.I. Bill and helped ensure that we hire the right people to work at the department. ... We are now processing more disability claims and appeals than ever before and, for the first time, allowing veterans to see the status of their appeals by simply logging on to their accounts. ...

It seems that these successes within the department have intensified the ambitions of people who want to put V.A. health care in the hands of the private sector.

To replace Shulkin, an experienced hospital administer who previously oversaw Beth Israel Medical Center and was a pioneer in patient centered care, Trump has selected ... his personal physician. The one who says Trump is 6’3” and not obese.

The experience that the new head of the Department of Veterans Affairs has in running healthcare organizations appears to be limited to the running of himself. He finished medical school in 2004, and served a year in Iraq as an an emergency physician. From there he was appointed a White House physician in 2006, and has been there ever since.

A biography released by the White House shows Jackson is credentialed and experienced in medicine but has no background in management. He nonetheless will be charged with

delivering on one of Trump's signature campaign promises: to fix the federal government's second-largest bureaucracy.

His biggest achievement in the White House seems to be his pioneering work in patient-centered flattery.

"Some people have just great genes," Jackson said. "I told the president that if he had a healthier diet over the last 20 years, he might live to be 200 years old . . . He has incredibly good genes, and it's just the way God made him."

So when Trump begins a series of tweets against the Twenty-Second Amendment and planning his 2040 campaign, Jackson will be the person to blame.

But the biggest concern isn't that Jackson has no management experience. It's that he doesn't plan to manage at all. Instead, he's being put in place as a figurehead whose real purpose is to just stay out of the way of the forces that ultimately ran over Shulkin.

Until the past few months, veteran issues were dealt with in a largely bipartisan way. (My 100-0 Senate confirmation was perhaps the best evidence that the V.A. has been the exception to Washington's political polarization). Unfortunately, the department has become entangled in a brutal power struggle, with some political appointees choosing to promote their agendas instead of what's best for veterans. These individuals, who seek to privatize veteran health care as an alternative to government-run V.A. care, unfortunately fail to engage in realistic plans regarding who will care for the more than 9 million veterans who rely on the department for life-sustaining care.

But at least there will be someone there with the experience to flatter them wildly.

"He's very sharp, and he's very articulate when he speaks to me, and I've never known him to repeat himself around me," Jackson said. "I've found no reason whatsoever to think the president has any issues whatsoever with his thought process."

[Back to Top](#)

9. Task & Purpose: [What's In Store For The Next VA Chief? Let's Break It Down](#) (29 March, James Clark, 102k uvm; New York, NY)

It's been an awkwardly long time coming, but as of yesterday afternoon embattled Veterans Affairs secretary David Shulkin is out of a job. The news comes after a month and a half of uncertainty that began when a scathing inspector general report detailed "serious derelictions" in expensing a Europe trip last summer. And then there were all the accusations and counter accusations of political infighting and rumors of possible replacements — at least all that is over:

Rear Adm. Ronny Jackson, the president's appointed White House physician, who drew national attention when he complimented President Trump on his "incredibly good genes," has been tapped to lead the Department of Veterans Affairs — pending approval by the Senate. Given that this leadership post has been described as "one of the most difficult jobs in government" — which has stymied generals, CEOs and health care executives — we thought it was time to give you a rundown of what's in store for the next officeholder, by the numbers:

More than 1,243 health care facilities. These Veterans Health Administration facilities include 170 VA Medical Centers, and 1,063 outpatient sites — making it the largest health care system in the United States.

9,000,000 veterans.. That's the number who receive medical care from VA, and many of these patients are older and suffer from multiple traumas and injuries that require specialized care: amputations, traumatic brain injuries, post-traumatic stress disorder, military sexual trauma, and as of 2013, half of all VA patients suffer from chronic pain, to name just a few. And as many as 2 million patients receive in-facility care, according to an American Legion statement.

20,000,000 veterans in the United States... we think. There could be far more veterans than we realize, since an individual's military history isn't tracked by the census bureau, which is a concern since the VA relies on headcount of its target population to get a feel for the size and scope of the services it needs to provide.

\$10,000,000,000 contract for Electronic Health Records. A long-term plan to modernize the VA's health records system could be jeopardy, with Shulkin's dismissal coming just as the VA was set to finalize the acquisition of a new electronic health record system.

2nd largest federal agency. The only one bigger is the Department of Defense.

\$186,000,000,000 budget for fiscal year 2018.

360,000 employees spread across three separate administrations within the department; the Veterans Health Administration, Veterans Benefit Administration, and the National Cemetery Administration.

23 years active duty. Jackson's Navy career began in 1995, and includes postings as an instructor, diving medical officer, diving safety officer, from Panama City, Florida Sigonella, Italy, to Norfolk, Virginia. By 2005 he deployed to Taqaddum, Iraq as part of a Surgical Shock Trauma platoon.

3 presidents. While still in Iraq in 2006, Jackson was selected as a White House physician and served as the supervising physician for the Camp David Presidential Retreat under the George W. Bush administration. Later he led the White House Medical Unit as its director and was the appointed White House physician for Presidents Barack Obama and Donald Trump.

Soon to be 7 VA secretaries in 4 years. The department has been beset by turmoil and scandal. Eric Shinseki resigned from his post as VA chief following the 2014 wait-list scandal the department. Since then, the VA has gone through three sitting secretaries, and is on its third acting secretary, with Robert Wilkie, previously the Pentagon's undersecretary of personnel and readiness, now tasked as the interim chief until Shulkin's replacement is approved by the Senate.

[Back to Top](#)

10. Washington Post: [Opinions - Surprise: Trump's newest Cabinet nominee has no relevant experience](#) (29 March, Eugene Robinson, 43.9M uvm; Washington, DC)

You can't make this stuff up: President Trump has announced he will nominate a medical doctor who has no discernible management experience to run the second-largest agency in the federal government.

Can presidents be sued for malpractice?

The man Trump has named to become secretary of veterans affairs, Ronny L. Jackson , happens to be the president's personal doctor. More to the point, given Trump's perpetual hunger for sycophancy, is the fact that Jackson showered the president with hyperbolic Dear-Leader-style praise during a widely viewed television appearance in January.

Trump has "incredibly good genes," the White House physician said in describing a examination he had given the president. Trump's overall health is "excellent." His "cardiac assessment" put him "in the excellent range." If his diet were a bit better, "he might live to be 200 years old." In any event, "I think he will remain fit for duty for the remainder of this term and even for the remainder of another term if he's elected."

That is an unusual way to describe a 71-year-old man whose height was reported as a generous 6 feet 3 inches , and weight at an eyebrow-raising 239 pounds, which classifies him as overweight — but conveniently one pound short of obese. Jackson's are odd words characterizing a man whose cheeseburger-laden diet my doctor would describe as suicidal and whose coronary calcium scan results, according to many other physicians, indicate some degree of heart disease and a clearly elevated risk of heart attack.

I assume Jackson has been more, shall we say, plain-spoken with the president about his health than he was with the public. But am I suggesting that flattery, rather than merit, is what makes him Trump's choice to replace ousted VA Secretary David Shulkin? Absolutely, because no other explanation makes sense.

Pliability may also be playing a role. In a New York Times op-ed, Shulkin wrote that he believed he was being sacked because he opposed a push by the Trump administration "to put VA health care in the hands of the private sector."

Shulkin is a physician, but before he took over VA, he also had experience running hospitals. With no comparable administrative background, Jackson — if confirmed by the Senate — would take over a sprawling agency with about 360,000 employees, a \$186 billion budget and responsibility for providing medical care to 9 million veterans who deserve better, faster service than they now receive.

Shulkin was one of several high-ranking Trump appointees under fire for lavish spending on the taxpayers' dime. He was also a holdover from the Obama administration, and even though the job is perhaps the least partisan in the Cabinet , that prior association clashed with Trump's bratty determination to oppose everything President Barack Obama supported and support everything he opposed.

But Shulkin, by most accounts, had stabilized VA's vast system of hospitals and health clinics. What he refused to do was support the notion of privatizing veterans' health care — an idea pushed by some of the political appointees the White House had installed under him.

"I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans," Shulkin wrote in his Times op-

ed. “The private sector . . . is ill-prepared to handle the number and complexity of patients that would come from closing or downsizing VA hospitals and clinics, particularly when it comes to the mental health needs of people scarred by the horrors of war.”

Shulkin wrote that “in recent months” the political environment in Washington had become “toxic, chaotic, disrespectful and subversive,” making it impossible for him to do his job. “It should not be this hard to serve your country,” he wrote.

But it should be hard to get a job running any organization as big, complex and vital as the Department of Veterans Affairs. Perhaps Jackson has an innate genius for management that awaits only the opportunity to flower. If not, Trump will be doing a grave disservice to men and women who are owed the nation’s thanks and gratitude.

I can’t say I’m surprised. Trump put neurosurgeon Ben Carson in charge of the Department of Housing and Urban Development, despite Carson having zero experience in housing policy. He put Betsy DeVos in charge of the Department of Education, despite her apparent unfamiliarity with actual schools. He put politician Rick Perry in charge of the Department of Energy, which Perry wanted to eliminate until he learned what the agency does.

Perry actually said that during his confirmation hearing. One doesn’t know whether to laugh or cry.

[Back to Top](#)

11. Washington Post (The Fix): [Who is Trump’s new Veterans Affairs pick, Ronny Jackson?](#) (29 March, Aaron Blake, 43.9M uvm; Washington, DC)

The seemingly never-ending parade of staff changes in the Trump administration continued apace Wednesday, with the president announcing that Veterans Affairs Secretary David Shulkin is out and that White House physician Ronny L. Jackson will replace him.

Jackson’s name will be familiar to political watchers across the country for one main reason: He’s the physician who delivered what some felt to be a suspiciously rosy picture of Trump’s health in January. But he’s an interesting pick for a whole host of other reasons.

For one, Jackson is something of a nonpartisan pick. Like Shulkin, he served in the Obama administration, where he was also President Barack Obama’s White House physician. A native of Texas and a graduate of Texas A&M and University of Texas Medical Branch, he’s a rear admiral in the U.S. Navy who has spent decades practicing medicine in the military. Jackson was nominated for a promotion to rear admiral (upper half) as recently as last week, which would give him his second star. According to his Navy biography, he was deployed to Iraq in the mid 2000s to head up an emergency medical unit tasked with resuscitating troops.

While there, he was chosen to join President George W. Bush’s White House as a physician. In 2013, Obama promoted him to the top job in the West Wing. Trump elected to keep him on. In that role, Jackson oversees not just Trump’s health, but also that of the first family and White House staff and guests. He mostly stayed behind the scenes but made headlines after treating a girl who got bit by one of the Obamas’ dogs in January 2017.

Navy Rear Adm. Ronny L. Jackson, the lead White House doctor, said on Jan. 16 that President Trump's "overall health is excellent." (Bastien Inzaurrealde/The Washington Post)

Jackson reached his highest degree of notoriety in January, when he delivered a promised review of Trump's health. Trump, who at 70 was the oldest newly elected president ever, is known to eschew exercise and dine on fast food. There have also been persistent questions — especially among his critics — about his mental health. And Trump's medical reviews during the campaign were both ridiculously hyperbolic — claiming he would be the most healthy president ever — and omitted key pieces of information, including a hair-loss drug Trump takes.

Jackson's review played up a cognitive test Trump had passed that seeks out early signs of dementia and other kinds of mental deterioration. He said Trump had "incredible genes" and (seemingly) joked that if Trump's diet had been better he might live to be 200 years old. He denied Trump had heart disease even as the data suggested he might. He listed Trump's weight at 239 pounds, which left Trump exactly one pound shy of the definition of "obese" and spawned a whole host of dubious reactions. (Call it the "girther" movement.)

The whole thing earned Jackson a send-up during the cold open of "Saturday Night Live."

Despite the ridicule, members of the Obama administration vigorously defended Jackson as a patriot and an honest man.

If nothing else, Jackson's ascension seems to reinforce that the best way to get ahead in the Trump administration is to say nice things about him. Some defended Jackson's credentials, but that review will likely be a topic at his confirmation hearings.

Perhaps the main reason Jackson is a somewhat controversial pick, though, is his lack of management experience. VA has been a department beset by scandals in recent years — including before Shulkin — and has proved a logistical and bureaucratic nightmare. Jackson has headed up medical units in the White House and Iraq, but he has never dealt with anything close to the scale of what he's set to take on. It may be the toughest Cabinet job in the entire administration, in fact.

Trump, though, as he often does, has gone with a nontraditional pick who said things he liked on television.

[Back to Top](#)

12. FOX News: [Ronny Jackson picked by Trump to lead the VA: What to know about the president's physician](#) (29 March, Kaitlyn Schallhorn, 32.5M uvm; New York, NY)

President Trump gave Dr. Ronny Jackson a clean bill of health in March — to run the Department of Veterans Affairs.

A Navy rear admiral, Jackson is the president's personal physician who rose to prominence after he addressed the press from the White House briefing room in January to discuss Trump's health. While Jackson said the president needs to lose some weight, he said the physical exam he conducted showed overall that Trump was in good physical and mental health.

Trump fired Secretary David Shulkin on March 28, and Robert Wilkie is serving as interim secretary until Jackson is confirmed.

He has a marine biology degree

From Texas, Jackson, 50, graduated from Texas A&M University in 1991 with a degree in marine biology, according to his Navy biography. He graduated from the University of Texas Medical Branch with his medical degree in 1995.

That same year, Jackson joined the Portsmouth Naval Medical Center – located just outside Chesapeake, Virginia – which kicked off his active duty military career. It was there that he finished an internship in transitional medicine.

Later, he would return to the naval center to complete his residency in emergency medicine, graduating at the top of his class in 2004.

Jackson is a veteran

Jackson was deployed to Iraq after he joined the 2nd Marines in 2005, according to his Navy biography.

He served as the emergency medicine physician in charge of resuscitative medicine for a forward deployed Surgical Shock Trauma Platoon.

He's been a White House physician since Bush

While still in Iraq, Jackson was tapped as a White House physician in 2006. He has overseen the physicians for Camp David presidential retreats, led the White House Medical Unit and directed the executive health care for the Cabinet and senior staff members, according to his biography.

It was former President Barack Obama who selected Jackson to fill the position of physician to the president.

13. FOX News (Video): [John Brennan: Trump's nomination for VA secretary is 'terribly misguided'](#) (29 March, Nicole Darrah, 32.5M uvm; New York, NY)

Former CIA Director John Brennan once again took a shot at President Trump on Twitter Thursday, saying he believes the decision to nominate Adm. Ronny Jackson to run the Department of Veterans Affairs is "terribly misguided."

"I personally know and greatly respect Ronny Jackson....as a terrific doctor and Navy officer," Brennan tweeted. "However, he has neither the experience nor the credentials to run the very large and complex VA. This is a terribly misguided nomination that will hurt both a good man and our veterans."

Trump announced via Twitter Wednesday his intention to replace current VA Secretary David Shulkin with Jackson, a 50-year-old Navy rear admiral who has served as personal physician to the president since 2013, when he was appointed by former President Obama, after being tapped to serve as a White House doctor in 2006.

Jackson's also a veteran. He was deployed to Iraq after he joined the 2nd Marines in 2005, according to his Navy biography.

Jackson's nomination triggered some concern among lawmakers and veterans groups about his experience to manage a federal agency, but Trump praised the lifelong doctor as "highly trained and qualified."

Trump decided to oust Shulkin from his Cabinet after he served just over a year in office. An internal VA watchdog found last month that Shulkin improperly accepted Wimbledon tennis tickets and that his then-chief of staff had doctored emails to justify his wife traveling to Europe with him at taxpayer's expense.

The swipe from Brennan, now an analyst for NBC News and MSNBC, isn't the first he's made against Trump.

Just last week, he suggested that the Russians "may have something" against the president, and days prior to that in response to former FBI official Andrew McCabe's firing: "When the full extent of your venality, moral turpitude, and political corruption becomes known, you will take your rightful place as a disgraced demagogue in the dustbin of history."

Fox News' Kaitlyn Schallhorn and Elizabeth Llorente, along with The Associated Press, contributed to this report.

14. New York Times: [Op-ed - Ronny Jackson's Disturbing Lack of Independence](#) (29 March, Norman L. Eisen and Bandy X. Lee, 30M uvm; New York, NY)

In announcing Dr. Ronny Jackson, the White House physician, as his choice to be the new secretary for veterans affairs, President Trump has taken his latest misstep in what has been the worst presidential personnel process in modern history.

We take no pleasure in saying so, including because one of us (Mr. Eisen) worked with Dr. Jackson in the White House, was even treated by him, and can testify that he is a very capable physician. But that good opinion of Dr. Jackson, which was widely held in the Obama administration, by no means qualifies him to run one of the largest, most complex and troubled cabinet agencies in the federal government.

Indeed, the very affability of Dr. Jackson's approach when it comes to his current presidential patient is perhaps his greatest disqualification, followed closely by his lack of relevant management experience and the apparent absence of a normal pre-nomination personnel vetting.

Dr. Jackson's January examination of President Trump, and subsequent news conference, give us great pause because they evinced a disturbing lack of independence — one of the most

important qualities in a cabinet member. Dr. Jackson startled observers by not only finding the president healthy, but declaring he would remain so in the future. The doctor even looked into his crystal ball to predict good health for a second term, a pronouncement extending seven years into the future and so more fit for a fortuneteller than a scientist.

Some expert observers also felt Dr. Jackson may have understated the president's heart disease, and even fudged the president's height (his driver's license says 6 feet 2 inches; Dr. Jackson reported 6 feet 3 inches) because the lower number would have forced the doctor to admit his patient was obese. When asked why he had such glowing things to say about the president's health when Mr. Trump gorges on McDonalds, guzzles diet Coke, and seldom exercises, Dr. Jackson said: "Some people have just great genes. I told the president that if he had a healthier diet over the last 20 years, he might live to be 200 years old."

That is hardly the objectivity that America needs from its cabinet members. But Dr. Jackson's worst failing was his purported examination of the president's psychological fitness, resulting in his pronouncement that "the president is mentally very, very sharp." The examination came at a time when there was widespread public discussion about the president's mental state, driven by reporting about some of the president's startling behind-the-scenes behavior. The scrutiny was so intense that the president himself asked Dr. Jackson for testing.

But the test that Dr. Jackson administered was not fit for his conclusion. It was a short examination known as the Montreal Cognitive Assessment, which is generally used as a screen for Alzheimer's and similar symptoms. One of us (Dr. Lee) is a mental health professional who has expertise in these examinations, and would never have utilized this narrow test under these circumstances. It is the equivalent of pronouncing a patient cancer-free because she has a good complexion.

A full history should have been taken and a standardized battery of tests given, such as the Minnesota Multiphasic Personality Inventory. Among the other, more appropriate tests that should also have been considered are the Wisconsin Card Sorting Test, the California Verbal Learning Test and the Stroop Test. The MoCA examination was simply not sufficient under the circumstances to support Dr. Jackson's declaration that he had "absolutely no concerns" about the president's cognitive ability or neurological functions.

All of this matters because, if Dr. Jackson cannot be trusted to act independently when it comes to the president's mental and physical health, we cannot be confident that he will do so when it comes to the fitness of the Department of Veterans Affairs. The department has the sacred charge of repaying our soldiers for their service by providing them with health care and other support. If Dr. Jackson tells the president — and the country — what Mr. Trump wants to hear about his own health, how can we trust him to honestly and rigorously diagnose the ailments of the V.A., and to treat them appropriately?

Having a candid V.A. secretary is all the more important because the department faces profound challenges. Since 2014, it has dealt with a pattern of negligent treatment at hospitals operated by one of its agencies, the Veterans Health Administration. Outgoing Secretary David Shulkin revealed yesterday that he had fought Trump administration proposals to privatize services provided by the V.A. — a move that could undermine the quality of health care provided to our veterans. Dr. Jackson's treatment of the president does not inspire confidence that he will take on the V.A.'s problems with the brutal honesty that the job demands.

Dr. Jackson's nomination is also undermined by the fact that although he is a medical professional, he lacks the management experience that the job demands. The V.A. secretary is responsible for a department that provides health care services to over nine million individuals. While Dr. Jackson has served his country with distinction, both in Iraq and as the White House physician, managing a relatively small medical team is not preparation for leading a vast and sprawling bureaucracy. The V.A. is one of the most complex health care management jobs in the world, and ideally would be run by someone with experience operating hospital systems or health businesses or enterprises, and large ones.

The nomination fits a pattern of cronyism, with the president appointing those of dubious qualifications to patronage jobs across the administration. The president's former golf caddy is now the White House social media director. A contractor married to one of the Trump's former household staff members now has a job at the Environmental Protection Agency. And a longtime friend of the Trump family who has been involved in planning golf tournaments and Eric Trump's wedding is the head of the New York and New Jersey office of the Department of Housing and Urban Development. And now he has appointed his White House doctor to oversee the health care of millions of veterans.

Finally, in addition to concerns about independence and qualifications, it appears that Dr. Jackson had not undergone the normal vetting process for White House presidential personnel. Reportedly, the tweet-from-the-hip nomination of Dr. Jackson by the president surprised even his own advisers. That suggests that Dr. Jackson has not in fact received the careful review that is normally completed before such an announcement.

One of us worked (just down the hall from Dr. Jackson, actually) on vetting hundreds of senior administration officials. Very presentable and capable individuals — sometimes even those with existing security clearances — are sometimes disqualified by the rigorous personnel investigations that are normally undertaken for cabinet positions. Such cabinet-level vets complement but are more thorough than a typical pre-existing security clearance, and can uncover conflicts, misdeeds or other disqualifying information.

We are not suggesting that vetting will uncover anything improper, but caution is warranted, since many of Mr. Trump's nominees have had unprecedented conflicts and other issues.

Norman L. Eisen (@NormEisen) is a senior fellow at the Brookings Institution and was President Obama's ethics czar from 2009 to 2011. Bandy X.Lee is a forensic psychiatrist at the Yale School of Medicine and a project leader for the World Health Organization.

15. ABC News (Video): [Veterans groups respond cautiously to VA secretary nomination](#) (29 March, Sarah Kolinovsky, 24.2M uvm; New York, NY)

Despite his active duty status as a Navy rear admiral (lower half) and his medical experience, veterans service organizations are responding cautiously to the nomination of Dr. Ronny Jackson for secretary of Veterans Affairs, with some expressing concern about his lack of managerial experience or what his views are on reforming the VA.

Jackson has served as White House Physician in the past three administrations and in January gave President Donald Trump a glowing health review. Recently, Trump nominated Jackson to

receive a second star, promoting him to the rank of full rear admiral. Jackson has deployed to Iraq as an emergency medicine physician in charge of resuscitative medicine for a forward-deployed Surgical Shock Trauma Platoon.

Iraq and Afghanistan Veterans of America, an organization serving the post-9/11 generation of veterans, say it looks "forward to learning more about Dr. Ronny Jackson's vision and qualifications." The statement underscores the fact that Jackson lacks significant managerial experience as he is poised to lead the government's second largest agency, which cares for more than nine million veterans and has an annual budget of nearly \$200 billion.

"Nobody really knows who is he. Is he an empty vessel? Does he have strong views on privatization, or reforming the VA?" asked IAVA CEO and Founder Paul Rieckhoff during an appearance on CNN Thursday morning. "So the confirmation hearings are going to be really really important. The Senate, House, time for you guys to step up and grill this guy and find out if he is qualified to not only run the agency but care for our veterans in a time of war."

IAVA welcomed the news that "finally puts an end to weeks of painful speculation that was negatively impacting VA and veterans nationwide," referring to media reports that President Trump had lost confidence in Secretary Shulkin. IAVA pointed out that in a recent survey, only 24% of the organization's members approved of the job Shulkin was doing.

Veterans of Foreign Wars (VFW) echoed IAVA's hesitation about Jackson's experience. "The VFW will be closely monitoring the Senate confirmation process, because what Dr. Jackson's bio does not reflect is any experience working with the VA or with veterans, or managing any organization of size, much less one as multifaceted as the Department of Veterans Affairs," VFW Director of Communications Joe Davis said in a statement.

The conservative group Concerned Veterans for America expressed more optimism about the change, saying in a statement "We are hopeful that this change will end the recent distractions at the VA and put the focus back on advancing policy that will ensure veterans get the health care and other benefits they have earned. The Trump administration has made great progress over the last year reforming and fixing the VA, however, there is still much work to be done."

The American Legion declined to comment directly on Jackson's qualifications. Instead, the group highlighted their intention to work "directly with the President through this transition and going forward, and providing him an increased level of advice and feedback on the issues important to America's veterans."

16. The Atlantic: [The Doctor Who Suddenly Got Nine Million Patients - For a position that demands high-level policy expertise, President Trump appointed his personal physician, Ronny Jackson.](#) (29 March, James Hamblin, 23.9M uvm; Washington, DC)

Nine million veterans will soon be under the care of the emergency-physician rear admiral Ronny Jackson, pending confirmation of his appointment Wednesday to lead the U.S. Department of Veterans Affairs.

This seemingly mundane appointment—a doctor and naval officer with years of experience as White House physician under both Trump and Obama—is of great consequence. It comes at a

time when the VA is in need of a politically savvy expert on health-care administration, budgeting, and resource allocation, as the system is on the brink of major changes that bear on national security. The system has proven to require a leader who can thread multiple bureaucratic needles with his or her eyes closed. Jackson does not clearly fit this bill.

The VA is the second-largest federal department, overseeing 1,243 health-care facilities including 170 hospitals, which tend to be a ghostly network of dim, mid-century structures that bear the scars of serving as constant political battlefields. They tend to have bad food and no marble and bizarre gift shops that I've seen sell knives and cured meats. Yet VA hospitals seem to underscore the waste of the glitz of five-star-hospital-style academic medical centers. The system punches above its weight in the quality and safety of care it delivers compared to most of the private health-care industry.

While it is crucial to have experienced veterans and physicians in the upper echelons of a system like this, the work is mostly about politics and economics. Jackson is not an expert in policy, and he lacks work experience in health-care administration or management. His chief credential is that he is a physician. I'm also a physician, and—ask anyone—I'm wholly unqualified to lead a hospital system, much less to lead the one most crucial to our national security.

Even as a doctor, Jackson's judgment has been dubious at times. The press conference in January where he extolled President Trump's soundness of mind suggested allegiance to the president above the public or the profession: "I've found no reason whatsoever to think that the president has any issues whatsoever with his thought process," Jackson said, after having administered a 10-minute test for dementia in which the president was asked to do basic math, identify zoo animals, and draw a clock. (A useful and good test, the results of which were, I've argued, overstated in the context of widespread physician concern over the president's soundness of mind.)

Professional bearing intact, Jackson also said that the borderline-obese (BMI 29.9), 71-year-old president—who does not exercise and eats McDonald's to excess (Filet-o-Fish, no less) and is known for angry outbursts and drinks around 144 ounces of Diet Coke per day and barely sleeps—is in "very good health, excellent health." He speculated that the president would remain fit for service until the end of a second term and said he told Trump that "if he had a healthier diet over the last 20 years, he might live to be 200 years old."

As David Axelrod, former adviser to President Obama and now the director of the University of Chicago Institute of Politics, responded publicly to the appointment: "Dr. Jackson is a good and honorable person, [a] fine doctor and career military, but you do get the sense that this [appointment] has as much to do with his boffo press conference on the president's physical [exam] as anything else."

Trump has become known for proximity-based, loyalty-based promotions made with apparent haste. Jackson may simply have been the only doctor in Trump's field of view. With doctors Oz and Phil being televisually obligated, and Harold Bornstein all the way up in New York ... who else is there?

Though if the move was deliberate to a policy end, it was a savvy move from the perspective of those who would like to see the VA privatized. There has been a creeping movement to privatize elements of the VA system, backed by the Koch brothers, among others. At a policy

level, the concept is worthy of consideration and debate. Some experts argue that certain elements being privatized could improve quality and decrease costs.

But that doesn't seem to be what's happening. The outgoing VA secretary David Shulkin made this clear on Thursday in an op-ed in The New York Times. He argued that some public-private cooperation had been fruitful: "We have expanded access to health care by reducing wait times, increasing productivity, and working more closely with the private sector." But he also warned that the push toward complete privatization was not being undertaken in good faith. Shulkin writes:

It seems that these successes within the department have intensified the ambitions of people who want to put VA health care in the hands of the private sector. I believe differences in philosophy deserve robust debate, and solutions should be determined based on the merits of the arguments. The advocates within the administration for privatizing VA health services, however, reject this approach. They saw me as an obstacle to privatization who had to be removed. That is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans.

With Shulkin out of the way, the next secretary of the VA would need to approach the job with strong moral bearing and willingness to resist political expedience for the sake of improving the system. Without this force, special interests could sway the system toward privatization at a cost to taxpayers and veterans.

18. NPR (All Things Considered, Audio): [How Veteran Groups Are Reacting To The Departure Of VA Secretary Shulkin](#) (29 March, 22M uvm; Washington, DC)

Garry Augustine, executive director of Disabled American Veterans, speaks with NPR's Audie Cornish about how veteran groups are responding to the the news of VA Secretary David Shulkin's firing.

[Back to Top](#)

19. The Hill: [White House: Trump has 'full confidence' in presidential physician to lead VA](#) (29 March, Max Greenwood, 11.9M uvm; Washington, DC)

President Trump has "full confidence" in White House physician Ronny Jackson's ability to head the Veterans Affairs (VA) Department, a spokeswoman for the White House said Thursday, despite reported concerns from some aides.

"As I said earlier, the president has full confidence in Adm. Jackson," White House deputy press secretary Lindsay Walters told reporters.

"The president did have some early individuals that he was looking at but continuously went back to Dr. Jackson to fulfill this role as VA secretary and ultimately decided that his health care experience, his distinguished career in the medical profession, was something that would be beneficial at the VA," she continued.

"At the end of the day, as I said earlier, the status quo was not working. We need somebody who understands the health care system," she said.

Trump continued a spate of shake-ups in his Cabinet on Wednesday by dismissing VA Secretary David Shulkin and tapping Jackson, a rear admiral in the Navy and the current White House physician, for the role.

The New York Times reported Wednesday that some White House aides had privately expressed concern about the decision to nominate Jackson for the VA's top job, because of his lack of experience managing a large organization.

At the same time, some aides acknowledged that Trump's relationship with Jackson carried more weight in making the decision than the physician's prior experience, the Times reported. Jackson gave Trump his first physical in office earlier this year.

Walters told reporters Thursday that Jackson "has bipartisan respect" in Congress, and said his experience in the Navy gives him an insight into "what soldiers need on the battlefield and what they need when they come home as veterans."

She also said the decision to oust Shulkin and nominate Jackson was in no way part of an effort to privatize veterans' health care, as Shulkin had implied in an op-ed he wrote the day after his ouster.

[Back to Top](#)

20. The Hill: [GOP, vet groups react with caution to Trump VA pick](#) (29 March, Rebecca Kheel, 11.9M uvm; Washington, DC)

Senators and influential veterans groups are withholding judgment on President Trump's pick to lead the Department of Veterans Affairs (VA), a Navy doctor with no experience leading a federal bureaucracy.

Both the Republican chairman and the Democratic ranking member of the Senate Veterans Affairs Committee said only that they look forward to meeting Rear Adm. Ronny Jackson. Several veterans groups expressed some concern about Jackson's qualifications, but did not immediately oppose him, saying that questions need to be answered during the confirmation process.

“We look forward to understanding more about the qualifications of Admiral Ronny L. Jackson, MD to helm the VA during this critical time,” Carl Blake, executive director of Paralyzed Veterans of America, said in a statement. “The VA has a broad mission and the secretary must be someone who is eminently qualified to lead the nation's second largest cabinet agency.”

On Wednesday night, Trump announced on Twitter that he'd tapped Jackson to replace David Shulkin, who fell out of the president's good graces after turmoil over the direction of private health care for veterans and a scathing inspector general report accusing him of misusing taxpayer dollars on a trip to Europe.

Shulkin's firing was expected, but Jackson was not among the names circulating as possible replacements.

Statements from lawmakers and veterans groups poured in Wednesday night, heavily praising Shulkin for his service at the department.

When it came to Jackson, though, the statements were generally shorter and more neutral.

“I look forward to meeting Admiral Jackson and learning more about him,” Senate Veterans Affairs Chairman Johnny Isakson (R-Ga.) said in a statement.

In a separate statement, committee ranking member Sen. Jon Tester (D-Mont.) likewise said he looks “forward to meeting Admiral Jackson soon and seeing if he is up to the job.”

Jackson was first thrust into the public spotlight when he gave Trump a clean bill of health in January during a lengthy and unusual press briefing at the White House.

Jackson told reporters that a cognitive test showed “no reason whatsoever to think the president has any issues whatsoever with his thought processes.” He also proclaimed Trump's “overall health is excellent,” crediting the president's “good genes” despite a well-known penchant for fast food and lack of exercise.

Jackson has served as a White House physician since 2006 and was promoted by former President Obama in 2013 to become the physician to the president.

Just last week, Trump nominated Jackson for a promotion in rank from rear admiral (lower half) to rear admiral. Jackson is expected to retire from active duty if confirmed.

A Texas native who received his doctorate of medicine from the University of Texas Medical Branch, Jackson started his naval career in 1995 at the Portsmouth Naval Medical Center in Virginia, according to his Navy biography.

In 2005, Jackson deployed as part of the Surgical Shock Trauma Platoon in Taqaddum, Iraq. There, he served as the emergency physician in charge of resuscitative medicine.

His bio lists several awards, including the Defense Superior Service Medal, the Legion of Merit, the Navy/Marine Corps Commendation Medal and the Navy/Marine Corps Achievement Medal.

But it makes no mention of any work on veterans issues.

Still, the White House says Trump has “full confidence” in Jackson, adding he believes the department needs someone who understands health care.

If confirmed, Jackson would take the helm at the government’s second largest bureaucracy at a time when the VA is still regaining trust after a 2014 scandal over long and falsified wait times for veterans seeking health care.

In addition to overseeing 1,700 health-care sites serving almost 9 million veterans annually, the doctor would be in charge of benefits delivery, 360,000 employees and a nearly \$200-billion budget.

Jackson would also come in during a raging debate over legislation to expand a program known as Choice that provides private health care to some veterans -- a concern seen as central to Shulkin’s undoing.

At issue is how much to expand the program. Veterans groups and Democrats fear the White House wants to essentially privatize veterans health care, which they warn would not be able to address the unique challenges veterans face.

Jackson’s position on the issue is unknown, though the White House said Thursday in response to accusations made by Shulkin that “there are no discussions about privatizing” the VA.

Veterans service organizations, which are congressionally chartered and hold substantial sway over veterans issues in Congress, raised questions about Jackson’s qualifications.

AMVETS listed several questions for Jackson, including how someone who’s never held a command is qualified to lead a massive bureaucracy and what his qualifications are to address issues outside of health care including claims, appeals, benefits and cemetery affairs.

“I am deeply concerned about the nominee,” AMVETS Executive Director Joe Chenelly said in a statement. “Veterans’ lives depend on this decision, and the Trump administration needs to substantiate that this active-duty Navy officer is qualified to run a \$200 billion bureaucracy, the second largest agency in the government.”

Disabled American Veterans (DAV) said they look forward to “learning more about the qualifications and views” of Jackson and expressed concern about a leadership vacuum.

“At a time of critical negotiations over the future of veterans healthcare reform, VA today has no secretary, no under secretary of health or benefits, and the named acting secretary has no background in health care and no apparent experience working in or with the department,” DAV Commander Delphine Metcalf-Foster said in a statement, referring to acting Secretary Robert Wilkie, who comes from the Pentagon.

“We certainly expect the next secretary to continue the path set by VA, Congress and veterans organizations in recent years to strengthen the VA healthcare system while ensuring that all enrolled veterans have timely access to quality care, whenever and wherever they need it.”

Still, Vietnam Veterans of America (VVA) said Jackson will understand veterans’ needs.

"We are pleased that he is a combat veteran with firsthand knowledge of the trauma of war, and as such, will understand what our veterans need," VVA National President John Rowan said in a statement.

VA secretaries typically receive strong bipartisan support in their confirmation. Shulkin was confirmed unanimously, as was his predecessor Bob McDonald. The secretary before that, Eric Shinseki, was confirmed by voice vote.

Nominees only need a simple majority to be confirmed. But Republicans only have a two-seat advantage over Democrats in the Senate, and one Republican, Sen. John McCain (Ariz.), has not voted in months as he receives cancer treatment in his home state.

Republicans on the Senate Veterans Affairs Committee appeared inclined to support Jackson.

"I look forward to working with Dr. Ronny Jackson on modernizing and reforming the VA, fixing the VA Choice Program, and implementing the major reforms that Congress has passed over the last year," Sen. Thom Tillis (R-N.C.) said in a statement.

Sen. Jerry Moran (R-Kan.), who in January accused Shulkin of "double-talk" in negotiating on Choice, said the VA secretary needs to focus on changing the department's bureaucracy.

"Rear Admiral Jackson has a career in service and I look forward to discussing his plans for the VA to make certain veterans receive access to care they deserve," Moran said in a statement.

Committee Democrats, meanwhile, promised close scrutiny of Jackson's qualifications and his position on privatization.

"I will seriously scrutinize the president's nominee, Ronny Jackson, because our nation's veterans deserve the best," Sen. Richard Blumenthal (D-Conn.) said in a statement.

Sen. Bernie Sanders (I-Vt.), who caucuses with Democrats, was more blunt.

"The Senate Committee on Veterans Affairs should not approve any nominee for secretary who supports the privatization of the VA," he said in a statement.

[Back to Top](#)

21. Military.com: [Others Considered for VA Job Before Trump Picked His Personal Doctor](#) (29 March, Richard Sisk, 9M uvm; San Francisco, CA)

Rear Adm. Ronny L. Jackson, the personal physician to President Donald Trump, was not his first choice to replace fired VA Secretary Dr. David Shulkin, the White House said Thursday.

"The president did have some early individuals that he was looking at but continuously went back to Dr. Jackson to fulfill this role as VA secretary," White House deputy press secretary Lindsay Walters told reporters.

She said Trump "ultimately decided that his [Jackson's] health care experience, his distinguished career in the medical profession, was something that would be beneficial at the VA."

Walters added that Trump "has full confidence in Admiral Jackson" to fulfill the demanding job at the Department of Veterans Affairs despite his lack of experience in running large organizations.

Walters did not name the others who were considered to head the VA, but they reportedly included Toby Cosgrove, former head of the \$8 billion Cleveland Clinic health care system, and Pete Hegseth, an Army National Guard veteran of Iraq, former head of the advocacy group Concerned Veterans of America and co-host of the weekend "Fox & Friends" program.

Cosgrove, a Vietnam veteran, was among those invited in 2016 to Trump's Mar-a-Lago estate in Florida to be interviewed for the VA post before Trump settled on Shulkin, a holdover from the Obama administration.

Others who were under consideration as VA secretary included former Rep. Jeff Miller, R-Florida, who had been chairman of the House Veterans Affairs Committee; retired Army Lt. Gen. Keith Kellogg; Michael Kussman, a former VA undersecretary of health; and Leo Mackay Jr., a former VA deputy secretary who is now senior vice president at Lockheed Martin Corp., The Associated Press reported.

The surprise announcement of his nomination Wednesday afternoon, his status as a relative unknown on Capitol Hill, and the ongoing turmoil at the VA indicate Jackson will have little in the way of a honeymoon period if he is confirmed by the Senate.

Shulkin wasn't even out the door when Jackson faced a barrage of conflicting demands from the White House, Congress and the major Veterans Service Organizations (VSOs).

The immediate concern is the upcoming decision by the VA to award a contract that could run up to \$10 billion and is aimed at finally giving the agency electronic health records. There are also the perennial disagreements on what to do about benefits, wait times, suicides, PTSD, corruption, caregivers and the crumbling infrastructure at VA hospitals.

However, at the top of Jackson's to-do list is reaching a final resolution on the extension and expansion of the Veterans Choice Program, which allows vets to opt for private health care.

Proponents, including Trump, see Choice as guaranteeing that vets get the best health care available; opponents, including the VSOs, see overreliance on Choice as threatening the core mission of VA as the primary provider and payer for the care of nine million vets annually.

In leaving, Shulkin sidestepped the scandal over his travel expenses. He portrayed himself as the victim of palace intrigues hatched by White House political appointees advocating the full "privatization" of VA health care.

In an op-ed for The New York Times, Shulkin wrote that the political appointees, at the White House and within the VA, "saw me as an obstacle to privatization who had to be removed."

"That is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans," he said.

In testimony to the House Veterans Affairs Committee earlier this month, Shulkin warned that the Choice program could run out of money as early as June.

Sen. Johnny Isakson, R-Georgia, chairman of the Senate Veterans Affairs Committee, had co-sponsored a bill that would have extended Choice while keeping the decision on whether vets could go to private doctors within the VA, but the bill was not included in the \$1.3 billion omnibus spending package signed by Trump last week.

Isakson has pledged to renew his efforts on Choice when Congress returns after the Easter recess. In a statement Thursday, he also hinted at the conflicts with the White House by heaping praise on Shulkin and pointing to improvements at the VA in the past year.

Shulkin "has made a tremendous impact toward improving the lives of veterans," Isakson said. "He has been instrumental in all that we have accomplished in the last year, and I thank Dr. Shulkin for his dedicated service to our country and our veterans."

As for Jackson's nomination, Isakson said, "I look forward to meeting Admiral Jackson and learning more about him."

If confirmed by the Senate, Jackson, who has little administrative experience and none in running an organization such as the VA, could be expected to rely on the insider knowledge of the No. 2 at the agency, Deputy VA Secretary Thomas Bowman. The VA, the largest healthcare system in the United States, has 370,000 employees and a budget of nearly \$200 billion.

However, Bowman, a retired Marine colonel and military attorney, has already been targeted for removal by Jake Leinenkugel, a former brewery company executive and now a senior White House adviser on veterans issues.

In December, Leinenkugel wrote in an email to Camilo Sandoval, a political appointee at the VA, that they should lobby for the ousters of both Shulkin and Bowman. The email was first reported by The Washington Post and later obtained by Military.com.

Isakson and the VSOs came to the defense of Bowman, a long-time former staffer on the Senate Veterans Affairs Committee.

"Tom Bowman is a veteran and a patriot, a public servant and a good man," Isakson said in a statement. "If this is true, it will be a mistake, and I am deeply disappointed in the president. Veterans will suffer because of this decision if it's true."

The VSOs have partly blamed the moves against Shulkin and Bowman, and the efforts at privatization, on the work of the advocacy group Concerned Veterans for America, which is funded by the conservative Koch brothers organization.

In a statement, CVA's executive director, Dan Caldwell, said that Shulkin "made significant headway in reforming the department, but ultimately became a distraction from the important task of improving health care for our veterans."

Without mentioning Choice, Caldwell said, "Congress needs to continue work with the president to pass legislation that will give veterans more health care options and better access to care through the VA."

In a statement, Sen. John McCain, R-Arizona, chairman of the Senate Armed Services Committee, said of Choice that "much more work remains to improve the Veterans Choice Program and ensure our nation's heroes have access to the best possible services."

"Let me be very clear: none of us committed to reform wants to privatize care. We simply believe the VA must put the needs of veterans first, and ensure they receive timely, quality and uncompromised health care, whether that's in the VA or in the community," McCain said.

Sen. Jack Reed, D-Rhode Island, ranking member of the Senate Armed Services Committee, said, "I admire Dr. Jackson's service to the nation, but I don't know if he is the right person to lead the VA.

"One thing is clear -- the Trump administration seems to devolve further into turmoil by the day," Reed said. "I hope the level of dysfunction that has engulfed other parts of the administration does not impact the care that our veterans receive."

22. Government Executive: [Lawmakers, Veterans Groups and Former Officials Worry VA Nominee Is Not 'Up to the Job'](#) (29 March, Eric Katz, 870k uvm; Washington, DC)

With David Shulkin now ousted from the Veterans Affairs Department, all eyes are on President Trump's nominated replacement to see where he comes down on the most pressing issue at VA: How large a role should the private sector play in providing health care to veterans?

One problem for observers and stakeholders in the veteran community is Trump's pick, Dr. Ronny Jackson, has very little experience in public policy or veterans issues. Veterans service organizations and lawmakers were effusive in their praise of Shulkin, while expressing disappointment in his firing and noting the new relationships they would have to now forge.

"I don't know if he ever set foot in a VA [facility]," Louis Celli, the national VA director at American Legion, a group that represents more than 2 million veterans, said of Jackson. By the time the secretary designate is fully able to understand all the issues facing the department, Celli said, "this administration could be over."

As VA secretary, Jackson would be responsible for managing 370,000 employees spread across 3,000 facilities. Administering veterans disability benefits, education subsidies and cemeteries number among the department's dozens of lines of business. Still, its responsibility to provide health care to veterans is by far its biggest operation—the Veterans Health Administration runs the largest hospital network in the country—and is what led Jackson, a physician, to get the job.

Trump "ultimately decided that his health care experience, his distinguished career in the medical profession was something that would be beneficial at the VA," Lindsay Walters, a White House spokeswoman, told reporters Thursday. "At the end of the day . . . the status quo was not working. We need somebody who understands the health care system."

While Jackson has served as White House physician since 2006 and the president's personal doctor since 2013, his background is atypical for VA secretaries. While Shulkin was the first to helm the department without himself being a veteran, he had served at VA as an undersecretary as head of the Veterans Health Administration. He had previously led multiple private medical centers and health systems. His predecessor was Bob McDonald, who came from the private sector but whose nomination was met with plaudits because of his experience leading the

Fortune 50 company Proctor & Gamble. McDonald replaced Eric Shinseki, who had previously served as chief of staff of the Army.

In a New York Times op-ed published after his firing, Shulkin warned that his political enemies from within the Trump administration pushed him out not due to the scandals surrounding him but because of ideological differences about the future of VA.

"I have been falsely accused of things by people who wanted me out of the way," Shulkin said. "But despite these politically based attacks on me and my family's character, I am proud of my record and know that I acted with the utmost integrity. Unfortunately, none of that mattered."

Shulkin added that the environment surrounding him became "so toxic, chaotic, disrespectful and subversive" that he could no longer accomplish his job. He said his opponents within the department, whom he repeatedly vowed to oust, were fighting to privatize VA health care and saw him as a barrier in achieving that goal.

"They saw me as an obstacle to privatization who had to be removed," Shulkin said. "That is because I am convinced that privatization is a political issue aimed at rewarding select people and companies with profits, even if it undermines care for veterans."

Opponents of privatization, including Shulkin, nearly all veterans service organizations and key lawmakers on both sides of the aisle on Capitol Hill, could breathe at least a momentary sigh of relief when Trump announced Jackson as his nominee to be the next VA secretary. Jackson is in many ways an unknown, but is not associated with any previous push to minimize the government's role in providing veterans health care as were some of the other candidates Trump was reportedly considering.

"I am deeply concerned about the nominee," said Joe Chenelly, executive director of AMVETS, another congressionally chartered veterans service organization. "Veterans' lives depend on this decision, and the Trump administration needs to substantiate that this active-duty Navy officer is qualified to run a \$200 billion bureaucracy, the second largest agency in the government."

AMVETS added it was pleased Jackson had a medical background, but noted VA is "more than healthcare."

"What qualifications does the president's nominee have to address claims, appeals, benefits and cemetery affairs?" the group asked.

Celli noted that even McDonald, a veteran who came to the department with vast managerial experience, took a while to fully "wrap his arms around the entire mission of what VA was" and was therefore only able to make a significant impact in two or three areas of VA's operation.

President Obama was wise to recognize he needed a veteran who had also run a large company with a big budget and many employees, much like VA itself, McDonald told Government Executive.

"That intersection is very small and I think [Obama] recognized that," McDonald said. "While Adm. Ronny must be a great doctor, the question the Senate will need to address is does he have sufficient management experience."

Even Shulkin seemed to suggest the job requires a large learning curve.

"No one is naturally prepared to take on a task like this," Shulkin told NPR on Thursday. Jackson would not be met with political leadership at the department to help guide him through the ins and outs of its medical network, as Trump has yet to nominate an undersecretary to head VHA.

"Given the state of the VA today, the most important thing is the leadership experience of a very large organization," McDonald said. Having medical experience would only be the third top priority, McDonald said, after being a veteran.

Several groups expressed concern over the fate of reforms VA had already initiated under Shulkin. The now former secretary was in the process of realigning the department's regions, or Veterans Integrated Service Networks, and the larger structure of the department. He had worked with oversight committees in Congress on a proposal to consolidate existing programs giving veterans access to private sector care on the government's dime and easing veterans access to such programs, while maintaining a tight balance with those who tend to have a knee-jerk reaction against any reform that could be construed as VA privatization. The existing Veterans Choice Program is expected to run out of funding this summer. He had won approval for his plan to shutter underutilized facilities and had already help shepherd measures to expedite firing of problematic employees and reform the disability appeals process through Congress and into law.

"I have enjoyed getting to know Secretary Shulkin, and I'm glad to call David a friend," said Rep. Phil Roe, R-Tenn., who chairs the House Veterans Affairs Committee. "I think he's done a fantastic job and I hate to see him go."

Roe pledged to work with Jackson and build "a strong relationship with him also." Roe's counterparts in the Senate made clear they would not automatically grant their approval, as will be necessary for his confirmation.

"I look forward to meeting Admiral Jackson and learning more about him," Sen. Johnny Isakson, chairman of the Senate VA committee, said after praising Shulkin for the "tremendous impact" he made during his tenure.

Sen. Jon Tester, D-Mont., was even more non-committal.

"Moving forward, the VA needs a strong leader at the top who will listen to veterans, strengthen the VA and work with Congress to implement bipartisan reform," Tester said. "I look forward to meeting Rear Adm. Jackson soon and seeing if he is up to the job."

McDonald suggested Trump's selection could mark a departure from the path on which he and Shulkin put the department, which the former secretary said he formulated after hundreds of visits around the country to listen to VA beneficiaries.

"Veterans don't want the privatization of the VA," McDonald. "I hope President Trump is listening to veterans."

The American Legion's Celli speculated that Trump's choice of Jackson was a matter of happenstance rather than qualification. His selection was not as "draconian" as he and many had feared, Celli said, but it still appeared as if Jackson got the nod because he was "someone with military experience who [Trump] just happened to know." Celli was at least pleased that

Jackson's demeanor and medical abilities were "above reproach," but said he would still have to prove himself beyond that to earn the support of the veteran community.

"Great, he's a nice guy," Celli said. "There's a lot of nice guys out there."

INFORMATION

MEMORANDUM FOR THE WHITE HOUSE STAFF SECRETARY AND CABINET SECRETARY

FROM: Vivieca Wright Simpson, Chief of Staff

SUBJECT: Department of Veterans Affairs Weekly Update

(Blue Font = New Entries)

1. Department of Veterans Affairs 30-Day Policy Look Ahead

VA Secretary's Top Priorities

Greater Choice and Quality In Health Care for Veterans

VA is working to ensure Veterans have more options for care, including at VA Medical Centers (VAMC) or Health Care Systems (HCS), and care in the community when VAMCs do not meet their needs.

- December 7
- Dr. Peter Almenoff, Veterans Health Administration's (VHA) Director for Organizational Excellence, will brief **Congressman Salud Carbajal** on VA's **Strategic Analytics for Improvement and Learning Value Model** data.
- POC: Brooks Tucker, VA's Office of Legislative and Congressional Affairs

- December 8
- Margarita Devlin, VA's Benefits Assistance Service Director, will brief Senate Committee on Veterans Affairs (SVAC) staff on VA's efforts to **enroll service members transitioning** from active duty into **VA's health care system**.
- POC: Brooks Tucker, VA's Office of Legislative and Congressional Affairs

- December 11
- Mark Yow, Veterans Health Administration's (VHA) Chief financial Officer, will brief **House Committee on Veterans Affairs** (HVAC) minority staff on the **Veteran Integrated Service Network resource allocation process**.
- POC: Brooks Tucker, VA's Office of Legislative and Congressional Affairs

- December 12
- The Minneapolis VA HCS will hold a ribbon cutting and open house for VA's first **Center for Integrative Health and Healing**. Located in three large reconditioned rooms that were previously clinical spaces, the center will offer mindfulness, yoga,

VA-18-0457-A-001116

tai-chi and acupuncture. After remarks from Minneapolis VA HCS Director Patrick Kelly, the center will open for tours and demonstrations.

- POC: Ralph Heussner, Minneapolis VA HCS Public Affairs
- [December 13](#)
- [Secretary Shulkin will meet with House Majority Leader Kevin McCarthy and Congressman Steve Knight to discuss an **immediate care pilot in Southern California**.](#)
- [POC: Brooks Tucker, VA's Office of Legislative and Congressional Affairs](#)
- December 18
- VA leaders will provide **SVAC staff** an update on VA Office of Inspector General's recommendations on the **Veterans Crisis Line (VCL)**, and VCL performance indicators.
- POC: Brooks Tucker, VA's Office of Legislative and Congressional Affairs

Improve Timeliness of Service – Disability Claims and Appeals Decisions

The Veterans Benefits Administration (VBA) is working to improve the timeliness of adjudicating and paying disability claims.

- December 6
- VBA leaders will brief congressional staffers on the **Decision Ready Claims** process and **Rapid Appeals Modernization Program**. Specific members/committees are TBD.
- POC: Brooks Tucker, VA's Office of Legislative and Congressional Affairs
- **VBA Claims Clinics** are outreach events where VBA employees provide Veterans with in-person support and guidance related to claims processing. Claims clinics differ from traditional outreach events in that VA claims personnel are available to discuss with Veterans their unique individual issues. Upcoming claims clinics are:
 - December 6: Jackson, MS
 - December 5 [and 19](#): Brunswick, ME
 - December 5-7: St. Louis, MO
 - December 9: Irvington, NJ
 - [December 13: Anthem, AZ](#)
 - [December 13-15: Winston-Salem, NC](#)
 - [December 14: Somerset County, NJ and St. Petersburg, FL](#)
 - [December 18: Mather, CA](#)
 - [December 19: Louisville, KY](#)
 - [December 20: Trenton, NJ](#)
 - [December 26: Portland, ME](#)
- POC: Tom Murphy, Acting Under Secretary for Benefits

Modernize VA Systems and Infrastructure

VA is working to modernize information technology, other systems and physical infrastructure to improve our delivery of care and services to Veterans.

- December 7
- VA's Office of Information and Technology will deliver upgrades to **how VA's National Cemetery Administration (NCA) coordinates with memorial benefits** for recently deceased Veterans. The upgrades will improve the security of Personally Identifiable Information – Sensitive data when NCA corresponds with next-of-kin and funeral homes to arrange memorial benefits. This will ensure more safeguards of Veterans' personal information and add peace of mind for families as their Veteran family members are appropriately honored for service to the nation at their final places of rest.
- POC: Scott Blackburn, VA's Office of Information and Technology

Other Department Priorities

Reducing Veteran Homelessness

VA is working to reduce or eliminate Veteran homelessness through internal programs and leveraging partnerships with public and private entities.

- POC for all events: A ^{(b) (6)} Acting Director for Veteran Homeless Programs
- December 8
- Leaders from VA's Pacific Island Health Care System will participate in a ribbon cutting ceremony at the **Enhanced Use Lease facility at Barbers Point, HI**. U.S. Vets, the organization currently leasing the VA property to provide supportive transitional housing for Veterans, has added 50 additional units to house Veterans who are homeless or at risk of becoming homeless. The Barbers Point location currently houses over 300 Veterans per year. The supportive services include providing access to VA healthcare, job placement programs, and other transition services.
- **Veteran Homeless Standdowns** are outreach events where VAMCs address the unique care needs of homeless Veterans. Events include health screenings, VA benefits counseling, and referrals for housing or employment assistance. Upcoming Homeless Standdowns are:
 - December 8: Newport, OR
 - December 12: Brandon, FL
 - December 14: Horseheads, NY
 - December 14-15: Seattle, WA
 - December 16: Dallas, TX
 - December 23-25: Yuma, AZ

Leveraging Partnerships

VA is committed to working with public and private entities who wish to improve outcomes for Veterans.

- December 7
- The Ralph H. Johnson VAMC and the Fisher House Foundation will host a grand opening and ribbon cutting ceremony for the opening of the new **Fisher House in Charleston, SC**. The new Fisher House will provide lodging for up to 16 families of eligible Veterans and active duty military members at no cost, allowing them to be near loved ones receiving care at the nearby Ralph H. Johnson VAMC. Dr. Carolyn Clancy, VHA Executive in Charge, and Ke (b) (6) er House Chairman and CEO, will make opening remarks.
- December 13
- Secretary Shulkin will meet w (b) (6) and the **Association of American Medical Colleges** to discuss VA legislation and other issues of importance to academic medicine, like joint ventures.

Building and Sustaining a Quality VA Workforce

VA is reshaping its workforce to one that is Veteran-centric and committed to improving care and services for Veterans. Efforts include engaging with employees at facilities in the field to communicate priorities on cultural change and accountability, as well as recognizing employees as key and valued stakeholders.

- December 21
- VBA will conduct graduation ceremonies for 109 Wounded Warriors and transitioning Servicemembers completing VBA's **Warrior Training Advancement Course (WARTAC)**. The program educates participants on the skillsets needed to serve as a Veterans Service Representative or Rating Veteran Service Representative in VBA, and allows the participants to complete the program while still on active duty. The in-person courses began in October at six military installations in California, Texas, and Germany, and consisted of instructor led training, web based instruction, scheduled tests, and completing mock claims. WARTAC graduates will then have an **opportunity to be interviewed for employment** at one of VBA's 56 Regional Offices in the country.
- POC: Tom Murphy, Acting Under Secretary for Benefits

2. Key Events for the Upcoming 30-Days

VA Advisory Committees

Supporting VA Priority: Engaging with Key Stakeholders

Via the Federal Advisory Committee Act, advisory committees operate as another component of the "people's voice" in our democratic form of government, and are comprised of experts from the public and private sector. Upcoming meetings are:

- December 6: The **National Research Advisory Council** provides advice to the Secretary on research and development sponsored and/or conducted by the Veterans Health Administration, to include policies and programs of the Office of Research and Development.

- December 6-7: The **VA National Academic Affiliations Council** provides advice to the Secretary regarding partnerships between VA and its academic affiliates.
- December 12-14: The **Advisory Committee on Minority Veterans** Committee provides advice to the Secretary on the administration of VA benefits for Veterans who are minority group members in the areas of compensation, health care, rehabilitation, outreach, and other services. Secretary Shulkin will meet with the committee during its first day of discussions. (b) (6) VA's Center for Minority Veterans Director, will serve as the Designated Federal Officer for the Advisory Committee.
- December 13: The **Cooperative Studies Scientific Evaluation Committee** provides advice on VA cooperative studies, multi-site clinical research activities, and policies related to managing these efforts. The Committee also ensures that all projects maintain high quality, are based upon scientific merit, and are efficiently and economically conducted.
- POC: (b) (6) A Advisory Committee Office

Veteran Town Halls

Supporting VA Priority: Engaging with Veterans

Veteran Town Halls are outreach events where local VA leaders invite Veterans, family members, congressional offices and community stakeholders, to learn about VA health care, services and benefits. Town Halls are usually conducted at VA Medical Centers (VAMC) or VA Health Care Systems (HCS), and they often include claims assistance from Veteran Benefits Regional Offices. Upcoming Town Halls are:

- POC: (b) (6) Veterans Health Administration Public Affairs
- December 6:
 - Ashville VAMC in Ashville, NC
 - Gulf Coast Veterans HCS in Pensacola, FL
 - Rochester VA Outpatient Clinic in Rochester, NY
- December 7:
 - William S. Middleton Veterans Hospital in Madison, WI
 - Minneapolis VA HCS in Forest Lake, MN
- [December 11: Erie VAMC in Erie, PA](#)
- December 12:
 - Roseburg VAMC in Roseburg, OR
 - Long Beach HCS in Long Beach, CA
 - Oscar G. Johnson VAMC at community locations in Wabeno, WI, Stephenson, MI, and Rapid River, MI
 - [Wilkes-Barre VAMC in Wilkes-Barre, PA](#)
- December 13:
 - Fargo HCS in Grafton, ND

Armstrong Outpatient Clinic in Kittanning, PA
VA Pittsburgh HCS in Pittsburgh, PA
VA Portland HCS in Vancouver, WA
Oscar G. Johnson VAMC at community locations in St Ignace, MI and
DeTour Village, MI
[Northern Arizona HCS in Anthem, AZ](#)

- December 14:
 - Canandaigua VAMC in Canandaigua, NY
 - Oscar G. Johnson VAMC at community locations in Sault Ste. Marie, MI, Newberry, MI, and Manistique, MI
- December 20: Milwaukee VA Medical Center in Milwaukee, WI
- December 21: Overton Brooks VAMC in Shreveport, LA
- December 28: Louis A. Johnson VAMC in Clarksburg, WV

VA's Center for Women Veterans (CWV)

Supporting VA Priority: Advancing Women Veterans Issues

- POC for all events: K ^{(b) (6)} [REDACTED] irector for VA's Center for Women Veterans
- December 12-13
- CWV Director Kayla Williams will speak at the **Defense Advisory Committee on Women in the Services (DACOWITS) meeting**. Ms. Williams, who is an ex-officio member, will update the Committee on the Secretary's priorities, current Federal initiatives addressing women Veterans, and benefits and services. Established in 1951 by then Secretary of Defense, George C. Marshall, the Committee consists of civilian women and men who are appointed by the Secretary of Defense to provide advice and recommendations on matters related to the recruitment and retention, treatment, employment, integration, and well-being of professional women in the Armed Forces. Historically, DACOWITS' recommendations have been very instrumental in effecting changes to laws and policies pertaining to military women.
- [January 6](#)
- [CWV Director ^{\(b\) \(6\)} \[REDACTED\] will speak at the **Student Veterans of America 2018 National Conference** in San Antonio, Texas. The theme of the conference is "Defining Our Future." Ms. Williams will speak about "Resources to Boost Women Veterans' Career Readiness."](#)

VA's Center For Minority Veterans (CMV)

Supporting VA Priority: Advancing Minority Veterans Issues

- POC: ^{(b) (6)} [REDACTED] Director of VA's Center for Minority Veterans
- December 5

Dwayne Campbell, VA's CMV Hispanic Veterans Liaison, will conduct a Lunch and Learn to educate veterans and employees at the Small Business Administration.

- December 6
Dwayne Campbell, VA's CMV Hispanic Veterans Liaison will attend the Congressional Hispanic Caucus Institute (CHCI) Holiday Reception at the Library of Congress.
- December 8
Ronald Sagudan, VA's CMV Asian American/Pacific Islander Veterans Liaison, will attend an event welcoming of Philippine Ambassador to the United States, Jose Manuel Romualdez.
- December 15
- (b) (6) MV Asian American/Pacific Islander Veterans Liaison, and (b) (6) MV Hispanic Veterans Liaison, will staff an information table for an **outreach event at Defense Intelligence Agency at Bolling Air Force Base.**
- December 15
- (b) (6) VA's CMV Hispanic Veterans Liaison, will attend the "Reach Out to Military Ministry" Christmas Holiday Gala hosted by Ebenezer AME Church.

Media Engagements

Supporting VA Priority: Engaging with Key Stakeholders

- POC for all events: L (b) (6) fice of Public Affairs
- December 11
- Secretary Shulkin will meet with **Benjamin Patton, the youngest son of General George Patton.** Mr. Patton will talk about the Patton Veterans Project, an innovative filmmaking program he developed as a therapeutic intervention for Veterans struggling with post-traumatic stress disorder, transition, and suicidal ideation.
- December 12
- Secretary Shulkin will participate in a live **Politico event at the Newseum.** Secretary Shulkin and a Politico reporter will discuss solutions-driven ideas around improving the physical and mental health of active duty Servicemembers and Veterans.

Engagements with Congress, Veterans Service Organizations, and Other Stakeholders

Supporting VA Priority: Engaging with Key Stakeholders

- December 6
- Secretary Shulkin will attend a **Cabinet Meeting** at the White House with other Cabinet Secretaries.

- December 6-7
- Deputy Secretary Bowman will travel to St. Louis, MO to provide keynote remarks at the **2017 National Veterans Small Business Event**. While in St. Louis, Deputy Secretary Bowman will conduct site visits at local facilities.
- December 7
- Secretary Shulkin will meet with C (b) (6) **Paralyzed Veterans of America** for a meet and greet.
- December 7
- Secretary Shulkin will meet with D (b) (6) **Concerned Veterans of America** for a meet and greet.
- December 7
- Secretary Shulkin will speak to the **2017-2018 Class of White House Fellows** as part of their speaker seminar series at the White House Fellows Luncheon.
- December 9
- Deputy Secretary Bowman will travel to Breckenridge, CO to accept the **Disabled Sports USA 2017 Dr. Robert Harney Leadership Award** on Behalf of the Department.
- December 9
- Secretary Shulkin will be in Philadelphia to attend the **Army Navy Football Game**.
- December 11
- Secretary Shulkin will meet with **Congressman Michael Turner** on Capitol Hill. They will discuss issues at the **Dayton VA Medical Center**.
- December 11
- Deputy Secretary Bowman and Anthony Kurta, Performing the Duties of Under Secretary of Defense for Personnel and Readiness, will co-chair the **VA/DoD Joint Executive Committee Meeting**. Topics will include: Purchased Care Network; Professional Health Care Services Contracts; Joint Sharing of Facilities and Services; VA Adoption of Defense Medical Logistics Standard Support; Telehealth Quick Wins; Military-to-Civilian Transition and Pre-Registration in VA Health Care; Movement of DoD Medical Personnel to work at VA; Joint Suicide Prevention; and Sexual Trauma – Section 402.
- December 12
- Secretary Shulkin will meet with executives from **Genoa Healthcare** to discuss mental health. Genoa is the Nation's largest mental health care pharmacy and the company also does medication management therapy and tele-psychiatric services.

- December 12
- Secretary Shulkin will participate in the **Association of American Retired Persons' (AARP) Caregiving Conference**. AARP is bringing together employers, tech innovators, medical providers, public officials, non-profits, and other leaders to talk about how to build a caregiver-friendly society and create a plan to make it reality. Several business leaders are expected to announce new commitments that their organizations are making to support family caregivers.
- December 12-13
- Deputy Secretary Bowman will travel to Augusta, ME to provide the keynote address at the first annual **State of Maine and VA Maine Veterans Symposium**. The theme of the symposium is suicide prevention and awareness, and the agenda will include panel and group discussions with Deputy Secretary Bowman on options available to Veterans who are in crisis. The State of Maine Bureau of Veterans' Services will live-stream many of the sessions for interested stakeholders who cannot attend.
- December 14
- Secretary Shulkin will meet with **VFW's Commander-in-Chief, Keith Harman**, for a meet and greet while he is in town. Bob Wallace, VFW's Executive Director, will also attend.
- December 15
- Secretary Shulkin will speak with former **Senator Bob Kerrey**. Senator Kerrey will brief Secretary Shulkin on the efforts of Virta Health to help Veterans. Virta Health is an enterprise whose goal is to reduce the number of Americans who are suffering from Type Two diabetes.
- December 18
- Secretary Shulkin will host a **breakfast** for leaders from Veterans Service Organizations.

Note: Unless noted otherwise, all events are in the Washington D.C. / Maryland / Virginia metro area.

Peter,

I wanted to shoot you a note and congratulate you on your new role as Chief of Staff for the VA. Based on what you have done at the Office of Accountability and Whistleblower Protection, I am confident you will do a great job.

Obviously, this was not an ideal time to assume your new position. As I told Secretary Shulkin in a phone call last week, it is my hope that the VA can move past the recent drama and get back to focusing on the upcoming community care reform along with implementing new accountability/transparency measures. I think there is a great team in place and it has been unfortunate to so many of them personally attacked by those who think they are defending the VA or the Secretary.

In that regard, I feel compelled to provide some feedback regarding this recent USA Today article:

<https://www.usatoday.com/story/news/politics/2018/02/28/va-secretary-david-shulkins-top-pr-aide-lobbied-congress-get-him-fired-sources-say/380726002/>

I have known Curt Cashour for 5 years and I worked with him closely during the VA wait list scandal. He has always been a consummate professional and I could never see him doing what is described in the above article. As I am sure you know, he also served. Since taking the job at the VA, I have spoken to him at least twice a month and never once did Curt speak ill of the Secretary. He never asked me or anyone else at CVA to help push the Secretary out and in fact only asked us to help defend the agency when it faced attacks from those opposed to the President's agenda.

To be clear, I don't work at the VA on a day to day basis and don't know the full extent of Curt's performance – there could be things (or many things) I am not aware of. But as I said earlier, I think you have some great teammates with you at VACO and it would be a shame to see some of them pushed out over this recent drama that they did not clearly begin.

All that aside – we at CVA are committed to working to improve the VA for the veterans who rely on it. Please let me know how my team and I can be of service to you.

Thank you,

Dan Caldwell

Executive Director

Concerned Veterans for America

COMMISSION ON CARE

1575 I Street, NW ▪ Washington, DC 20005

June 30, 2016

We are honored to submit to the President, through the Secretary of Veterans Affairs, in accordance with the Veterans Access, Choice, and Accountability Act of 2014 (VACAA), the enclosed recommendations for transforming veterans' health care. We believe these recommendations are essential to ensure that our nation's veterans receive the health care they need and deserve, both now and in the future.

We worked with an absolute commitment to putting veterans at the heart of our deliberations, and believe our recommendations will create an integrated, community-based health care system for veterans that will be sustainable for the long term. During the term of the Commission on Care, we evaluated the 4,000-page *Independent Assessment Report*; held public meetings; listened to a broad range of stakeholders, including veterans and leaders of veterans service organizations; made site visits to Veterans Health Administration (VHA) facilities; and exchanged ideas with individual veterans, VA and VHA leaders, VHA employees and health care providers, members of Congress, economists, and health care experts.

Overall, the Commissioners agree with the findings of the *Independent Assessment Report*, which are consistent with the expansive body of other evidence the Commissioners have reviewed. This evidence shows that although care delivered by VA is in many ways comparable or better in clinical quality to that generally available in the private sector, it is inconsistent from facility to facility, and can be substantially compromised by problems with access, service, and poorly functioning operational systems and processes. The Commissioners also agree that America's veterans deserve much better, that many profound deficiencies in VHA operations require urgent reform, and that America's veterans deserve a better organized, high-performing health care system.

VA-18-0457-A-001136

The most public and glaring deficiency was access problems. Congress attempted to solve this problem through a provision in VACAA that directed VHA to implement a temporary program allowing for greater choice. The Commission finds, however, that the design and execution of the *Choice Program* are flawed. In its place, we offer specific recommendations for standing up integrated veteran-centric, community-based delivery networks that will optimize the balance of access, quality, and cost-effectiveness.

The Commission also finds that the long-term viability of VHA care is threatened by problems with staffing, facilities, capital needs, information systems, health care disparities and procurement. Fixing these problems requires deliberate, concurrent, and sequential actions. It also requires fundamental changes in governance and leadership of VHA to guide the organization during the next two decades through the rapid changes coming in demographics, technology, and in the structure of the overall U.S. health care system.

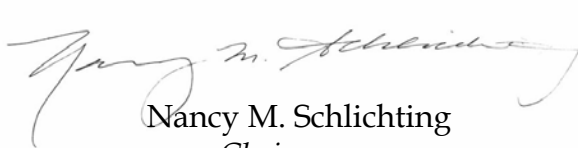

VHA has many excellent clinical programs, as well as research and educational programs, that provide a firm foundation on which to build. As the transformation process takes place, VHA must ensure that the current quality of care is not compromised, and that all care is on a trajectory of improvement. VHA has begun to make some of the most urgently needed changes outlined in the *Independent Assessment Report*, and we support this important work.

Implementing the recommendations in this report will greatly enhance VHA's ongoing reform efforts by providing both a systems-oriented framework and vitally needed changes in organizational structure. Foundational among these changes is forming a governing board to set long-term strategy and oversee the implementation of the transformation process, and building a strong, competency-based leadership system.

The remaining recommendations work in harmony to ensure veterans receive timely access to care, have options for where and how they receive care, are cared for in an environment that embraces diversity and inclusion, and are supported in making informed decisions about their own health and well-being. These recommendations are

not small-scale fixes to finite problems. Instead, they constitute a bold transformation of a complex system that will take years to fully realize, but that our country must undertake to provide our veterans with the high-quality health care they richly deserve.

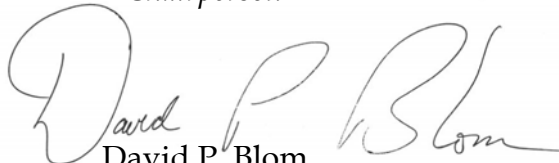

Respectfully Submitted,

COMMISSION ON CARE FINAL REPORT

THIS PAGE INTENTIONALLY LEFT BLANK

EXECUTIVE SUMMARY

Two years ago, a scandal over VHA employees' manipulation of data systems to cover up long appointment scheduling delays made headlines and left the veterans' health care system reeling. The White House and Congress investigated the situation and identified chronic management and system failures, along with a troubled organizational culture. The White House appointed new leadership, including the secretary of veterans affairs (SECVA) and the undersecretary of health (USH), and Congress enacted substantial legislation that established a temporary program, the *Choice Program*, to fund expanded community care to alleviate wait times; directed a comprehensive independent assessment of VHA care delivery and management systems; and established this commission to review that assessment, examine access to care, and look more expansively at how veterans' care should be organized and delivered during the next 2 decades.

The independent assessment included an examination of the hospital care, medical services, and other health care provided in VA medical facilities.¹ The legislation identified 12 specific areas for in-depth evaluation:

- Demographics
- Health Care Capabilities
- Care Authorities
- Access Standards
- Workflow–Scheduling
- Workflow–Clinical
- Staffing/Productivity
- Health Information Technology
- Business Processes
- Supplies
- Facilities
- Leadership

The *Independent Assessment Report* provided a detailed analysis of the assessment and associated findings. The Commission work during the past 10 months was informed by the *Independent Assessment Report*, as well as by 26 days of public meetings (held in 12 sessions) with testimony by a broad range of experts and stakeholders, intensive deliberations, site visits to VHA facilities, and very importantly by the wide-ranging experience and expertise of commission members appointed by congressional leaders and the President.

In an effort to focus the Commission's recommendations and set the tone for subsequent change, the Commissioners developed a vision, a mission, and a set of values to drive reform as shown below. The vision provides the conceptual framework for the model of veterans' health care put forth in this report, and the mission and values shape the content of the recommendations.

Vision

Transforming veterans' health care to enhance quality, access, choice, and well-being.

- *Quality: Provide community-based, innovative care that drives improved outcomes.*
- *Access: Ensure timely access to the best providers for meeting veterans' health care needs.*

¹ Veterans Access, Choice, and Accountability Act of 2014, Pub. L. No. 113–146, § 201(a)(1).

COMMISSION ON CARE FINAL REPORT

- *Choice: Integrate health care within communities to foster convenience and efficiency.*
- *Well-Being: Support veterans in achieving optimal physical and mental health.*

Mission

Provide eligible veterans prompt access to quality health care.

Values

- Provide veteran-centric care.
- Involve all stakeholders, and especially veterans and their families, in designing the evolving future health care for veterans.
- Assimilate veterans into the greater community.
- Create community-based integrated networks to improve health care access and choice for veterans.

The recommendations in this report acknowledge that although VHA provides health care that is in many ways comparable or better in clinical quality to that generally available in the private sector, it is inconsistent from facility to facility, and can be substantially compromised by problems with access, service, and poorly functioning operational systems and processes.

Some of these challenges are not exclusive to VHA, and reflect large-scale problems in the U.S. health system in general, such as acute shortages of primary care doctors and lack of health care capacity in poor and rural areas. Other challenges reflect deficiencies within VHA itself, in areas such as staffing, facilities, capital needs, information systems, healthcare disparities and procurement.

It is important to understand VA's long history as a health care provider, which has included previous cycles of crisis and renewal that offer lessons for the present. It is also important to consider how VHA can implement major reform in a manner that is sustainable. This report addresses both of these issues.

The Commission's focus on access to care clearly highlighted the need for a long-range strategic evaluation of the veterans' health system. Access problems were the primary catalyst for the law establishing this body, and an examination of access has necessarily been central to the commission's work; however, Congress wisely directed the Commission to undertake a strategic examination as well.

The report begins with an *Introduction* that addresses the controversy over veterans' health care and gives a brief description of the Commission's vision for improving it. There are three main recommendation sections: *Redesigning the Veterans' Health Care Delivery System*; *Governance, Leadership, and Workforce*; and *Eligibility*. Each section includes detailed discussions of the high-level areas in which change must occur in the respective areas to facilitate bold reform. The format for each discussion includes identification of the problem, the Commission's recommendations for addressing the problem, background information, analysis, and implementation steps for Congress, VA, and other agencies. This executive summary provides a brief overview of each of the recommendations.

For the ease of our readers, the appendices contain all additional content. Of particular interest are appendices on *Financing the Vision and Model*, *Leadership Implementation*, *History as a Context for Systemic Transformation*, *Veteran Feedback*, and *Additional Resources*. These and other appendices provide policymakers and those charged with implementing the plan with a clear picture of the rationale for the recommendations and the context that frames them.

Recommendations

The Commission does not intend for these recommendations to be piecemeal fixes to everyday problems. Instead, they are presented as the foundation for far-reaching organizational transformation that adheres to a systems approach. The Commission's recommendations comprise the essential elements for such transformation.

Redesigning the Veterans' Health Care Delivery System

The VHA Care System

Recommendation #1: Across the United States, with local input and knowledge, VHA should establish high-performing, integrated community health care networks, to be known as the VHA Care System, from which veterans will access high-quality health care services.

Due to changing veteran demographics, increasing demand for VHA care in some markets and declining demand in other markets, more veterans being adjudicated as having service-connected conditions, aging facilities, provider shortages and vacancies, and other factors, VHA faces a misalignment of capacity and demand that threatens to become worse over time. Some facilities and services have low volumes of care that can create quality concerns, and in high demand areas, VHA often lacks the capacity to avoid lengthy wait times and other access issues.

With passage of the Veterans Access, Choice, and Accountability Act of 2014 (VACAA), Congress tasked VHA with creating the temporary *Choice Program*. It was designed to alleviate access issues by allowing for greater use of community care for enrolled veterans who meet the law's wait-time or distance-to-a-VHA-facility requirements.

Both the design and implementation of the law have proven to be flawed. VHA must instead establish high-performing, integrated, community-based health care networks, to be known as the VHA Care System.

The Commission Recommends That . . .

- VHA Care System governing board (see recommendation on p. 94) develop a national delivery system strategy, including criteria and standards for creating the VHA Care System, comprising high-performing, integrated, community-based health care networks, including VHA providers and facilities, Department of Defense and other federally-funded providers and facilities, and VHA-credentialed community providers and facilities.

COMMISSION ON CARE FINAL REPORT

- Integrated community-based health care networks be developed with local VHA leadership input and knowledge to ensure their composition is reflective of local needs and veterans' preferences.
- Integrated, community-based health care networks must include existing VHA special-emphasis resources (e.g., spinal cord injury (SCI), blind rehabilitation, mental health, prosthetics, etc.). In areas for which VHA has special expertise, VHA should also play the role of enhancing care in the local communities by collaborating with community care providers to implement services that may not exist, focused on the needs of veterans (e.g., expansion of integrated primary care/mental health care).
- Networks be built out in a well-planned, phased approach, overseen by the new governing board, which determines the criteria for the phases to ensure effective execution of the strategy.
- VHA credential community providers. To qualify for participation in community networks, providers must be fully credentialed with appropriate education, training, and experience, provide veteran access that meets VHA standards, demonstrate high-quality clinical and utilization outcomes, demonstrate military cultural competency, and have capability for interoperable data exchange.
- Providers in the networks should be paid using the most contemporary payment approaches available to incentivize quality and appropriate utilization of health care services (i.e., using Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) physician payment methodology being proposed by CMS).
- The highest priority access to the VHA Care System be provided to service-connected veterans, and low-income veterans also be of high priority.
- The current time and distance criteria for community care access (30 days and 40 miles) be eliminated.
- Veterans choose a primary care provider from all credentialed primary care providers in the VHA Care System.
- All primary care providers in the VHA Care System coordinate care for veterans.
- VHA Care System provide overall health care coordination and navigation support for veterans.
- Veterans choose their specialty care providers from all credentialed specialty care providers in the VHA Care System with a referral from their primary care provider.

The recommendations above work together to support the VHA Care System, as outlined in Table 1 below.

Table 1. VHA Care System Operations

Key Component	Expectations
Choice	<ul style="list-style-type: none"> ▪ Veterans can choose a primary care provider from all credentialed primary care providers in the VHA Care System. ▪ Veterans can receive their care at any VHA Care System location across the country with coordination by their primary care provider.
Care Coordination	<ul style="list-style-type: none"> ▪ All primary care providers in the VHA Care System must coordinate care for veterans. Specialty care is exclusively accessed through referrals from primary care providers. ▪ Veterans can choose their specialty care providers from all credentialed specialty care providers in the VHA Care System with a referral from their primary care provider. ▪ Although primary care is traditionally defined as internal medicine or family practice, VHA may designate other specialty providers as primary care coordinators based on veterans' specific health needs (e.g., endocrinologists for diabetic patients, neurologists for patients with Parkinson's disease, OB/GYN for female patients). ▪ VHA will have overall responsibility of ensuring care coordination for veterans, including complex care navigation.

Clinical Operations

Recommendation #2: Enhance clinical operations through more effective use of providers and other health professionals, and improved data collection and management.

A shortage of providers and clinical managers, combined with inadequate support staff and policies that fail to optimize the talents and efficiency of all health professionals, detract from the effectiveness of VHA health care.

The problem starts with inadequate numbers of providers. Ninety-four percent of VHA sites with clinically meaningful access delays indicated that increasing the number of licensed independent practitioners was critical or very important to increasing access.²

At the same time, ineffective use of providers and other health professionals contributes to suboptimal productivity. Highly trained clinical personnel are often unable to perform at the top of their license, meaning they spend much of their time performing tasks that should be done by support staff.³ For example, doctors and nurses often escort patients; clean examination rooms; take vital signs; schedule; document care; and place the orders for consultations, prescriptions, or other necessary care that could be done more cost effectively by support staff. Twenty-three percent of VHA providers identified “not working to top of provider licensure” as a barrier in health care provision.⁴

² RAND Corporation, *Independent Assessment of the Health Care Delivery Systems and Management Processes of the Department of Veterans Affairs, Assessment B (Health Care Capabilities)*, 95, accessed June 3, 2016, http://www.va.gov/opa/choiceact/documents/assessments/assessment_b_health_care_capabilities.pdf.

³ Grant Thornton, *Independent Assessment of the Health Care Delivery Systems and Management Processes of the Department of Veterans Affairs, Assessment G (Staffing/Productivity/Time Allocation)*, ix, accessed June 3, 2016, http://www.va.gov/opa/choiceact/documents/assessments/Assessment_G_Staffing_Productivity.pdf.

⁴ Ibid., 95.

COMMISSION ON CARE FINAL REPORT

VHA is also currently failing to optimize use of advanced practice registered nurses (APRNs). APRNs are clinicians with advanced degrees who provide primary, acute, and specialty health care services.

The Commission Recommends That. . .

- VHA increase the efficiency and effectiveness of providers and other health professionals and support staff by adopting policies to allow them to make full use of their skills.
- Congress relieve VHA of bed closure reporting requirements under the Millennium Act.
- VHA continue to hire clinical managers and move forward on initiatives to increase the supply of medical support assistants.

Recommendation #3: Develop a process for appealing clinical decisions that provides veterans protections at least comparable to those afforded patients under other federally supported programs.

All federal providers and most health insurers have processes to ensure that beneficiaries have enforceable protections that allow them to obtain medically necessary care within their health benefits package.⁵ Such processes are imperative, particularly for care plans using capitated payment models for which there are incentives to conserve resources. Most veterans, and even their advocates, are unsure of VHA's process for resolving clinical disputes. This may be because there is not one policy in place for VHA, but 18 (one for each Veteran Integrated Service Network [VISN]).⁶

As part of the MyVA initiative, the Secretary of Veterans Affairs has set a goal of world-class service for veterans, including a proactive patient advocacy team that is integrated into patient-centered care and cultural transformation plans.⁷ The processes in place for patient grievances and central protections to ensure access to medically necessary care remain poorly understood despite these efforts. Also, they may be less comprehensive and fair than appeals processes private health insurers and other federal payers are required to provide.⁸

The Commission Recommends That . . .

- VHA convene an interdisciplinary panel to assist in developing a revised clinical-appeals process.

⁵ MaryBeth Musumeci, *A Guide to the Medicaid Appeals Process*, accessed June 3, 2016, <https://kaiserfamilyfoundation.files.wordpress.com/2013/01/8287.pdf>.

⁷ "About the VHA Patient Advocate and Veteran Experience Program (VHA PA & VEP)," accessed from VA Intranet, May 31, 2016, <http://vaww.infoshare.va.gov/sites/OPCC/VEP/SitePages/vep-about.aspx>.

⁸ MaryBeth Musumeci, *A Guide to the Medicaid Appeals Process*, accessed June 3, 2016, <https://kaiserfamilyfoundation.files.wordpress.com/2013/01/8287.pdf>. VHA Clinical Appeals, VHA Directive 2006-057 (2006).

Recommendation #4: Adopt a continuous improvement methodology to support VHA transformation, and consolidate best practices and continuous improvement efforts under the Veterans Engineering Resource Center.

VHA has not effectively empowered its staff to identify problems and make changes to improve the overall quality of care.

Best practices exist in pockets of VHA; however, communication and support for implementation appear to be challenges. Various facilities indicate best practices are in place but seem isolated rather than widely adopted. Facilities often struggle to implement best practices, and information sharing is limited and ad hoc.⁹

VHA has a program of system engineering — Veterans Engineering Resource Center (VERC) — that can assist with transformation efforts, but it is not well known throughout VHA and until recently has been underutilized.

The Commission Recommends That . . .

- The Veterans Engineering Resource Center (VERC) be tasked to assist in transformation efforts, particularly in areas such as access and in areas that affect systemwide activities and require substantial change, such as human resources management, contracting, purchasing, and information technology.
- The many idea and innovation portals within VHA be consolidated under VERC.
- A culture to inspire and support continuous improvement of workflow processes be developed and fully funded.
- VHA's reengineering centers be enabled to identify proactively problem areas within the system and offer assistance.

Health Care Equity

Recommendation #5: Eliminate health care disparities among veterans treated in the VHA Care System by committing adequate personnel and monetary resources to address the causes of the problem and ensuring the VHA Health Equity Action Plan is fully implemented.

The Office of Health Equity (OHE), tasked with eliminating health disparities by building cultural and military competence within VHA, has not been given the resources or level of authority needed to be successful. Until VHA leadership establishes the elimination of health care disparities as a critical strategic priority and commits the resources required to address this problem, health care disparities will continue to persist among veteran patients.

⁹ The MITRE Corporation, *Independent Assessment of the Health Care Delivery Systems and Management Processes of the Department of Veterans Affairs*, Assessment F (Workflow—Clinical), 14 and A-2, accessed January 1, 2016, http://www.va.gov/opa/choiceact/documents/assessments/Assessment_F_Workflow_Clinical.pdf.

COMMISSION ON CARE FINAL REPORT

A systematic review of VHA in 2007 identified the existence of racial and ethnic health inequalities. Health care disparities exist among veterans and especially among minority and vulnerable veterans.¹⁰ VHA cannot transform veterans' health care to enhance quality, access, choice, and well-being unless these health care disparities are addressed and eliminated. VHA has a plan for addressing these issues—the Health Equity Action Plan (HEAP)—but it has not been fully implemented.

The Commission Recommends That . . .

- VHA work to eliminate health disparities by establishing health care equity as a strategic priority.
- VHA provide the Office of Health Equity adequate resources and level of authority to successfully build cultural and military competence among all VHA Care System providers and employees.
- VHA ensure that the Health Equity Action Plan is fully implemented with adequate staffing, resources, and support.
- VHA increase the availability, quality, and use of race, ethnicity, and language data to improve the health of minority veterans and other vulnerable veteran populations with strong surveillance systems that monitor trends in health status, patient satisfaction, and quality measures.¹¹

Facility and Capital Assets

Recommendation #6: Develop and implement a robust strategy for meeting and managing VHA's facility and capital-asset needs.

Veterans who turn to VHA to meet health care needs should expect that its facilities have been designed and equipped to provide state-of-the-art care. As health care continues to move to ever greater use of ambulatory care delivery, VHA not only lacks modern health care facilities in many areas, but generally lacks the means to readily finance and acquire space, to realign its facilities as needed, or even to divest itself easily of unneeded buildings. Many of those barriers are statutory in nature, although VA's own internal processes compound its capital asset challenges. Establishing integrated care networks holds the promise of markedly improving veterans' access to care. That promise cannot be realized without transformative changes to VHA's capital structure. Political resistance doomed previous attempts to better align VHA's capital assets and veterans' needs. It is critical that an objective process be established to streamline and modernize VHA facilities in the context of building out the VHA Care System's integrated networks to ensure the ideal balance of facilities within each network. VHA needs as

¹⁰ Somnath Saha et al., *Racial and Ethnic Disparities in the VA Healthcare System: A Systematic Review*, U.S. Department of Veterans Affairs, Health Services Research & Development Service, June 2007, accessed June 22, 2016, <http://www.hsrd.research.va.gov/publications/esp/RacialDisparities-2007.pdf>.

¹¹ Kathleen G. Sebelius, Secretary, Department of Health and Human Services, *HHS Action Plan to Reduce Racial and Ethnic Health Disparities: A Nation Free of Disparities in Health and Health Care*, accessed March 30, 2016, http://www.minorityhealth.hhs.gov/npa/files/Plans/HHS/HHS_Plan_complete.pdf.

much control as possible to drive the process to ensure that all facility plans are fully integrated with the strategic vision for the VHA Care System.

The Commission Recommends That . . .

- VA leaders streamline and strengthen the facility and capital asset program management and operations.
- The VHA Care System governing board be responsible for oversight of facility and capital asset management.
- Congress provide VHA greater budgetary flexibility to meets its facility and capital asset needs and greater statutory authority to divest itself of unneeded buildings.
- Congress enact legislation to establish a VHA facility and capital asset realignment process based on the DoD Base Realignment and Closure Commission (BRAC) process to be implemented as soon as practicable. The Commission recommends the VHA Care System governing board subsequently make facility decisions in alignment with system needs.
- New capital be focused on ambulatory care development to reflect health care trends.
- VHA move forward immediately with repurposing or selling facilities that have already been identified as being in need of closing.

Information Technology

Recommendation #7: Modernize VA's IT systems and infrastructure to improve veterans' health and well-being and provide the foundation needed to transform VHA's clinical and business processes.

To operate a high-performing VHA Care System, VA requires a comprehensive electronic health care information platform that is interoperable with other systems; enables scheduling, billing, claims, and payment, and provides tools that empower veterans to better manage their health. Creating a single, uniform, integrated IT platform will promote care continuity, cost savings, and consistent care delivery and business processes.¹² VA's antiquated, disjointed clinical and administrative systems cannot support these essential clinical and business processes and consequently are unable to support the Commission's transformation vision for VHA. In addition, VHA lacks an experienced senior health care IT leader focusing on the strategic health care IT needs of veterans.

The Commission Recommends That . . .

- VHA establish a Senior Executive Service (SES)-level position of VHA Care System chief information officer (CIO), selected by and reporting to the chief of VHA Care System (CVCS) with a dotted line to the VA CIO. The VHA CIO is responsible for developing

¹² The MITRE Corporation, *Independent Assessment of the Health Care Delivery Systems and Management Processes of the Department of Veterans Affairs, Volume 1: Integrated Report*, 43-44, accessed February 25, 2016, http://www.va.gov/opa/choiceact/documents/assessments/integrated_report.pdf.

COMMISSION ON CARE FINAL REPORT

and implementing a comprehensive health IT strategy and developing and managing the health IT budget.

- VHA procure and implement a comprehensive, commercial off-the-shelf (COTS) information technology solution to include clinical, operational and financial systems that can support the transformation of VHA as described in this report.

Supply Chain

Recommendation #8: Transform the management of the supply chain in VHA.

Effective management of all aspects of the supply chain has become a competitive differentiator for health care delivery systems. Modernization and automation of the supply chain in health care have the potential to save hundreds of millions of dollars, if done well. VHA cannot modernize its supply chain management and create cost efficiencies because it is encumbered with confusing organizational structures, no expert leadership, antiquated IT systems that inhibit automation, bureaucratic purchasing requirements and procedures, and an ineffective approach to talent management.

The problems are systemic. The organizational structure is chaotic, contracting operations are not aligned to business functions, and processes are poorly constructed, lacking standardization across the organization. Information technology infrastructure is inadequate, and it lacks appropriate interoperability among IT systems. VHA is unable to produce high-quality data on supply chain utilization and does not effectively manage the process using the insights such data could provide.¹³

The Commission Recommends That . . .

- VHA establish an executive position for supply chain management, the VHA chief supply chain officer (CSCO), to drive supply chain transformation in VHA. This individual should be compensated relative to market factors.
- VA and VHA reorganize all procurement and logistics operations for VHA under the CSCO to achieve a vertically integrated business unit extending from the front line to central office. This business unit would be responsible for all functions in a fully integrated procure-to-pay cycle management that includes policy and procedures, contract development and solicitation, ordering, payment, logistics and inventory management, vendor relations and integration, data analytics and supply chain visibility, IT alignment, clinician engagement and value analysis, and talent management across all these supply chain functions.
- VA and VHA establish an integrated IT system to support business functions and supply chain management; appropriately train contracting and administrative staff in supply chain management; and update supply chain management policy and procedures to be consistent with best practice standards in health care.

¹³ The MITRE Corporation, *Independent Assessment of the Health Care Delivery Systems and Management Processes of the Department of Veterans Affairs, Assessment J (Supplies)*, vi, accessed April 29, 2016, http://www.va.gov/opa/choiceact/documents/assessments/Assessment_J_Supplies.pdf.

- VHA support the Veterans Engineering Resource Center (VERC) Supply Chain Modernization Initiative including consistent support from leadership, continued funding and personnel, and the alignment of plans and funding within OIT to accomplish the modernization goals.

Governance, Leadership, and Workforce

Board of Directors

Recommendation #9: Establish a board of directors to provide overall VHA Care System governance, set long-term strategy, and direct and oversee the transformation process.

The existence—and concealment—of unacceptably long delays in care at the Phoenix VA Medical Center, and similar problems at multiple other VA medical centers, had both direct and indirect causes. Weak governance was found to be among those indirect causes.¹⁴ As the authors of a root-cause analysis of the Phoenix scandal highlighted, “a governance gap in leadership continuity and strategic oversight from one executive leadership team to another” contributed to the wait-time problems.¹⁵ The report authors observed, “Unlike other health care systems, VHA does not have a governance mechanism to fill the role of a board of directors.”¹⁶ The governance limitations made evident in the Phoenix scandal have profound implications for the long term. As discussed in this report, the Commission believes VHA must institute a far-reaching transformation of both its care delivery system and the management processes supporting it. Changes of the magnitude facing VHA would be difficult for any health care system to achieve. A transformation will take years to accomplish and must be sustained over time. Yet the short tenure of senior political appointees, each administration’s expectations for short-term results,¹⁷ and VHA’s operating in a “dynamic environment [in which it is] answering to a large number of stakeholders, sometimes with competing demands”¹⁸ offer little reason for optimism that real transformation could take hold without fundamental changes in governance.

The Commission Recommends That . . .

- Congress provide for the establishment of an 11-member board of directors accountable to the President, responsible for overall VHA Care System governance, and with decision-making authority to direct the transformation process and set long-term strategy. The Commission also recommends the governing board not be subject to the Federal Advisory Committee Act (FACA) and be structured based on the key elements included in Table 5.

¹⁴ The MITRE Corporation, *Independent Assessment of the Health Care Delivery Systems and Management Processes of the Department of Veterans Affairs, Volume 1: Integrated Report*, xvi, accessed June 15, 2016, http://www.va.gov/opa/choiceact/documents/assessments/integrated_report.pdf.

¹⁶ Ibid.

¹⁷ Ibid.

¹⁸ The MITRE Corporation, *Independent Assessment of the Health Care Delivery Systems and Management Processes of the Department of Veterans Affairs, Volume 1: Integrated Report*, xiv, accessed June 15, 2016, http://www.va.gov/opa/choiceact/documents/assessments/integrated_report.pdf.

COMMISSION ON CARE FINAL REPORT

- The Board recommend a chief of VHA Care System (CVCS) to be approved by the President for an initial 5-year appointment. Additionally, the Commission recommends the governing board be empowered to reappoint this individual for a second 5-year term, to allow for continuity and to protect the CVCS from political transitions. If necessary, the CVCS can be removed by mutual agreement of the President and the governing board.

Leadership

Recommendation #10: Require leaders at all levels of the organization to champion a focused, clear, benchmarked strategy to transform VHA culture and sustain staff engagement.

High-performing organizations have healthy cultures in which diverse staff feel respected and engaged at work. These workers, in turn, are better able to demonstrate compassion and caring toward customers in their delivery of high-quality services. Leaders at all levels of the organization are responsible for promoting a positive organizational environment and culture through how they treat staff and the systematic approach they take to decision making and management. VHA has among the lowest scores in organizational health in government. For the past decade, VHA's executives have not emphasized the importance of leadership attention to cultural health, and it has not been well integrated in training, assessments, and performance accountability systems.

The Commission Recommends That . . .

- VHA create an integrated and sustainable cultural transformation by aligning all programs and activities around a single, benchmarked concept.
- VHA align leaders at all levels of the organization in support of the cultural transformation strategy and hold them accountable for this change.
- VHA establish a transformation office to drive progress of this transformation and report on it to the CVCS and the new VHA Care System board of directors (see governance discussion in the previous section).

Recommendation #11: Rebuild a system for leadership succession based on a benchmarked health care competency model that is consistently applied to recruitment, development, and advancement within the leadership pipeline.

VHA, like any large organization, requires excellent leaders to succeed. Succession planning and robust structured programs to recruit, retain, develop, and advance high potential staff are essential to maintaining a pipeline of new leaders. In health care, leadership programs must prepare candidates with the specialized knowledge and skills required of health care executives, while also helping to mature their leadership traits. VHA does not use a single leadership competency model, and what it does use is not specific to health care or benchmarked to the private sector. VHA also does not use competency models as a tool to establish standards for hiring, assessment, and promotion. As a result, executive leaders and

promising staff members do not have the tools they need to guide career transitions and ensure VHA has the leaders it needs for the future.

The Commission Recommends That . . .

- VA establish, as an OMB management priority for VHA, the goal of implementing an effective leadership management system in the agency.
- VHA executives prioritize the leadership system for funding, strategic planning, and investment of their own time and attention.
- VHA adopt and implement a comprehensive system for leadership development and management that includes a strategic priority of diversity and inclusion.
- Congress create more opportunities to attract outside leaders and experts to serve in VHA through new and expanded authority for temporary rotations and direct hiring of health care management training graduates, senior military treatment facility leaders, and private not-for-profit and for-profit health care leaders and technical experts.

Recommendation #12: Transform organizational structures and management processes to ensure adherence to national VHA standards, while also promoting decision making at the lowest level of the organization, eliminating waste and redundancy, promoting innovation, and fostering the spread of best practices.

Leadership structures and processes should be organized to promote agile, clear decision making, the free flow of ideas, and identification of organizational priorities, as well as make clear reporting relationships and lines of accountability within the organization. VHA currently lacks effective national policies, a rational organizational structure, and clear role definitions that would support effective leadership of the organization. The responsibilities of VHA Central Office (VHACO) program offices are unclear, and the functions overlap or are duplicated. The role of the VISN is not clear, and the delegated responsibilities of the medical center director are not defined.

The Commission Recommends That . . .

- VHA redesign VHACO to create high-performing support functions that serve VISNs and facilities in their delivery of veteran-centric care.
- VHA clarify and define the roles and responsibilities of the VISNs, facilities, and reorganized VHA program offices in relation to one another, and within national standards, push decision making down to the lowest executive level with policies, budget, and tools that support this change.
- VHA establish leadership communication mechanisms within VHACO and between VHACO and the field to promote transparency, dialogue, and collaboration.
- VHA establish a transformation office, reporting to the CVCS with broad authority and a supporting budget to accomplish the transformation of VHA and manage the large-scale changes outlined throughout this report.

COMMISSION ON CARE FINAL REPORT

Recommendation #13: Streamline and focus organizational performance measurement in VHA using core metrics that are identical to those used in the private sector, and establish a personnel performance management system for health care leaders in VHA that is distinct from performance measurement, is based on the leadership competency model, assesses leadership ability, and measures the achievement of important organizational strategies.

To achieve the Commission’s vision of quality, access, and choice for veterans, VHA must effectively measure outcomes and hold leaders accountable for improvement. VHA can measure itself against internal best practices, but veterans deserve care that uniformly meets or exceeds private-sector quality standards. A clear, concise, balanced measure set—identical to private-sector standards—will give leadership, staff, and administrators focus and direction for their work. VHA leaders are responsible for delivering these quality outcomes to veterans. They do so by exercising leadership skills and traits in their management and direction to staff. Short-term gains can be realized at the expense of staff morale and well-being, but the long-term health of the organization cannot. Therefore, organizations must be sure to assess leaders’ performance not just on *what* they achieve but *how* they achieve it.

The Commission Recommends That . . .

Organizational Performance Measurement

- VHA streamline organizational performance measures, emphasize strategic alignment and meaningful effect, and use benchmarked measures that allow a direct comparison to the private sector.
- The new Office for Organizational Excellence work with experts to reorganize its internal structure to align business functions with field needs and consolidate and eliminate redundant or low-priority activities.

Personnel Performance Management System

- VHA create a new performance management system appropriate for health care executives, tied to health care executive competencies, and benchmarked to the private sector.
- The CVCS and all secondary raters hold primary raters accountable for creating meaningful distinctions in performance among leaders.
- VHA recognize meaningful distinctions in performance with meaningful awards.

Diversity and Cultural Competence

Recommendation #14: Foster cultural and military competence among all VHA Care System leadership, providers, and staff to embrace diversity, promote cultural sensitivity, and improve veteran health outcomes.

The VHA Care System must implement a systemic approach to developing the cultural and military competence of its leadership, staff, and providers, as well as measure the effects of

VA-18-0457-A-001159

these efforts on improving health outcomes for vulnerable veterans. Although VHA has made some strides in specific program areas, cultural competency is an essential part of providing effective care to veterans because of the unique needs military service, and especially participation in combat operations, may cause.

The Commission Recommends That . . .

- VHA implement a systemic approach to establishing cultural and military competence across VHA and its community providers, and provide the resources required to fully integrate the related strategy into veterans' care delivery.
- Cultural and military competency training be required on a regular basis for VHA Care System leadership, staff, and providers.
- Cultural and military competency be criteria for allowing community providers to participate in the VHA Care System.

Workforce

Recommendation #15: Create a simple-to-administer alternative personnel system, in law and regulation, which governs all VHA employees, applies best practices from the private sector to human capital management, and supports pay and benefits that are competitive with the private sector.

VHA has staffing shortages and vacancies at every level of the organization and across numerous critical positions, including facility leadership, clinical staff, supply chain personnel, and customer service staff. VHA lacks competitive pay, must use inflexible hiring processes, and continues to use a talent management approach from the last century. A confusing mix of personnel authorities and position standards make staffing and management a struggle for both supervisors and human resources personnel. Title 5 was not created with a modern health care delivery system in mind and falls short of offering what is needed to create a high-performing health care system.

The Commission Recommends That . . .

- Congress create a new alternative personnel system that applies to all VHA employees and falls under Title 38 authority. The system must simplify human capital management in VHA; increase fairness for employees; and improve flexibility to respond to market conditions relating to compensation, benefits, and recruitment.
- VHA write and implement regulations for the new alternative personnel system, in collaboration with union partners, employees, and managers, that does all of the following:
 - Meets benchmark standards for human capital management in the health care sector and is easy for HR professionals and managers to administer.
 - Promotes veteran preferences and hiring.

COMMISSION ON CARE FINAL REPORT

- Embodies merit system principles (merit-based, nonpartisan, nondiscrimination, due process) through simplified, sensible processes that work for managers and employees.
 - Creates one human capital management process for all employees in VHA for time and leave, compensation, advancement, performance evaluation, and disciplinary standards/processes.
 - Provides due process and appeals standards to adverse personnel actions.
 - Allows for pay advancement based on professional expertise, training, and demonstrated performance (not time-in-grade).
 - Promotes flexibility in organizational structure to allow positions and staff to grow as the needs of the organization change and the success of each individual merits.
 - Establishes simplified job documentation that is consistent across job categories and describes a clear path for staff professional development and career trajectories for advancement.
 - Eliminates most distinctions (except for benefits) between part-time and full-time employees.
 - Grandfathers current employees with respect to pay and benefits.
- VHA ensure all positions, to include human resources management staff, are adequately trained to fulfill duties.

Recommendation #16: Require top executives to lead the transformation of HR, commit funds, and assign expert resources to achieve an effective human capital management system.

Effective planning for and management of human capital are core enabling requirements for any business: If the system that supports the employees fails, then the organization fails. Executive leaders must ensure the success of human capital management; however, for too long in VA, human capital management has not been a top priority for leadership time, attention, and funding support. Human capital management personnel must be equal members of the leadership team, contributing fully to strategic decisions and planning for future initiatives.

The Commission Recommends That . . .

- VHA hire a chief talent leader who holds responsibility for the operation's entire HR enterprise, is invested with the authority and budget to accomplish the envisioned transformation, and reports directly to the chief of VHA Care System.
- VA and VHA prioritize the transformation of human capital management with adequate attention, funding, and continuity of vision from executive leaders.
- VA align HR functions and processes to be consistent with best practice standards of high-performing health care systems.

VA-18-0457-A-001161

- VA Human Resources and Administration and the Office of Information and Technology should create an HR information technology plan to support modernization of the HR processes and to provide meaningful data for tracking, quality improvement, and accountability.

Eligibility

Recommendation #17: Provide a streamlined path to eligibility for health care for those with an other-than-honorable discharge who have substantial honorable service.

Addressing access issues is at the core of the Commission's charge. Veterans face a range of barriers to care, from geographic barriers to facility-specific problems, such as long wait times for an appointment or lack of evening or weekend hours. These barriers, which affect even those with service-incurred health conditions, can be overcome. Some former service members, however, have encountered a more fundamental barrier when applying for care. Because of the character of their discharge, they are not considered veterans, and thus are not eligible for VA care.

In some cases, individuals have been dismissed from military services with an other-than-honorable (OTH) discharge because of actions that resulted from health conditions (such as traumatic brain injury [TBI], posttraumatic stress disorder [PTSD], or substance use) caused by, or exacerbated by, their service. Under VA regulations, these individuals do not meet the definition of a veteran, and are therefore ineligible for VHA medical care. This situation leaves a group of former service members who have service-incurred health issues (namely mental health issues) unable to receive the specialized care VHA provides.

The Commission Recommends That . . .

- VA revise its regulations to provide tentative eligibility to receive health care to former service members with an OTH discharge who are likely to be deemed eligible because of their substantial favorable service or extenuating circumstances that mitigate a finding of disqualifying conduct.

Recommendation #18: Establish an expert body to develop recommendations for VA care eligibility and benefit design.

Although VHA continues to offer the promise of health care to all eligible veterans, its capacity to meet that promise is constrained by appropriated funding.¹⁹

The Commission Recommends That . . .

- The President or Congress task another body to examine the need for changes in eligibility for VA care and/or benefits design, which would include simplifying eligibility criteria, and may include pilots for expanded eligibility for nonveterans to use

¹⁹ The MITRE Corporation, *Independent Assessment of the Health care Delivery Systems and Management Processes of the Department of Veterans Affairs, Volume 1: Integrated Report*, 24, accessed April 11, 2016, http://www.va.gov/opa/choiceact/documents/assessments/integrated_report.pdf.

COMMISSION ON CARE FINAL REPORT

underutilized VHA providers and facilities, providing payment through private insurance.

- The SECVA revise VA regulations to provide that service-connected-disabled veterans be afforded priority access to care, subject only to a higher priority dictated by clinical care needs.

Conclusion

The next 20 years will see continued dynamic change in health care, well beyond the Commission's capacity to forecast the future. What is clear, though, is that the concept of access to care is itself undergoing marked change. The potentially explosive growth of telemedicine, increasing emphasis on preventive care, and likely proliferation of technologies that permit routine home-based health monitoring and care of patients with chronic illnesses will dramatically affect access needs. We are also witnessing profound changes in the nature of patient-provider engagement and in where and how care is delivered. VHA must keep pace with, and even be a leader in, these changes.

Patient-access is a sharp lens through which to gauge how well a health system is functioning, particularly if we understand access to reflect not only timeliness, but care quality, and patient expectations. Providing veterans timely care remains a challenge today, notwithstanding establishment of the *Choice Program* and VHA leadership's focus on improving access. Access is not a problem for VHA alone: Delivering timely care is challenging for many providers and health systems, in part due to the unavailability of providers in some communities and national shortages of some categories of health professionals.

For VHA, an important conclusion is that providing timely access to care is not simply a matter of increasing staffing, modernizing IT systems, installing new leadership, or any other single effort, although all of these changes are needed. As the *Independent Assessment Report* emphasized, multiple systemic problems have contributed to VHA's access problems, and an integrated systems approach is essential to address the myriad issues affecting access to care and the service veterans receive.

The Commission's report underscores the importance of transforming VA health care delivery and the systems that underlie it. In employing the term transformation, the Commission means fundamental, dramatic change—change that requires new direction, new investment, and profound reengineering. Some will question that view, and perhaps challenge the notion that the nation should invest further in the VA health care system. None, however, should question the nation's obligation to those who sustained injury or illness in service, or who are at increased health risk as a result of deployments to combat zones or other service-related experiences.

In this report, the Commission fully acknowledges the deep problems the *Independent Assessment Report* described. Importantly, though, the Commission recognizes the VA health care system has valuable strengths, including some unique and exceptional clinical programs and services tailored to the needs of the millions of veterans who turn to VA for care. For

VA-18-0457-A-001163

example, VHA's behavioral health programs, particularly with their integration of behavioral health and primary care, are largely unrivalled, and profoundly important to many who have suffered from the effects of battle and for whom VHA is a safety net. Even considering these strengths, some may question how a system beleaguered with the problems VHA faces can achieve lofty transformation goals. This is not the first time VHA has faced challenges; however, and history has demonstrated that with appropriate structure and strategies in place, transformation can be achieved and sustained.

Transformation is a difficult process that will require careful stewardship, sustainable leadership, and unwavering focus and commitment to the long-term vision and strategy. The Commission's recommendations in some areas acknowledge VHA's efforts to begin the transformation process and suggest that where these efforts align with the Commission's recommendations, they should be sustained. Reaping the fruits of transformation will take more than a single Congress or a single 4-year administration. For this reason, the Commission strongly recommends a new governance model and an extended term for the leader of the VHA Care System to sustain a continuing transformation. Even should VHA implement all the Commission's recommendations, it will not succeed in transforming on its own; it will require the full support from both the White House and Congress. Our nation's veterans deserve no less.

COMMISSION ON CARE FINAL REPORT

THIS PAGE INTENTIONALLY LEFT BLANK

INTRODUCTION

Two years ago, a scandal over VHA employees manipulating data systems to cover up long delays in scheduling care left the veterans' health care system reeling. The White House and Congress investigated the situation and identified chronic management and system failures, along with a troubled organizational culture. In response, the White House appointed new leadership, including the secretary of veterans affairs (SECVA) and undersecretary of health (USH), and Congress enacted substantial legislation that established a temporary program, the *Choice Program*, to fund expanded community care to alleviate wait times; directed a comprehensive independent assessment of VHA care delivery and management systems; and established this commission to review that assessment, examine access to care, and look more expansively at how veterans' care should be organized and delivered during the next 2 decades.

The Commission on Care's work during the past 10 months was informed by the *Independent Assessment Report*, as well as by 26 days of public meetings (held in 12 sessions) with testimony by a broad range of experts and stakeholders, intensive deliberations, site visits to VHA facilities, and very importantly by the wide-ranging experience and expertise of commission members appointed by congressional leaders and the President.

The charge given this Commission, with its emphasis on access to care, reflects the need for a long-range strategic evaluation of the veterans' health system. Access problems were the primary catalyst for the law establishing this body, and an examination of access has necessarily been central to the Commission's work; however, Congress wisely directed the Commission to undertake a strategic examination as well.

The next 20 years will see continued dynamic change in health care, well beyond the Commission's capacity to forecast the future. What is clear, however, is that the concept of access to care is itself undergoing marked change. The potentially explosive growth of telemedicine, increasing emphasis on preventive care, and likely proliferation of technologies that permit routine home-based health monitoring and care of patients with chronic illnesses will dramatically affect access needs. We are also witnessing profound changes in the nature of patient-provider engagement, and in where and how care is delivered. VHA must keep pace with, and even be a leader, in these changes.

Patient-access is a sharp lens through which to gauge how well a health system is functioning, particularly if we understand *access* to reflect not only timeliness, but care quality and patient expectations. Providing veterans timely care remains a challenge today, notwithstanding establishment of the *Choice Program* and VHA leadership's focus on improving access. Access is not a problem for VHA alone; Delivering timely care is challenging for many providers and health systems, in part due to the unavailability of providers in some communities and national shortages of some categories of health professionals.

For VHA, an important conclusion is that providing timely access to care is not simply a matter of increasing staffing, modernizing IT systems, installing new leadership, or any other single effort, although all of these changes are needed. As the *Independent Assessment Report*

VA-18-0457-A-001166

COMMISSION ON CARE FINAL REPORT

emphasized, multiple systemic problems have contributed to VHA's access problems, and an integrated systems approach is essential to address the myriad issues affecting access to care and the service veterans receive.

The commission's report underscores the importance of transforming VA health care delivery and the systems that underlie it. In employing the term *transformation*, the commission means fundamental, dramatic change—change that requires new direction, new investment, and profound reengineering. Some will question that view, and perhaps challenge the notion that the nation should invest further in the VA health care system. None, however, should question the obligation owed those who sustained injury or illness in service, or who are at increased health risk as a result of deployments to combat zones or other service-related experiences.

In this report, the Commission acknowledges the deep problems the *Independent Assessment Report* described. Importantly, though, the commission recognizes the VA health care system has valuable strengths, including some unique and exceptional clinical programs and services tailored to the needs of the millions of veterans who turn to VA for care. For example, VHA's behavioral health programs, particularly with their integration of behavioral health and primary care, are largely unrivalled, and profoundly important to many who have suffered from the effects of battle and for whom VHA is a safety net.

Others may question how a system with the range of problems VHA faces can meaningfully improve, let alone realize a transformation. Mindful of its 20-year charge, the Commission notes that VA health care faced similar challenges 20 years ago and underwent a historic transformation. The long history of the VA health care system has seen highs and lows. Among the lessons in that history is that the mission—to care for those who have borne the battle—is not only powerful, but enduring. History has demonstrated that transformation can be achieved, but also that structures and strategies for sustainability must be built into the framework.

As the commission report emphasizes, transformation is difficult. It is a process that will require careful stewardship, sustainable leadership, and unwavering focus and commitment to the long-term vision and strategy. VHA has begun some of this work; our recommendations in some areas acknowledge VHA's efforts and suggest that where they are aligned with the Commission's recommendations, they should be sustained. The fruits of the transformation, though, will not be realized over the course of a single Congress or a single 4-year administration. For this reason, the Commission, strongly recommends a new form of governance and an extended term for the leader of the VHA Care System to sustain a continuing transformation. Even should VHA implement all the Commission recommends, it will not succeed in transforming on its own; it will require the full support from both the White House and Congress. Our nation's veterans deserve no less.

COMMISSION RECOMMENDATIONS

Redesigning the Veterans' Health Care Delivery System

The VHA Care System

Recommendation #1: Across the United States, with local input and knowledge, VHA should establish high-performing, integrated community-based health care networks, to be known as the VHA Care System, from which veterans will access high-quality health care services.

Problem

Due to changing veteran demographics, increasing demand for VHA care in some markets, and declining demand in other markets, more veterans being adjudicated as having service-connected conditions, aging facilities, provider shortages and vacancies, and other factors, VHA faces a misalignment of capacity and demand that threatens to become worse over time. Some facilities and services have low volumes of care that can create quality concerns, and in high demand areas, VHA often lacks the capacity to avoid lengthy wait times and other access issues.

With the passage of the Veterans Access, Choice, and Accountability Act of 2014 (VACAA), Congress tasked VHA with creating the temporary *Choice Program*. It was intended to alleviate access issues by allowing for greater use of community care for enrolled veterans who meet the law's wait-time or distance-to-a-VHA-facility requirements.

The Commission Recommends That . . .

- VHA Care System governing board (see Recommendation #9) develop a national delivery system strategy, including criteria and standards for creating the VHA Care System, comprising high-performing, integrated, community-based health care networks, including VHA providers and facilities, Department of Defense and other federally-funded providers and facilities, and VHA-credentialed community providers and facilities.
- Integrated, community-based health care networks be developed with *local* VHA leadership input and knowledge to ensure their composition is reflective of local needs and veterans' preferences.
- Integrated, community-based health care networks must include existing VHA special-emphasis resources (e.g., spinal cord injury (SCI), blind rehabilitation, mental health, prosthetics, etc.). In areas for which VHA has special expertise, VHA should also play the role of enhancing care in the local communities by collaborating with community care providers to implement services that may not exist, focused on the needs of veterans (e.g., expansion of integrated primary care/mental health care).
- Networks be built out in a well-planned, phased approach, overseen by the new governing board, which determines the criteria for the phases to ensure effective execution of the strategy.

Recommendations continue on next page. =>

COMMISSION ON CARE FINAL REPORT

Both the design and implementation of the law have proven to be flawed. VHA must instead establish high-performing, integrated, community-based health care networks, to be known as the VHA Care System.

Background

VHA has long had authority to purchase hospital care and medical services based on geographic inaccessibility or VHA's lack of a required service.²⁰ In 2013, VA moved beyond the use of individual purchased-care authorizations to regional contracting under the Patient-Centered Community Care (PC3) Program.²¹ In all cases, purchased care was a secondary means of providing care, to be used "when VA health care facilities are not feasibly available."²² Even before the creation of the *Choice Program* in 2014, some 10 percent of VHA medical spending went for purchased-care services.

When Congress enabled what became known as the *Choice Program*, it tasked VHA with implementing a fundamentally new mechanism for purchasing care. Unlike traditional purchased-care authority (which still exists), the *Choice Program* promises veterans who meet specific geographic or wait-time-related criteria that they can elect to receive treatment from within a network of a community providers.²³

Under the current *Choice Program*, however, most VHA patients are promised little or no actual choice of providers outside VHA. To be eligible for the program, VHA patients must meet the following criteria:²⁴

The Commission Recommends That . . .

<= Recommendations continued from previous page.

- VHA credential community providers. To qualify for participation in community networks, providers must be fully credentialed with appropriate education, training, and experience, provide veteran access that meets VHA standards, demonstrate high-quality clinical and utilization outcomes, demonstrate military cultural competency, and have capability for interoperable data exchange.
- Providers in the networks be paid using the most contemporary payment approaches available to incentivize quality and appropriate utilization of health care services (i.e., using Medicare Access and CHIP Reauthorization Act of 2015 [MACRA] physician payment methodology being proposed by CMS).
- The highest priority access to the VHA Care System be provided to service-connected veterans, and low-income veterans also be of high priority.
- The current time and distance criteria for community care access (30 days and 40 miles) be eliminated.
- Veterans choose a primary care provider from all credentialed primary care providers in the VHA Care System.
- All primary care providers in the VHA Care System coordinate care for veterans.
- The VHA Care System provide overall health care coordination and navigation support for veterans.
- Veterans choose their specialty care providers from all credentialed specialty care providers in the VHA Care System with a referral from their primary care provider.

²² Non-VA Medical Care Program, VHA Directive 1601, (2013).

²³ Veterans Access, Choice, and Accountability Act of 2014, Pub. L. 113-146, 128 Stat. 1754, (2014).

²⁴ Veterans Access, Choice, and Accountability Act of 2014, Pub. L. 113-146, 128 Stat. 1754, (2014), as amended by Construction Authorization and Choice Improvement Act, Pub. L. No. 114-19, 129 Stat. 215, (2015). The Independent Assessment proposed that VA should "Develop and implement more sensitive standards of geographic access to care. VA should compare the 'one-size-fits-all' approach of driving distance to alternative standards that are more sensitive to differences between Veteran subgroups, clinical populations, geographic regions, and individual facilities. This

- Live more than 40 miles from the closest VHA facility with a full-time primary care provider
- Cannot be seen within 30 days of the date veterans' providers indicate they need to be seen.
- Cannot be seen within 30 days of veterans' preferred appointment date if providers have not provided a specific appointment date.

This standard is difficult to reconcile with other statutory priorities for VA care.²⁵ For example, under the *Choice Program*, a veteran with severe service-incurred health conditions may have no access to providers outside VHA, yet a veteran with no service-related disabilities does have such a choice.²⁶ Implementing the *Choice Program* has posed challenges, including difficulties arising from overlapping, but fundamentally different, care-purchasing authorities. Veterans, VHA staff, and community providers²⁷ have been confused because of conflicting requirements and processes in eligibility rules, referrals and authorizations, provider credentialing and network development, care coordination, and claims management.²⁸

Adding to the confusion is the fact that VHA, facing a 90-day deadline for implementing the program, outsourced the creation and management of its provider networks to two private contractors, thus blurring lines of responsibility and leaving both patients and providers confused about who exactly holds responsibility for what. In execution, the program has aggravated wait times and frustrated veterans, private-sector health care providers participating in networks, and VHA alike.²⁹

In October 2015, VA submitted a report to Congress that proposed legislation to harmonize the different purchased-care authorities into a single approach.³⁰ VA's report also set out a plan for establishing high-performing networks. The report acknowledged that "[n]o organization can excel at every capability," and that "[s]ervice delivery systems designed around core competencies . . . provide the highest potential value to their customers."³¹ As further articulated by Dr. David Shulkin, USH:

assessment highlighted the importance of time spent driving, mode of transportation, traffic, and availability of needed services as key considerations in assessing geographic access to care."

COMMISSION ON CARE FINAL REPORT

It's become apparent that the VA alone cannot meet all the health care needs of U.S. veterans. The VA's mission and scope are not comparable to those of other U.S. health systems. Few other systems enroll patients in areas where they have no facilities for delivering care. Fewer still provide comprehensive medical, behavioral, and social services to a defined population of patients, establishing lifelong relationships with them. These realities, combined with the wait-time crisis, have led the VA to reexamine its approach to care delivery . . . [A]ddressing veterans' needs requires a new model of care: rather than remaining primarily a direct care provider, the VA should become an integrated payer and provider. This new vision would compel the VA to strengthen its current components that are uniquely positioned to meet veterans' needs, while working with the private sector to address critical access issues.³²

Analysis

VHA needs systemic transformation, and merely clarifying and simplifying the rules for purchased care, as proposed in the *Independent Assessment Report*, is not sufficient to achieve that goal. VHA must replace the arbitrary eligibility requirements and unworkable clinical and administrative restrictions of current purchased programs with the new VHA Care System, available to all enrolled veterans.

The VHA Care System is defined as VHA employed providers and facilities; Department of Defense (DoD) and other federally-funded providers and facilities; and community-based, VHA-credentialed community providers and facilities, forming integrated networks to deliver high-quality and high-access care to enrolled veterans across the United States. VHA may establish the networks with the use of national contractors or with internal resources, but networks should be developed with local VHA leadership input and knowledge to ensure their composition is reflective of local needs and veterans' preferences.

This new delivery model must preserve critical VHA programs and competencies that are unique to VHA or that are of higher quality or greater scope than is available in the private sector, either locally or nationally³³ They include specialized behavioral health care programs, integrated behavioral health and primary care (in patient-aligned care teams), specialized rehabilitation services, spinal cord injury centers, and services for homeless veterans.³⁴ These and similar programs and services are core competencies and special capabilities that serve the needs of combat veterans, veterans with conditions incurred or aggravated in service, and veterans reliant on safety-net services and supports.³⁵ Because of its unique capabilities and competencies, VHA should play an important role in expanding and enhancing the care of veterans across the United States by collaborating with local network providers to improve the

³² David J. Shulkin, "Beyond the VA Crisis — Becoming a High-Performance Network," *New England Journal of Medicine*, 374, (2016): 1003-1005, accessed June 15, 2016, <http://doi.org/10.1056/NEJMp1600307>.

³⁴ Special capabilities like spinal cord injury care, which draw from specialty care available in the full-service hospitals in which they are currently provided, merit continued support and investment. Thus, in instances where VHA might no longer operate a full-service hospital that had once housed a spinal cord injury center, it would need to establish community partnerships to assure veterans would continue to receive the same high quality care.

availability and quality of care in areas especially needed by veterans, such as mental health and rehabilitation.

Management and Oversight

VHA Care System networks will be built out in a well-planned, phased approach overseen by the new governing board, which will determine the criteria and sequencing for the phases, to ensure effective execution of the strategy. The timing and phasing criteria may include veteran service needs, access issues, quality issues, facility issues, and IT capabilities.

The networks within the VHA Care System will require ongoing management and evaluation of their performance. This process will be the responsibility of VHA management and board, with board oversight of network performance.

The governing board will oversee the budget for the VHA Care System. Local leadership will provide input on funding, and the local networks will determine their funding needs and submit their respective requests to the chief of VHA Care System (CVCS), formerly the undersecretary of health for VHA. The governing board will recommend to Congress the budget required to implement the VHA Care System, with multiyear appropriations. The local network leaders will have the flexibility to manage their respective network budgets based upon local needs. A key element of the new system will be combining a national strategy and local flexibility for managing the budget to allow for effective decision making to ensure veterans' needs are met.

Provider Payment

Providers in the networks should be paid using the most contemporary payment approaches available to incentivize quality and appropriate utilization of health care services (i.e., using Medicare Access and CHIP Reauthorization Act of 2015 [MACRA] physician payment methodology being proposed by CMS). MACRA is intended to move the health care industry away from a fee-for-service model to value-based payments.³⁶ Such a system is expected to drive improved quality and lower costs.³⁷

Care Administration

From a strategic perspective, service-connected disabled veterans should receive the highest priority access to the VHA Care System. This principle should guide access to all types and points of care. Veterans with limited financial means should also have high priority. If needed, cost sharing (applicable only to those who are non-service-connected disabled and not financially needy) can provide a means for offering broader choice. The current time and distance criteria for community care access (30 days and 40 miles) should be eliminated. VISN geography should also be eliminated as a factor in determining where veterans can access care. Eligible veterans should be permitted to receive care at any facility and by any provider in the VHA Care System, whether in a veteran's home VISN or not.

Choice and Care Coordination

The topic of choice was the most contentious issue considered by the Commission. Some Commissioners advocated complete choice of providers for veterans, with no requirement for

³⁶ "The Medicare Access CHIP Reauthorization Act (MACRA)" National Partnership for Families and Women, accessed June 6, 2016, <http://www.nationalpartnership.org/issues/health/macra.html>.

³⁷ Ibid.

COMMISSION ON CARE FINAL REPORT

care coordination by primary care physicians. Others advocated for a tightly managed model with VHA controlling access to community providers, as is done today. After considering the costs of various design options, the importance of care coordination, and the need for greater veteran access to both primary care and specialty care services, the Commission agreed to the following design principles:

- VHA will establish and credential community networks with a focus on quality of providers, access to comprehensive services, and utilization of VHA resources.
- Veterans will have complete choice of primary care providers within the VHA Care System.
- All primary care providers in the VHA Care System (including VHA providers, DoD and other federally funded providers, and community providers) will coordinate veterans' care.
- Specialty care will require a referral from a primary care provider.
- VHA will assume overall responsibility for care coordination and navigation for all enrolled veterans.

Quality of care must be a core element of network design and consistently monitored with metrics that are routinely used by the private sector. Accordingly, VHA must adopt standards that both ensure networks are composed of high-quality providers and set appropriate expectations of those providers. Critically, all providers in the networks must have fully interoperable IT platforms to allow for complete data exchange. Providers must work together to maximize patients' well-being using evidence-based protocols of care.

Lack of coordination among providers is a major quality and patient-safety issue throughout the U.S. health care system. It is important for VHA to coordinate the care it provides because it serves an especially vulnerable population that has more chronic medical conditions, behavioral health conditions, and individuals of lower socioeconomic status than the general medical population.³⁸ Veterans who receive health care exclusively through VHA generally receive well-coordinated care, yet care is often highly fragmented among those combining VHA care with care secured through private health plans, Medicare, and TRICARE. This fragmentation often results in lower quality, threatens patient safety, and shifts cost among payers.³⁹

VHA Care System will operate as outlined in Table 2 below.

Table 2. VHA Care System Operations

Key Component	Expectations
Choice	<ul style="list-style-type: none"> ▪ Veterans can choose a primary care provider from all credentialed primary care providers in the VHA Care System. ▪ Veterans can receive their care at any VHA Care System location across the country with coordination by their primary care provider.
Care Coordination	<ul style="list-style-type: none"> ▪ All primary care providers in the VHA Care System must coordinate care for veterans. Specialty care is exclusively accessed through referrals from primary care providers. ▪ Veterans can choose their specialty care providers from all credentialed specialty care providers in the VHA Care System with a referral from their primary care provider. ▪ Although primary care is traditionally defined as internal medicine or family practice, VHA may designate other specialty providers as primary care coordinators based on veterans' specific health needs (e.g., endocrinologists for diabetic patients, neurologists for patients with Parkinson's disease, OB/GYN for female patients). ▪ VHA will have overall responsibility of ensuring care coordination for veterans, including complex care navigation.

Scope of Provider Networks

In setting up networks within the VHA Care System, VHA must make critical tradeoffs regarding their size and scope. For example, establishing broad networks would expand veterans' choice, yet would also consume far more financial resources (i.e., taxpayer dollars) due to increased utilization or cost shifting. Currently, money VHA spends on expanding choice is not available to spend on other programs and services vital to its mission.⁴⁰

Health plans commonly limit the size and scope of networks as a cost-management tool, offering insurance products with narrow networks (managed care plans) or more open networks (preferred provider plans). Well-managed, narrow networks can maximize clinical quality by requiring participating clinicians to adhere to evidence-based protocols of care.⁴¹ Achieving high quality and cost effectiveness may constrain consumer choice. A patient's preferred doctor, clinic, or hospital may not be part of that smaller network or the narrow network may not offer sufficient geographic access for some patients.⁴²

VHA must balance these competing considerations. In doing so, it faces a variety of options. In addition to the scope of networks, for example, is the question of whether and how VHA will play a role in steering patients to different providers within the networks. This is another area involving tradeoffs among competing values and considerations. Private-sector health plans

COMMISSION ON CARE FINAL REPORT

often require all specialty care to be preapproved through a referral from a primary care physician. Managed care plans may also use prospective and concurrent utilization review and care management for hospitalization. For prospective reviews, patients must receive approval from their health plan before being admitted to the hospital to ensure the admission is clinically appropriate. Plans may also use concurrent utilization or case management for inpatient care to ensure the care and tests ordered and the length of stay in the hospital are appropriate.⁴³

The Commission carefully weighed these issues in recommending an approach. The Commission considered the effect of cost using various configurations of VHA services and community delivered services (CDS). Options considered by the commission include the following:

- **Recommended Option:** This option provides an integrated network of VHA, DoD and other federally funded providers, and community providers, credentialed by VHA. It requires veterans to attain a referral from their primary care provider to access specialty care.
- **CDS Alternative 1:** The main difference between this option and the *Recommended Option* is primary care, inpatient medical and surgical care, and some standard specialty care would not be eligible for CDS networks and would be accessed within VHA unless the *Choice Program* distance exception applies.
- **CDS Alternative 2:** The division of care between VHA providers and CDS network providers would be the same as for *CDS Alternative 1*; however, veterans would only need to consult their primary care provider before seeking specialty care, rather than obtaining a referral.
- **CDS Alternative 3:** This option would combine the broad network in the *Recommended Option*, but would have no referral or consultation requirement; thus, it would be an extremely generous benefits package.
- **Premium Support:** Under this scenario, enrollees who are younger than 65 would choose a subsidized insurance premium with cost sharing. Access to VA services, including special services, would be eliminated.
- **Eligibility Expansion:** Under this scenario the VA health care system would expand to allow all veterans, regardless of priority group.
- **Other-Than-Honorable Discharges:** A policy change for which individuals with other-than-honorable (OTH) discharge is outlined in Recommendation #17. This option would allow temporary eligibility for VA health care to those with an OTH discharge until the adjudication process to determine long-term eligibility took place.

⁴³ Paul B. Ginsburg, "Achieving Health Care Cost Containment Through Provider Payment Reform that Engages Patients and Providers," *Health Affairs*, 32, no. 5, (2013): 929-934, accessed June 20, 2016, <http://doi.org/10.1377/hlthaff.2012.1007>. While these approaches can help keep costs down, patients, doctors and hospitals can experience the process as bureaucratic interference in clinical care. To implement utilization management, health plans usually include a strong clinical appeals process that both doctors and patients can access to question the decisions made by administrators.

Below is a more detailed summary of the Commission's *Recommended Option*. Additional information, including cost projections for all of the options above, can be found in Appendix A.

Cost Model for Commission Recommended Option

This option would expand community care. At least initially, all care currently provided by VA would continue to be available through VA. In addition, expanded community care, also called CDS, would be provided by an integrated network consisting of providers (medical practitioners including physicians, midlevel practitioners and therapists, and hospitals and clinics) vetted by VHA. The CDS network would include all primary and standard specialty care; it would not include special-emphasis care (care that is provided in a substantially different way than by VHA).⁴⁴ In 2014, 68 percent of care would have been eligible for CDS networks at current VHA prices. A referral from a primary care provider would be required to receive specialty care. This referral could come from a provider either at VHA or from the community network (i.e., from any provider in the VHA Care System). In this scenario, we assumed all other characteristics of the VHA Care System would remain the same as under current policy. We assume that the *Choice Program* ends and that those formerly in the *Choice Program* will take advantage of the community care offered in the CDS networks.

Both CDS networks and traditional Care in the Community (CITC) are priced at Medicare allowable rates by matching Medicare fee schedule data to VA Health Service Categories.⁴⁵ A few benefits that are not covered by Medicare, such as dental, are priced at historic CITC unit costs. Cost sharing for CDS networks is assumed to be the same as that for care in VA facilities. For care shifting into the CDS networks, we assume VA is able to adjust resources such that only the equipment and national overhead portions of unit costs remain in VA facilities. Note that unit costs do not include costs associated with the physical building or nonrecurring maintenance; those costs are not modeled.

We expect that allowing enrollees to get primary and standard specialty care in the community will increase reliance for care provided in the community because many veterans would have a choice among a larger number of providers and would be more likely to have the option to receive care at a more convenient location. We also expect enrollment to increase because some eligible veterans would be induced to enroll by the prospect of having VA pay for them to see a provider in the community. We assume that 60 percent of eligible care shifts from VA facilities to CDS networks. Currently reliance is 34 percent. Under this scenario, we model reliance levels of 40, 50, and 60 percent, which correspond to reliance rates increases of approximately 18, 47, and 76 percent, respectively. These reliance increases apply only to CDS care, not CDS-eligible care that is provided in VA facilities. Although the choice of providers is expanded and wait times are potentially reduced in VA, there continues to be a requirement for a referral to access specialty care, as there is in the current system. We modeled enrollment increases of 5, 15, and

⁴⁴ Special-emphasis care includes: prosthetics and orthotics, recreational therapy, rehabilitative care, pharmacy, home-based primary care, spinal cord injury and disorders, some categories of long-term services and supports, mental health, and homeless care. We count all mental health as special-emphasis because mental health categories cannot easily be differentiated by care that is VA special-emphasis and care that is not.

⁴⁵ Medicare Allowable rates were provided by Milliman at the request of VA. They were produced using repricing performed at the area-specific level for inpatient, outpatient, and professional care. For services that were not repriced within an HSC, Medicare amounts were estimated.

COMMISSION ON CARE FINAL REPORT

20 percent for the low, middle and high estimates, which assume integrated, narrow, and well-managed networks that are designed and managed with cost as one of the major considerations. We also modeled an enrollment increase of 50 percent, more consistent with a less-managed, relatively broad network for which cost is a less important consideration. Finally, we assume that newly entering veterans who receive treatment in CDS networks because of this policy have a 20 percent utilization increase for new demand in CDS networks. Much of this care was formerly subject to sizable cost sharing with private insurance or Medicare and now would be subject to little, if any, cost sharing associated with VA-financed care.

There are a number of caveats associated with our estimates. These caveats are important, and to the extent that these assumptions do not hold, the estimates will be inaccurate. The estimates do not include savings and costs of reducing or repurposing infrastructure, or effects on VA's teaching, research, and emergency preparedness missions. Medicare allowable rates are assumed adequate to provide all veterans with robust CDS networks in their local areas. For care priced at historic CITC rates, national average rates are assumed to represent future rates. Shifting care into CDS networks does not affect the unit cost of care that remains in VA facilities. Reductions in the volume of care within VA facilities, and potentially adverse effects on quality, are not addressed. Other than equipment and national overhead, the costs of care shifting out of VA facilities are phased out concurrently with other effects in the model. Finally, estimates do not include administrative costs associated with CDS networks; these costs could be substantial.

Figure 1 displays estimates for the *Recommended Option*. Estimates for well-managed, narrow networks range from \$65 billion to \$85 billion in 2019, with a middle estimate of \$76 billion. The middle estimate is moderately above the baseline projection of \$71 billion. Although reliance and enrollment increases push VA budgetary costs up, the switch from VA unit costs to the less costly Medicare allowable rates for CDS networks and CITC mitigate the increases. The estimate for the less-managed, broader network scenario is \$106 billion in 2019, illustrating that costs could increase markedly if governance of the network places less importance on cost or if VA were unsuccessful in tightly managing the network.

This model is described more fully in Appendix A, along with models for a range of other options, some of which are previously described in this section. Consult Appendix A for more details on the technical assumptions necessary to understand the results presented here. The assumptions and caveats detailed in Appendix A play a critical role in our estimates, and any deviation from these assumptions could substantially affect the estimates.

Figure 1. Projected Costs of Recommended Option

Mitigating Risks

Choice involves tradeoffs. Reducing drive times to see a doctor may lead to longer wait times, for example, if it induces substantially more veterans to seek more care.⁴⁶ VHA reliance on contracting could also have unintended consequences for already underserved communities. Providers in such communities who join the local VHA network may decide to limit the number of Medicare and Medicaid patients they accept into their practices. In other, highly concentrated health care markets, which are increasingly common throughout the United States, VHA may not be able to contract for care in the community except at higher prices.⁴⁷ Such circumstances underscore the importance of VHA retaining the option of building its own capacity.

Policymakers must also carefully weigh concerns that leaders of seven major veterans organizations expressed in a recent joint letter in which they warned “choice should never be the ultimate goal of a health care system designed to meet the unique needs of veterans.”⁴⁸ These organizations do not support providing unfettered choice, and the VSO leaders stated that “any health care reform proposal that elevates the principle of ‘choice’ above all other clinical considerations would have severe consequences for veterans who rely on VA, resulting

⁴⁶ RAND Corporation, *Independent Assessment of the Health Care Delivery Systems and Management Processes of the Department of Veterans Affairs, Assessment B (Health Care Capabilities)*, 284, accessed May 2, 2016, http://www.va.gov/opa/choiceact/documents/assessments/assessment_b_health_care_capabilities.pdf.

⁴⁸ Garry J. Augustine, Disabled American Veterans et al., letter sent to Commission on Care, April 29, 2016.

COMMISSION ON CARE FINAL REPORT

in less ‘choice’ rather than the intended desire for more health care options for many disabled veterans.”⁴⁹

The Commission has addressed this concern in several ways, including the following:

- recommendations to substantially improve VHA operations, thereby enhancing the attractiveness of using VHA providers and facilities by enrolled veterans
- VHA control of network design
- VHA Care System governing board oversight of network execution and phasing
- high standards for community provider participation, including credentialing, military competence, and quality and utilization performance
- VHA oversight of care coordination and navigation
- requirement of primary care referral for specialty care

The Commission recognizes that greater choice of provider can result in higher utilization of health care services, which increases costs. This risk can be mitigated by recommendations in this report that will produce cost savings. To incentivize cost mitigation, all cost savings associated with improved efficiency and operations should be reinvested into the VHA Care System. Examples of cost mitigation strategies include the following:

- recovering third-party payments owed to VHA more effectively
- maintaining VHA as a secondary payer when veterans have other health insurance and treatment is for non-service-connected care
- increasing cost-sharing or changes in eligibility and/or benefit design could also substantially contain the projected costs of increasing provider-choice
- reducing fixed costs of underutilized facilities and services
- managing the supply chain to produce cost savings
- improving facilities to increase provider productivity (e.g., increase in outpatient exam rooms)
- adopting information technology that improves the quality and efficiency of care

Effectively implementing and managing integrated networks will require extensive changes in the governance and leadership of VHA, as well as flexible and smart procurement policies and

⁴⁹ Ibid.

contracting authorities, as discussed elsewhere in this report. The highest priority for standing up networks should be locations where VHA quality of care is deficient or capacity is strained.⁵⁰

Where capacity constraints exist within networks, first priority for care should go to those veterans with greatest medical need, followed by service-connected disabled veterans and indigent veterans.⁵¹ VHA should develop processes and procedures for insuring that veterans have the knowledge and assistance they need to make informed health care decision and to navigate effectively through the expanding health care networks. By employing strategies proven by other managed care plans, VHA will find administrative means to guard against inappropriate treatment, wasteful spending, and fraud.

As many surgical and medical procedures that previously required inpatient hospital stays have routinely become outpatient procedures, there continues to be a substantial shift from inpatient to outpatient care.⁵² Consequently, to ensure improved access to care for veterans, the VHA Care System and long-term plans for facilities should focus on creating a robust ambulatory network and reshaping inpatient resources to match expected demand. Additionally, to inform veterans' and providers' decisions and create increased accountability for performance, all VHA and community network providers and facilities must provide transparent information on inpatient and outpatient quality, service, and access using the same performance metrics, including those used by Medicare.

Implementation

Legislative Changes

- Enact legislation amending 38 U.S. Code, Chapter 17 to consolidate existing purchased-care authorities and authorize the SECVA to furnish enrolled veterans needed hospital care and medical services through agreements with providers the SECVA deems meet quality standards the SECVA will establish. Veterans would be eligible for community care on the same basis as for VHA-furnished care, and current wait time and geographic distance criteria should no longer be applicable.

VA Administrative Changes

- Develop national policy to govern local establishment of networks, and in doing so, focus its design and long-term planning on creating a robust ambulatory capability and reshaping inpatient resources to match expected demand.
- Establish standards that community providers must meet to qualify for participation in community networks, to include becoming fully credentialed, meeting patient-access criteria, demonstrating high-quality clinical outcomes and appropriate use decisions, demonstrating military cultural competency, and having capability for interoperable data exchange.

⁵⁰ Information on what medical centers are deficient in their care is available, for example, from the VHA's own Strategic Analytics for Improvement and Learning (SAIL) data.

⁵¹ It would seem prudent to begin such phased development by piloting that effort, and limiting the scope of unfettered choice to service-connected veterans.

⁵² Mehul V. Raval et al., "The Importance of Assessing Both Inpatient and Outpatient Surgical Quality," *Annals of Surgery*, 253, 3, (2011): 611-618, accessed June 20, 2016, <http://www.ncbi.nlm.nih.gov/pubmed/21183845>.

COMMISSION ON CARE FINAL REPORT

- Establish systems to ensure that all primary care providers in the VHA Care System can effectively coordinate veterans' care.
- Provide veterans navigation services for complex care needs, including information needed by patients and their families for informed decision making about treatments and providers. Navigation services should assist veterans and their families with eligibility, cost-sharing, and other administrative issues.
- Establish policies and procedures to ensure that VHA provider as well as community providers within each network, provide transparent information (using the same metrics) on care-quality, service, and access.
- Eliminate the practice of cross-country referrals if quality care is available locally.
- Employ the most current payment approaches that incentivize quality and appropriate use of health care services.

Other Department and Agency Administrative Changes

- None required.

Clinical Operations

Recommendation #2: Enhance clinical operations through more effective use of providers and other health professionals, and improved data collection and management.

Problem

A shortage of providers and clinical managers, combined with inadequate support staff and policies that fail to optimize the talents and efficiency of all health professionals, detract from the effectiveness of VHA health care.

The problem starts with inadequate numbers of providers. Ninety-four percent of VHA sites with clinically meaningful access delays indicated that increasing the number of licensed independent practitioners was critical or very important to increasing access.⁵³

The Commission Recommends That . . .

- VHA increase the efficiency and effectiveness of providers and other health professionals and support staff by adopting policies to allow them to make full use of their skills.
- Congress relieve VHA of bed closure reporting requirements under the Millennium Act.
- VHA continue to hire clinical managers and move forward on initiatives to increase the supply of medical support assistants.

At the same time, ineffective use of providers and other health professionals contributes to suboptimal productivity. Highly trained clinical personnel are often unable to perform at the top of their license, meaning they spend much of their time performing tasks that should be done by support staff.⁵⁴ For example, doctors and nurses often escort patients; clean examination rooms; take vital signs; schedule; document care; and place the orders for consultations, prescriptions, or other necessary care that could be done more cost effectively by support staff. Twenty-three percent of VHA providers identified “not working to top of provider licensure” as a barrier in health care provision.⁵⁵

VHA is also currently failing to optimize use of advanced practice registered nurses (APRNs). APRNs are clinicians with advanced degrees who provide primary, acute, and specialty health care services.

Background

A large part of the VHA’s problem with inadequate clinical support staff derives from its difficulties in hiring, retaining, and training medical support assistants (MSAs). These individuals answer phones, schedule care, and verify health care eligibility, among other duties.

⁵³ RAND Corporation, *Independent Assessment of the Health Care Delivery Systems and Management Processes of the Department of Veterans Affairs, Assessment B (Health Care Capabilities)*, 95, accessed June 3, 2016, http://www.va.gov/opa/choiceact/documents/assessments/assessment_b_health_care_capabilities.pdf.

⁵⁴ Grant Thornton, *Independent Assessment of the Health Care Delivery Systems and Management Processes of the Department of Veterans Affairs, Assessment G (Staffing/Productivity/Time Allocation)*, ix, accessed June 3, 2016, http://www.va.gov/opa/choiceact/documents/assessments/Assessment_G_Staffing_Productivity.pdf.

⁵⁵ *Ibid.*, 95.

COMMISSION ON CARE FINAL REPORT

Congress has recently given VHA the flexibility to offer MSAs market-based pay rates.⁵⁶ VHA is changing cumbersome rules that have made hiring new MSAs exceptionally time-consuming.⁵⁷

VHA is working to resolve its problems with resource allocation in clinics. For example, the agency has committed to increasing use of clinical managers to help medical centers better match resources to patient demand. Widely used by other health care systems, clinic managers enhance operations by ensuring that telephone protocols, scheduling, and clinic workflow are operating at peak efficiency. They also ensure that staff members are assigned appropriate caseloads and are meeting productivity standards and wait time targets and that administrative staff has appropriate training in scheduling, coding, and/or documentation.

Many states have already taken the steps to ensure APRNs have full practice authority. VHA is working to do the same, which will allow a vast increase in the number of VHA clinicians available to treat patients independently.⁵⁸

To effectively manage clinician supply for the inpatient setting, administrators require accurate bed count data. Currently in VHA, data integrity of bed counts is compromised as a consequence of disclosure requirements of Congress. VHA is required by statute to complete a complicated reporting, approval, and notification process when it closes hospital beds.⁵⁹ To avoid the reporting requirements some VA medical centers count beds as unavailable indefinitely. This action can skew occupancy rates and thwart planning activities. VHA developed its guidance in part to satisfy the Millennium Act⁶⁰ and other requirements that essentially froze beds at FY 1998 levels.⁶¹

Analysis

VHA has taken a number of measures to address data integrity issues. VHA has started hiring clinical managers to assist in managing resources for effective performance. VHA has made efforts to address problems affecting supply and training of MSAs. Additionally, VHA has recently proposed a rule that would authorize full practice for APRNs working within the agency.⁶²

These measures by themselves, however, will not be sufficient to solve the current problems. VHA must ensure all facilities have enough support positions—both clerical and clinical—to

⁵⁶ Sloan D. Gibson, Deputy Secretary, Department of Veterans Affairs, presentation to Commission on Care, April 18, 2016.

⁵⁷ 38 U.S.C. § 7401(3)(A)(iii).

⁵⁸ Establishing Medication Prescribing Authority for Advanced Practice Nurses, VHA Directive 2008-049, (2008).

⁵⁹ Inpatient Bed Change Program and Procedures, VHA Handbook 1000.01, (2010).

⁶⁰ The Veterans Millennium Health Care and Benefits Act, Pub. L. No. 106-117, 113 Stat. 1545, Sec. 301. Title III of the Millennium Act prohibits the secretary from closing in any fiscal year more than 50 percent of the beds within a department medical center unless the secretary first submits to the veterans' committees a justification for such closure and waits to take action on a closure until 21 days after the submission of the report. It also requires the secretary to report annually to the veterans committees on bed closures during the preceding fiscal year.

⁶¹ Extended Care Services, 38 U.S.C. § 1710B(b) requires staffing for extended care to remain at FY 1998 levels.

⁶² "VA Proposes to Grant Full Practice Authority to Advanced Practice Registered Nurses," Department of Veterans Affairs, accessed June 3, 2016, <http://www.va.gov/opa/pressrel/pressrelease.cfm?id=2793>.

enable all clinicians to work at the top of their licenses and to avoid problems with turnover, unexpected staff absences, and surges in patient demand.⁶³

VHA must have authority to pay competitive rates for the personnel it needs. This goal would be accomplished in part by adopting Recommendation #15 of this report for creating a new personnel system under Title 38 for all VHA employees. Currently, for example, clinical managers and practitioners earn far more in the private sector.⁶⁴

As VHA develops improved clinic management tools such as the Health Operations Dashboard, these tools draw from clinical data, patient data, and other sources to allow managers to make decisions using real-time data.⁶⁵ To be effective tools, the data fed into them must be accurate. Relieving VHA from some of the reporting requirements of the Millennium Act will help accomplish effective use of the dashboard for inpatient management.

Implementation

Legislative Changes

- Create a new alternative personnel system under Title 38 authority as mentioned in Recommendation #15.
- Eliminate bed reporting requirements under the Millennium Bill, and require VHA to report new beds as closed, authorized, operating, staffed, or temporarily inactive within 90 days of enactment.

VA Administrative Changes

- Develop policy to allow full practice authority for APRNs.
- Develop leadership tracks, including clinical and group practice managers, for ambulatory settings.
- Develop training programs for medical support assistants (MSAs).
- Modify policy in VHA Handbook 1000.01, Inpatient Bed Change Program and Procedures, as appropriate.

Other Department and Agency Administrative Changes

- None required.

⁶³ McKinsey & Company, Inc., *Independent Assessment of the Health Care Delivery Systems and Management Processes of the Department of Veterans Affairs, Assessment E (Workflow—Scheduling)*, 17-18, accessed June 3 2016, http://www.va.gov/opa/choiceact/documents/assessments/Assessment_E_Workflow_Scheduling.pdf.

⁶⁴ For example, Salaries.com listed a median salary for Clinic Manager III (a manager of a clinic with more than 50 physicians) in Dallas, TX, as \$94,000.⁶⁴ The pay grade assigned for this position is GS-13, which pays about \$73,800 in the first step and increases up to \$96,000. Office of Personnel Management, *Schedule 1 General Schedule*, accessed March 31, 2016, <https://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/pay-executive-order-2016-adjustments-of-certain-rates-of-pay.pdf>.

⁶⁵ Sloan D. Gibson, Deputy Secretary for Veterans Affairs, presentation to Commission on Care, April 18, 2016.

COMMISSION ON CARE FINAL REPORT

Recommendation #3: Develop a process for appealing clinical decisions that provides veterans protections at least comparable to those afforded patients under other federally-supported programs.

Problem

All federal providers and most health insurers have processes to ensure that beneficiaries have enforceable protections that allow them to obtain medically necessary care within their health benefits package.⁶⁶ Such processes are imperative, particularly for care plans using capitated payment models for which there are incentives to conserve resources. Most veterans, and even their advocates, are unsure of VHA's process for resolving clinical disputes. This may be because there is not one policy in place for VHA, but 18 (one for each Veteran Integrated Service Network [VISN]).⁶⁷

The Commission Recommends That . . .

- VHA convene an interdisciplinary panel to assist in developing a national revised clinical-appeals process.

As part of the MyVA initiative, the SECVA has set a goal of world-class service for veterans, including a proactive patient advocacy team that is integrated into patient-centered care and cultural transformation plans.⁶⁸ The processes in place for patient grievances and central protections to ensure access to medically necessary care remain poorly understood despite these efforts. Also, they may be less comprehensive and fair than appeals processes private health insurers and other federal payers are required to provide.⁶⁹

Background

VHA policy has long required medical centers to operate a patient advocate program to address patient complaints.⁷⁰ In 1996, Congress enacted an eligibility reform statute that, for the first time, gave enrolled veterans access to a uniform benefits package.⁷¹ In implementing that law, VHA conducted a systemwide review of how clinical disputes were handled and consequently instituted an external appeal system in FY 2000. The policy, as outlined in a subsequent directive, allowed VISNs to request external professional boards to conduct impartial reviews of clinical determinations.⁷² That directive also addressed a process for internal clinical appeals. It stated as policy that patients or their representatives who have disputes regarding clinical determinations or services pertaining to provision or denial of care that are not resolved at the facility level must have access to a fair and impartial review of those disputes that could result in a different and/or improved clinical outcome. That policy requires VISN directors to have written policy and procedures in place for how internal appeals are to be handled. Under this policy, VISNs still have authority to request an external review at any time during the clinical

⁶⁸ "About the VHA Patient Advocate and Veteran Experience Program (VHA PA & VEP)," accessed from VA Intranet, May 31, 2016, <http://vaww.infoshare.va.gov/sites/OPCC/VEP/SitePages/vep-about.aspx>.

⁶⁹ MaryBeth Musumeci, *A Guide to the Medicaid Appeals Process*, accessed June 3, 2016, <https://kaiserfamilyfoundation.files.wordpress.com/2013/01/8287.pdf>. VHA Clinical Appeals, VHA Directive 2006-057 (2006).

⁷⁰ VHA Clinical Appeals, VHA Directive 2006-057 (2006).

⁷¹ Veterans' Health Care Eligibility Reform Act of 1996, Pub. L. No. 104-262, 110 Stat. 3177 (1996).

⁷² VHA Clinical Appeals, VHA Directive 2006-057 (2006).

appeals process.⁷³ Although the directive itself expired in 2011, it continues to serve as guidance because it has not been renewed or replaced.

VHA policy directs that all facilities have a patient advocate office to manage and attempt to resolve complaints. That office, which can serve as the liaison between patients and clinicians, is generally the first stop for veterans who are dissatisfied with a clinical decision.⁷⁴ If a clinical issue is not resolved at the point of the service, it generally goes to the facility director, who is to provide veterans written notification of the facility's decision and inform veterans about the VISN's appeals process. Under the same policy directive, veterans may appeal the facility decision to the VISN director. That official, or a clinical review panel that he or she establishes, is to render a decision within 30 days (or 45 days if the director requests an external clinical review).⁷⁵ Should the VISN director agree with the facility, he or she must notify the veteran that the decision is final or may refer the matter to a VACO office to arrange for an external review.⁷⁶

The VHA process does not appear fully comparable to procedures required under other federal and federally-supported health care programs. For example, under the Affordable Care Act, health care plans are required to provide external reviews to beneficiaries whose internal appeals have been denied.⁷⁷ Unlike those and other appeals processes, veterans have no right to external review; such review is at the discretion of the VISN director. Medicare has an extensive review process for clinical disputes between its managed care organizations and beneficiaries. Beneficiaries have the right to an internal appeal with an option for an expedited review, an internal reconsideration of the initial review, an independent review, a hearing with an administrative law judge, a review by the Medicare Appeals Council and, finally, a federal district court review.⁷⁸ Medicaid has requirements for localities to review appeals from its beneficiaries and for states to offer timely access to fair hearings to determine whether managed care organizations have denied or terminated medically necessary care.⁷⁹ Although VHA's timeframe for decision making seems reasonable, the national policy makes no provision for an expedited review, unlike Medicare managed care organizations and plans providing health benefits to federal employees. VHA's policy is also silent on meeting with veterans to hear their cases much less hold hearings during any point of the appeal. Unlike Medicaid, VHA also lacks any provision for service-continuity while the matter is being appealed. The Commission recommends that VHA develop a revised clinical-appeals process that provides veterans protections at least comparable to those afforded patients under other federal and federally-supported programs, including, at a minimum, a right to an external review at the veteran's discretion.

COMMISSION ON CARE FINAL REPORT

Implementation***Legislative Changes***

- None required.

VA Administrative Changes

- Convene an interdisciplinary panel to assist in developing a revised clinical-appeals process and policy that includes all care provided within the VHA Care System, to include representation from Patient Care Services, MyVA's Patient Advocates and Veterans Experience Program, the Office of Equity, the National Center for Ethics in Health Care, and the Office of Access and Clinical Administration. VHA should have that panel examine and offer recommendations regarding the following:
 - Each level of review in the clinical-appeals process – from the facility's initial reconsideration to a final decision by the VISN director to assess the fairness and impartiality in those processes compared to Medicare Managed Care and Medicaid appeals processes and private-sector managed care providers' best practices.
 - Whether VHA should establish a uniform national clinical appeals process.
 - The advisability of requiring review panels consisting of individuals such as attorneys, clinicians, case managers, patient advocates, and administrators to review clinical appeals.
 - Whether hearings or judicial reviews are appropriate at any level of the appeals process.
 - Whether resolutions of clinical appeals are equitable for all types of veterans (service-connected or non-service-connected, by racial or ethnic group, by age, or gender).
 - Options for increasing veterans' awareness of the clinical-appeals process.
- Publish the new clinical appeals policy and process for comment and input by veterans, VHA business partners, and other stakeholders.
- Once the new policy is finalized, VHA must train staff on the new process.

Other Department and Agency Administrative Changes

- None required.

Recommendation #4: Adopt a continuous improvement methodology to support VHA transformation, and consolidate best practices and continuous improvement efforts under the Veterans Engineering Resource Center.

Problem

VHA has not effectively empowered its staff to identify problems and make changes to improve the overall quality of care.

Best practices exist in pockets of VHA; however, communication and support for implementation appear to be challenges. Various facilities indicate best practices are in place but seem isolated rather than widely adopted. Facilities often struggle to implement best practices, and information sharing is limited and ad hoc.⁸⁰

VHA has a program of systems engineering — the Veterans Engineering Resource Center (VERC) — that can assist with transformation efforts, but it is not well known throughout VHA and until recently has been underutilized.

The Commission Recommends That . . .

- The Veterans Engineering Resource Center (VERC) be tasked to assist in transformation efforts, particularly in areas such as access and in areas that affect systemwide activities and require substantial change, such as human resources management, contracting, purchasing, and information technology.
- The many idea and innovation portals within VHA be consolidated under VERC.
- A culture to inspire and support continuous improvement of workflow processes be developed and fully funded.
- VHA's reengineering centers be enabled to proactively identify problem areas within the system and offer assistance.

Background

To become a truly veteran-centric care provider, VHA is working to become a learning organization.⁸¹ Learning organizations focus on worker competency rather than on rules compliance. Instead of using results to identify high- and low-performers, VHA will use this information to identify opportunities to intervene with training or other resources to improve employees' performance universally. Employees and patients should benefit from this approach because it values listening and encourages risk taking and innovation.

VA and VHA have adopted the tenets of LEAN Six Sigma as a systemic change approach to move the system forward. This methodology employs a rigorous define, measure, analyze, improve, and control approach to systemic change. LEAN, initially used by manufacturers, has been used successfully by many health care organizations.⁸² The goal of implementing LEAN practices is to eliminate waste, ensuring that any work done adds value. The MyVA plan calls for MyVA districts and the Office of Policy and Planning to ensure the transmission of best practices and the adopting of LEAN throughout the enterprise to provide a more comprehensive view of quality that balances a results-oriented approach with more process-

⁸⁰ The MITRE Corporation, *Independent Assessment of the Health Care Delivery Systems and Management Processes of the Department of Veterans Affairs, Assessment F (Workflow—Clinical)*, 14 and A-2 accessed January 1, 2016, http://www.va.gov/opa/choiceact/documents/assessments/Assessment_F_Workflow_Clinical.pdf.

⁸¹ Sloan D. Gibson, Deputy Secretary for Veterans Affairs, Department of Veterans Affairs, Building on Excellence, 67, presentation to Commission on Care, April 18, 2016.

⁸² MyVA Integrated Plan, Department of Veterans Affairs, July 30, 2015, 12, accessed June 30, 2016, http://www.va.gov/opa/myva/docs/myva_integrated_plan.pdf

COMMISSION ON CARE FINAL REPORT

oriented practice.⁸³ So far these efforts have been guided by trial and error, rather than directives and adopting a LEAN, process-driven model.⁸⁴ VHA must sustain its commitment to LEAN Six Sigma as a continuous improvement methodology.

VHA will have to use VERC staff and other trained staff members to ensure that principles of LEAN Six Sigma are applied at every level of the system. VERC has the mission to propose, develop, and facilitate innovative solutions to challenges within VHA health care delivery through the integration of systems engineering principles.

With VERC's reach already extending into access to care, health policy, population health, LEAN management, business systems, clinical systems, safety systems, and innovation, all other programs and initiatives become redundant or ancillary. VHA must assess its new system for best practice diffusion to ensure that selected practices are being appropriately scaled. This goal can best be achieved by collapsing all related efforts into VERC.

There are a number of emerging best practices within the health care sector that apply to all aspects of VHA – health care capabilities, staffing, access, supplies, and facilities – and involve the testing, dissemination, and application of procedures or systems that have been shown to improve approaches, processes, or systems.⁸⁵ VHA needs to have the opportunity to fully leverage and build on institutional strengths by implementing best practices.

VHA has recently developed the Diffusion of Excellence Initiative, which is designed to serve as the mechanism for improving practice through a combination of targeted national guidance and nationally-supported local best practice sharing and innovation.⁸⁶ Its organizational structure includes a governance board chaired by the USH, a Diffusion Council, and action teams responsible for implementing promising practices.

VHA also has many business lines charged with disseminating best practices information, including VERC, Systems Redesign SharePoint – Center for Improvement Education, VA Center for Innovation, MyVA – Best Practices in LEAN, MyVA Blog, MyVA Performance Improvement Hub, Knowledge Management System–Improvement in Action (I-ACT), VA Idea House, VA Pulse: Promising Practices Consortium, Evidence-based Synthesis Program (ESP), Quality Enhancement Research Initiative (QUERI), the Annual Conference on the Science of Dissemination and Implementation, and the Diffusion of Excellence Initiative.

Analysis

LEAN Six Sigma offers VHA a methodology to effect change and VERC offers VHA the agents to lead its implementation. VHA must consolidate its transformational tools, including its best

⁸³ MyVA Integrated Plan, Department of Veterans Affairs, July 30, 2015, 21, accessed June 30, 2016, http://www.va.gov/opa/myva/docs/myva_integrated_plan.pdf

⁸⁵ Institute of Medicine of the National Academies, *Transforming Health Care Scheduling and Access: Getting to Now*, 41, accessed January 1, 2016, http://www.va.gov/opa/choiceact/documents/assessments/Assessment_D_Access_Standards.pdf.

⁸⁶ Sloan D. Gibson, Deputy Secretary for Veterans Affairs, Department of Veterans Affairs, Building on Excellence, 67, presentation to Commission on Care, April 18, 2016.

practice repositories within VERC. The VERC uses a systemic change process to streamline workflow and procedures by eliminating waste and redundancy to ensure that every step in the process adds value. The VERC offers services to VHA health care facilities upon request, but VHA would substantially benefit if the service was authorized to perform outreach to ensure awareness across the VHA Care System.⁸⁷

Until developing the Diffusion of Excellence Initiative, VHA lacked a uniform way to scale and optimize best practices throughout the enterprise. Although the Diffusion Initiative is initially targeting best practices from within VHA, to be successful, a long-term plan should also allow for the adoption of best practices from the private sector and other government sectors (e.g., the Medicare program related to pricing, contracting, privatization, value-based purchasing, management, and oversight). Plans should also allow for adaptation at the local and regional levels to reflect respective differences in provider supply, veteran needs, and marketplace characteristics.⁸⁸

VHA has multiple offices and sites invested in system reengineering, continuous process improvement, and best practices implementation. Repositories of best practices do not get information to the intended person or group that could benefit from the information and are dependent upon VHA employees knowing they exist.⁸⁹

VHA's National Leadership Council has proposed consolidating these best practice repositories under the VERC, which now serves within the Office of Organizational Excellence. Until recently, VERC has been underutilized because it is not known throughout the enterprise.⁹⁰

QUERI is a system that identifies evidence-based care practices that may be scaled for systemwide implementation. QUERI was integrally involved in the transformation of VHA from a largely hospital-based system to one centered on primary care⁹¹ and is now integral to the collaborative endeavor to transform VHA into a learning organization. QUERI recently released a policy brief that indicated veterans' reliance on VHA was strongly correlated to economic factors such as unemployment rates and availability of other health care coverage.⁹²

VA should use a systematic, continuous performance improvement process to improve access to care. Although many VA facilities achieve very high-performance ratings on key access and quality measures, a systematic effort is needed to improve performance. These efforts need to

COMMISSION ON CARE FINAL REPORT

be embedded into routine use across the VA system. The best solutions should be adjusted to reflect local needs and designed to respond to veterans' preferences, needs, and values.⁹³

A systems approach to health care is “one that applies scientific insights to understand the elements that influence health outcomes, models the relationships between those elements, and alters design, processes, or policies based on the resultant knowledge in order to produce better health at lower cost”⁹⁴ and would benefit VA greatly, especially with resources like VERC to serve as a guide.

Emerging best practices have improved health care access and scheduling in various locations and serve as promising bases for research, validation, and implementation.⁹⁵ A variety of quality improvement organizations are involved in establishing and maintaining standards in health care as well as developing measures for the monitoring and assessment of these standards, including The Centers for Medicare & Medicaid Services, the Joint Commission, the National Committee for Quality Assurance, and the National Quality Forum.⁹⁶

The tools of operations management, industrial engineering, and systems approaches are successful in increasing process gains and efficiencies. In particular, a wide range of industries have employed systems-based engineering approaches to address scheduling issues, among other logistical challenges.⁹⁷

Implementation

Legislative Changes

- None required.

VA Administrative Changes

- Consolidate all best practices and continuous improvement portals under VERC to provide a more accessible and comprehensive approach to best practice sharing and adoption.

Other Department and Agency Administrative Changes

- None required.

Health Care Equity

Recommendation #5: Eliminate health care disparities among veterans treated in the VHA Care System by committing adequate personnel and monetary resources to address the causes of the problem and ensuring the VHA Health Equity Action Plan is fully implemented.

Problem

The Office of Health Equity (OHE), tasked with eliminating health disparities by building cultural and military competence within VHA, has not been given the resources or level of authority needed to be successful. Until VHA leadership establishes the elimination of health care disparities as a critical strategic priority and commits the resources required to address this problem, health care disparities will continue to persist among veteran patients.

The Commission Recommends That . . .

- VHA work to eliminate health disparities by establishing health care equity as a strategic priority.
- VHA provide the Office of Health Equity adequate resources and level of authority to successfully build cultural and military competence among all VHA Care System providers and employees.
- VHA ensure that the Health Equity Action Plan is fully implemented with adequate staffing, resources, and support.
- VHA increase the availability, quality, and use of race, ethnicity, and language data to improve the health of minority veterans and other vulnerable veteran populations with strong surveillance systems that monitor trends in health status, patient satisfaction, and quality measures.⁹⁸

A systematic review of VHA in 2015 identified the existence of racial and ethnic health inequalities. Health care disparities exist among veterans and especially among minority and vulnerable veterans.⁹⁹ VHA cannot transform veterans' health care to enhance quality, access, choice, and well-being unless these health care disparities are addressed and eliminated. VHA has a plan for addressing these issues—the Health Equity Action Plan (HEAP)—but it has not been fully implemented.

Background

It is time to refocus, reinforce, and repeat the message that health disparities exist and that health equity benefits everyone.¹⁰⁰

Across the nation, health care systems are raising awareness about health care equity, inequality, and disparities.¹⁰¹ The growing incidence of health care disparities and inequities is said to be ascribed to individual and collective cultural indifference on the part of health care

COMMISSION ON CARE FINAL REPORT

providers and the health care system as a whole.¹⁰² A health disparity is a particular type of health difference that is closely linked with social or economic disadvantage. Health disparities adversely affect groups of people who have systematically experienced greater social and/or economic obstacles to health based on racial or ethnic group, gender, age, sexual orientation, military era, geographic location, religion, socioeconomic status, mental health, cognitive/sensory/physical disability, and other characteristics historically linked to discrimination or exclusion.¹⁰³

The United States is becoming increasingly diverse, with racial and ethnic minorities making up more than 36 percent of the population.¹⁰⁴ Indicators of overall health, such as life expectancy and infant mortality, have improved for most Americans; however, some minorities still face comparatively greater likelihood of preventable disease, death, and disability.¹⁰⁵

Although the country's veteran population is projected to decline from 22 million to 14.5 million by 2040, the percentage of minority veterans will increase from 20 percent to 34 percent during the same period.¹⁰⁶ Currently, African Americans make up 11 percent of the veteran population, and Hispanics, 6 percent.¹⁰⁷

Survey data show that minority veterans use VA health care more than White veterans, as shown below:¹⁰⁸

- African American: 38 percent
- Hispanic: 34 percent
- American Indian/ Alaska Native: 38 percent
- White: 32 percent

Survey data on racial and ethnic minority veterans' use of VHA health care offer revealing insights on current equity issues:¹⁰⁹

- Fifty-seven percent of African Americans indicated they are more likely to use VA as their primary source of health care as compared to 45 percent of Whites.¹¹⁰
- The percentage of African Americans who reported they use VA for all or most of their care needs is 18 percent higher than the percentage of Whites who do so.¹¹¹
- A higher percentage of Whites assessed their health to be good or excellent than did African Americans.¹¹²

Analysis

VHA Office of Health Equity

VA created the OHE in 2012 to identify health care inequities, understand the cause of them, and bring to clinical practice interventions intended to reduce disparity drivers within VA. OHE partners with other VA offices, federal government offices, and nongovernment institutions with missions aimed at promoting health equity.¹¹³ OHE has substantial stakeholder involvement from minority veterans groups, including the Advisory Committee on Minority Veterans (ACMV), rural veterans groups, women veterans, and the Office of Diversity and Inclusion (ODI).¹¹⁴ A staunch internal partner and stakeholder of OHE, ODI's mission is to foster a diverse workforce and an inclusive work environment. The OHE and ODI missions intersect with ODI's special emphasis programs, intended to engage affinity groups and agencies to raise the awareness of the importance of diversity and demonstrate VA's commitment to a diversity model.¹¹⁵

OHE's foundational work included updated systematic reviews and data analyses that not only revalidated VA's previous findings on health care inequities, but also identified more areas of health care disparity among veterans. For instance, hepatitis C virus (HCV) was noted to have disparate effect on racial/ethnic minority veterans and Vietnam-era veterans. Additionally, OHE convened stakeholders and worked with the Health Equity Coalition to develop the VHA Health Equity Action Plan (HEAP), which aligns with the VHA Strategic Plan Objective 1e: Quality & Equity, which states, "Veterans will receive timely, high quality, personalized, safe effective and equitable health care irrespective of geography, gender, race, age, culture or sexual

COMMISSION ON CARE FINAL REPORT

orientation.”¹¹⁶ HEAP aims to address five strategic areas: awareness, leadership, health system and life experience, cultural and linguistic competency, and data that are vital for effectively implementing its mission. HEAP implementation strategies are conceptually modeled after the goals and strategies of the National Partnership for Action to End Health Disparities’ National Stakeholder Strategy for Achieving Health Equity sponsored by the U.S. Department of Health and Human Services.¹¹⁷

Despite OHE’s best efforts, HEAP was not fully implemented because VHA leadership failed to establish it as a strategic priority with adequate staffing, resources, and support, and the departure of the then USH, a champion for health equity. These factors led to the reduction of OHE staffing from 8 to 2 FTEs in FY 2013 and a realignment of OHE to several layers down in the organization. As a result of an FY 2015 budget reduction, OHE continues to operate with a two-person staff.¹¹⁸ The reduced staffing level is inadequate to meet the requirements and mission of the office.

OHE has a broad and challenging mission, particularly given the number of minority veterans who rely on VA health care, the health risks in those populations, and the health care disparities those populations experience.¹¹⁹ OHE faces serious challenges in its efforts to carry out its action plan and to realize its broad and critical mission, challenges intensified by its limited staffing and the downgrade of this office within VHA’s organization structure. These include the following:¹²⁰

- lack of quality data on vulnerable populations and disparate health outcomes
- health equity projects that have been delayed or halted due to staff and resource limitations
- lack of data on the overall impact of existing health equity initiatives at facilities
- lack of common definitions on vulnerable populations and health equity concepts

Notwithstanding its limited staffing, OHE has compiled a substantial record of accomplishments. Among its initiatives, OHE embarked in 2015 on a strategy of working collaboratively with the Quality Enhancement Research Initiative (QUERI) to advance health equity. The two collaborative efforts focus on using a population health approach to examine the distribution of diagnosed health conditions, mortality, and health care quality across the VA health care system. A fully staffed OHE would have the capability of creating additional
